WANTED—Greenhouse foreman, for a commercial place of about 12,000 feet of glass. Man must be a good grower of general stock for retail trade. Wages \$70.00 and house to the right party. Address X, care of HORTICULTURE.

WANTED a young man as assistant in greenhouses on a private place, suburb of New York City. Wages, \$45.00; good board and room. Give full information and references, etc. Address "A. R.," care HORTICULTURE.

WANTED—Good all-round man for commercial greenhouse work. Good wages to right man. JOHN MCKENZIE, North Cambridge, Mass.

SITUATIONS WANTED

GARDENER wants position on gentleman's place. Able to take charge. Single, age 29 years. First class grower of vegetables and flowers outside and under glass; also experienced in palms, planting and care of shrubs, shrubbery; fruit trees, flower beds, lawn, roads, etc. First class references. Please state salary. Address "X," care HORTICULTURE.

SITUATION WANTED—As superintendent or head gardener by Englishman, 34; married, one child. Abstainer and non-smoker. Twenty years' extensive experience; five years in this country; over four years in present place. At liberty April 1st. Well recommended. Address S. W. S., care HORTICULTURE.

SITUATION WANTED—By a young man thoroughly experienced in all departments of gardening. Single, age 26. Strictly sober. Would prefer place under glass. Excellent references. State salary. Anyone desiring a capable man apply to J. Pearson, Ansonia, Penn.

SITUATION WANTED—Private gardener's position in Massachusetts preferred. Married, one child. Strictly temperate. Experienced in all-around greenhouse work. Best reference. M. care HORTICULTURE.

SITUATION WANTED—By first class plant grower, to take charge of place. 25 years' experience, 15 years in last place; best of reference; married; 40 years of age. Address "D," care HORTICULTURE.

POSITION WANTED—In commercial establishment, east preferred. Experienced in cut-flower growing, carnations especially. Can furnish first-class Boston references. H. C., care HORTICULTURE.

SITUATION WANTED—By young man, 24 years of age, would like to get work at gardening. Gentleman's place preferred. P. NEYLON, Stonington, Conn.

"You can no more conduct business without advertising than you can farming without fertilizing."—Uncle Peleg.

CATALOGUES RECEIVED.

V. Lemoine & Fils, Nancy, France.
—Illustrated Novelty List.

Atlantic Nursery Co., Inc., Berlin, Md.—Trade Price List of Nursery-Grown Stock.

Geo. R. Pedrick & Son, Pedricktown, N. J.—Monthly Trade Price List of Vegetable Seeds.

Clinton Falls Nursery Co., Owatonna, Minn.—Circular of "Slaughter Prices" on Fruit, Ornamental and Forest Trees.

Richland Nurseries, Rochester, N. Y.—Illustrated Price List of Fruit and Ornamental Trees, Shrubs and Plants. Cover attractively adorned in colors.

Ross Bros. Co., Worcester, Mass.—Annual Catalogue for 1913. A piece of good work throughout. Very complete in its lists of seeds and implements. Covers in glowing colors. Lawn grass department shows up well.

Vaughan's Seed Store, New York.—General Catalogue of Seeds, Bulbs, Plants, etc., for 1913. Front cover page bears a group of China asters and the back page a vase of gladiolus Mrs. Francis King, both in excellent color effect.

Stumpp & Walter Co., New York City.—Seed Catalogue, Spring, 1913. This is a mighty handsome catalogue, especially in its exterior, bound in white with color reproductions of Shirley Poppies on front and Giant Petunias on back cover pages. These color pictures are exceedingly well done. The contents of the book are on a par with the average publications of the leading houses.

James Carter & Co., Raynes Park, London, England.—"Garden and Lawn, 1913." We have on various occasions commented admiringly on the beauty of the half-tone illustrations and excellent typographical work characterizing some of the leading English catalogues. The one now before us is one of that sort. It is a book of nearly 300 pages and nothing less than a splendid floral picture gallery. There are three full-page pictures in colors.

PATENTS GRANTED.

USED FROM OCEAN TO OCEAN FOR 29 YEARS.

Sold by Seed Dealers of America.

Saves Currants, Potatoes, Cabbage, Melons, Flowers, Trees and Shrubs from Insects. Put up in popular packages at popular prices. Write for free pamphlet on Bugs and Blights, etc., to B. HAMMOND, Fishkill-on-Hudson, New York.

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

The Recognized Standard Insecticide.

Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.

\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water. It does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

FOR SALE BY SEEDSMEN.

CURVED IRON EAVE STYLE "S."

This Eave is intended for use on detached houses with either fixed glass or side sash.

It is practically all exposed to the inside heat of the greenhouse and so is ice clearing.

KING

GREENHOUSE EAVES

THEY SOLVE THE EAVE PROBLEM
THEY MAKE THE LEAST POSSIBLE SHADE

and as you can see

present no surface for icicles to form on. They have great strength with lightness. They are designed and made for the purpose and not adapted from stock structural shapes.

WE WANT TO FIGURE WITH YOU.

CURVED IRON EAVE STYLE "L."

This Eave although lighter than Style "S" is amply strong for all Eave purposes.

It obstructs little light and is ice clearing in the most severe weather. It is intended for use with fixed glass only.

The Question of Wide Houses

THERE are certain proven out reasons why wide houses of reasonable widths—say 40 to 60 feet—are more economical to build, easier to heat, give better ventilation and grow better plants. But wide houses must be built right, not only strong, but right.

We know how to build right. Have been doing it for over a quarter of a century. We want to talk with you about that house you intend building. We will do it either by letter or by coming to see you. Write us and get things started.

Something Simple

Some folks have a notion that if a thing is simple or plain, it can't be attractive. It's a mistake! U-Bar Greenhouses of the plainest, simplest sort are

nevertheless attractive, because the construction is so light and graceful. You can't say the same of other constructions. You will promptly admit.

But no other construction is like the U-Bar—so no other house can even look like it; let alone be like it. The U-Bar costs a bit more, but it's worth a good bit more than it costs. Send for catalog.

ORDER AT ONCE AND RESERVE QUALITY STOCK

Craig Easter Specialties

Are known all over the country and are in greater demand each year. Having increased our glass area over 100,000 square feet, we are in a position to meet our fast increasing business. The fact that Easter falls this year on March 23d will make absolutely no difference to us as to finishing our stock. Our entirely new plant at Norwood, Pa., has been of great assistance to us.

Our stock for the Easter season is superior in quality to any we have ever grown, notwithstanding the high standard we have maintained for years. We are now the largest growers of Easter stock in America, and any buyer seeking quality will be repaid by inspecting our immense stock at our Philadelphia and Norwood plants.

To give our customers an idea of just what we intend offering, we enumerate the following: 25,000 Lilies, 8,000 Spirea, 8,000 New French and Otaksa Hydrangeas, 3,000 Daisies, 12,000 Roses, 7,000 Genistas, 2,000 Rhododendrons, 3,000 Azaleas, Dracaenas in variety, Lily of the Valley, Gardenias, Begonias, Cyclamen, Chrysanthemums, Adiantum, Ferns in great variety, Pandanus, Crotons, Areca, Ficus, Phoenix, Kentias.

If unable to call, you may send us your order, large or small, with every confidence that it will have our best attention. We would suggest placing your order as early as possible.

LILIES

Our stock of this grand Easter plant is exceptionally fine this year, and having 25,000 plants, we can positively please the most critical buyers.

Plants with from 4 to 10 flowers, 12c. per bloom.

Made up pans from 15 to 25 flowers, 12c. per bloom.

Plants with less than 4 flowers, 15c. per bloom.

Cut Lilies, medium, \$12 per 100 blooms.

Cut Lilies, long, \$15 per 100 blooms.

All plants have been grown moderately cool.

RHODODENDRONS

Our stock is large, the plants being exceptionally well budded and shapely, including all the best varieties in all colors.

Prices, \$1.50, \$2, \$2.50, \$3, \$3.50 and \$4 each.

Very large plants, \$5 and \$6 each.

RHODODENDRON PINK PEARL. Prices, \$2, \$2.50, \$3 and \$4 each.

HYDRANGEAS

We have the largest and finest stock of Hydrangeas ever offered to the trade at Easter, having 7500 perfect plants. Our stock includes over 6000 of the new French varieties, all of which have proven so valuable to the retailer. The plants have all been grown cool and are well hardened off, insuring satisfaction to the buyer.

Hydrangea Otaksa, 6-in., \$9, \$12, \$15 and \$18 per doz.

Hydrangea Otaksa, 7-in. and 8-in., \$2, \$2.50, \$3, \$3.50 and \$4 each.

THE NEW FRENCH HYDRANGEA

All of the varieties here offered have been tested by us under ordinary conditions as to their adaptability to forcing for Easter. All have proven themselves to be valuable additions.

Bouquet Rose, bright pink.
Gene de Vibrax, bright rose.
La Lorraine, bright pink.
Mme. A. Riveram, bright rose.
Mme. E. Mouillere, best white.
Mme. Maurice Hamar, bright pink.
Mme. Renee Gaillard, large white.
Souv. de Mme. E. Chantard, bright rose.
 6-in. and 7-in. pots, from 3 to 15 flowers, \$9, \$12, \$15, \$18, \$24, \$30 and \$36 per doz.

April delivery, strong stock of the above varieties, 2½-in. pots, \$10 per 100, \$90 per 1000.

April delivery, **Otaksa**, 2½-in. pots, strong plants, \$8 per 100, \$75 per 1000.

ROSES

We desire to make special mention of our large stock of Roses, growing upwards of 10,000 plants in the following varieties. We have no hesitation in saying we are the largest growers of forcing Roses for Easter in America. We are positive our

ROSES—Continued

stock will please the most critical buyers, as the quality was never better. It has all been grown cool and will prove very satisfactory.

BABY RAMBLERS. Good, strong stock, well flowered. \$4, \$6 and \$9 per doz.

HALF STANDARD BABY RAMBLERS. Orleans, Pres. Taft, Phyllis, etc.; exceptionally fine plants, 3-ft. stems, \$1.25, \$1.50 and \$2 each.

MRS. CUTBUSH, PINK BABY RAMBLER. This variety is one of the popular ones. 5-in. and 6-in. pots, \$6 and \$9 per doz.

PHYLLIS BABY PINK RAMBLER. This variety we consider the most beautiful of its class. 5-in. and 6-in. pots, \$5, \$6 and \$9 per doz.

ORLEANS (New). The best of the Baby Ramblers. Colors, bright red and pink, center slightly shaded white, very free flowering. 5-in. and 6-in. pots, \$6 and \$9 per doz. 7-in. pots, very heavy, made up, \$12 and \$15 per doz.

PINK RAMBLER ROSES. In grand condition, trained into fan, globular and pyramidal shapes, \$1, \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50 and \$4 each.

Special Ball Shapes, wire frames, \$2.50, \$3, \$4 and \$5 each.

Standard Ball Shape, \$3 and \$3.50 each.

CRIMSON RAMBLER. These plants are unusually fine. 7-in. pots, \$1.50 each; 8-in. and 9-in. pots, \$2, \$2.50, \$3 and \$3.50 each.

HIAWATHA. The best variety of its color, brilliant red with yellow center. 6-in., 7-in. and 8-in. pots, trained in globular and fan shapes, \$1.25, \$1.50, \$2, \$2.50 and \$3 each.

Special baskets, \$7.50 each.

JUNIATA (New Climbing Rose). One of the very best of the seedlings raised by Mr. M. H. Walsh, of Woods Hole, Mass.

We purchased the entire stock several years ago at a large figure, and this is the first time disseminated. We are offering some very handsome specimen plants in bloom for Easter delivery and every one should have a few of this grand Rose novelty.

It is an unusually strong grower and the most prolific boomer of any of the climbing Roses. The color is a beautiful rose pink with tips of petals lightly tinged with white and a white disc in the center of the flower. It is the ideal variety for either forcing or for outside decoration. Specimen plants, 5-in., 6-in. and 7-in. pots, \$6, \$9, \$12, \$15, \$18, \$24 and \$30 per doz.

TAUSENDSCHON (Thousand Beauties). This was our finest and most popular Climber last year, and this year our stock is large and the plants are much finer. We cannot recommend the Tausendschon too highly.

Strong plants, 6-in. and 7-in. pots, \$1, \$1.25 and \$1.50 each.

Trained plants, fans, globular and pyramidal shapes, \$2, \$2.50, \$3, \$3.50, \$4, \$5 and \$6 each.

Baskets, \$7.50 each.

ROSES—Continued

BABY TAUSENDSCHON. This is a new introduction this year and will be one of the most popular Roses ever sent out. It is exactly the same as the popular Rose "Tausendschon" in coloring, but belonging to the Baby Class, it is an ever bloomer. Every one should try this variety; its great value will be for baskets and for Spring planting. 4-in., 4½-in., 5-in. and 6-in. pots, \$6, \$9 and \$12 per doz.

Strong plants for growing on. May delivery, 2½-in. pots, \$12 per 100; \$100 per 1000.

SUNBURST (New Yellow Rose). Strong plants, 6-in. pots, \$12, \$15 and \$18 per doz. 2½-in. plants, \$20 per 100; \$150 per 1000.

HYBRID ROSES. We have an exceptionally large stock of Hybrids and Teas which will be just right for Easter.

Killarney, 6-in. and 7-in. pots, \$6, \$9 and \$12 per doz.

Magna Charta, very fine, 6 to 18 flowers, \$9, \$12, \$15 and \$18 per doz.

Frau Karl Druschki, very fine, 6 to 18 flowers, \$9, \$12, \$15 and \$18 per doz.

Richmond, \$6, \$9 and \$12 per doz.

Kaiserin, \$6, \$9 and \$12 per doz.

SPIREA GLADSTONE

Our stock is in superb condition.

6-in. pots, very heavy, \$6 per doz.

7-in. pots, very heavy, \$9 per doz.

8-in. tubs, very heavy, made up, \$12 per doz.

10-in. and 11-in. tubs, very heavy, made up, \$18 and \$24 per doz.

PINK SPIREA, Queen Alexandra, 6-in. and 7-in., very heavy, \$9 and \$12 per doz.

GENISTAS

Fine stock for basket work in the small sizes.

3-in. pots, \$15 per 100.

4-in. and 4½-in. pots, \$3 and \$4 per doz.

5½-in. and 6-in. pots, \$6 and \$9 per doz.

7-in. pots, \$12 and \$15 per doz.

Large plants, \$1.50, \$2, \$2.50, \$3, \$4 and \$5 each.

DOUBLE DAISY—Mrs. Sander

Well grown and well flowered.

4-in. pots, \$3 per doz.

5-in. pots, \$5 per doz.

6-in. pots, \$6 per doz.

Larger plants, 75c., \$1, \$1.50 and \$2 each.

MARGUERITES

Well flowered plants.

4-in. pots, \$2 per doz.

6-in. pots, \$4 and \$6 per doz.

Larger plants, 75c., \$1, \$1.50, \$2 and \$2.50 each.

LILY OF THE VALLEY

5-in. pots, \$7.50 per doz.

6-in. pots, \$9 per doz.

Terms of Business: Unknown correspondents desiring to open an account, will please furnish three references to parties in the trade with whom they have had credit relations, otherwise cash must accompany order. Cash discounts: To customers of approved credit when payment is made within ten days from the date of invoice, a discount of 2 per cent. will be allowed on plants or cuttings, but this rule does not apply to customers carrying open accounts. C. O. D.: Goods desired C. O. D. must be accompanied by a partial remittance to guarantee acceptance.

LILIUM FORMOSUM

that are imported in boxes marked with the Horseshoe Brand are superior to anything in the lily line for winter flowering. Size 9/10 from last season's crop are producing from eight to eighteen flowers per bulb. The price of this quality is \$20.00 per case of 200 bulbs, and it is the best investment any florist can make in lily bulbs to-day. The order should be placed now, because the crop promises to be short of demand this year.

THE LILY HOUSE

A WARNING

Under the new Plant Quarantine law the importation of Azaleas, Palms, Etc., is more difficult than ever before. Certain conditions must be complied with before the plants can enter this country. Are you sure the man you buy from knows this? Can he and will he comply with the new law? Furthermore, the importer must have a permit from Washington to import such plants. Have you such a permit? If you don't wish to run the risk and bother with all this, you can buy from us, or other reliable American houses. Horseshoe Brand Azaleas come from Petrick's, the most reliable Azalea firm in existence. Prices are reasonable for good plants—sent upon application. Order early.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Achimenes

These tubers stored away from last year can now be started. You can make two or three plantings which will give a succession of flowering plants, when a great number of other plants have done flowering. Place them quite thickly in pans or flats, well-drained, and filled up with sand. The tubers should be just covered with sand and kept moist, but not in a wet state. They like a good brisk heat so should have anywhere from 62 to 68 degrees night temperature and from 10 to 15 degrees higher with sun heat. When young growth begins to show, which should be in about three or four weeks, they should be placed in 5 or 6-inch pans or pots using 6 to 8 tubers to each pan. Do not overlook giving plenty of drainage and on this drainage use some sphagnum moss. They do well in a compost of fibrous loam three parts, leaf mold two parts, cow manure one part and a little sand. Keep well up to the glass so they will grow sturdy.

Care of Asters

The aster grower's busy season has begun. Several successive sowings of the best strains obtainable should be made from now until the middle of May and even later if a crop of flowers for the latter part of October is desired. In order to cover the entire aster season reliance must be placed on the various types, early, mid-season and late, the time of sowing counting for little or nothing in the hastening or prolonging of the cut. The seed can be sown in flats, using a compost of new soil three parts, leaf mold and well rotten manure one part each, with enough of sand to make the soil porous. These flats can be placed in a temperature of 55 to 58 degrees at night. Keep the flats moist and shaded until the seed begins to germinate, when they should be placed up near the glass where they can have full sun. These early sowings can be grown inside where they will come in three weeks or a month ahead of the regular flowering season. Later in the season a good place for the raising of asters is a very mild hotbed and cold frames for the later sowings. The seedlings should be transplanted once and allowed to become of sturdy size before going into the open field.

Chrysanthemums

All the varieties that were rooted early and intended for exhibition will need lots of care and attention from this out. They will require shifting right along so they will not become potbound, which always checks their growth and makes it impossible to produce fine flowers. As every flower grower knows chrysanthemums are great feeders and soon draw all the plant food from the soil. For a compost there is nothing better than sod that was cut last fall and piled up. This should have at least one

part of well rotted cow manure to three of chopped sod. Mixed at this rate it will do for shifts up to May. As they advance they will take equal parts of sod and cow manure with a sprinkling of bone meal. Give them airy quarters where they can have plenty of sun. Keep on propagating right along now. See that all stock is kept clean by timely fumigations.

Geraniums

Now that the days are becoming longer and the sun stronger, geraniums will need lots of water at the roots. Give also plenty of ventilation to keep them stocky and sturdy. Every two or three weeks give them a spacing to let the light and air around them and never allow them to become crowded as they will spindle up very fast. After Easter when you will have more room and time all fall rooted cuttings which are in either 2½ or 3-inch pots should have their final shift. When making up compost always avoid green manure. A good mixture is fibrous loam four parts, well decayed cow manure one part, and about a 4-inch pot of bone meal to each barrow load. Give proper drainage and pot them firm. Keep the atmosphere rather dry than moist and a night temperature of from 50 to 55 degrees.

Growing Swainsona

Now is a good time to put in a batch of Swainsona galegifolia. Plants that have been growing thrifty will have a lot of material fit for propagation. The best cuttings are those selected out of the axil formed by the leaf and main stem. These can just be pulled out sideways and will not need any trimming. Place in a moderately warm propagating bench and by keeping them shaded and watered for about twelve to fifteen days they root nicely, after which they can be potted into 2½-inch pots, using a compost of fibrous soil three parts, leaf mold and well rotted cow manure one part each. Keep shaded for a few days when they should have all the sun and light possible. Give them a temperature of from 55 to 60 degrees at night with 10 to 15 degrees more with sunshine. Give ventilation on all good days. These will make fine plants by Decoration Day as they are suitable for cemetery planting. They make good subjects for bench culture when planted out from 4-inch pots. When handled right they will give a fine crop of snow-white flowers from the middle of May on.

The Propagating Bench

Keep every inch of the propagating bench filled up so that you will have plenty of stock when planting out time arrives. When cuttings are rooted see that they are potted up in time before they go back. Remove the sand when it shows signs of fungus. Your propagating bench or house will need attention in the way of watering, spraying and ventilation as an hour or two of neglect will spell ruin at this season of the year.

Mr. Farrell's next notes will be on the following: Boronias; Deadrobiums; Dipladenias; Outside Sweet Peas; Pricking Out Seedlings; Outdoor Work.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Setting Melons

There appears to be a certain amount of luck attached to securing large crops of melons—four and five to a plant. It has been done and there is every possibility of its occurring again, but who can say he is certain of averaging that number? Three fruits to a plant, perfectly netted and finished, is a good crop. If it were possible to average up the various crops grown in a year I think it would not reach even three. The question before us is, how to increase the number of fruits to a plant, after which comes the alternative,—does it pay to carry more than three? After studying the thing out my conclusion is that where fruits of good size are looked for, three is enough. One of the freest setters that has come under our notice is His Eminence (white flesh), which has carried five and six fruits but invariably one-half was not finished satisfactorily. Three, or occasionally four, fruits are much better. Then again there are those that prefer small fruits, so it is the demand that, to a great extent, must regulate the supply, yet it must be remembered that there are those varieties that never attain the size of others when grown one on a plant. To have the largest number of fruits to a plant an even set is essential. In the winter it is impossible to open more than one flower a day but large crops are not to be considered then. From now on several will open about the same time and it is these that must be looked to. Get all you can open in one day and fertilize them. This is the keynote. A second is, make sure the pollen on the male flower is dry before inserting it. After a few days' swelling one is liable to take a flying start; this one must be eliminated in the interest of those remaining; otherwise, the probability is that those left behind will turn yellow and decay. Get them all away together and keep them "coming." Firm beds will assist in keeping a crop even and do away with very rank growth. Make a bed up loose and the probability is you get one large fruit (perhaps an eight-pounder).

Strawberries

In the south strawberries have been in season for some time. Further north the greenhouse will have to supply this, the most popular of berries, equal in size and flavor to those that will come later from the garden. There is only one place in a greenhouse to get the right flavor in the berries and that is near the ventilators. Plenty of sun and air is what they require. A shelf near the top ventilators will be an ideal place for them. With the first color showing in the berries stop feeding, but do not diminish the clear water supply. This means that twice a day they ought to be looked over. In mild weather leave a crack of air on all night. It is useless to assume that good flavored berries can be grown with the plants standing down on a bench and the house run to suit other stuff.

Heeling In Peach Trees

Soon after the final reduction of the growths those remaining will need attention, to train them in the way

that they should go. This consists of a tie put neatly around each growth and the wood that it is growing on, drawing the young and old together; this starts the youngsters off in the right direction and is known as "heeling in." If this is omitted until later the stronger growths will not lie so close and thus form a bend in the wood, giving the tree an appearance of so many young moons. The greatest advantage is that with a pressure of other work the growths can be left to take care of themselves for sometime.

Syringing

Syringing at this time of year must be done thoughtfully, especially the afternoon work. Any house that is doubtful of drying up before night must be left and damping alone will supply the moisture. Crops going into the night wet are liable to contract many and varied diseases. Where there is any possibility of anything not drying up after syringing give them a good shake to dislodge the water. Morning syringing ought to be done as the house is nicely warming up from the approaching sun. Be thorough in this work and reach the corners and ends with all the force the foliage is able to stand.

Cherries

Cherries mature quickly after setting. Seldom is it necessary to reduce the quantity of fruits. More than often there is a scarcity when forced early. Frequent applications of lime water will help them through the stoning period, after which a little feeding can be given in the form of quick-acting manures. Cherries will ripen without any great heat; 55 F. at night with the usual advance by day will be sufficient.

Early Watermelons

A New Mexico reader who is going to raise early water melons sends along an interesting letter and very wisely gives us his climatic conditions there. The following is his plan: Plant in an east-and-west house about 18 inches from the glass in strawberry baskets, about four seeds in each on or about the 15th of March. Grow them here until 15th of May and then plant in the field, keeping the temperature just above freezing during the night while ventilating freely during the day.

The questions that arise are these:

Will the water melon plants that have been thinned to two in a basket be too large to transplant with safety—i. e., without starving them, or too small? Will the probable bearing period be advanced one month or less? Ought the glass to be shaded or direct sunlight given?

Your system seems very practical, very similar to what we have practiced here. Would advise you to make three sowings until you are sure of an approximate date,—say about ten days or two weeks apart. The bearing period will be advanced about one month. Give the plants full sunlight all the time. Would not let the night temperature below 45 or the plants are liable to get stunted. Greater success would be insured by using small frames and sash over the plants after planting out; in so doing a little sun heat can be retained.

OUTDOOR VEGETABLES AND FRUIT

Edwin Jenkins

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Jenkins. Such communications should invariably be addressed to the office of HORTICULTURE.

Seed Sowing

Sowings for succession should now be made of lettuce, cauliflower and cabbage and those having the room should sow in frames or on hot-beds, early onions such as the Barletta, Victoria spinach, forcing radishes, beets and carrots. Growers who are dependent entirely on the hot-beds will sow as soon as possible, tomatoes, egg plants and peppers, as well as some early celery, celeriac and parsley.

Sprouting Potatoes

We are all anxious to get potatoes as early as possible every season, as the old stock generally begins to lose flavor if they do not give out entirely by about the month of June, and any method that will give us new potatoes from two to three weeks earlier than is usual is well worthy of a trial. Early sprouting is not practiced nearly as much as it deserves to be, considering the simplicity of the operation and the good results obtained. Take a peck, or bushel, according to your requirements of some of the early varieties such as Early Rose, Noroton Beauty, Bovee, or any other good kind, and pack them closely into flats, one layer deep; set them in the full light where there is no danger of freezing, and where the temperature does not rise above fifty. Should they show signs of shriveling, sprinkle lightly with water, but be sure and not over-do this. Instead of the white, sickly, weak sprouts which we usually see on potatoes which are just taken from the cellar and planted, we shall have on sets treated as above, sturdy dark green or purplish shoots which are ready as soon as planting out time arrives to go away strong and do things.

Fertilizers for Garden and Orchard

While the writer considers farm-yard manure by far and away the best fertilizer for most crops I realize that in many cases the farm-yard manure is not obtainable in sufficient quantities and must needs be supplemented by some of the inorganic or artificial manures, and there are rare instances where the best results may be obtained by the use of artificial manures. A brief consideration of the properties of the several main constituents of artificial manures may be profitable.

Nitrogenous Manure

We should all know that nitrogenous manures promote growth—the production of large dark green foliage, and while absolutely essential to all plant growth, too much tends to make plants unproductive of fruit or flowers. Such vegetables as spinach, lettuce, asparagus, and cabbage such as are grown for foliage or stem only are those which will reap the greatest benefits from a purely nitrogenous feed. Our main sources of inorganic nitrogen are nitrate of soda and sulphate of ammonia. These are two highly concentrated expensive fertilizers which must hardly ever be used in excess of two hundred pounds to the acre; in fact “little and often” is the safe motto with these. Both are caustic to foliage to some extent, and so should be kept from the leaves of plants.

Phosphoric Acid

The chief effect of phosphatic manuring is early maturity, and the production of flowers and fruit, and as farm-yard manure is always deficient in this element it is absolutely urgent that it should be supplied from some other source. Bone meal is one of the commonest phosphatic manures, and it is a very good one, too. A good grade of bone meal will average about twenty-five per cent phosphoric acid and on the garden or orchard it may be used as heavy as a ton to the acre, although a less amount may sometimes be just as beneficial. Superphosphate is another phosphatic manure and may be used about the same strength as bone meal, and basic slag is still another one which may be used at the same rate. All three of the foregoing should be sown on the garden or orchard as early as possible after snow has gone and indeed would be better in some cases sown on in the fall. They are somewhat slow acting and if something is wanted for immediate effect use steamed bone meal or better still phosphate of ammonia.

Potash

Potash is especially valuable inasmuch as it produces quality in fruits and vegetables. Potatoes and beets are never of good quality if there is a deficiency of potash in the soil as the starch and sugar content of these is dependent on potash. High grade sulphate of potash containing about eighty per cent actual potash sown at the rate of two hundred pounds to the acre on garden and orchard will be very beneficial, but it must be got on now or some burning may occur. Wood-ashes is another source of potash and where they can be had cheap may be used at the rate of a ton to the acre with good effect. Kainit is another useful potash manure having some ten to twelve per cent of actual potash and this is another that should be sown as early as possible at the rate of half a ton to the acre.

Lime

All the manuring above recommended will be of no avail if your soil is deficient in lime (except that the wood ashes and bone contain some lime) and if you have been manuring for several years with animal manure the chances are that lime is needed and will be very helpful. A ton to thirty hundredweight per acre about every three years will be found an excellent practice or half a ton annually of fine air-slacked lime, spread on as evenly as possible and thoroughly worked in. Besides counteracting acidity, lime forms a base for the various potash, phosphatic and nitrate salts to combine with, so that these are not so readily washed away, and further, it makes the garden soil an uncomfortable home for the various worms which are often so destructive. Lime like every other good thing may easily be overdone, and one of its evil effects is that if it is present in too great quantity it will, by liberating the various salts too rapidly, cause a serious loss in plant food. Do not dump the lime in heaps on the garden and leave it there for any length of time before spreading, for if you do these spots will be barren for several years to come.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

That Easter Crop

It is very seldom that we try to bring in some house especially for Easter, or for any other holiday for that matter. We always aim to have roses in good quantity all the year round. Only once or twice did we grow the crops especially for the holidays, and we were disappointed with the prices these brought, and since then we have practically forgotten there is such a thing as holidays, preferring a steady cut of roses to the holiday crop. We find there is such a great amount of other flowers grown for Easter that an extra large cut of roses for that day is likely to fail when it comes to the price. Of course with the florist who does a large retail trade things are different and he must be guided by his trade.

Crowding other Stock into the Rosehouses

Seeing a house or two of good roses ruined by the grower crowding a lot of bedding stock in among the plants and around the edges of the benches, we thought a line or two on the subject may be of interest. If you can give both roses and the bedding stock the proper care then go ahead and move as much of it in as you like. Our experience shows that neither will get proper care and therefore neither will amount to the high standard that is so sought by nearly all of us now-a-days. If you wish to grow a good many bedding plants, our advice would be to find a bench or two or a whole house for that matter, and tear the roses out and then use all the space for the plants. You will then have plants that you do not have to be ashamed of, and will not be endangering the roses in the least. There is only one thing we ever permitted to find its way on the benches of the rose houses and that was Grand Rapids lettuce. This was grown to perfection along the front of the benches and no harm was ever noticed as far as the roses were concerned. Of course the little benches in the ends of the old-fashioned houses and in the cross houses can be well planted to almost anything without any danger, but we would not try to crowd any plants whatever among the growing roses.

Spot on the Young Plants

Be sure to look the plants over very carefully every few days, to be sure and not let blackspot get into them unnoticed. This applies to Beauties especially as they seem to be more subject to it than other varieties. Re-

member there is no cure and the only thing to do is to try to prevent it. This can be done by having the air always fresh and sweet and the plants nice and dry for the night, never syringing late enough in the day as to be in doubt in regards to the plants drying off. Leaving them wet over night is certainly like inviting trouble and surely we get enough of that without bothering with invitations. It is well to spray the young plants with the ammoniacal copper carbonate which will help prevent it, but is not a cure. Fungine has also proven very effective, but that will not cure. The only "cure" is to grow the plants out of it if they get a dose of the spot, and being on the lookout for the first one or two that appear, picking these off long before they ever get a chance to breed mischief.

Mildew on Young Stock

We cannot see why mildew should ever be allowed to find its way among the young plants, and we can only think of carelessness as the cause. Proper ventilation will insure hardy foliage that will resist an attack, and will live through a sudden change of temperature without getting the much dreaded disease, although many regard it only as a cold and treat it as such. A little sulphur applied to the steam pipes will quickly do away with it, but the marks of it on the foliage will always remain to tell the tale. Therefore it is best to be very careful and never allow any of the plants to get any, and they will be ever so much more vigorous.

Ventilation these Changeable Days

With the thermometer changing with the wind, it is difficult at times to know just how to ventilate so as to keep the houses right. The only thing to do is to keep right after the ventilators, even though it takes nearly all the time to do so. It will pay in the end and anyone is proud to have all his roses free from mildew.

Night Temperature

This should be increased a little now that the warmer days are here. Do not allow the temperature to go down too low on the cold nights that come in between the warmer nights. A crack of air can also be left on with perfect safety now and it will do the plants good, especially with the wide houses. A crack of air will hardly be noticed as far as the coal consumption goes, and the benefits derived make it a very good investment.

CITY THAT PAYS.

ORCHIDS

CATTLEYA TRIANAE ALBA

Once more Easter, the great "harvest day" for the florist, is rapidly approaching and everybody along the line is hustling to get everything ready for this important occasion. The gloomy days of Lent with its oversupply of all staple goods and consequent low prices will soon be forgotten and once more the great factory will be running full time again with increased revenues. Judging from the market reports of late it would seem that the orchid grower also is affected by the oversupply and low price problem and one wonders if the time has really come when there are more orchids, and especially cattleyas, grown than the market is able to absorb. Complaint is also heard of the poor quality of cattleyas and other orchids coming in the

market. Can it be that orchids are not grown as well as in former years? I, for my part, venture to say that they are grown just as good if not better today than at any time before. Of course, the supply is much greater now than it used to be, but the demand for choice goods is also much greater. Have orchids become less popular?

I think not; just the reverse. One thing, however, is sure: The buyers or consumers of this specialty have learned to discriminate between good and poor orchids and consequently the same conditions exist now in this branch of the trade as in all the others. The best roses will always find a buyer willing to pay a good price for them; the same holds good with any other staple product marketed as they should orchids

GROUP OF CATTLEYA TRIANAE

be an exception? In the accompanying picture of *Cattleya Trianae*, one of the most useful and popular of all orchids, a number of variations can be seen; there are good ones and poor ones, considering shape, color and substance. Now if there is such a marked difference in a small group like this, what will it be in a lot of 5,000 plants or more? There must and will be quite a number among them which are not worth the bench-room they occupy and if those plants were discarded after their first flowering and the room and time thus gained given over to the remainder that are good it would be for the benefit of all concerned; there would be more satisfied customers, less kicking and better prices. All cattleyas vary more or less, some species more so than others, and this is true of all other orchids to a considerable extent. Take *Odontoglossum crispum*, for instance. What beautiful flowers one finds among an importation and on the other hand what miserable insignificant little flowers some of them turn out to be on their first flowering! Rubbish; nothing but rubbish, compared to the good varieties. What will the grower do with these? He naturally thinks of their first cost and tries to get his money back; the poor flowers are marketed together with the good ones, thereby decreasing the value of the latter and getting little or nothing for the former. Would it not have been better to throw these poor things away at once in order to keep up a good price as well as the grower's good reputation? The grower cannot help it that there are poor varieties amongst all imported or home-raised

orchids, but he can discard the poor ones and grow only those that come up to the standard and I am sure that this would pay best in the end. A poor variety of any orchid will always be a poor one, no matter how skilful the cultivation may be; on the other hand a good variety will remain good as long as the plant receives proper treatment. Should a plant deteriorate through wrong or careless treatment, it will soon show the effect by producing fewer and smaller flowers of less substance, and, once a plant has gone back, it will take a long time to restore it to health again if ever.

Eternal vigilance should be the watchword here as with all other flowers. The rose grower who will neglect a house of roses for one day cannot expect to get the best results; neither can the orchid grower afford to neglect his orchids for a day, for if he does he will surely have occasion to regret it. Not that orchids are harder to grow than roses. No indeed; the majority of them are much easier to grow than roses. But, as in growing roses, strict attention must be paid to all the little details, such as watering, ventilating, cleaning, potting, etc., and wherever this is done orchids will be found to do well and to be a good paying proposition; not a drug on the market but a leader in high grade products of the American florist.

Two Plants Valuable for Summer Cut Flowers

Anchusa Italica

The pure bright blue color is one of the most precious hues in flower gardens. The fact that it is comparatively rare naturally strengthens the desire for clear

ANCHUSA ITALICA DROPMORE

blue. Among annuals the flowers of *Centaurea cyanus* represent this shade to perfection. *Salvia patens*, the blue sage, possesses it too, but I never saw plants bloom

profusely enough for modern mass effects. Turning to hardy perennials we notice similar conditions. Pale blue and the dark purple shades we meet frequently with, but the pure bright blue color remains scarce. We treasure it at present most in the tall stately spikes of some of the new large-flowering *Delphinium hybridum* varieties. It is that blue, which in combination with the white of *Lilium candidum* and the clear primrose yellow of *Oenothera fruticosa* Youngi enables us to produce vivid and harmonious late spring and early summer effects in herbaceous gardens. The same intense ultra-marine blue is the striking attribute of the blossoms of the new *Anchusa italica* Dropmore. Anchusas are hardy perennials with strong, fleshy rootstocks, forming large, freely branching bushes of from 5 to 6 feet in height. Their flowering time begins early in June, to continue for over a month. The genuine Dropmore variety, from the first day of its coming into full bloom, has been an object of keen interest and steadily growing admiration wherever it was shown to perfection. Its color, free habit and long florescence, according to my observation, meet with popular favor. The same may be said of Perry's Variety, a more vigorous growing type of the Dropmore form. *Anchusa italica* Opal resembles the former in habit, but its flowers are light blue. In gardens I have been planting anchusas 3½ to 4 feet apart, interspersing clumps of aconitums, *Pyrethrum uliginosum* or *Lilium speciosum* for succeeding autumn display between. It should be the constant aim in planning and planting perennial flower gardens to avoid bareness and unsightly spots at any time of the season.

For the benefit of those of my readers desiring to grow their own stock I mention that anchusas can be easily

raised from seed sown in spring or propagated by root cuttings. They thrive best in a rich, loamy soil and an open sunny exposure is a necessity for perfect development of plantations. Prolonged excessive moisture proves detrimental. Protect anchusas with leaves or straw during winter; thickness of cover according to latitude and climate of location.

Stokesia

The steadily increasing interest in new introductions of hardy herbaceous plant species is one of the encouraging signs of a healthy horticultural advancement. This being at present the rule, it is, however, by no means a rule without exceptions. Closer observation, now and then, brings to light striking instances where unquestionable merits for a long time seem to escape the watchful eyes of even those, who are readily inclined to take

STOKESIA CYANEA

the initiative. As a telling example I mention today the cornflower-aster *Stokesia cyanea*. Not very many perennials can be depended on to bloom in even continuance from July until frost. Stokesias in this respect are reliable. For this reason they prove attractive subjects for plantations on mixed hardy borders. Attaining an average height of about 2 feet, plants produce desirable

cut flowers on long and stiff stems. The individual flowers are decidedly handsome and appear in sufficient numbers to attract attention. Those of *Stokesia cyanea* possess a clear lavender-blue, while *cyanea alba*, resembling in shape the former, blooms white. Readers desirous to grow their own supply will find that cornflower-asters can be very easily raised from seed sown in spring. Seedlings do not require an extraordinary amount of care, and, when flowering the following season, come true to color. For the small garden with limited space at our disposal a few plants, of necessity, must suffice. Employing stokesias on larger ground areas it is essential to plant in adequate number and close enough to gain an impressive effect. Whenever the intention is to grow this perennial for cutting, I advise sowing not less than at least one-half ounce of seed of each variety. Stokesias are quickly becoming popular when shown in masses. Being coarse-seeded the one-package sowing and subsequent insufficient stock to commence with is frequently the cause of the slow headway in the realization of the opportunities at hand. I am convinced that a fair trial is likely to bear out the correctness of my statement. Stokesias, while not new, are offering possibilities which to further ignore it appears we can hardly afford.

Riverton, N. J.

Richard Rothe

Bleeding of Grape Vines

When I was a small boy living in Vermont, one spring as the sugar season approached I thought I would try a little sugar making myself, and knowing the propensity of the grape to bleed, and supposing that all sap would make sugar if boiled down, I tapped a big *Vulpina* vine that was growing near the house, and it ran nearly a stream. I gathered and boiled all day and the next day till noon; then I stopped gathering so that I could sugar off at night. I kept testing it, but it neither thickened nor sweetened; it only boiled away, and at night all that I had to show for the great amount of sap boiled away was a little froth at the bottom of the kettle! About that time there was a disappointed boy in Vermont, but the disappointment has proved of value to me as it demonstrated that there is no substance in grape water. I do most of my pruning in April and let them bleed. I only prune in fall such ones as I wish to lay down and cover to save wood from.

A request Our readers will find in this issue of HORTICULTURE the Easter and spring trade announcements and offerings of those enterprising dealers who, although passing through a period of unusual dullness, have the confidence and courage

to reach out and persist in the effort to increase and extend their business with the readers of this paper. We hope the response will be most liberal and substantial for these are the people who are worthy of the encouragement and support of all who like to see hustle and enterprise. Tell them you are giving them your business because they support HORTICULTURE and they will surely treat you well.

Unbalanced We reprint in this issue, from the Secretary's Annual Report of the Society of American Florists, a portion of the report of the State vice-president for Pennsylvania East, E. J. Fancourt. This particular document was most pertinent and timely and is just as true and interesting for present reading as it was last August. The problems resultant from the disproportionate increase of flower production as compared with the facilities for distribution are becoming more and more formidable and, unless the situation changes so that a better balance exists between supply and demand, conditions will certainly go from bad to worse. A wider retail market *must* be created and, as we have repeatedly urged, the growers should get busy on the question of ways and means for they are the ones who have the most at stake. We start in this issue a series of original articles on Advertising, by R. M. Ward, which we hope will be carefully perused by everyone interested in increasing the sale of floral products.

Restlessness Changes are the order of nature. Because a situation happens to suit us we scout the idea of a change. But it is bound to come and whether it be politics, business or social we cannot do more than perhaps retard it a bit, especially if the change be in the nature of development. Let no one deceive himself that the present restlessness in the domain of commercial floriculture means nothing more serious than a passing whim. The situation is being carefully sized up by men of shrewdness and ability, the causes analyzed and the possibilities of new alignments carefully weighed. It is pointed out that the whole structure of the flower industry is unevenly developed, its growth not well balanced and that sooner or later, and the sooner the better, the demand for a remedy will become irresistible. That this industry which carries within itself a potentiality greater than its most sanguine devotees ever dreamt of, is suffering from a sort of malnutrition somewhere is a contention difficult to argue down after one knows the facts.

Think it over Considering the foregoing, the present seems a good time to inquire "What are you going to do about it?" If, as has been repeatedly asserted, some of our business methods are already antiquated and totally unequal to present needs what shall we say as to their applicability to the future requirements of this rapidly expanding industry? And if our methods are to be reformed on modern lines he is surely the wise man who will give heed to the premonition and, at least, make the endeavor to keep in touch with whatever progressive movement may materialize and try to foresee its character and tendency and what may be its ultimate effect on his own interests. We do need a better understanding, all around, between the various departments and a fuller appreciation of one another's indispensability to the welfare of the whole. When this has come to pass then reform on permanent lines will come easy. HORTICULTURE's ear has been close to the ground and there is good reason for this little discourse. So don't cast it aside too hastily, but just "think it over."

CALIFORNIA NOT A HUMBUG LAND.

Under the heading "Massachusetts Boosters," in a recent issue of *HORTICULTURE*, Rev. C. S. Harrison of York, Nebraska, took occasion to refer to the state of which I am proud to be a resident, as a humbug land. I have not a word to say against the state of Massachusetts nor in fact any other state, and when anyone goes so far out of his way as to make so sweeping a statement about the great state of California, it is about time to enter protest. Not that California as a state needs defence from anyone but there might be some readers of *HORTICULTURE* who may be inclined to believe what your correspondent from Nebraska has written.

It is quite true that weather conditions in California have been unusually severe during the passing winter, but it may teach a wholesome lesson; I verily believe it will. Admitting that citrus trees have suffered severely there are yet many horticultural subjects grown here that even the good old Bay State cannot surpass or, in many cases, even equal.

I fully believe that in Massachusetts apple growing is conducted quite satisfactorily. The same may truthfully be said about many parts of California. Lompoc, for instance, my home valley, is one of these. At this season of the year, and for months past, the writer has been enjoying and still enjoys, daily, apples that were grown right here on Burpee's Floradale Seed Farm, and, in passing, I cannot resist stating that I never enjoyed the eating of apples in my life before as I have done, and am still doing, these "Yellow Belleflowers." This variety is claimed to be a synonym of "Warren's Pippin" and so, by the way, is a variety grown sparsely hereabouts called "Artley;" but we are not on the subject of the nomenclature of the apple or I would be inclined to declare there is much confusion to be found therein. Our adjoining neighbor immediately to the south of Floradale said only yesterday that he was without apples for home use during the months of May and June only, and this without resorting to cold storage. We have yet on hand for own use, besides a few Belleflowers: Newtown Pippins, Winter Pearmain and a local apple known as Ben Cap, which from present indications will supply us up to and through the month of April quite satisfactorily. So far we are not troubled with codling moth, San Jose scale nor any disease common to the apple back east. (Every state is back east on the Pacific Coast.)

California is a great state, as I have found during my stay here since the autumn of 1909. It was also the writer's privilege to live in California from May, 1874, to September, 1875, part of the time in San Francisco and the remainder in San Jose, when I was "called" to my native land, and going there with the forlorn hope, as it so proved, of returning forthwith to California. Circumstances, however, which no strenuous efforts were made to control caused us to locate in Philadelphia, Pa., and although I have not a word to say against the good old Quaker City, yet daily almost a tender

yearning for a return to the Golden State would not down!

No. California is not a humbug land. Many horticultural subjects may be grown here superior to that grown on any other land in this broad universe. What would the flower-loving public do without California as the producer of seeds of that most popular of all flowering annuals—namely, the Sweet Pea? Where would the supply come from for the present year's demand had it not been for Lompoc Valley? No. California is not a humbug land.

Take another popular subject, namely, the Queen of Flowers. No other land

withholding of water towards the end of summer when growth is finished and the ripening process is in course of completion. No; California is not a humbug land!

Lompoc, Cal.

EDWIN LONSDALE.

A DIFFICULT PROBLEM.

An extract from the Annual Report of Vice-President E. J. Fancourt, of Philadelphia, to the S. A. F. Convention at Chicago.

Trade conditions in this part of the country are, in general, on a very satisfactory basis. There have been very few business failures and the expansion both in production and distribution has been quite extensive, especially in the production. What few failures we have heard of were mostly in the distributing end, showing that this department is by far the most difficult, or, in other words, that it is much easier to send the goods to market than to sell them to good advantage. The most difficult problem that faces us today, and with the outlook more serious, if not disastrous, in the future, is the small increase of retail flower stores. We have heard of no failures among the growers; on the contrary, in the neighborhood of Philadelphia alone, and not taking into account eastern Pennsylvania, which this report of your State Vice-President is supposed to cover, there has been an increase in glass area built during the last twelve months of anywhere from 1,500,000 to 2,000,000 sq. ft. Can anything be shown of an increased number of retail stores in the same territory, during the same period? No. In fact, what few new stores have been opened have been balanced by those who have been forced out of business. It would appear, therefore, that if the growers are to continue to make money as quickly as they have been doing, in order to build more glass, and in order to produce more flowers, it is high time to begin to think seriously of the retail end. What is essential is new methods in the line of selling. Twenty years ago flowers were grown for the so-called rich, and classed as a luxury, while today they are merchandise, and in a measure, a necessity. Three classes of stores are necessary: cheap, medium and high class. With the idea of serving the masses, low-priced flower stores are equally as essential for the distribution of flowers and plants as the five and ten-cent stores are to the merchants and manufacturers, and unless a marked change in methods of retailing is soon forthcoming, the slogan will be—too much glass, too few retailers.

Evanston, Ill.—Florists here complain that the city water, which is purified with hypochloride of lime, is changing yellow chrysanthemums to an ashen color, white roses to pink and carnations to almost every shade, but the one they should be. The commissioner of public works, with whom the florists took up the matter, said the water had nothing to do with changing the colors of the flowers. The florists will make an effort to keep the city from placing lime in the water and claim they will have the aid of the women, who some time ago complained that the water was bleaching their hair.

ADVERTISING TALKS

BY

Ralph M. Ward

No. 1

Advertising began with Adam and Eve. They were advertised in the Bible, the greatest advertising medium ever printed. From that time until today advertising has never ceased and never will. The manner of advertising changes with the times but no one in any line of business can succeed to any great extent without the aid of advertising. This is especially so when selling to the consumer. Even monopolies advertise these days. Just think of the amount of money devoted to advertising certain articles—gum, for instance. The combined cost for a year, of all the floral advertisements in the U. S. A. would not pay a month's publicity bill of Spearmint Gum. If the florists combined and advertised flowers on the same scale, the production would not catch up with the demand in ten years. The daily newspaper is the medium the florists should use first. Advertise in your town papers every day in the year. Consider the expense the same as a man's salary, the only difference being that the newspaper in the course of time will bring you more business than five men at the same salary. Of course, this is provided you take good care of the business when it reaches you, for advertising must be backed up by good flowers and good service. Most newspapers will write good copy for you if you wish them to. Your business will grow in proportion to the advertising you do of the right kind.

can produce finer roses for the pleasure of the amateur or commercially than have been grown here on Floradale, and what may be grown successfully here without effort may be grown elsewhere where rose growing systems prevail. When florists in the cities and towns back east who have a pot-plant trade fully realize how much better ripened the wood on roses is here, the demand for outdoor California-grown roses will for all time more than equal the supply. Where irrigation is under control the rose plant crop can be given all the water necessary in its early stages of growth and then—the most important of all—the

STATE OWNED vs. PRIVATE OWNED NURSERIES

Report of the special committee of the American Forestry Association, appointed January 9, 1912, for consideration of the subject of State Owned versus Privately Owned Nurseries.

From the investigations of this committee under the resolution adopted at the last meeting, authorizing its appointment for considering "the advantages of State Nurseries for the propagation, cultivation and sale of forestry material in competition with the business of private owners," it is our conviction that the matter of producing and distributing forestry material is one of such importance to the people of the country, that the subject should be handled as a matter of mutual interest, on the part of the United States Forestry Department, the different states, this association, and those owning private nurseries and engaged in the business, rather than as a subject which might cause antagonism between the states and private nurseries.

The committee wishes to emphasize the fact that the suggestion for investigating the subject arose more from a desire on the part of nurserymen to have the subject investigated than on the part of the association.

From the various data obtained by the committee from the leading foresters and representative firms engaged in the business, the following summary of opinions is here presented: The opinion of state foresters who are conducting state nurseries, all other state foresters and all foresters in other employment, is, with two exceptions, unanimous, that state nurseries should be permitted to sell stock to private parties mainly for the following reasons:

(a) Previous to the establishment of State nurseries, private nurseries had not furnished stock at prices which would permit the planting of large quantities of trees for forestry purposes.

(b) As a result there was comparatively small demand for nursery stock for forest planting until certain States instituted the policy of supplying such stock to private planters.

(c) The demand for nursery stock for forest planting is largely the result of this policy on the part of the States, and the claim is made that private nurseries have in the aggregate been benefitted rather than injured by it.

(d) The State is justified in encouraging forestry planting by assisting private owners to obtain cheap nursery stock in order to secure to the community the benefits of forestry.

Private nurserymen contend and are generally of the opinion that,

1—State nurseries which sell to private parties act to deprive privately owned nurseries of their legitimate business, causing them financial loss and should be prohibited from competing with them.

2—They also contend that it is not the proper function of a State to engage in this industrial enterprise more than in the manufacture and sale of any commercial product in which large amounts of private capital are already invested.

Between these opposing opinions decision should rest upon ascertainable facts bearing on the cost of producing and distributing nursery stock of the desired quality and quantity, and the prices asked for this stock by states and private nurseries, respectively, upon the demand for stock for this specific purpose and the supply of nursery stock available from states and from private nurseries.

The committee is advised by the U. S. Forestry Service that ten states re-

ported maintaining forest nurseries, the aggregate acreage of which is 140.5 acres: Connecticut, Kansas, Massachusetts, Michigan, New Hampshire, New York, Ohio, Pennsylvania, Vermont and Wisconsin. There were produced during the past year 19,058,000 plants, including both seedlings and transplants. The cost of raising this stock varied for seedlings from 45 cents to \$5.00 per thousand plants, with an average of \$2.50 per thousand; and for transplants from \$2.00 to \$6.00 per thousand, with an average of \$4.50. This covered all species, both hardwoods and soft woods. The hardwoods were in all cases seedling stock and very much in the minority. The number of plants distributed by these states amounted to 14,100,100, for which a price varying from \$1.00 to \$7.00 per 1000 was charged, the average being \$4.00 for both seedlings and transplants, as well as hardwoods and softwoods. The apparent discrepancy between the figures of production and distribution is accounted for by the fact that several of the states are themselves large users of the planting stock which they raise. There are a few states on the other hand that distribute considerably more stock than they produce, the additional amount of course being stock purchased from commercial dealers. Only two states report direct importation, the total of which amounts to less than 250,000 plants.

The committee has been unable to ascertain as to the cost of producing and distributing forestry material by privately owned nurseries.

The cost of raising forest nursery stock includes the following items:

(a) Initial cost for plant, as land, buildings, equipment, waterworks. The legitimate charge for the item of interest on investment and depreciation of equipment.

(b) Skilled supervision and overhead charges.

(c) Labor cost.

(d) Selling costs, including advertising.

(e) Legitimate profits.

These cost items vary according to the following conditions:

(a) Size of output. Overhead charges are greatly reduced with large annual output.

(b) Character of labor.

(c) Soil and climate.

(d) Assurance of definite and stable markets.

The variation in cost of production from these causes may be as great as 100 per cent.

State nurseries, in computing costs, are apt to neglect certain elements, especially depreciation, interest, supervision, and, necessarily, profits, and on a basis of equal efficiency would tend to undersell private nurseries.

The demand for nursery stock for forest planting arises:

(a) From large corporations doing extensive planting. These concerns have largely pursued the policy of raising their own stock, and are therefore seldom in the market.

(b) Smaller owners planting a few thousand trees per year. This demand is uncertain, constantly shifting, since the same persons do not continue as purchasers from year to year, and is largely

influenced by the educational propaganda conducted by State foresters. In itself it forms an unreliable basis for conducting a commercial business.

It is apparently true that state nurseries have it in their power, by developing and increasing in size and output to supply a very large proportion of the nursery stock required for private forestry plantations, and at prices which will make it impossible for private firms to compete successfully with them in this field, in the absence of an assured market for their own output.

In European countries, private nurseries have been able to produce stock more cheaply than states can grow it, and states therefore purchase their stock in considerable quantities from private nurseries, and are their main customers. Demand is steady and permanent.

In conclusion the committee presents the following conclusions and suggestions:

(a) States are at present justified in raising their own nursery stock for reforesting State lands.

(b) Sales of nursery stock at low prices by State nurseries to private parties naturally tend to encourage forest planting by individuals.

(c) Low prices for nursery stock sold by States will have the effect of lowering the prices of stock sold by private nurseries for forest planting, but only under the conditions that State output does not monopolize the demand. Should the State output keep pace with the demand, private nurseries will be forced out of their field of endeavor.

(d) The value of State nurseries as regulators of prices for forest stock is recognized, but the policy for the future should probably be for State nurseries to continue as regulators, along the lines indicated, rather than to assume permanent responsibility for the business.

(e) Present prices on 2-year seedling stock sold by private nurseries, in most instances compare favorably with State prices, while prices for 3-year transplants are, except in one or two instances, much higher than the State prices.

In view of the facts above stated, the committee recommends a policy of state purchase of such stock as may be procured to advantage from private nurseries and sale or subsequent sale to private parties, for planting purposes.

In the long run it will probably be better for both states and private land owners if states endeavor to encourage the legitimate development of private nurseries in the field of supplying trees for forest planting, while retaining the right and ability to check extortionate prices, by supplying stock from state nurseries at low cost. This policy would mean careful consideration of the elements of cost in raising stock, and of the demand and size of output required to supplement and regulate the trade, in order that the states may act with fairness to the public on the one hand and the nursery companies on the other.

The committee doubts the advisability of free distribution of material for forest planting by states and considers that better results may obtain if proper prices are charged for the material.

Your committee desires to express its appreciation of the courtesy ex-

tended by state commissioners, foresters and the owners of private nurseries for the data and information kindly submitted to it, and hope that the consideration of this subject by the association may result in harmonious relations between the forestry department of the government, each of the states and those engaged in the business, to the mutual advantage of all.

FRED'K W. KELSEY,
H. H. CHAPMAN,
H. R. BRISTOL,
Committee.

A GIANT ELM.

The Markham elm, near Avon, N. Y., of which only a small piece remains, may have begun to grow six hundred years ago. John Dunbar, assistant superintendent of Rochester Parks, and President of the Rochester Florist Association, gives this interesting account of what he has learned about the tree. "While spending a few hours one day on the estate of W. G. Markham, I was much interested in viewing the lingering remnant of the large historic elm known usually as the Markham elm. A small piece of its former self remains, and this is mainly a large limb extending over the north side of the base, supported by a stout brace to prevent its breaking down from its own weight. The immense size of this giant of the past can readily be judged from the hollowed and partial shell of the base which remains. To a lover of trees it conveys impressive lessons on the beauty and grandeur of some vegetable organisms.

"The Markham family have been acquainted with this elm for four generations and extends back for 149 years. This elm was distinctly a pendulous branched or 'weeping' tree.

"The trunk of the Markham elm was forty-five feet in circumference three feet above the ground and at noon the shade of the branches extended over an acre.

"In the spring of 1893 the north side of the tree which was mainly a shell, blew down. This was sawed across and Mr. Markham counted approximately three hundred and seventy-five rings. Estimating the portion that had decayed toward the center of the tree, he felt confident that the elm was six hundred years old.

"To have this direct evidence of the age of this remarkable elm is exceptionally interesting and valuable as a record. It places the maximum age of the American elm far above the common estimate.

"This tree was old when the Pilgrim Fathers founded the Plymouth Colony in 1620. It was in adult age when Columbus landed in 1492. It will be six hundred years on June 24th, 1914, when the Scottish army under King Robert Bruce, crushed the English army under King Edward II on the field of Bannockburn, securing for all time Scottish independence. About this time the Markham elm began its life's history."

THE NEW CARNATIONS

A Paper Read by Elmer Weaver Before The Lancaster County (Pa.) Florists' Club.

Starting with Benora, it looks like an ideal variegated, exceedingly free bloomer; stem of sufficient length and strong enough to hold flower erect. The color is good, although carrying a slight yellow cast. Growth is healthy and vigorous and cuttings root about as easy as Beacon which means you may get them rooted if you are careful, very careful, not to allow any chance for them to get too wet, too dry, too hot or too cold, don't let any wind blow over them, and a few other don't's. In transplanting from the field, plants take hold easily and in a few weeks blooming shoots are forming in abundance. On the whole it is a variety worthy of trial, though the color would preclude the growing of it universally in large quantities.

Delhi is an improved Victory and, as I personally could never muster much enthusiasm over Victory, I do not know whether or not I think much of Delhi. With us it has somewhat the habit of a sweet potato vine, the stems showing a tendency to grow horizontal instead of vertical. Even though it has formed such undesirable habits here it certainly makes enough flowers and will make as many during the season as any thing in sight. I have seen it growing in Chester County this season and can say it was a fine sight, away ahead of Beacon in the same house, having as good a stem, and better color, is a freer bloomer and not the cropper Beacon is, though the flower looks as though a trip to the laundry would improve it greatly; Victory looks like a wilted collar and Delhi the same.

Comfort has had the advantage of two seasons' experience on our place and when you visit us next season you will find 10,000 plants growing on the place. I know a number of you gentlemen are afraid of Comfort because it looks sleepy under certain conditions, but the grower who thinks Comfort sleepy and discriminates against it on that score is nearer asleep than the carnation. He had better take a nap and when he wakes up and feels fit try Comfort. It is not so high in quality as our Mr. Rohrer's seedling but will produce more money per square foot of bench surface than any red we now have.

Rosette is the fourth variety of last season's novelties with which we are experimenting and from the ultimate dollar-and-cents point of view I feel sure the best; first, from what it is showing itself to be, and second because it is one of Dörner's seedlings, all of which have made good here excepting Scarlet Glow. It differs from their other recent introductions in that its growth is heavier and that it makes plenty of good cuttings that root easily. When lifted and planted indoors it was ready for business long before Mrs. Ward, White Perfection and some others decided whether they wanted to move or not. The stem is very stiff and of good length, the flower larger than either Gloriosa or Pink Delight, deeply serrated, center well filled and of unusual depth. In

color it is perfectly clear and very nearly a Lawson shade, having none of the streaks or faded edges sometimes found in Mrs. Ward. My commission man pronounces it a very desirable shade and an excellent keeper.

One year's trial is not sufficient to determine the merits of a variety unless it shows characteristics so bad and so universal that the condemnation is general, as quite frequently, indeed too frequently occurs.

Any variety showing many good points and a few defects, is worthy of care and further trial, as something in our treatment individually may accentuate the good points and minimize the bad, so that in the end we are the gainers. Even though we unfortunately are handed many gold bricks, I feel that it pays to try at least a few of the new ones as introduced, but not so few that they do not seem worthy of your care. Then do not throw them out until you are sure there is no money in them for you, or that they are not better than the variety they are intended to replace.

This constant adding and discarding of new varieties is expensive but if you do not do it you will soon, very soon, be comparing the market reports in the trade journals with the returns from your commission firm, with the result that you will decide that the reporter for the trade journals should be in Teddy's Annanias Club or the commission merchant in jail, while the cause usually is to be attributed to your own lack of business acumen in keeping up with these progressive times.

Some years back we experienced something like this. Mrs. Lawson was given a trial in a small way and in a careless manner, with the result that we discarded it the first season as no good, and you all know that we did not know anything at that time when we said Mrs. Lawson was no good, and that we lost good money by our hasty action. Later on when everybody was doing it, well, we bought stock again, but we lost several seasons when the flowers were bringing big money.

A present-day parallel is Gloriosa, about the grandest we have had up to the present time. I have made many inquiries regarding this variety and have had a great variety of replies, never realizing before how many people are affected by various degrees of indecision. Several are propagating and buying all they can get of it; others say frankly they are going to discard it, while others are up in the air and don't know yet what they want to do.

The chief objections to this variety are its lack of desire to reproduce itself by a cutting and its lack of growth in the field. These faults should not deter us from experimenting until we overcome them. This tendency to run to a flowering shoot in a short space of time can be partly overcome by topping part of the shoots when bringing them in from the field. If we can get the results Mr. Brinton has we would certainly be foolish to discard it.

CARPET BEDDING

The editor of "Moeller's Deutsche Gaertner-Zeitung," Mr. W. Dambardt, recently sent to the leading landscape gardeners and park superintendents the following question:

"What do you think about the carpet bed, and what is your opinion of its artistic resurrection?"

The answers which are now published in this, Germany's first horticultural paper, are so interesting to everybody engaged in outdoor gardening that we have had them translated in their essential paragraphs by Mr. G. Bleicken and they are here presented for the benefit of our readers.

E. Barth, Supt. of Public Parks of Charlottenburg.—The absolute rejection of carpet bedding is to be lamented. Necessary for a good bed are: clear design, pure colors and a position for the spectator from whence he can overlook the whole at right angles. The lines of the design must not be shifted in the perspective. They appear always best when looked at from above, say a balcony. Planting in palms or dracaenas, etc., to give them height, as is done, is contrary to their purpose. Their use should be restricted to the more conventional part of the garden in the vicinity of the house; in a public park very few locations suitable for them could be found.

A. Broersma, Supt. of Public Parks of Berlin.—Carpet bedding has come into bad order through mechanical imitation. People who today put white-painted garden furniture, etc., everywhere err the same way as did our carpet-bed manufacturers of the past century. I am convinced that the carpet bed is coming to its own again in the near future; not the kind that looks like fancy cake, but after the style of old Italian and French carpet bedding, which were designs by real artists. A proper location is the first requisite for good carpet bedding.

Theo. Goecke, Professor of Architecture of Berlin.—The carpet bed had become a lifeless imitation, a toy thing without artistic merit; therefore it was rejected. It is only a step from modern colonization of large quantities of plants in grass lawns back to the old artistic carpet bed. It all depends on the artist who makes them.

I. P. Grossmann, Landscape Architect of Berlin.—The carpet bed correctly used is a fine ornament in a garden. Two points are to be kept in view: (1) location of bed, (2) composition of form. Especially is the first point singled against, as a carpet bed has no place in a natural landscape, but only in a formal garden. It is the ground line in a given garden or court, and it must never have height except where height be made through plants, vases or statuary, etc. The main reason for failures can be traced to the habit of drawing out a carpet-bed design on paper and believing it will look like the drawing in reality, forgetting that the perspective shortens all surfaces. They must be drawn so as to not shorten surfaces nor intersect lines, and so become simply distracting. Few and quiet lines are to be recommended. The composition of color is pure individual art; but one leading color should occur, and pure colors are essential. Time and tradition will bring back to us the carpet bed.

G. Hannig, Supt. of Cemetery of Stettin.—The carpet bed as it was a decade or so ago should not be mourned; it only showed off the technical skill of the gardener. In all ornamentation one must take into account the material; this we call style. There was no style in carpet beds any more. Any figure put on paper was all right for a carpet bed, and plants had to be clipped to fit certain lines of the design. Such things are always wrong and violate the very fundamental laws of art in planting designs. A short time ago an artist in furniture-making had exhibited a flower garden design, which was patterned after a real carpet. Such things must be wrong, because the weaving of the material for a carpet is a different question from the planting of live plants, and plants themselves are different from wool

or cotton or other weaving material. Yet I would not say that a sort of transformed carpet design could not give a good carpet-bed design. The famous beautiful Doges palace in Venice, one of the most beautiful buildings on earth, is without doubt built after the design of an old oriental rug; nevertheless the facade of the palace is not a "carpet of stone," because a master artist designed the Venetian palace and he took only his motive from an oriental rug. On the whole, I should say beware of carpet bedding, as we have as yet not even good designs in carpets themselves.

E. Hardt, Landscape Architect in Dusseldorf.—Carpet beds must have in them low growing flowering plants, and the design must harmonize with its location. No objections could be made to it if the colors and the form are chosen correctly; low tunes in harmony with the light in our northern skies, instead of the lawn carpets and the affected flowering greens—the carpet bed.

A. Lichtwark, Director of Art Museum in Hamburg.—The carpet bed has had no place in the modern landscape park. In a formal garden it may have its place, that is if the maker of it is an artist. Theory will be of no avail; all depends on the designer.

Henry Maas, Lubeck.—The carpet was a sort of indicator of a gardener's ability as a plant grower, but no work of art. The carpet bed of the gardener was the stucco ornament of the architect of old. But I see no reason why a carpet bed in its proper place will not come back in some future time.

Liebrecht Migge.—The question is of great importance. We wanted flowers instead of rigid leaves, and we have them now; and instead of carpets we got walls of flowers in our big flowering beds. I am going to make some carpet beds at the next international exhibition at Leipzig this coming summer. The territory lies in a low plain there. If one avoids the rock of ornamentation in carpet bedding, I believe one can today summon back to life the old profitable art of carpet bedding.

J. F. Muller, Landscape Architect, Geisenheim-a-Rhein.—Carpet bedding is an art of planting in level surfaces, not of planting into space. The distribution of carpet beds has been done wrongly in many cases also. Modern ornament shows a certain compactness of forms. I have had success in using for foundations of designs, the circle, the ellipse and the spiral. Echeveria metallica and dumetiana are good plants for such work. Attention to the level character of carpet beds and to a similarity in the plants employed, will give better results.

Franz Wirth, Landscape Architect, Frankfurt-on-Main.—Nothing changes more than does opinion in art. I believe carpet bedding will come back soon. As edging for flowering beds or in place of small lawns it can be used with good taste. All plastic treatment of carpet bedding is wrong art.

F. Zahn, Landscape Gardener, Steglitz.—The modern tendency for formal gardens will lead again to carpet bedding, but plastic carpet bedding is a self-evident contradiction; a carpet is always only a surface. No copying of old designs, but simple ornamental divisions, will bring back new modern carpet beds of taste—as enclosure for small lawns, for instance.

Baron W. v. Engelhardt, Supt. of Public Parks, Dusseldorf.—As long as there exists so little knowledge of the relations of garden parts, devoted to some special purpose, to the garden as a whole organism or to a park, carpet beds had better be restricted to the formal garden only.

Willy Lange, Landscape Architect, Dahlem.—When the public has become tired of the glaring masses of salvias and scarlet pelargoniums, they will call back the carpet bed. Many people enjoy the fine pretty workmanship of the small scale in the carpet beds.

W. P. Tuckermann, Charlottenburg.—Carpet beds should be planted in variation with solid flower beds of fuchsias, cannas, dahlias, etc. We have not yet had good results with large masses of flowering plants, neither in solid colors nor in the herbaceous garden. This is because masses of greens, as lawn grass for instance, look

different from masses of solid red or yellow or blue colors; they look often too small for masses, and then again if very large they remind us of the commercial nursery. Certain flower borders and certain centre pieces will always be necessary, but they must be put in their proper locations. But we must learn more about effect of colors; for instance, sunny locations are more beautiful by different colors than are shady sites.

OF INTEREST TO EASTER PLANT BUYERS.

Nineteen hundred and thirteen promises, from all we can learn, to be an exception to the run of seasons for many years past. Heretofore we have had an abundance of everything seasonable, and buyers could get their supplies at prices very much in their own favor. This year it looks as if there would be quite some scarcity among the staple plant lines—especially in lilies and azaleas. In lilies the trouble seems to come from two points: One being "junk" bulbs used to fill orders at the last minute; the other, the difficulty to get good bulbs in flower for so early an Easter. As to the azalea, the large increase in price in Europe owing to scarcity, and the small profits to growers here, in past years—owing to competition and losses—has curtailed planting to a considerable extent, and buyers will find this year, that if they are to get anything like their quota of good azaleas, they will have to get busy very quick.

On the other hand it seems as if the supply of some other plants would to a certain extent make up for this shortage in these two great Easter staples. Among these we think the most important is the spirea. We have never seen this fine Easter plant in greater abundance or better done or in better form. Dollar for dollar and in style and elegance it tops the list. The favorite varieties are Gladstone and Queen Alexandra. Next to the spirea comes the rhododendron. We have seen some fine blocks of this in remarkably well done shape for Easter. Another good old standby which more than holds its own is the hydrangea—especially the new French varieties such as Gaillard, Avalanche and others in white, pink and lavender. Some of them have florets big as a silver dollar, beautifully fringed and with trusses of great size and abundance. The Rambler roses are, of course, a feature, one of the finest this year being "Baby" Tausendschon. Phyllis and Orleans "Baby" are also in the running as well as the old form. Magnas, Kaiserins and Richmonds are also favorites in the hybrid class. Lily of the valley in pots and marguerites are to be had in abundance. In the latter the Queen Alexandra holds a conspicuous place.

The foregoing notes have been gathered and digested from our study of conditions this year in and around Philadelphia where many growers make a specialty of Easter plants. Perhaps the largest and most comprehensive of all these growers, with the biggest stocks and the largest variety of subjects, is the establishment of the Robert Craig Co., at Market and 49th streets and at Norwood. We are indebted to them for courteous explanation of the general situation this year to a large extent and commend them to our readers who may feel like calling on this market for their supplies.

CHRYSANTHEMUMS IN THE LONDON PARKS

The Northern Suburbs.

For many years past those of the London parks which are under the control of the London County Council have provided for the benefit of the public gratuitous displays of chrysanthemums lasting from about the middle of October to the middle of November. What are known as the Royal parks—that is, St. Jame's, Regent's, Hyde Park, etc., do not provide this highly appreciated display.

It may be assumed without further explanation that the attendance of visitors varies. At some of the parks there is an enormous crowd, especially on Sundays when a long line of eager sightseers has to be regulated for some hours. The finer the day the more visitors and even on week days—Saturday afternoons for instance—the number is very large. If you are a specialist it is amusing to mingle with the crowd and listen to the comments. Sometimes a little group of amateurs get together and in a critical frame of mind pass their opinion with a freedom that shows a fullness of knowledge of the art of chrysanthemum culture.

We begin our round at Waterlow Park, the northernmost of all. It is situated on the heights above Highgate Hill, a place of some historic interest as our readers will remember who have heard the story of Dick Whittington and his cat. The underground tube railway takes us to the foot of the hill and a tram car does the rest. But a fine autumn morning encourages us to wander gently up the hill, and in doing so we are rewarded by a sight of the stone that marks the spot where Whittington as a poor boy journeying to the great city sat and rested, and as the story goes, heard the bells of Bow church ringing and heard, or fancied he heard, in their music the words:

Turn again Whittington,
Thrice Lord Mayor of London.

Every boy, or, at any rate, every British boy, knows the story. The stone today is at the edge of the pavement opposite a public house of the same sign. It is enclosed within an iron railing and surmounted with a gas lamp. On two sides of the stone is the following inscription:

Whittington Stone.

Sir Richard Whittington

Thrice Lord Mayor of London

1397—Richard II.

1406—Henry IV.

1420—Henry V.

Sheriff in 1393.

This stone was restored, railings fixed and lamp erected, A. D. 1869.

We wander on, slowly up the hill, and think how different are the surroundings from what they were in Whittington's day. London has encroached upon the country; its never-ending ugly rows of bricks and mor-

tar push in all directions and absorbs old-time country villages and hamlets in its rapacious maw. At length we reach St. Joseph's church and alongside is a little lane with an entrance to the park. London owes this park to the generosity of Sir Sidney Waterlow, himself a Lord Mayor. It is a charming old-world place, formerly a private residence, and of which we may say more another time.

The greenhouse in which the chrysanthemums are staged consists of several divisions, the first one, or entrance, being the most capacious. It contains a bank of plants right and left, tastefully arranged with ornamental greenery, and we notice Japanese, singles and a few of the best-known decoratives help to enliven the display. The varieties are mainly older ones than we see at our society's shows but they are admirable for the purpose of public display and are chosen more for variety and brilliancy of color than for size and prize-winning points.

The next house is rather narrow and it is evident it is a case of adaptation. The house was never built for a public display, but many rich decorative effects have been obtained. The next house is similar with the exception that singles are a little more freely used. Buttercup, a grand yellow incurved, strikes us here as being worthy of a note of commendation.

As we approach the exit in front of us lies an old-fashioned hardy herbaceous garden. It is past its best at this date, but a few little bits of color remain. Michaelmas daisies, early chrysanthemums, *Anemone japonica*, geunis, sunflowers, hydrangeas, stocks, evening primrose, etc., are making their last effort and then farewell. It is here that can be seen the Shakespeare garden. At the corner of the cross walks there is a tablet notifying the fact and we may at some future time have just a few words to say about this attempt to collect in one group all the plants and herbs mentioned by the great poet.

We have now to make our way to Finsbury Park, a very different kind of place, for it is much larger in extent and on a dead level. Formerly there were two displays here but the old wooden chrysanthemum house, near the manor gate, has been abolished and the show is now held in the large conservatory hardby. The grouping is most tastefully and artistically done and the plants are finely grown. Big solid substantial blooms in all sections are displayed which bear testimony to the capacity of the grower. There is a good display of *Pteris* and other ferns used as an edging. Altogether there are about 2500 plants in pots. Roughly speaking the visitors average 500 daily, but on Sundays they total something like 8000.

Victoria Park is properly North East. It is situated in a densely crowded part of the city where the working class dwell in large numbers. It is a very large park, well kept, and a great boon to the denizens of this locality. The chrysanthemum show here

has always been one of the most attractive, the variety and extent of the display being the chief factors. The house is a span 25x100, and as we enter it we look around and see a long roadway leading to it, bordered as far as the eye can reach with groups of brightly colored pompons and others showing the outdoor capacity of the chrysanthemum as a town flower. Inside the house we find the collection arranged right and left in two sloping banks of brilliant color and a serpentine path running from end to end. We are conscious as soon as we enter of the skilful decorative talent of the superintendent. It is beyond all praise and difficult to describe. Rising high above the banks of color at intervals are arranged great bushes of singles and decoratives. The crossbars of the glass structure have Glennys and Rundles trained to them. The ends and sides of the house seem to be covered with a carpet of living blooms of the most freely flowered varieties. Each bay of the roof has a different color trained up under it and beneath, of course, are the big show blooms. As an edging dwarf plants of singles are freely employed.

C. HARMAN PAYNE.

A CO-OPERATIVE ADVERTISING SUGGESTION.

The Sales Promotion Department of the Daily Newspaper Association has sent a copy of the following letter to the secretary of every Florists' Club in the country:

Dear Sir:—

Is the magnitude of the florist business in general what it should be? We think not.

First of all, the retail florist does not think it worth while to let the public know where his place of business is, or that he is in business at all, or that there are such things as flowers in existence. He does know that a certain few of the well-to-do or wealthy class buy flowers at all seasons—no matter what the price—but overlooks the fact that multitudes might "get the habit" if reminded daily that flowers are within their reach.

We suggest that in every community where there are several florists, every day in the year in the local newspapers of such communities an advertisement be inserted simply advertising "FLOWERS."

This daily reminder would soon have the effect of educating the public to buy flowers, and the dealer would reap the benefit in manifold sales. His increased business means more business for the grower, and this means more business for the importer, and so on. Thus, you see, everyone is benefited.

You may have the idea that the cost of advertising is too much. The average rate per line for space in the leading newspapers in twenty of the largest cities is but 16 2-3 cents, and in smaller cities it is much less. Say, there are five florists in each community to share this expense; that would mean a trifle more than 3 cents per line each day for each dealer, and he gets that back several times over in his profit on the sale of a single rose.

Will you not be good enough to submit this letter to the members of your club at the next meeting? If you are in the least interested, please let us tell you more about newspaper advertising and how to do it economically and effectively; and if there is any further information any of your members desire on the subject, please do not hesitate to write us. Any advice or co-operation within our power will be cheerfully given without the slightest obligation on your part.

CARNATION CULTURE.

Paper Read Before the Morris County Gardeners' and Florists' Society, by G. Neipp.

No Excuse for Poor Flowers Now.

Within the last fifteen years more progress has been made in the culture of the carnation than of any other flower. Yet when we visit the flower markets of the large cities we find alongside of the finest carnations lots of very poor ones and one cannot help asking why florists keep on growing such rubbish that never pays for the work, not to say expenses. There is no excuse whatever, since there is no longer any secret in carnation culture and it costs little, if any more to produce good flowers than poor ones.

Good carnations can even be produced in small houses, if they receive the proper treatment, and yet I have seen produced in good up-to-date houses the poorest carnations I ever laid my eyes on. Ignorance is no excuse, since we can read articles on carnation culture from the best authors in the country nearly every week in our trade papers. We can get plenty of information in our societies and we don't need to go far to see good carnations grown in an up-to-date establishment. But the trouble is mostly that these so-called carnation growers are too conceited to look for any information, or, as some fellows I have met, they would not believe anybody. Others gather all information they can get but have not the brains to work it out. If somebody suggests that their carnations need feeding they would overdose it, or if told that they keep their plants too dry, or too wet, or the houses too warm or cold, they would fall into the other extreme. I once had a neighbor who had four small greenhouses and always kept them too warm, never had any success with carnations, yet he said if he had the money he would keep the houses at 90 to 100 degrees for carnations, and I think he has now only one greenhouse instead of four.

Propagation the Foundation.

As in any other plant culture, in carnation culture propagation is the foundation upon which to build up the structure necessary to success. Therefore the greatest care should be given to selecting the stock and the production of healthy and well-rooted cuttings. Many cuttings are spoiled by putting them too deep in the sand, shading too much, keeping too wet, or too warm, and also by waiting too long in potting them up. They should be potted as soon as all cuttings which are placed in the sand at the same time are rooted. Some will have a little longer roots than others, but this cannot be helped.

I use 2½ inch pots and a good live soil without any addition of manure or fertilizer. As soon as the pots are full of roots, but before getting pot bound, and while too early to plant in the field, we knock out the plants and plant them in a bunch, or sometimes in a cold frame, according to season and weather, using about the same kind of soil as in potting.

As soon as lateral shoots start to show on the bottom, we pinch out the main shoot. The young plants should be kept in a light house with plenty

of ventilation and the temperature kept cool. It is of much importance to have the crown of the roots never covered more than ¼ inch as this prevents stem rot and insures a healthy growth. As I only practice field culture, I shall not touch pot culture.

Summer Treatment.

It is of much importance what kind of soil and location is available. The soil should not be too heavy nor too light, but almost any kind can be used if properly treated. I prefer a field almost level or with a slight slope, to give water no chance of standing after rain, but not steep enough to make washing out possible. The field should be well manured in August or September the previous year, and plowed and harrowed several times. A late plowing should be done in November and the surface left in a rough condition. No field should be selected without good drainage. In the same manner we prepare our bench soil, only manure heavier and keep on plowing and harrowing until we bring the soil inside.

The field to receive the young plants is plowed again in spring as soon as the soil is dry enough, and the surface smoothed off with the harrow. As soon as steady weather can be expected all hands join in planting out, planting in rows 15 to 18 inches apart. Again I see to it that the plants are not planted too deep, just a little bit deeper than they stood in the pots.

A Bit of Experience.

This reminds me of my first experience with carnations in this country, seventeen years ago. It was my first job in a plant-growing establishment of sixteen or eighteen rather small houses. Three of the houses were devoted to carnations, but I started in March and the houses looked more like geranium houses, as most of the carnations had died and geraniums in four-inch pots took their place. We also had probably 10,000 young carnation stock in a sash house—some in pots, the others in flats in about two inches of soil and all looking as yellow as a lemon. When planting time came we brought them out to the field—pots, flats and all. From the flats we had to cut them out in squares and then the boss told us to plant as deep as possible, showing me, as a greenhorn, how deep, which was about 2 inches soil about the roots. The soil being very sandy—in fact, all sand—I did not wonder much about deep planting, but I found out later on when many plants rotted off just above the ground after some heavy rains.

In the latter part of August they were to be benched, the boss with his brother doing the planting and I having the pleasure of bringing in the plants. This, of course, gave me a chance to see how they did it. They dug a big hole in the soil, nearly to the bottom, stuck the plants away down and the ends of the roots, which were very long and few, stuck up. Then the hole was filled up and the ends of the roots frequently stuck out

of the soil. I could not help asking—"Do you expect these plants to grow?" The answer was: "They don't need to grow, they must only flower." The growing was done in the field." I was thoroughly speechless, but thought this must certainly be a great country if they could make carnations flower without growing. But one day a friend asked me how I liked the job and I said "first rate, I think it's a good place to learn how things should not be done," and he laughed. I did not stay much longer, but had a chance to carry out a good percentage of those plants to the dump heap; and the next spring I had a look at the houses but most of the plants were gone, the geraniums taking their place again.

Benching.

But to come back to the field—we start cultivating with the wheel-hoe as soon as planting is over, going through once a week. As soon as the plants have made some growth, topping commences, to form the plant and also to prevent flowering which would only stop the growth to some extent. By July first the plants should be large enough to be benched, and as the old plants are usually thrown out there is no reason why preparation ought not to be made. After the old plants and soil are carted out, the benches ought to receive a thorough cleaning and white-washing and also all the necessary painting should be done before the benches are filled again. As soon as the soil is on the benches all hands have to get busy and get the and bringing in. Care should be taken to leave some soil on the roots, as the plants will grow on much quicker. As soon as a number are planted they should be watered. But I would not soak the bench all through at once, but would rather go over the same place three or four times until the soil is all moist, but not real wet, as root action will be slower in a very wet soil. The house should always be well ventilated and the atmosphere kept as cool as possible.

I put no shade on after benching, but a light shading in spring which gradually wears off. Watering for the first few weeks should be done carefully. Some recommend to plant in a depression and water each plant separately, but I would rather plant on a hill and have the water run away from the plants. Of course, the plants should never suffer for want of water. In one large house I have installed an irrigation system, which I consider ideal watering in the summer months as it leaves the soil always in a loose, open condition, so that no cultivation is needed, except weeding, which should not be neglected.

Watering and Temperature.

As soon as planting is done, we give the first support, using the well-known wire rings with two legs stuck in the ground. They keep the plants in a natural round shape. Soon flowering shoots grow up and we put another support in place. This time we stretch wires lengthwise and twine crosswise.

Gradually, we put two more on, making four in all, each six inches above the other. Disbudding should commence as soon as the buds are large enough to handle.

The plants consume more water now and should never be without sufficient moisture, although not be overwatered. On a dull day, watering should not be done and while the plants enjoy syringing in the summer months they will not do so when the days are getting short and the sun low. As soon as the nights get so cold as to make it impossible to keep the temperature at 48 or 50 degrees with some air on at night, a little heat should be given to keep up the temperature and give the desired results. Throughout the winter months ventilation should be given as much as possible. Even when the outside temperature goes down to 19 or 20 degrees above zero, a crack of air should be given to keep the air pure and moving.

Feeding and Mulching.

In October the plants can usually stand a little feeding and if no bone or other fertilizer has been mixed in the soil before bringing the plants into the house, I usually put either a sprinkling between the plants and cover with a light mulch consisting of half soil and half sheep manure, or mix the fertilizer with the mulch, the latter way being preferred. This fertilizer should not contain more than three per cent. of nitrogen, but can be rich in phosphoric acid and potash. I warn against the use of nitrate of soda, blood, ammonia or tankage, at any time when the plants are in bud or flower, as they will come bullheaded and will not keep. Mulching not only gives nourishment, but prevents the formation of scum and keeps the surface open to admit the air. I usually put it on half an inch and later on repeat it several times. Toward spring manure watering will be beneficial, but the manure water should not be too rich and should be made with cow or sheep manure. As long as the plants make a heavy growth with dark and broad leaves, feeding is not needed.

Enemies.

This is all I can say about the culture of the carnation, but we must not forget our little enemies. The first one in the season we usually notice is the so-called thrips. We cannot see much of him, but suspect his presence when some of the shoots come out twisted and crippled, and when the buds show color the edges of the petals on white flowers look burned, while on colored varieties they look striped. A few good fumigations or sprayings with tobacco extract in short succession will clean out this pest.

Aphis or green fly appear very persistently, but will also be killed by tobacco or other insecticides. As a rule I have carnations sprayed once a week with tobacco solution during the whole season. Just after benching, the plants are benefited by a spraying with Bordeaux mixture against both fungus and insects.

One of the worst enemies is Mr. Red Spider, as he will not succumb to fumigation of any kind, not even to hydro cyanic gas as has been frequently recommended. I know by experience that the plants would have to be killed first and then the spiders starved to death. I find Aphine will kill all that

can be reached, but is a little expensive in bad cases. After all, good and persistent syringing is the best cure.

INDIVIDUALITY AND SPECIALIZATION.

Dear Sir:—In a recent number of *HORTICULTURE* Mr. R. Rothe writes an article on individuality in horticultural craft and art; this article will not, to my belief, throw any more light on our horticultural problems of today, but invites criticism very much, although his warning against imitating opinions, practices and methods of others blindly and without own reasoning, is timely. But he confuses individualism with specialism, if I may use such a word. This is plain, when we follow the article to the lines describing the enthusiastic business meeting of Mr. Rothe's friend, where he says "Receivers of dividends, gentlemen of high individuality, and respectability, on one side; on the other side young assistants, plant propagating, budding, hybridizing, packing, labeling, doing a hundred and one kind of things, etc., etc."

Just look into one of the books on political economy, etc., of today and you will find that not more than 5 or 10 per cent of those young men ever become those receivers of dividends on the other side. What of the 90 per cent that never become one of those gentlemen of "high individuality and respectability"? Well, they become specialists who command good living wages, which they demand rightfully, and enjoy quite contentedly. Individuality has much to do with the capital "I" when not checked by stern social obligations to and for others; the originality which Mr. Rothe wishes to further through individualism of today is the kind that allows nobody else besides his own greatness.

We want now in our times strong individual exertion but only for a common cause and for a common end; or, speaking personally of florists and greatness, I believe, we want no individualism either for the end of getting the best hedge or flower bed, or garden, or largest cut flower vase at a show and that sort of thing, but we want individualism and individual labor and exertion to the utmost limit in order to advance one of the great plant cultures in modern gardening, one new artistic conception in garden making—call it what you may—or to help bring about true ideas in decorative floral designing or to help to discover the right roads in numerous other horticultural fields.

There are plenty of good leaders today, plenty issues to stand up for, plenty questions to take sides either for or against; and that is to me the most-needed endeavor in our times, i. e., to be able to choose good standards. To learn to choose good standards today rather than originate new standards, seems to me the key to success for a young man who should enter our craft and art.

Finally allow me to remind you, that Mr. Rothe, when he quotes from Freytag's novel "Shall and Have," he quotes from an age where the patriarchal system between employer and employee existed. Now we are in many cases employees, or—some of us—employers (say partners) in soulless firms and corporations—we allow for all due exceptions naturally. So

those quotations of Freytag, the novelist, do not fit our age where we have seen the old patriarchal individualistic system of society go to pieces. As they say we are "from Missouri"; we have to be shown. But if Mr. Rothe means by more individuality in horticulture the nursing once more of the neglected craft of horticulture besides the overestimated science of horticulture and the art besides the business of horticulture and if Mr. Rothe sees more in a yellow dandelion in its place, say on a workman's cap in early springtime, than in the biggest and best-grown show roses in an ugly fountain or umbrella-shape design, sticking in an ugly pressed glass vase, then I would like to shake hands.

Or if he sees more in a lot of well cultivated plants, any kind and anywhere on God's green earth, than in hair-splitting controversies over botanical questions, over correct or incorrect names or in novelty chasing, or in office or lecture-room gardening, then once more I will call him a fellow gardener.

GERHARD BLEIKEN.

PHILADELPHIA NOTES.

We had our friend, P. Welch of Boston, with us a few days last week. That is: we thought we had him; but he suddenly disappeared, which goes far to prove the old saying that Boston isn't a place but only "a state of mind." It developed later that a telegram arrived which chased the visitor in haste to Montreal. He stayed long enough, however, as to almost convince Commodore Westcott that via Boston is the way to go to the Minneapolis convention next August! It is to smile.

Judging from the amount of mail orders received, M. Rice Co., predicts that this Easter will be the biggest ever for the florists, all over the country. Last month showed the largest volume of sales for February in the 27 years this firm has been in business.

Visitors: John Sambrook, Troy, N. Y.; J. V. Phillips, Brooklyn, N. Y.; Edward Wickersham, Pottstown, Pa.; J. F. Horn, Allentown, Pa.; D. H. Mish, Lebanon, Pa.; A. H. Schaeffer, York, Pa.; M. F. Hayden, Wilmington, Del.; Mrs. Weber, Fairmount, W. Va.; Chas. Vorkeller, South Bethlehem, Pa.

WASHINGTON NOTES.

A rose show is to be held in May next by the Brookland Citizens' Association, in Lord Memorial Hall, Brookland, D. C., during which prizes will be given in the various classes. This is the second annual show held by the organization.

The eight-hour law for women failed to pass the House of Representatives before that body adjourned and in order to be enacted into law it will again have to be introduced into Congress. The bill is not viewed with favor by those florists and other merchants who utilize female labor and for the former Z. D. Blackstone recently appeared before the Congressional committees protesting against its enactment. The bill will eventually be passed but possibly not in its present form.

Visitors.—Mr. Poehlmann, Jr., Chicago; Mr. and Mrs. J. W. Grandy, Norfolk, Va.; Harry Jones, Philadelphia, Pa.; J. V. Phillips and wife, Brooklyn, N. Y., and Charles Dudley, Parkersburg, Va.

CLUBS AND SOCIETIES

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The night of March 4 was very interesting, with an attendance of 80. The subject of the meeting had been changed from "Easter Flowers" to "Carnations." Fred Burki made a few interesting remarks on his experiences with the various carnations now commercially prominent. Mrs. Ward, Beacon, Benora, Pink Delight, White Enchantress and Winsor were all favorably spoken of.

Gloriosa, he said, gives occasionally a very fine flower, and he was delighted with it the first year, but it is not holding out as good as expected. He plants more white than any other color. For Rosette he has never met with much demand in Pittsburgh. Being asked to name the three best whites he gave White Enchantress, Perfection and White Wonder. For pinks he named Mrs. Ward, Winsor and Pink Delight.

The judges, F. Burki, P. S. Randolph, Jr., and Wm. Falconer, reported the following awards:

To Scott Brothers, Elmsford, N. Y.: A first-class certificate for a splendid, new scarlet carnation, Wm. Eccles; long and stiff stems with magnificent large, scarlet flowers.

To Chicago Carnation Co., Joliet, Illinois: A first-class certificate for Herald, a splendid bright scarlet carnation; fine large perfect blooms, and big stiff stems.

To James D. Cockcroft: A first-class certificate for "Northport," a very beautiful, large deep pink flower, fine calyx, and long, wiry stems.

To George J. Learzaf, Mt. Washington, Pittsburgh: A cultural certificate for a fine group of splendidly grown carnations.

To C. Becherer, Dixmont: A certificate of merit for very beautiful, perfect, scarlet blossoms, seedling carnations.

To Pittsburgh Cut Flower Co.: A certificate of merit for vase of Benora carnations; a most beautiful, finely developed, striped flower; a good grower, free bloomer and healthy.

To the Pittsburgh Cut Flower Co.: A cultural certificate for several large bunches of excellently grown standard varieties of carnations, including White Enchantress, Beacon, Rosette, Winsor, Gloriosa and Pink Delight.

To Schenley Park, Phipps Conservatories (Geo. W. Burke, Supt., and Jno. W. Jones, foreman), for an extensive group of finely grown hyacinths, tulips, narcissus, oh-conica primroses and chenille plants; all finely grown specimens.

About 9 P. M., Prof. Jennings of Carnegie Institute began his illustrated lecture, "A Trip with a Botanist Along the North Shore of Lake Superior." The pictures were good and the plant and animal life of that region vividly described.

After the lecture we all adjourned to the Dutch Room where on tables adorned with the flower exhibits of the evening light refreshments were served, bringing to a pleasant close a very full evening.

H. P. JOSLIN, Sec'y.

A CLUB VISIT TO WAVERLEY, MASS.

The visit of the Gardeners' and Florists' Club of Boston to the plant houses of the W. W. Edgar Company last Saturday was a most pleasant and profitable occasion, enjoyed by about 75 of the members, including a good representation of ladies. The tour of the houses glowing with Easter beauty was a floral feast in itself. Following it a nice lunch was served, after which

remarks appreciative and complimentary to the founder of the establishment and the present management and staff were made by President Kennedy, Thomas J. Grey, A. P. Calder and others. Mrs. Edgar, Robert Edgar and Mr. Bartsch extended a hearty welcome and dispensed hospitality without stint. Calls were afterwards made at the establishments of Edgar Bros. and Peirce Bros., at each of which places prosperous conditions were found.

BUFFALO FLORISTS' CLUB.

The annual meeting and election of officers of the Buffalo Florists' Club was held on Tuesday evening, March 4th, at the Bismarck Cafe, where also the annual banquet was held. With President Greever in the chair, the regular routine of business was transacted and a number of new applicants taken into the club. The following officers were elected for the ensuing year:—President, Wm. Legg; vice-president, Fred Brown; secretary, G. D. Savage; financial secretary, W. H. Eiss; treasurer, E. C. Brucker; directors, Charles Guenther, W. A. Adams and Prof. J. F. Cowell. The banquet was quite a success, although a much larger attendance was expected. The able toastmaster, Louis Neubeck, filled the position to the entire satisfaction of all. Brief remarks by the retiring president and also the new president were to the point. Wm. F. Kasting was heard from, also W. A. Adams, F. C. Brown and the newly elected officers. Several out-of-town guests were present; among them were Henry Weber, F. G. Lewis and C. T. Guenther who never misses the annual affair. The banquet room and table was well decorated and music was furnished by the Bismarck orchestra. A very enjoyable evening was had by all.

E. C. B.

ILLINOIS STATE FLORISTS' ASSOCIATION.

The Illinois State Florists Association had a good representation at its eighth annual meeting at Peoria, Mar. 4-6, and all declare it one of the best meetings ever held, with plenty of praise for the way they were taken care of. All the officers were reelected. President, Charles Loveridge, Peoria; vice-president, C. W. Johnson, Morgan Park; treasurer, F. L. Washburn, Bloomington; secretary, J. F. Ammann, Edwardsville. The attention of the members was called by Thomas E. Franks, retail florist of Champaign, to the disposition of the flowers from the experiment station at Urbana, which he did not consider fair competition. A discussion, but no decisive action, followed. There was a fine exhibition, of which the following is a list:

Geo. A. Kuhl, Peoria.—Miscellaneous plants, baskets cut flowers and table decoration.

W. H. Gullett & Sons, Lincoln.—Cyclamen, ferns, lilies and potted roses, carnations Gloriosa and White Enchantress.

Frank B. Smith's Sons, Danville.—Pansies, cyclamen, violets, carnation seedlings, etc.

Fred M. Hansen, Peoria.—Cyclamen and sweet peas.

Frank E. Rue, Peoria.—Table Killarney roses and pink sweet peas.

E. C. Amling Co., Chicago.—Sweet peas, lily of the valley, etc.

Chas. Loveridge, Peoria.—Baskets of flowers, centerpiece orchids and lily of the valley; roses, lilies, etc.

Wendland & Keimel, Elmhurst.—Killarney, White Killarney, Rhea Reid and Antoine Revoire roses.

Poehlmann Bros. Co., Chicago.—Roses Killarney, White Killarney, dark Pink Killarney, Richmond and Antoine Revoire, also carnations.

Vaughan's Seed Store, Chicago.—Bulbs, gladioli, lilies, etc.

Mount Greenwood Cemetery Association, Chicago.—Carnation seedlings, etc.

Henry Baer, Peoria.—Carnations.

A. Washburn & Sons, Bloomington.—Prince of Wales violets.

BUFFALO FLORISTS' CLUB BANQUET

Swan Peterson Floral Co., Gibson City.—Enchantress carnations.
 A. C. Brown, Springfield.—Carnations.
 W. C. Hill Floral Co., Streator.—Carnations.
 Arvid Anderson, Moline.—Seedling carnations.
 E. G. Hill Co., Richmond, Ind.—Carnations.
 A. N. Pierson, Inc., Cromwell, Conn.—Rose Milady.
 A. Henderson & Co., Chicago.—Carnation Philadelphia.
 G. Swenson, Elmhurst.—Sweet peas.
 Bassett & Washburn, Chicago.—Roses Rhea Reid, Sunburst, Lady Hillingdon, also seedling carnation.
 Chicago Carnation Co., Chicago.—Carnations Gloriosa, White Wonder, White Enchantress, The Herald, seedlings No. 86, and other seedlings.
 John Steidle, Olivette, Mo.—Seedling carnation.
 Cottage Gardens Co., Queens, N. Y.—Carnation Matchless.
 H. N. Bruns, Chicago.—Lily of the valley.
 Travis Grate Co., Henry, Ill.—Rocker grate.
 Raedlein Basket Co., Chicago.—Baskets. Certificates of merit were awarded to E. G. Hill Co., for carnation Commodore; A. N. Pierson, Inc., Cromwell, Conn., for rose Milady; A. Henderson & Co., Chicago, for carnation Philadelphia; G. Swenson, for winter-flowering sweet peas; Chicago Carnation Co., for carnation The Herald.

CONNECTICUT HORTICULTURAL SOCIETY.

Cineraria Night, February 28th, brought out a splendid collection of blooming plants of this favorite flower. President Huss showed fifteen varieties of hybrid dwarfs, including some of the cactus type. Alfred Cebelius exhibited *C. stellata*. George W. Fraser of Storrs Agricultural College, Schizanthus Wisestonensis, and a promising seedling carnation, A. G. Gulley, cerise pink, a cross of Beacon and a single seedling. Awards were as follows: Cultural certificates to Mr. Cebelius and Mr. Huss; a first-class certificate to Mr. Fraser for the schizanthus, and a certificate of merit for the carnation seedling.

Plans are being made for a banquet at Harry Bond's, Hartford, on the evening of the 18th. The committee in charge are Cuno A. Helfricht, A. Righenzi, and W. W. Hunt. Prominent speakers are expected to enliven the occasion by addresses.

Our next meeting will be "Pruning Night," March 14th, with a practical demonstration of pruning of ornamental stock by President Huss.

GEORGE W. SMITH, Secretary.

Melrose, Conn., Mar. 11, 1913.

AMERICAN ASSOCIATION OF NURSERMEN.

James McHutchison, chairman of the membership committee of the American Association of Nurserymen, is sending out a letter from which we extract the following:

Every live ambitious nurseryman should become a member. The association was organized in 1875 for the promotion and protection of nursery interests throughout the 48 states, and as a member you will be entitled to all its benefits and advantages.

The tariff committee has been successful during the past few years in securing a tariff equitable and satisfactory to nurserymen. They have had the duty upon French fruit stocks made per 1000, thus doing away with all the controversies over valuation that previously prevailed. They recently visited Washington and expect to prevent the threatened tariff reduction. The work of this committee has been of immense value to all nurserymen.

The transportation committee has had

freight classification defined, freight rates reduced. They have caused the railroads to give carload rates where nursery products were formerly paying less carload rates in carload lots. The work of this committee has saved more than the membership fee to every nurseryman in the United States.

The legislative committee, under the able leadership of Wm. Pitkin, has prevented much unwise and unfair state and federal legislation from becoming law, and now are testing the constitutionality of several state laws which are injurious and unfair to nursery interests. You are today receiving the benefits of the work of these committees, but by not being a member of the association you are not paying your fair share of the expense.

The committee upon publicity, rootgall, standard grading, etc., have done and are doing equally good work. Like the watchman on the tower, these committees must constantly be on the alert, for there is no limit to the necessity for eternal vigilance.

All that has been accomplished has cost the association thousands of dollars in legal, traveling and other legitimate expenses. Every nurseryman in the United States shares in these benefits—he can't help it, and we should all be willing to lend practical help and financial support by becoming a member of the organization, the dues of which are \$5 per year.

Each member gets a Badge Book about June 1st each year, also a badge number which he wears at conventions so that his customers recognize him by his number. The Badge Book is worth more than the membership fee to every progressive nurseryman. He also gets a copy of the annual report of each convention containing a stenographic report of all discussions, reports of committees, speeches and papers. The association's telegraphic code will save you many dollars.

NEW YORK FLORISTS' CLUB.

The March meeting of the New York Florists' Club, last Monday evening, brought out a good attendance. The main topic was naturally the International Flower Show which will have come and gone before the next regular meeting of the club. Reports of committees showed a good progress towards completion of preparations for the club's part in the management of the big affair and the entertainment of the vast throng of visitors who will come from all sections of the country. Interest in the club's work was shown by the large number of applicants for membership. That there is plenty of hustling to be done between now and the opening of the show is realized but the outlook is encouraging and everything harmonious. All are delighted over the rapid recovery of Secretary Young after his recent operation.

CLUB AND SOCIETY NOTES.

An exhibition of orchids, roses and miscellaneous flowers is scheduled by the Horticultural Society of New York for Saturday, March 15.

The annual meeting of the Kentucky Society of Florists was held on March 5 at the home of George E. Schulz. Joseph Able read a paper on bookkeeping.

At the next meeting of the Gardeners' and Florists' Club of Boston, Tuesday evening, March 18th, Edwin Jenkins of Lenox is expected to deliver a lecture on sweet peas and their culture outdoors.

A meeting of the ladies' committee of the New York Florists' Club was held on Feb. 28th. Mrs. F. H. Traendly was elected chairman, Mrs. Julius Roehrs, Jr., secretary and Mrs. Joseph

A. Manda, treasurer. These ladies are entrusted with the responsibility of the entertainment of visiting ladies at the time of the National Flower Show, and the names as given above are a sufficient guarantee that the hospitality of New York will be well demonstrated on this important occasion.

The Twenty-sixth Annual Dinner of the New York Florists' Club will be held at the Hotel Astor, 45th street and Broadway, Thursday evening, April 10th, 1913, at 7.30 o'clock sharp. This annual event will occur during the week of the International Flower Show when visitors from distant points will be entertained as guests of the club. The dinner committee consists of John B. Nugent, Jr., Robert Koehne, Thomas Boothe Deforest, Walter F. Sheridan, Alex. M. McConnell and Joseph S. Fenrich, Secretary.

The Chicago Florists' Club held its regular meeting March 6th. The report of the transportation committee, regarding the trip to the National Flower Show was given and discussed but no action decided upon. By vote of the club Andrew McAdams was made an honorary member. The resignation of D. A. Robertson was read and accepted. Vaughan's Seed Store was given a vote of thanks for an exhibition of seedling red canna known as No. 15 and the new "baby Rambler" rose Erna Teschendorff. A communication from the Florists' Telegraph Delivery was read and referred to the "good-of-the-club" committee.

The Gardeners' and Florists' Club of Baltimore celebrated their twenty-sixth anniversary Monday night by having a fine banquet. One hundred or more members were present. Ex-president Robert L. Graham presided as toastmaster. At the meeting of the club before the banquet the annual election of officers took place as follows: president, William J. Johnson; vice president, James L. Towner; treasurer, Fred G. Burger; corresponding secretary, Noah F. Flitton; financial secretary, George Talbot; librarian, Charles M. Wagner. Only the first two named are new officers, all the others being reelected. Toasts were responded to by all the officers, Richard Vincent, Jr., James Hamilton and several others also contributed valuable talks. Everyone was out for a good time and they had it too. The club is in a very prosperous condition, with a good nest egg in the treasury, and new members joining every meeting night. Some of the work the club is accomplishing will be of great value to the State. No doubt that through its efforts there will be erected in the near future a magnificent Horticultural or Exposition building.

Northampton, Mass.—The Holyoke and Northampton Florists and Gardeners' Club entertained the families of members at a banquet Tuesday evening, March 4. The company numbered about 125 and after dinner there was an informal program of speech-making and music, presided over by the president, Edward J. Canning of Northampton. The membership of the club numbers 50.

INTERNATIONAL FLOWER SHOW

GRAND CENTRAL PALACE, NEW YORK, APRIL 5-12.

The board of management has made the following dates for meetings of the Co-operating Societies:

April 7, Society of American Florists.

April 8, American Rose Society.

April 9, American Carnation Society.

April 10, National Association of Gardeners.

April 11, American Sweet Pea Society.

April 12, American Gladiolus Society.

The meetings will be held at 10.30 A. M. each day.

Each afternoon and evening during the show the lecture room will be reserved for public lectures on horticultural subjects. In addition to the lecturers already announced, Arthur Cowee, of Berlin, N. Y., will talk on "The Gladiolus;" Arthur Herrington, of Madison, N. J., on "The Whys and Wherefores of Tree Planting," and L. W. C. Tuthill, of New York, on "Greenhouses and Frames for Amateurs."

Members of the Rose, Carnation, Sweet Pea and Gladiolus Societies and of the S. A. F. & O. H., in good standing, will be furnished with tickets or badges admitting them to the show at all times.

The show will be opened at 6 P. M. on Saturday, April 5, with an appropriate ceremony, and on other days will be open from 10 A. M. until 10 P. M. Posters and hangers, in colors, are now in course of distribution.

The advertising forms for the Official Program will close on March 15, so that anyone who has not already taken space in the same and intends doing so should lose no time in making his wants known to John Young, secretary, 54 West 28th street, New York, who also is still able to furnish a few excellent locations for exhibits in the trade exhibition.

J. H. PEPPER,
Chairman Publicity Committee.

AMERICAN ROSE SOCIETY.

Revised Dates of Staging and Special Prizes.

Division A. Pots and tubs to be staged Saturday, April 5th.

Divisions F. and G. Cut flowers to be staged Saturday, April 5th.

Divisions B. and D. to be staged with Division C. on Monday, April 7th.

Division E. New roses not in commerce—50 blooms, to be staged Monday, April 7th.

With Division E. the following specials:

Hill-Totty Prize—50 blooms, any new rose, not in commerce, \$25; 25 blooms Sunburst, \$50, \$30, \$20.

S. S. Pennock-Meehan Company Prizes—25 blooms, pink forcing rose, not yet disseminated, either domestic or foreign origin, \$25; 25 blooms, red forcing rose, not yet disseminated, either domestic or foreign origin, \$25.

Pittsburgh Cut Flower Company Prize—25 blooms, white forcing rose, not yet disseminated, either domestic or foreign origin, \$25.

Divisions F. and G. to be staged on Monday, April 7th. Division H. to be staged on Wednesday, April 9th.

New York Cut Flower Company offers for 200 cut roses irrespective of the number of varieties shown, effect of arrangement as well as quality to count, American Beauties and undisseminated varieties excepted, to be staged on Thursday, April 10th. Silver cup valued at \$200.

Philadelphia Rose Growers' Prizes—open to all, for 75 roses, any variety

years previous to the award—the rose to be of American origin. The first five years will be reached in 1914. Mrs. Hubbard presented to the American Rose Society the sum of \$250 to be kept as a permanent fund, the interest to be used every five years to provide the gold medal as above.

Mrs. Roche's Prize—\$50 for a new rose to be grown under glass, to resemble as nearly as possible in color, the Marechal Niel, but with a stronger stem.

BENJAMIN HAMMOND,
Secretary.

Fishkill, N. Y.

AMERICAN CARNATION SOCIETY.

Addition to the A. C. S. premium list. Section G. Class 53.—Best six pot plants carnations in 8-inch pots; not over 30 inches high; no artificial supports. Premium offered by Hy. Eichholz, Waynesboro, Pa., \$10.00 in gold.

Please note that all entries in the carnation classes must be in the hands of Secretary A. F. J. Baur, Indianapolis, Ind., not later than March 26th. A fee of \$2.00 will be charged for each entry made after that date. Staging of exhibits must be completed by one o'clock on the days specified for the various classes. Write for a schedule of premiums.

The Hotel Manhattan has been selected as headquarters for the American Carnation Society. Engage your accommodations ahead, if you want to be sure of stopping there.

New carnations have been registered as follows:

By H. D. Rohrer, Lancaster, Pa. Scarlet Wonder—Parentage unknown. Color scarlet; size 3 inches; clean, strong grower; stiff stem, non-bursting calyx; fragrant.

By A. Jablonsky, Olivette, Mo. Wizard—Parentage seedling crosses. Color variegated; size 3¼ to 3¾ inches; sturdy, stocky strong growth; stiff, long stems; ground color glistening white, delicately pencilled with pink; perfectly formed flower.

By Henry J. Symonds, Decorah, Iowa. Zoe Symonds—Parentage White Perfection x Prosperity. Color cerise pink; size 3¼ to 3½ inches; rapid grower and unusually prolific bloomer; stems very stiff and long; flower full in centre.

Decorah—Parentage Cardinal x White Perfection. Color Harlowarden shade; size 3½ to 4 inches; plants grow very large; a free bloomer and not a cropper.

A. F. J. BAUR, Secy.

Florists of Washington are discussing the possibilities of having a law enacted by Congress which will prescribe a license fee to be assessed on the itinerant vendors who come here from other cities at times like the inauguration and who do business on the streets, often directly in front of the stores of legitimate florists. Indignation is high at the methods used by these men to dispose of their wares and the District Commissioners will probably be asked to do something to eliminate this practice.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Officers—President, J. K. M. L. Farquhar, Boston, Mass.; vice-president, Theodore Wirth, Minneapolis, Minn.; secretary, John Young, 54 W. 28th St., New York; treasurer, W. F. Kasting, Buffalo, N. Y. Next convention, Minneapolis, Minn., Aug. 19-22, 1913.

For Full Information, Schedules, Space for Trade Exhibition, etc., write to John Young, Secretary and Manager for Trade Exhibition, 54 West 28th Street, New York City.

or varieties, excepting American Beauties and undisseminated varieties, to be staged on Thursday, April 10th—first, \$75; second, \$50; and third, \$25.

Small Growers' Prize—offered by Moore, Hentz & Nash. Six roses in each entry, no three to be of the same variety, no stem to be longer than 20 inches. The roses of each variety to be judged on their own merits and not by comparison with the other varieties. Silver cup, value \$50.

The Toronto Horticultural Society Medals for the best display of hardy outdoor roses. First prize, silver medal; second, bronze medal.

Actual Growers' Prizes, offered by Benj. Hammond, \$15, \$10 and \$7. These prizes are meant for the actual grower of any exhibit and not for the exhibitor, excepting in the case where he does his own growing. The above are to be awarded to such three exhibits of roses as, in the opinion of the judges, reveal the best specimens of the growers' work in rose growing. The object is to recognize the man who actually does the good work.

Peter Henderson & Co., New York, offer the following special prizes: Rose "Silver Moon" in an eight-inch pot or tub, or larger—first prize, \$15; second, \$10. Rose "Dr. W. Van Fleet" in an eight-inch pot or tub, or larger—first prize, \$15; second prize, \$10.

The Mrs. Gertrude M. Hubbard Gold Medal. The same to be given once in five years to the raiser or originator of the best rose introduced in the five

Minneapolis is busily engaged preparing her gala attire which she will don on the eventful day, August 19th, when the American Florists and Ornamental Horticulturists arrive. Systematic arrangements are being made under the directions of efficient local committees which have been formed to take charge of the details and the able co-operation of the Minneapolis Civic and Commerce Association, the chief civic and commercial body of the city.

Minneapolis has long been known as a great convention city, due to its unique distinction of being a commercial center and a scenic wonder. No other city in the United States can boast a volume of wholesale trade equal to that of Minneapolis and still possess the abundance of natural beauties enjoyed by this metropolis of the great American Northwest.

The old Indian legend has made famous the laughing waters of Minnehaha which still glide stealthily away through fairy glens to wind its way parallel for a distance of three miles with a broad continuous boulevard with an extent of 50 miles. A delightful drive is promised those persons attending the florists' sessions. Tourist busses, automobiles, etc., are always available for sightseers who wish to take the boulevard trip, skirting the shores of four of the famous in-town lakes continuing to Minnehaha Falls, thence along the shores of the beautiful Mississippi Gorge to the campus of the famous University of Minnesota.

Four interurban car lines connect Minneapolis with St. Paul, which with Minneapolis forms the Twin Cities with a population of six hundred thousand. These car lines take the visitors to Fort Snelling, the historic army post, to the State Capitol, to the famed Como Park and to the Minnesota State Fair grounds, home of the greatest state fair in the world.

Minneapolis also has interurban car lines which extend to various points on the shores of Lake Minnetonka, which with its one hundred miles of irregular shore line, islands, magnificent hotels for the special accommodations of the summer tourists makes it the most picturesque lake in America.

A little more than sixty years ago the site of Minneapolis was an Indian reservation. Today, the United States Census Bureau estimates its population at 319,271. The growth of the city has been one of the marvels of the age. Its development was due to its natural advantages. The great water power furnished by the St. Anthony Falls of the Mississippi River made it a manufacturing center. Its pre-eminence as a wholesale market was due to its location in the gateway to the vast agricultural and forestry regions tributary to it. It was a grain and lumber center at the start. Its extensive dealings in these commodi-

ties naturally made it a convenient place for other business and it has grown into a city of diversified manufactures with a tremendous jobbing trade.

Hotels of other years have been enlarged and improved generally, while five splendid new hostelrys costing about five million dollars have been erected in the past five years. One of these new hotels cost more to build and equip in proportion to its size than any other hotel in the United States.

The grain and flour trade still represents the chief single business of Minneapolis. The city receives over 200,000,000 bushels of wheat annually and her mills produce more than 17,000,000 barrels of flour. "Purity" has always been the motto of the manufacturers and wholesalers of Minneapolis and due to their strict adherence to the principle of honest quality, the millers of this city have attained the position they now hold as first in the whole world in the production of flour. So it is small wonder that Minneapolis is known the world over as a "Flower-Flour City." The former will be self-evident when the visitors view our vacant lot gardens, hanging gardens, parks, etc., which will be in splendid condition when the florists will be the city's guests.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Registration.

As no objection has been filed, public notice is hereby given that the registration of the new geraniums Dr. Richard Behrend, Jack London, Julius Eberius, Dr. Lincoln Cothran, Judge Lindsey, Fresno, H. Plath, Anna Eberius, Palo Alto, Fire Ball, Los Altos, Florence Metzner, Mrs. Edward Stock, La Paloma, Tamalpais, J. Stitt Wilson, Ramona, Fire King, Sacramento, Luisa Tetrazzini, Mt. Shasta, Rosea, Tacoma, Hawaii, Mary Garden, Mayor Ralph, Governor Johnson, Gifford Pinchot, Gertrude Atherton, Richard Diener, Mt. Hamilton, Alviso, Sunnyvale, Snow Bird, Gilroy, Tivoli, White Beauty, Billie Burke, Fritzie Scheff, by Richard Diener & Co., Mountain View, Cal., becomes complete.

As no objection has been filed, public notice is hereby given that the registration of the new orchid *Cypripedium Harrisianum* Laura Mitchell Kimball by Mrs. William S. Kimball, becomes complete.

As no objection has been filed, public notice is hereby given that the registration of the new Sweet Peas, Ogata, Skyair, Vera, Cardinal, Golden West, Orange, Nora and Norma, by Anton Zvoianek becomes complete.

JOHN YOUNG, Sec'y.

"PUBLICITY" IN BRITAIN.

"A Glut in the Market"—Not a very elegant term, but one frequently used to indicate an over supply of stock. Growers are railed at for overloading the markets, and the surplus goes to the hawkers. We commend to the notice of every grower, salesman and florist, the paper which we publish to-day, "The Florist and His Market," by Wallace R. Pierson. Although penned for the American trade, three-fourths of it is applicable to British conditions. Could a publicity scheme on somewhat similar lines be engineered here? As in America, the producing end has been going too quick for the selling end, and a publicity campaign in every town and county to create a market would surely prove helpful. Growers what do you say?—*Horticultural Trade Journal*, London.

The Annual Spring Exhibition of the Massachusetts Horticultural Society is on this week, opening on Friday, March 14 and closing Sunday night, March 16. It promises to be a magnificent display.

Obituary

Nathan Dexter Pierce.

Nathan D. Pierce, nurseryman and florist, died at his home in Norwood, R. I., March 7, of pulmonary tuberculosis, in the 64th year of his age. He had been seriously ill for over a year and for the past ten weeks he had been confined to his bed. He was born in Providence, on February 2, 1850.

Mr. Pierce was well known throughout the state as an authority on flowers and small fruits, having served as judge at many exhibitions. Among his own introductions were the carnations Beau Ideal and Dexter Pierce some years ago which received medals and certificates in New York, Boston and Providence shows.

At the age of 22 Mr. Pierce began his career as a nurseryman, starting on a small lot set aside for him by

NATHAN DEXTER PIERCE

his father. In 1875 he built a small greenhouse, growing flowers for his own use. He gradually branched out in this line and the care of the nursery was left to his father. When his father died in 1899, Mr. Pierce also took over the active management of the nursery, which is one of the largest in the state.

Mr. Pierce was a member of the first board of managers of the State Agricultural School, now the Rhode Island State College, having been appointed by Governor John W. Davis in 1891. He took an active part in the political affairs of his state, serving several years in the legislature and on the Warwick town council.

C. J. Barbour.

C. J. Barbour of Hartford, a leading member of the Connecticut Horticultural Society, died suddenly, and was buried a few days ago. He long occupied the position as lawn caretaker on the spacious grounds of the Hartford Retreat, and took many prizes for dahlias and other flowers at the Society exhibitions.

Other deaths which have come to

our notice recently are the following: Wm. Blacker, florist, Clearfield, Pa., who died on Feb. 21st; Peter Morscheister, florist, La Salle, Ill., who died Feb. 24th; James A. Hovey, Newton Highlands, Mass., manager of the seed department of the George A. Weaver Co. of Newport, R. I.; J. H. Tilton, seedsman, of Cleveland, Ohio, who died on March 1st, aged 34 years.

PERSONAL.

Arthur Senn of Milwaukee, Wis. has opened an office as landscape gardener.

A. Francis succeeds J. Clarkson as gardener to W. C. Egan at Highland Park, Ill.

Julius Roehrs of Rutherford, N. J. sailed for the Mediterranean on Tuesday, March 11th.

A. H. Ruepke, recently of Lake Forest, Ill., will take charge of the Smith Farm at Terre Haute, Ind.

Karl Zeidler succeeds the late Mr. Schrader as trustee of Locust Hill Cemetery at Evansville, Ind.

Emil Bollinger has accepted the position of manager on the estate of Byron L. Smith at Lake Forest, Ill.

O. G. Koenig, of the Koenig Floral Co., St. Louis, has been nominated for the office of city councilman on the Republican ticket.

A. F. Vick, recently connected with the Vick & Hill Co., Rochester, N. Y., has accepted a position with the Robert Craig Company of Philadelphia.

Henry Penn and family, who have

been enjoying a vacation at Atlantic City, N. J. are back in Boston, and Mr. Penn is very fit to tackle the oncoming Easter trade.

New York visitors—P. Welch, Boston, Mass.; E. W. McLellan, Burlingame, Cal.; W. C. Langbridge, Cambridge, N. Y.

Boston visitors—H. C. Neubrand, Providence, R. I.; Walter Pedersen, St. John, N. B.; Wm. Canning, Pride's Crossing, Mass.

Cincinnati visitors: Sydney Wertheimer, Sam Seligman and A. Ford of New York; C. G. Perkins, Newark, N. Y.; and G. P. Dietrich, Maysville, Ky.

St. Louis visitors—Ed. Fancourt, of S. S. Pennock-Meehan Co., Philadelphia; Frank McCabe, of the Randall Co., Chicago, and J. Schreiber, of the Foley Mfg. Co., Chicago.

The British Encyclopedia of National Biographies says that Thos. Bridgeman who settled in New York in 1824 and wrote on horticulture is a descendant of the Bridgeman who planned the Kew Gardens and who is mentioned by Horace Walpole in his "Memoirs" as the one who revolutionized landscape gardening in England and who was a friend of Alexander Pope.

Thomas Bridgeman had two sons both of whom made a name in horticulture, Andrew as a plantsman and Alfred as a seedsman. W. A. Bridgeman, who is responsible for the elegant window displays in the Thos. F. Galvin store on Tremont street, Boston, is a son of Andrew Bridgeman. "Blood will tell."

E. S. MILLER, WADING RIVER, N. Y.

FEDERAL PLANT QUARANTINE LAW.

As a result of the experience gained during the last two or three months, it has seemed advisable to slightly amend the rules and regulations for carrying out the Federal Plant Quarantine Act. The object of this circular is to point out specifically, for the information and guidance of importers, the changes made in the regulations.

No material changes are made in Regulations 1 to 5, inclusive.

Reg. 1.—No change.

Reg. 2.—No material change.

Reg. 3.—Definition of port of entry added.

Reg. 4.—Addition of the explanatory words "at port of entry;" bonded period to obtain permit extended from 10 to 20 days; error corrected in line 5—"arrival" changed to "entry."

Reg. 5.—Addition of explanatory paragraph relating to shipments in bond.

Reg. 6.—Change to indicate more plainly the requirements in force after July 1, 1913, in relation to the official inspection certificate and limiting the importation of nursery stock from countries having no provision for such official certification, such as certain Asiatic and Central and South American countries.

Reg. 7.—Made to indicate more explicitly the nature of the certificate of inspection which will be required after July 1, 1913.

Reg. 8.—Amended at the suggestion of Customs Bureau, Treasury Department, to require the notice of importer or broker to the Secretary of Agriculture to be transmitted through the Collector of Customs at port of entry. This notice is to be given to the collector with other entry papers, and will be compared with the invoice and forwarded by the collector to the Secretary of Agriculture. This will accomplish both the notice required from the Treasury Department to the Secretary of Agriculture and the notice from the importer to the Secretary of Agriculture on one blank in one report, and will save the importer the labor and cost of mailing this report.

The notice required of the importer to the State Inspector must, as is now required, be sent by him direct to the proper State official.

Blanks for these two reports—namely, to the Secretary of Agriculture through the Collector of Customs and to the State Inspector—will be furnished by the Collector of Customs.

There is added to this regulation an explanatory paragraph in relation to the requirements of the act governing the re-shipment, interstate, of imported nursery stock, which has not been inspected at the destination reported from the port of entry.

Reg. 9.—Changed merely to lessen the requirements by eliminating some of the information originally provided for. A paragraph is added, making it possible in the absence of the declaration to deliver the goods under bond in the same manner as provided for a landing permit.

It will be noted that practically all of these changes are corrections of errors, explanatory, or lessening the requirements. The only exception is the limitation placed upon the importation from countries where no inspection certificate is possible, and this can be corrected by any of these countries whenever commercial possibilities indicate the need. This limitation will not affect ordinary commercial nursery importations.

John Lewis Childs

Wholesale Department

Flowerfield, Long Island, - - - N. Y.

Nursery Stock. A very neat pocket list.

Canadian Seed Growers' Association.—Price List of Registered and Improved Seed Produced in 1912. Agricultural grains, with name of grower and quantity available.

Clarke Bros., Portland, Oregon.—Oregon Roses and Other Beautiful Flowers. A very "meaty" catalogue, with copious descriptive notes, and many attractive halftone illustrations.

W. B. Whittier & Co., Framingham, Mass.—Trade Catalogue of Framingham Nurseries for Spring, 1913. A valuable publication for landscape gardeners and large planters of shade and ornamental trees. Revised prices.

Scott Bros., Elmsford Nurseries, Elmsford, N. Y.—Price list of Chrysanthemums, Roses, Carnations, Etc., for 1913. A pocket size list but very complete in the number of varieties offered. A number of well attested new things are included.

David Herbert & Co., Acto, N. J.—Descriptive Catalogue of New Dahlias, Cannas, Gladioli and other Summer Flowering Bulbs. A portrait in natural color of Dahlia Delice makes an attractive cover illustration for this comprehensive catalogue.

Peter Henderson & Co., New York City.—"Henderson's Farm Manual." An agricultural seed list of sterling value. Bound in strikingly effective covers and containing the information essential to securing bountiful crops. Readable and instructive.

J. L. Moore, Northboro Dahlia and Gladiolus Gardens, Northboro, Mass.—Catalogue and Price List for 1913. Cover adorned with dahlia portrait in

crimson. Accompanying it is Mr. Moore's wholesale price list of dahlias in the various classes, and gladioli, for the trade.

J. Bolgiano & Son, Baltimore, Md.—General Spring Catalogue. Agricultural, garden and flower seeds, plants and implements are all covered fully in this up-to-date catalogue of this old-established seed house. "Prosperity" Tomato on cover page looks like a sure winner.

New England Nurseries, Bedford, Mass.—Catalogue of Trees, Shrubs, Evergreens, Roses, Vines, and Herbaceous Perennials. A good and complete exponent of the best hardy garden material valuable in latitude of New England. Has some excellent innovations in information and instruction for the public.

Palisades Nurseries, Inc., Sparkill, N. Y.—"Palisades Popular Perennials." A luxurious catalogue, splendidly illustrated. A model of catalogue printing art. The covers are novel in design and richly effective. The contents represent a well-selected stock and an effort has been made to familiarize the buyer with the accepted popular name as well as the botanical name of each variety.

W. Atlee Burpee, Philadelphia, Pa.—Prize supplement for 1913. This is a unique supplement to Burpee's annual spring catalogue and is well-calculated to awaken interest in Burpee's seeds and the result and product—that is if there is anybody left in this land who had not already been apprised! Burpee says his are the "Best Seeds That Grow." This publication is intended as a convincer of this proposition.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Some Sensible Advice.

C. L. Orme, Maryland.—It will be impossible for you to get sufficient free seed from the Department of Agriculture at Washington to plant your one acre of garden and nine acres of farm land. However, write the Congressman from your section of Maryland, addressing him at Washington, D. C., and he may be able to assist you in obtaining considerable free seed. You should remember that the seed sent out through the government is as near worthless for commercial purposes as seed can be. As you own your farm and expect a remittance from home late in the summer the local seedsman will, perhaps, open an account with you for both seeds and fertilizers if you present the circumstances to him. Seed from a reputable firm will give far better results than government free seed. As to what varieties of vegetables to plant and the best farm crops, I would advise you to write the director of the Maryland Experiment Station, College Park, Md., for he is familiar with the exact conditions in your section. He can also tell you what kind of fertilizer will give the best results. In writing him state your conditions fully that reliable information can be given you.

Amateur Gardener, Bloomfield.—Free government seed can be secured by writing the Congressman from your district, addressing him at Washington, D. C. For less than \$1 seed far more reliable and of better varieties can be purchased from a seed firm and the seed thus purchased will be more certain of successful results. It is never advisable to sow government seed, notwithstanding that they are given away. One should never look a gift horse in the face, but government seeds are as thankless a gift as any gift well can be.

—Newark (N. J.) Evening News.

Notes.

L. C. Brown of La Grange, Ill. plans to open a branch at Kankakee, Ill.

Frank D. Hunter, recently bookkeeper for J. H. Small & Sons of New York, and formerly well-known as a member of the firm of Hammond & Hunter, wholesale florists, has taken the position of manager for the seed house of J. F. Noll & Co. in the Hudson Terminal, New York City.

M. J. Tilden, who has been conducting a seed store at Albion, N. Y. has closed out the business which he purchased some time ago from J. T. Duquette. Mr. Duquette, thus released from his agreement not to enter the seed trade so long as his successor continued the business, has started again under his own name as nurseryman, seedsman and florist at 66-78 Clinton Ave. The business thus resumed was established by Mr. Duquette's father sixty years ago.

Thomas J. Grey, founder of the T. J. Grey Co. of Boston, twenty-three years ago, having sold his interest in that company, has again associated himself with Joseph Breck & Sons Corporation in whose employ he was for many years previous to establishing in business under his own name. Mr. Grey is one of the best known men in the New England dis-

strict and, with an enviable record as a courteous personality, will no doubt find a willing welcome wherever he may go.

PUBLICATIONS RECEIVED.

The Planting and Care of Trees for Colorado, by D. M. Andrews, Boulder, Colo. An instructive "vest-pocket" manual of cultural notes.

"The Garden Book," by John Kirkegaard.—Published by The Bullard Company, Boston. Net \$2.50. Is also procurable in a beautiful "Garden Green" binding at \$2.00. The sale of this unusual book has surpassed the expectation of its publishers, who, by offering this second binding, can give

our readers the benefit of "quantity production."

Transactions and Proceedings of the California Association of Nurserymen: Second annual Meeting, Oakland, Nov. 7-9, 1912. This interesting volume edited and compiled by Henry W. Kruckeberg of Los Angeles, secretary of the Association, affords convincing evidence of the splendid makeup of this young society. Few society reports can show a more comprehensive list of subjects considered at one meeting or more pointed and intelligent discussions. The book itself is an excellent production of the printing art. A portrait of the late John Rock, pioneer pomologist and nurseryman, makes an appropriate frontispiece.

Branches: Michigan and Wisconsin **MILFORD, CONN.**

The "SPENCER" Type of Sweet Peas

Burpee's Unequaled List for 1913. Arranged Alphabetically. Choicest Re-selected Stocks Grown on "Floradale Farm."

SPENCER SWEET PEAS are a great specialty with us! We were the first to grow the seed in America the stock having been entrusted to us before introduction, even in England, of the original Countess Spencer. We have grown "the original Beauty" and its many "sportive" children with painstaking care each season since. There are but few other growers—either in England or America—who can supply an equal assortment of True RE-SELECTED "SPENCERS" that are uniformly of such choice quality. Seedsmen and planters generally can see how superior our stocks now are by the trials at FORDHOOK FARMS next June or July, while those who may be in California are invited also to inspect the growing crops at our FLORADALE FARM in the beautiful Lompoc Valley. Every planter's garden, however, is really a trial ground and we shall be quite content if any "Doubting Thomas" will send us only a portion of his order and note the difference in character of flowers produced!

BURPEE'S BLUE LIST FOR 1913

The most complete catalogue published for Market Gardeners, Truckers and Florists. For the planter who "knows" it contains complete lists of all that is best in vegetables and flowers, while the grower who is uncertain as to the best varieties suited for his purpose may be guided by the bull's eye placed after what is known to be best. In addition full descriptions are given many new and most valuable varieties.

BURPEE'S BLUE LIST FOR 1913 contains 148 pages with hundreds of halftone and engraved illustrations. Within the pages of this catalogue we have condensed an experience of thirty-five years both in handling and the actual growing of seeds.

If you garden for profit (that is, sell your products in the market) you are entitled to a copy of this complete and easily understood catalogue, but if you are a private planter please do not ask for a copy, as we must protect the Market Gardener, Trucker and Florist.

Washington, D. C.—The inauguration festivities brought to the local trade considerable additional business in the way of dinner decorations although the ball and a number of important events were not held this year. There were plenty of flowers to meet all demands with the possible exception of American Beauties, of which there is a scarcity. The death of Mrs. Leiter, a social leader of the city, called for the supply of a very large number of pieces made of orchids, gardenias, American Beauty roses and other high-priced stock.

On OCTOBER 1, this year, our NEW YORK STORE will be opened at 361 FIFTH AVE., corner 16th Street.

OF INTEREST TO RETAIL FLORISTS

EASTER HINTS.

You need not to be reminded that this is your busy week coming and there are a good many little things to be done, beside the arrangement of plants and decorating of windows; things so small and yet large enough to cause trouble, if they are not attended to while there is time. Let us get together and think of the little obstacles that we can remove now, and not wait until we are in the midst of our rush and then realize it should have been attended to before.

As a reminder we will mention cut flower boxes, handy handles, pot coverings and crepe paper, green predominating as it matches all plants, and above all things don't let a dirty or mouldy pot leave your store; the recipient will think less of you for delivering such.

Be sure you have an adequate supply of card-envelopes with brass eyelets, this kind being less apt to tear away, saving the trouble of answering calls as to who ordered the plants; also prepare yourself with a large stock of newspapers, in case the weather chooses to blow a cold wave your way. Have your crates ready for out-of-town shipments; small wooden boxes and laths makes excellent plant crates. Use excelsior or paper to pad the corners. Have plenty of saucers to set the plants on as this will keep a large portion of water from the floor; some customers desire saucers to accompany plants. Keep your writing tables well stocked with pens, cards and en-

velopes for the convenience of customers, more so than at ordinary times. Have your clerks request the purchaser to address all card-envelopes, thus relieving you of trouble in case cards become detached from order sheets; if they do, it can be easily traced as the name on card-envelope and order-sheet will correspond.

Many people are undecided just when to send a plant as an Easter gift. I should advise you to instruct your sales-people to encourage early deliveries; by so doing you are getting plants out of your way and are better prepared to handle the cut flower end which always comes the last of the week; so move the plants quickly!

A plant or basket when sold, should be immediately marked "sold," and put aside, as two or more clerks are apt to sell the same article over again, and it may be something that cannot be easily duplicated; avoid this by putting a "sold" tag on at once with name and day to be delivered.

Then see that all plants are watered before leaving the store, as they may be on the road some time before reaching their destination. Remember a dry plant going into a warm room will soon bring a complaint and you will probably have to replace same or lose the trade of the purchaser. It might be well to instruct those doing the packing to attach small tags requesting the receiver to water plants freely. If you haven't these tags on hand they can be printed at short notice.

By following a few of the foregoing pointers it will enable you to sail

through a stormy week and dock the good ship "Easter" safely in her berth.
MR. STOREMAN.

FLOWERS AT FUNERALS.

In noting the recent item in HORTICULTURE about the sentiment recently expressed against the use of flowers at funerals, to the writer it seems most fit that the craft carefully consider first the features of strongest interest bearing on the matter.

In merchandising what leads to the final employment of each blossom, so evidently created and developed to serve its purpose and but one purpose, and that involves a catering to the finest sentiments the mind can express, as a trade or profession that of the florist stands conspicuous. His is really a "trust," that but too few of the craft appreciate. The lure of the dollar too often becomes a guide or motive. Mechanical methods operated for least resistance to lead the customer into indulging in the display that is made up or produced the easiest and will look biggest to the mind unfamiliar with such products, no doubt prevails to a deplorable degree, a blot on the intelligence of customer and craftsman both. As the latter should know, and practice better, he is the more guilty conspirator against public uplift and welfare.

When employed to lighten grief, the using of flowers engenders so fine a sentiment that no argument for, or either against, seems needed. No doubt however, but what conduces

THE FLORISTS' SUPPLY HOUSE OF AMERICA

1129 ARCH STREET, - - - - - PHILADELPHIA, PA

more than aught else to conditions against their employment, comes through the encouragement given big showy effects, regardless of general quality.

Illy filled and finished, and strenuous-sized and shaped forms, and such free using of dried and dyed materials, not to mention wax flowers, but all passed out as representative products of the craft, never can standardize sensible demand, and such practices reflect on business acumen.

The using of flowers at funerals being in no way a necessity, and most optional, it follows that as free an option against their employ as well, may exist. This leaves the florist, practically an outsider or an onlooker, merely, and many years of noting akin conditions leads the writer to believe that counteracting the conditions in question will be accomplished the more, by so to speak "saying nothing," not even allowing being drawn into worded discussion of the subject. If nailed to it, aim to treat it as a passing matter of intermittent type as related to the business, and sustain the idea that using of flowers is an inborn natural trait or sentiment and its quality so harmless that the custom must continue to prevail to a proper degree, never to die out.

Agitating the matter will betoken weakness, a childish look, so don't! Keep easy! If you see need to act at all, let it be in trend of trying to raise the standard of proper and fitted quality as commonly dealt out to customers. If you organize anything, better such be a campaign for educating

those in the business to also at the same time educate, in turn, their customers to better ordering and purchasing ideals. Such means must promote needed good will, and aid a properly natural and increasing call for flowers at funerals.

Publicize and encourage buying within reason, but after quiet ways, along rational lines. Any physical concerted efforts made to counteract will surely breed deeper antagonism to the florist trade, in which the self interests of the craftsman will stand out so palpably as to directly kill any possible gain of favor in any form.

History tells us that, years aback, dire conditions of business following the panic of 1873 were keenly felt for some years, and the bishop of Western New York diocese of the Episcopal church, inveighed against undue extravagance of flowers at funerals. The promptings were heeded, as later on and ever since, in the city of Buffalo and immediate vicinity it is quite common with obituary notices to request the omission of flowers. This circumstance has no doubt checked the indiscriminate sending in of flowers at funerals, where often such is prompted only for the influence gained, rather than for expressing true sentiment. As railing against such conditions would but aggravate matters, it behooves us to interpret it as a balance properly justified by circumstances.

It seems to have been the custom, to some degree, in the past, for certain Catholic parishes to refuse the bringing of floral tokens into churches at funerals. If the affair reported on at Cincinnati is merely of this character, its influence must remain limited.

Buffalo, N. Y.

L. B. D.

The MEYER Green SILKALINE

Used by Retail Florists for mossing funeral designs, tying bunches, etc., is

THE ONLY ARTICLE THAT SHOULD BE USED

by Growers for stringing Smilax and Asparagus, as it will not fade or rot in the greenhouse. The Meyer Silkline was the first green thread to be introduced among Florists and Growers. It is handled by the best houses everywhere, but it should be ordered by name—Meyer's Silkline—to be sure of getting the genuine article. Do not accept substitutes.

If your jobber cannot supply you, order direct of the manufacturers. Price for any size or color, \$1.25 per lb. Sizes, "F" fine, "FF" medium, and "FFF" coarse.

Do not take any fake green thread. Use the Genuine Silkline and get more thread and less wood.

JOHN C. MEYER & CO., Lowell Thread Mills, 1495 Middlesex St., **LOWELL, MASS.**

Silkline also is made in all leading colors, as Violet, for bunching violets, and also for tying fancy boxes.

Please mention Horticulture when Writing.

Flower Market Reports

BOSTON We are pleased to report that business this week shows a decidedly better front than it did at the time of the last report. Prices, while not advanced to any great extent, are more readily realized and the sacrifice sales are not so numerous or so low in price. There are very few American Beauties in sight yet and those are of indifferent quality. Crate lilies are being quoted at 12 cents but cut bloom rarely brings over 6 or 8. The prices on these will establish themselves about Monday. Carnations are also looking up to better figures, commencing on next Monday. Orchids and gardenias are selling poorly and are entirely too plentiful for the call. Roses are plenty and good and prices are a little more stable. Violets and bulb stock still very dumpish. Sweet peas selling for less than they are really worth. Easter outlook is fairly encouraging.

BUFFALO Market conditions have been rather unfavorable for some time and the past week did not show much improvement. Buying has been light; in fact it has been left to the wholesaler to carry all the stock, the merchant simply buying what he actually needed. The supply of carnations has been heavy and prices low. Roses are in good supply but with no special demand and the same holds good with lilies and other stock. Violets have not taken well, though peas sold considerably better than the week previous. There was plenty of lily of the valley and bulbous stock and some

fine Kaiserkroon and LaReine tulips. Asparagus and all greens in good supply.

CHICAGO Chicago market approaches very closely to the normal at this time. As the Lenten season draws to a close, the trade in general agree that the sales have not decreased as much as has usually been the case in former years. The past week has found the market well supplied with all kinds of seasonable flowers, and with the possible exception of lily of the valley and violets the demand has kept pace with the supply. Bulbous stock of all kinds is decidedly in evidence

yet apparently all is sold and generally at quotation prices. There is every indication now that the supply of roses at Easter will be good, as they are coming in more freely now than at any other time since the holidays and Easter quotations on them differ very little from regular prices. It may be that "the wish is father to the thought" but American Beauties seem a little less difficult to obtain this week and quality a shade better. There is now and will be for Easter a good carnation crop. Fancy sweet peas are in great demand but the short ones move slowly. Violets are

Flower Market Reports

(Continued from page 403)

not bringing fancy prices but quantities of them are sold each day. There is plenty of all kinds of green.

For the past week **CINCINNATI** and a half there has been a better demand than for some time, both locally and from out-of-town. The rose cuts are in a splendid condition, quantity large and quality right. The supply of American Beauties is limited. Carnations are in an adequate supply. The call easily takes up all the good offerings. Tulips, jonquils and Dutch hyacinths are much improved in quality and are meeting with a better call. Lilies and callas are in a large supply. Choice sweet peas continue to sell well. Stock from this vicinity is given a decided preference by the local buyers. Double violets are given a wide berth by the retailers and as a result they find a poor market even at low prices. Singles sell tolerably well. Neither lily of the valley nor orchids enjoy a very good call.

All classes in the flower trade of this section are emphatic in stating that the past two weeks are among the quietest ever experienced at this season of the year. The market is well supplied with material of good quality and prices rule low on everything with few exceptions which we will note below. American Beauty roses are still among the rarities. There are evidences, however, that this famine will not last much longer and when the crop does come on we predict it will be a landslide. Carnations have been looking up in price for the past few days and there have been sales of acceptable grades as high as four dollars a hundred which is pretty good for this date. The carnation market suffers considerably from the general complaint of poor lasting quality. The explanation of this unfortunate condition is as variant as ever and the universal remedy is not yet in sight. The wholesale marts are well supplied with roses of all the standard varieties and quality rules good generally. Violets are as plentiful as ever and very poor sellers. What little demand there is the singles monopolize. Of sweet peas there are many, a large percentage of them being what are now considered as inferior stock. Spencer varieties are coming in from the more progressive growers and some of these are irresistibly beautiful. Lilies are seen in profusion on all sides. The oft-repeated prediction of short supply of these for Easter seems to lack foundation. Cattleyas are among the worst sufferers from the present stagnation. Buyers are indifferent to them although Trianaes of extra size and finish are obtainable at twenty dollars a hundred and Schroederas can be had in quantity at a much lower figure even. Schroederas is a beautiful flower and its failure to win popularity with the flower buyers is something we can't understand. Bulbous flowers are, as usual at this season, very abundant. Tulips and daffodils are excellent in quality, new and choice varieties being well represented but sales are very draggy most of the time.

BEAUTIES FOR EASTER

If you should need any Beauties for Easter, you can be reasonably sure we can fill your order. We will have a good supply of the Specials, and the quality could hardly be improved. Place your order early.

SNAPDRAGON

\$1.50 Per Dozen

Pink, White and Yellow. This stock is in splendid condition now, long stems and fine large flowers. Our price is very reasonable, and you can handle it very profitable.

CARNATIONS

Plenty of the better grades, and quality extra fine. We have never offered a better grade of stock for Easter and our prices will surely please you.

VALLEY SWEET PEAS DAISIES LILAC PANSIES VIOLETS
With a splendid stock to select from, you have the best assurance your orders will be filled complete.

It seems to be generally accepted that the Easter plant supply is likely to run short this year. If so, the cut flower will come in for a good Easter but we don't hear much shouting yet.

Market last week

PHILADELPHIA very sluggish.

Perhaps the poorest week we have had this winter. The weather was very cold for one thing; but whatever the cause, the fact remains. There was not so much stuff left over at the windup but a good deal had to be cleared at sacrifices. One lot of 4000 carnations went for \$6, which will give an idea con-

sidering that quoted rates were twenty to forty dollars per thousand. Probably the worst sufferers in the glut were sweet peas. The tag end of the early plantings fared worst—as the later plantings are much superior and

(Continued on page 411)

A Word to the Florist Trade Buyers

In the advertising pages of this number you will see the Easter and Spring Trade Offerings of the Leading Wholesale Dealers in Flowers, Plants and Florists' Requisites. These firms are in business to supply you and are worthy of the support which they ask for in these announcements. The special stock they offer is the best ever placed before the trade. Read what they have to say and then get busy with them as to prices and quantity.

DO NOT DELAY A DAY NOW IN PLACING YOUR ORDERS

Flower Market Reports

(Continued from page 405)

had first call. Also there were nice lots of Spencers to be had and these also got first call. All the growers around here pull a long face about American Beauty for Easter week. No hope of any increased quantity. One grower who planted an early lot especially for this gap will have a few more but nothing to make any impression on the general situation. Carnations are magnificent and are bringing very good prices. The experts seem to think the average returns for these even a shade better than last year at this season. Greenhouse daffodils still holding their own. The cold weather of last week held back the rush of the southerners which was a blessing. Plenty of cattleyas and gardenias. No improvement in the violet demand.

All the past week the **ST. LOUIS** commission men had plenty of good stock of anything seasonable. There is an over supply in sweet peas of fine quality, and the same may be said of violets, and cheap prices prevail. Roses have been coming in fine and plenty of them, with prices ranging low. Carnations are quite plentiful in every variety, too, and the quality extra good. Lilies are in good demand; also callas. The market has a good supply in tulips, lily of the valley and hyacinths, and they sell well at all times.

CHICAGO NOTES.

A Successful Bulb House.

Chicago bulb growers have now had two winters when the proper storage of their stock was a very live question. Last year in spite of all the protection they had given them they found the frost had extended beyond the pots and pans in which the bulbs were planted. This year has been too warm for best results. One of the large growers in Chicago experimented in a small way a year ago by having a cement cellar, under a cottage, fitted up as a bulb cellar with such success that during the past summer he built a cellar over 20 x 100 feet. The walls are of concrete and a part of the top is of reinforced concrete, supported by steel beams, and shelves to accommodate a very large number of bulbs. It has proven a great success.

Lilies and Azaleas.

As the greatest of the florists' holidays draws near, the fate of the lily, without which Easter would not be Easter to many, hangs in the balance. How hard to force them to get them just right for the early Easter, is the all-important question. Tall, slender, frail looking lily plants are not in favor with Chicago buyers and equally unacceptable are plants with no open blooms, so Chicago growers are trying to guide their precious cargo along the channel that leads to the harbor, where lilies may be exchanged for dollars. Most growers are optimistic in their present outlook and think both plants and cut lilies will be, at least, fair in supply and quality.

Azalea growers have had their troubles the entire season owing to the condition of all the later importa-

tions which were far below the usual standard. The Easter supply will be good in quality but owing to the number discarded will not be so large as usual.

Trade Items.

The number of shamrocks sold this week in Chicago is beyond the wildest flights of imagination five years ago.

Flower boxes, with suitably decorated covers to appeal to St. Patrick's Day flower purchasers, are seen in the flower stores.

April 18th has been appointed Arbor Day. A rivalry between department stores a year ago, placed the price of young trees at one cent each and the number sold was almost incredible.

The Foley Manuf. Co. are receiving an unusually large number of inquiries from those who contemplate building this spring. Despite the recent cold weather and the snowfall orders have been placed and an active year in greenhouse building is predicted.

The John C. Moninger Co. are responsible for a new offering to florists which will preserve the iron in the greenhouses. They tell us it has been the work of years but that they have succeeded beyond a doubt. This Metal Kote can be applied either hot or cold and neither blisters nor scratches but adds indefinitely to the life of all metal, in the construction of the houses. See their advt. in this issue.

Personal.

Wilder Deamud has resigned as secretary of the Chicago Florists' Club and left for Bay City, Mich., March 11th, where he will take up a new enterprise in the retail line.

Visitors—Geo. T. Crabb, Grand Rapids, Mich.; John S. Wilson, El Paso, Ill.; F. H. Henry, New York; T. C. Joy, Nashville, Tenn.; C. W. Scott, Yokohama Nursery Co., New York; W. A. Philippo, Hillegom, Holland.

BUFFALO NOTES.

Another Scott has taken unto himself a bride and this time it is Oliver J., who was married to Miss Flora Bass.

The well-known flower shop of Gertrude Sauer has changed hands and is now being run by George Clemens and managed by Miss Lily Burns, recently of the J. H. Rebstock Co.

Another new flower store has been opened the past week in the Central Park district by A. T. Vick of Albion, N. Y. The location is 2324 Main street and while the store is not a large one, it is well-fitted out with fixtures making a good appearance.

A sign displayed in the window of R. M. Rebstock Co. a few days ago read as follows:

Subject—Departure.
Object—Matrimony.
Enough said; she is inside.

Miss Hazel Adams who has been connected for some time with the above firm has made departure and the object is matrimony. Miss Adams' engagement was announced recently, and she is to be married on April 17.

MISCELLANEOUS

BUY OR LEASE 10,000 to 20,000 feet of glass. Address "H," care HORTICULTURE

OVERVALUATION OF GREEN-HOUSES.

A peculiar condition of affairs exists among the several greenhouse men and the board of relief. It was many years ago that the standard valuation of greenhouses was placed at \$14 per square foot.

In those days wood and glass were the principal materials of construction which made \$14 a reasonable figure of valuation. Modern methods of construction calls for iron piping for framework which is much cheaper than wood consequently lessening the cost of construction.

The assessors this year dug up the old \$14 per square foot valuation and used it in making up the grand list. The result was a boost to the amount of several thousand dollars of the town's grand list. It happens that Oleson and Lunden, were the only greenhouse men who handed in their list to the assessors last fall. When aggrieved owners of greenhouses appealed to the board of relief and showed the members of that board the unjust raise in their tax list, bringing with them figures to show cost of construction, etc. That body immediately saw the reasonableness of their appeal, but were powerless to do anything. The law is very plain on the matter. Anyone who fails to swear in their list has no appeal from the assessors' valuation, to any source.

If the board of relief should take any action upon the appeals of the greenhouse men, even though they appear to be unjustly assessed, each member of the board would be liable to a fine of \$50.

As conditions exist nothing can be done this year in the way of relief. It should be a good object lesson not only to the greenhouse men, but to all other property owners, to hand in their lists next fall, as the board of assessors will no doubt do things differently than in former years and tax lists will probably be raised all along the line. —*New Haven Register.*

Stony Croft, Ct.—Miss Marie Hotchkiss, conservatory.

West Collingswood, N. J.—Charles Zimmer, additions.

Danielson, Ct.—Franklin Crosby, house 100 ft. in length.

Flatbush, N. Y.—Dailledouze Bros., Lord & Burnham house 57 x 200.

Chestnut Hill, Pa.—Myer & Samtman, Lord & Burnham house 57 x 350.

Philadelphia, Pa.—John Stephenson's Sons, Lord & Burnham house 75 x 500.

The Lord & Burnham Company are about to remove their office from the St. James Building, 1133 Broadway, to the new 42d street building opposite the Grand Central Terminal, New York City, where they will have a very much enlarged and better equipped office facilities.

LEMON OIL CO'S STANDARD INSECTICIDE

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

$\frac{1}{2}$ Pint - - 25c; Pint - - 40c; Quart - - 75c
 $\frac{1}{4}$ Gallon, \$1.25; Gallon, \$2.00; 5 Gallon Can, \$9
10 Gallon Can - - \$17.50

Dilute with water 30 to 50 parts

SLUG-SHOT

USED FROM OCEAN TO OCEAN FOR 29 YEARS.

Sold by Seed Dealers of America.

Saves Currants, Potatoes, Cabbage, Melons, Flowers, Trees and Shrubs from Insects. Put up in popular packages at popular prices. Write for free pamphlet on Bugs and Blights, etc., to B. HAMMOND, Fishkill-on-Hudson, New York.

PATENTS GRANTED.

1,054,320. Grass Cutter and Trimmer. George Slatter, Plumtree, England.

1,054,485. Weed Exterminating Device. Leonidas H. Archard, Wymore, Nebr.

1,054,742. Grass and Weed Destroyer. Josiah W. Bodie, Greenwood, S. C.

1,055,224. Pea-Vine Cutter and Gatherer. William M. Proctor, Cheboygan, Mich.

INCORPORATED.

Augusta, Me.—Atlantic Seed Co., capital stock, \$30,000.

Troy, N. Y.—Standard Seed & Soil Inoculation Co., capital stock, \$1,000.

Hemet, Cal.—Howard Rose Co., capital, \$20,000.

NEWS NOTES.

Berea, O.—Carl Gerdman has leased the greenhouses of G. Schneider.

Corfu, N. Y.—The greenhouse establishment of the William Scott Co. will hereafter be conducted by David Scott in his own name.

Boskoop, Holland.—The firms of Felix & Dykhuys and Van Balen & Co. have merged into one organization. Mr. J. Dykhuys will be the American representative of the new concern.

Booneville, Mo.—Peyton & Barnes have dissolved partnership, and Mr. Barnes will hereafter conduct the Booneville Nurseries. Mr. Peyton will do business under the name of Peyton Nurseries, as representing the firm of T. R. Peyton & Sons.

The Recognized Standard Insecticide. Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.

\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water. It does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$5.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

7 WATER STREET, BOSTON, MASS.

CURVED IRON EAVE
STYLE "L."

This Eave although lighter than Style "S" is amply strong for all Eave purposes.
It obstructs little light and is ice clearing in the most severe weather.
It is intended for use with fixed glass only.

FOLEY IRON FRAME HOUSE ERECTED FOR JOSEPH THOMAS, GREENSBURG, PA.

This is one of our Iron Frame Flat Rafter Houses. 34 ft., 6 in. by 300 ft. The testimonial given by Mr. Thomas as shown herewith will give you an idea of how superior our construction is as compared with the houses he had been building of an inferior type.
We are now working on an order for an additional house for Mr. Thomas.

"The frame is certainly the easiest and most simple to erect of any houses we have built. The many visiting florists who have been through the house, join us in pronouncing it the most modern and up-to-date house they have seen."

Joseph Thomas.

THE FOLEY MFG. CO., 2510 So. Western Avenue, CHICAGO, ILL.

MONINGER'S METAL KOTE
A NEW PRODUCT

After several years of testing and making a careful study of Metal Paints for greenhouse work, we have at last solved the problem. Moninger's Metal Kote is the Real Thing. Specially prepared—Heating Systems—Can be applied at a temperature exceeding 180 degrees. No vapor, no fumes, no odor; does not bubble, blister or scratch from heat or cold. Not injurious to plant life. Just what you need for Iron Gutter, Iron Frame Houses, and all Greenhouse Metal Work. Increases durability of all metals from 50 to 100 per cent.—One Coat only required—One Gallon covers 500 square feet of surface.

PRICE, \$1.75 PER GALLON

Last Chance

On The Special Sash Offer

The offer was good for 30 days—not a day longer.

Nine days are left.

If you haven't ordered—better step lively. It's probably the only **special sash offer** we will make this year.

We have tried to mail to every grower in the country circulars stating directly what the offer is on both Single and Double Lite.

If your circular never came—write us at once, and we will reply same day, so you can surely get your order in before the time limit expires—on the 24th.

Test No. 1

After you get our sash, test them out.

Try jamming them down on the corners.

If the joists open up—you are stuck and better send the sash back.

Test No. 2

Glaze one up—give the putty three days to harden up—then hold up one end and have your man press down on the centre with all his might. It shows up the strength and importance of our steel rod (not wood) centre bracing.

Test No. 3

You grip one end of the same glazed sash, and have a couple of your men grip it at the other end, and try twisting it to break the glass. After a couple of trys you will give it up.

NEW CARNATION—"BENORA"

This variegated carnation, sent out by Mr. Peter Fisher last season, is the finest variegated variety, and one of the very best carnations of any color ever sent out.

It has immediately attained a commanding position among the very choicest sorts, and will add to Mr. Fisher's already enviable list of introductions. It is indispensable. It is a very early and free bloomer, matures quickly, making very perfect flowers of the largest size on long stems; does not split the calyx.

Strong rooted cuttings ready for immediate delivery, \$6 per 100; \$50 per 1000

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

OUR NEW CRIMSON CARNATION

PRINCESS DAGMAR

will be disseminated next season, 1913-1914. We are booking orders now at \$12.00 per 100, \$100.00 per 1000. PRINCESS DAGMAR will be exhibited at the National Show in New York.

LILIUM FORMOSUM

Many lily growers do not favor this variety, owing to the trial they probably gave it when it was comparatively new and unselected.

But right here let us say that it is impossible to get better lilies from any kind of lily bulbs, for winter flowering, than you can get from the right stock of Formosum.

There is more difference in Formosum than most people realize. The process of assortment is now going on, in fields where attention is given to quality.

Horseshoe Brand Formosum, size 9/10 which have bloomed this winter, have given from eight to eighteen flowers. That is, the selected stock. Next fall's delivery is expected to be as good, if not better.

Any florist who cannot make money on Horseshoe Brand Formosum 9/10 had better put on a kilt and take in washing for a living.

The price of a single case of this selected stock is \$20, and it is the best investment in lily bulbs today that any man can make. Order now—don't wait until it's too late.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Boronias

Now is a good time to put in some cuttings of boronias. Cuttings of half ripened wood can be inserted in three-inch pots filled with a compost of sifted loam, peat and sand in equal parts. Give them a thorough watering and then plunge in a moderately warm propagating bed where they should be kept shaded and moist. It takes some little time for them to root. When they have formed roots they can be gradually brought to the sunlight. As these pots become filled with roots they can have a shift into 5-inch pots, using a compost of fibrous loam three parts, fibrous peat two parts and enough sand to make it porous. Give ample drainage so the water will pass off freely. Place in a house that runs from 50 to 55 degrees at night. When the plants become well established they will require plenty of ventilation and when hot weather sets in they can be placed in a frame where they can have plenty of air. They can be grown here until September. As the older plants go out of flower they can be repotted in a mixture of fibrous loam three parts, fibrous peat two parts, cow manure one part and a little sand.

Dendrobiums

Dendrobium nobile and its various forms, together with many hybrids will soon be through blooming. Before the young pseudo-bulbs make too much headway they should be rebasketed or potted. Do not give them receptacles too large as many growers err in this. They will make excellent growths in such, but a large body of compost holds moisture too long and thus it frequently happens, when the resting period comes in fall, that there is just sufficient moisture held in the compost to start many of the nodes into growths, instead of flowers. For compost we find equal parts of sphagnum moss and fern fiber good. Many plants will probably not require that anything be done to them; others will be benefited by a little surface dressing. A good position in the warm house on the south side, where there is plenty of light is most suitable at first, watering carefully and keeping the compost only moderately moist until the roots show signs of activity, after which water may be more freely used; careless watering at this stage often causes a loss of new growth by damping. Those hanging near the roof should be of a larger size, allowing the small plants to stand on the benches. Damping down will now be necessary, morning, noon and night, and the plants should be examined each day and watered only if they need it, for even whilst growing they should not be kept in a saturated condition.

Dipladenias

When well-grown and managed there are but few plants that equal the dipladenias in the beauty of their flowers. In the cultivation of dipladenias one point should not be lost sight of; that is, the necessity of a brisk temperature. To do well they want a night temperature of from 70 to 75 degrees, while in growth with a day temperature of from 85 to 90 degrees with sun heat. Syringe them overhead every morning getting the water well to the underside of the foliage as they are subject to red spider as well as to scale and mealy

bug. Care in watering is the most important consideration in growing dipladenias. When in active growth they will not continue in a thrifty condition unless they get water abundantly. When done flowering they require to be rested, but never should be subjected to an absolute drying off process. Very little water is necessary, however, when they are at rest and it may be safer to err on the dry side than on the other. A temperature of about 55 degrees suits them in the winter, while at rest. Dipladenias are easily propagated from cuttings of wood with one or two joints. When the roots are about one inch long they should be carefully removed from the sand and carefully potted into small pots. The material for the first potting may be composed of peat and sand in equal proportions and for subsequent potting porous, lumpy peat two parts and sand and charcoal one part will do.

Outside Sweet Peas

Sweet peas should be sown just as soon as the frost leaves the ground and it has dried out sufficiently to be plowed or spaded without being pasty. Give the ground a good sprinkling of wood ashes and fine ground bone as they doubtless form the best elements in potash and phosphoric. Points to remember in sweet pea culture are: Liberal enrichment of the soil; burying the seeds at least three inches deep; care not to sow thickly, and if you have done so, thin in good season; give them brush and other supports before they start to climb; remove all seed-pods as soon as formed, give persistent cultivation and mulching to assist in keeping them cool and moist at the roots. Watering in dry weather, keeping the flowers cut as they open and a hosing on warm summer evenings will all help to make sweet pea culture a success. A short time before you begin to pick you should spread two or three inches of stable litter entirely over the ground between the rows. This will help keep the ground moist and be of the greatest benefit when you water.

Pricking Out Seedlings

There will be lots of seedlings coming on now and many of these will require pricking off into flats. As the days lengthen and the sun increases in power it will be necessary to watch the many flats and pans of seedlings closely. Use for all seedlings a compost with a good proportion of leaf-mold in it. If some well broken up cow manure or the manure from a spent hot-bed or mushroom bed is added the seedlings will grow all the better. Shade all newly pricked off seedlings for a few days. A neglect to do this may mean a loss of many of the little plants. Careful and thorough watering and a moderately close and moist atmosphere for the first few days will reduce losses to a minimum. In addition to seedlings, there are many small cuttings which are just as well, or better, in shallow flats than in pots. Never leave them in the cutting bench to become hard. When the roots are quite short is the time to transplant and not when they have matted the whole bench with roots. See that all seedlings are kept as near the glass as possible, as it insures a stocky and robust growth.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Planting Grafted Roses

(Written in Reply to Inquiry.)

When planting grafted rose plants, the question as to which is the best method naturally arises, and it is but very seldom that a number of growers will agree on one certain plan as being the best. Conditions vary and to lay down one rule for all would be very impractical, and foolish as well. A good deal depends on the grower himself, who must be the judge. Grafted plants that are set with the graft too high above the surface of the soil are very likely to be broken off when syringing even though they are properly tied to either stakes or wires. And, not only that, but they will not break from the bottom as readily as plants that are set lower. However, the plants should not be set too deep as that would not be doing them any good either. We would always recommend setting the plants with the graft about level with the surface of the soil. In selecting plants take all those that have been grafted as low as possible—they are the best. As to the results there is no reason whatever why plants planted with the graft above the surface of the soil of the bench should not do equally as well as those planted otherwise, providing they are properly handled. However, bear in mind the fact stated above, about the plants breaking easily when syringing. With this continually in mind the grower should experience little trouble in producing strictly high-grade cut blooms.

Grafted vs. Own-Root Stock

Our experience with the two is such that we would prefer the own-roots, in such varieties as Killarneys and Radiance. Except under unusual conditions, the own-root are as good and in many cases better than the grafted stock. Where the soil is extremely heavy and liable to stay wet for any length of time during the winter months—then plant the grafted stock. Or if your help is not of the most experienced kind, and you are afraid the plants will be overwatered—then plant grafted stock also; as it will stand for more moisture at the roots without any bad effect. Where Brides and Bridesmaids are still grown these should be grafted as they do much better grafted than own-root, especially in their second and third years. We have never had any experience with grafted Beauties and therefore we can pass no comment on these. We always had grown them on their own roots.

Bonemeal

From now on we would not advise using much bonemeal on the benches, except where the plants are to be run another season. Bonemeal is a fertilizer in class with cattle manure, therefore it is rather slow in acting, especially when it is ground a little coarse. Therefore from bonemeal applied from now on the plants will get but little and there is a large amount of it wasted, and if there is anything that we all must keep away from it's waste.

Liquid Manure

There is nothing that can replace good liquid manure to supply all the necessary plant food that the plants

require at this time of the year. Where facilities are such that the liquid can be boiled before applying, so much to the good. A little bonemeal can be easily added to the mixture, the best way being to dump the required amount of fine bone right into the manure side of the tank and let it mix in and run through the screens with the other liquids. Make the liquid as thick as is possible without clogging up all the pipes. It can hardly be made too strong from now on, as the plants are growing rapidly and will easily take it about as fast as it can be applied. However, be careful as we have repeatedly advised, and do not have the plants too dry when you apply it. Better go over the benches with clear water first to make sure.

Weeds

These are a nuisance both in the old benches and in the pots among the young plants, and should not be tolerated under any circumstances. Boiled liquid manure will be quite free from weed seeds and will not be responsible for any that appear on the benches. Weeds are great housers of spider, a very small but bothersome enemy of nearly all greenhouse plants, and therefore every little thing that can be done to prevent its spread will be of great service to the growers. Remove all weeds as fast as they appear, and do not let them grow a couple of feet high among the rose plants. There is such a thing as a crop of weeds saving a batch of cuttings during the dark weather, as weeds will carry off a large amount of water. But this is only in rare cases, and as a rule all weeds should be rooted out as soon as they appear, for manures are too expensive to be used in supplying plant food to nourish the weeds.

Mulching

As the warmer days approach the roots of the plants will need a little more mulch to protect them from the heat and from becoming extremely dry. To do this a good mulch of cow manure can be applied, a little layer of soil over the top of it, and the rest left to the plants themselves. They will take care of the mulch providing the grower remembers to give them sufficient water. Do not go to any extremes in drying out the plants at this time of the year as naturally they should be growing vigorously and allowing them to become too dry would hinder their growth a good deal, and would tend to deform the buds. This should be avoided as the market does not care for anything like poor stuff. "The best is none too good" is a common saying, and it is getting more and more popular every day, as it can be applied to nearly all things, no matter what line they may belong to. In case of a "glut" in the market it is the best stuff that always sells first, even at higher prices than may be ruling for the week.

Packing

With spring come larger crops of roses and the growers are likely to be tempted to crowd their stock when shipping to the markets. There is very little in doing this, as most of us know, as bruised or crushed stock is not in demand, never was and hardly ever will be. If

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Stopping and Tying the Grape Vine

Stopping the growths of a grape vine should be systematized to secure the best results. Young vines making the first year's growth do not come under this heading to the extent of the fully developed ones. If the younger canes are allowed to grow away more natural it will promote a greater root action which is desirable. See that the part of the cane which is to form the first portion of the rod is kept straight and free from lateral growths, after which two or three "leaders" can be taken up if desired and allowed to "run."

With the older vines things are different; the spur system will be in vogue and the proper stopping of laterals must be attended to. If two eyes were left at pruning time and both break, rub out the weaker one; where both are of equal strength retain the one likely to make the most compact spur. When the laterals are from six to eight inches long the tiny flower trusses can be seen and soon afterwards the leaves beyond expand. Wait until two are visible and then pinch out or "stop" the lateral growth. Do not mind how short it all seems at this time; they will always pull out. In time sub-lateral growths will push out from the axil of the leaves. Those between the bunch and the spur should be rubbed out completely. The two leaves beyond the bunch should be allowed to develop one sub-lateral leaf each, making four altogether beyond the bunch. All subsequent growths should be rubbed out as they appear. In this way all the strength possible is thrown into the bunch. Do not be in a great hurry to tie the laterals down; they are very brittle in the young stage; later the growths will be more pliable. Keeping them away from the glass will be all that is necessary for quite a while.

Apples and Pears

Apples and pears that were started early will have made their own natural thinning ere this, so much so in some instances that any further reduction will not be needed. Where there is still an excess and the fruits are swelling nicely reduce them to one to the spur. Do not be over-anxious about this job or a total loss may be experienced. There is a growing look to some fruits right from the start while others are always doubtful until

half matured. The trees will take regular feed from now on and on no account let them become dry at the roots.

Apircots

Apricots are difficult to handle in pots. A set has to be secured to start with, which at times is not easy. Keep an even temperature after this and help the trees along. Any stimulants given must be weak. As the stone is forming, a little lime should be mixed into the water. Let it be put in the water and not on the surface of the soil; by doing so a better solution is given the roots and the danger of the lime caking on the surface soil is thus avoided.

Late Houses

In some states the late houses will be swelling their buds fast at this date. Cooler localities may have to wait another week or so before noticing any movement. Where this house is to be kept back as late as possible, a minimum night temperature of 40 degrees is all the change that need be made; open up the house as usual through the day. As the buds show signs of bursting a more congenial atmosphere must be offered them. There is a danger of keeping the house too cool after reaching this stage; laterals will be very short-jointed; the bunch will be too close to the rod and itself be short and stubby. A careful watch must be accorded them and the temperature raised accordingly. If the border is on the dry side see that it has a thorough watering without delay.

Vine Cracking

Am sorry I cannot enlighten G. W. W. on his Muscat of Alexandria vine cracking at intervals for a distance of four to five feet from the top on the west side only, especially as the present growths are in good shape. Had there been any weakness or irregularity on these it might be accounted for. I presume the same preparation was used for cleaning the rods throughout the house. Muscat of Alexandria is one of the most tender grapes we have but this theory cannot be followed, as only a section is affected. Should watch them closely through the growing season to ascertain if it is spreading, as in all probability it is a disease of some kind. Have any other readers experienced similar conditions or can they account for this one?

the growers could only realize how very particular the people who buy from retailers are, they would no doubt be a little more careful in handling their cut blooms at home. The very first thing a lady buyer sees is a crushed leaf or a bruised petal and of course the roses are not fresh any more. It is very true that roses that have been bruised badly will hardly open up as well as those that have been handled "with gloves on."

Fumigation

Never allow this to remain unattended to or you will

no doubt have cause to regret it. Here again the growers ought to see the shocking expression on the young lady's face when she discovers the roses she has purchased and prized so highly are "alive." That is a bad thing for the retailers and in spite of the hours spent daily in polishing the flowers, once in a while a complaint comes that "there were 'bugs' on the roses, etc., that your boy delivered to us this morning, and unless they can get better flowers they will not buy any." We think the trade is hurt a good deal this way, as if there is anything the people detest it is "bugs."

We take pleasure in announcing to our readers and the trade in general that W. P. Edgar, one of the most widely known and successful publicity men in New England will, on March 24, assume a position on HORTICULTURE's

staff. Mr. Edgar is already well known to many of our readers through his work in connection with the National Flower Show at Boston two years ago as assistant manager and press agent for Chester I. Campbell, on which occasion he made many friends among the exhibitors by his efficiency and courtesy. Excepting for such call as may be made upon him in his position as publicity promoter for the Massachusetts Horticultural Society, Mr. Edgar will henceforth devote his entire time to the interests of HORTICULTURE. Watch us grow.

The critical public

Our leaders who are interested in the cut flower industry as growers for the wholesale markets will do well to read carefully Mr. Ruzicka's advice in his rose article this week. It is a good and sensible admonition from a grower to his brother growers as interesting as it is unusual in its recognition of the retailers' particular troubles and dilemmas. Mr. Ruzicka's slogan, "The best is none too good," is well supported by facts, for the demand for better and better quality becomes increasingly insistent every day. Mark it down as an indisputable fact that "the market does not care for anything like poor stuff." The reason back of this is, of course, the knowledge now possessed by the average flower buyer as to quality and this is, as Mr. Ruzicka says, something that the retail dealer is forced to meet. Even the curbstome fakir must have the right goods today, transient buyers turning up their noses at what would, a few years ago, have passed muster in the best stores. Whether it may seem reasonable or not the fact as above stated remains and there is no escape from it. If the goods are to bring a living price—or, indeed, if they are to sell at all in some markets—the quality *must* be there.

The Greeks' great loss

HORTICULTURE extends to its readers of Greek birth sincere sympathy and condolence in the dastardly assassination of their loved monarch, at a time when they were rejoicing in the well-won victories of their countrymen under his leadership, over a desperate foe. The Greek has in recent years come to be a powerful factor in the flower trade in this country and this is particularly true in New York where many hundreds of their race are engaged in one or another branch of the floral industry—not as curbstome dealers always, by any means, but conducting large stores and as leading dealers in greens and other supplies for florists' use. The readiness of the Greek florists of New York to sacrifice their business interests and hasten at the call of their king, to the defence of their country, as so many of them did, was a fine exhibition of patriotism and won for them the admiration of many who had hitherto regarded them lightly. It is said that King George's motto was: "My strength lies in the love of my people." He seems to have enjoyed the love of his people in a superlative degree and the sympathy of all right-thinking men will now go out to them in this deplorable calamity which has befallen them.

OUTDOOR ROSES.

A paper read before the New York Horticultural Society on March 15 by Edwin Jenkins.

Introductory.

The rose has ever been a favorite flower of mankind, perhaps the greatest favorite of them all. Poets of every land and of every age have sung its praises, and rightly so, for truly a plant that yields such delightful fragrance, that comes arrayed in such diversity and such splendor of color, is worthy of the homage of all. Something tells me, however, you would rather hear from me something more to the point, what soil and manures are best suited to its needs, and how best to combat its insect and fungoid enemies.

Location of a Rose Garden.

First, an open spot where no large overhanging trees can cut off the life-giving sunshine or absorb the necessary light or where the roots (and it is well to remember that the roots of some trees travel a long way in search of food) of trees are likely to enter the rose beds and rob the roses of their own rightful food. If you are fortunate enough to have the choice of soils, choose a medium heavy loam, rather than a light, sandy, or black, peaty soil, and if it is of a yellow or reddish tinge and has been growing grass for a number of years, so much the better. However, let no one despair because their soil is not just what we could wish, but take heart from the thought that good roses can be grown with a little intelligent care in most any soil that is not absolutely acid or alkaline. The best aspect is a gentle slope to south and east as the rose, in common with most all vegetation, thrives and luxuriates the better for being kissed by the morning sun. And if the chill winds which blow from the north and west are cut off by some friendly building or belt of trees, so much the better. The rose loves a cool, moist medium, for its roots, but it cannot endure wet feet. To make sure that our roses will not suffer from a water-logged sub-soil, test pits should be dug at several different points of the proposed location; these test pits should be at least four and a half feet deep and if in average weather water stands more than a few inches deep in these pits, the ground should be tile drained. Should you find it necessary to drain be sure to do a good job. Put the tile down at least four feet and cover the top two-thirds of the joints with tarred paper, and do not be led into any false notions of accelerated drainage by putting gravel or other porous material on top of the tile; it is a mistake and leads ultimately to trouble; refill the ditch with the soil excavated from it and tramp it thoroughly. I shall not attempt to advise you about the design of the rose garden as that is work for the garden architect after studying all the local conditions. But whether the belt of trees or building previously referred to are in existence or not to shelter the rose garden from the cold winds, I would build a pergola along the north and west sides. This pergola may be as simple or as elaborate as your taste dictates

or your purse will allow; be that as it may, the pergola, besides furnishing some protection to the rose garden from the wind and to the rosarian from the hot sun makes a splendid place for the various climbing or rambling roses and is a charming feature in any rose garden. Whoever designs the rose garden should keep in mind certain practical features, such as easy means of access for the periodical mulchings, and that narrow beds are to be preferred because they are easier worked without tramping the soil in wet weather, when tramping would make the surface hard and sticky, which, when dry would bake and exclude the air.

Preparation of the Soil.

Dig deep, should be the motto of every grower of outdoor roses. Nothing less than two feet of well ma-

ture, and use it in large, and impressive, quantities. If one-sixth to one-eighth of the bulk of prepared soil is cow manure it will hardly be too much; do not put it at the bottom or in layers, but thoroughly incorporate it with the whole mass of the soil. A generous sprinkling of bone meal throughout the mixture will be beneficial as it will supply the phosphoric acid which is deficient in all animal manure. Naturally, if cow manure is unobtainable, horse, sheep or pig manure will make a good substitute, though there is something about cow manure that is very palatable to the rose.

(To be continued.)

RESTORING A WORN-OUT PASTURE.

Editor HORTICULTURE.

Dear Sir:

I have a lawn of ten acres which is used for hay and pasture. It is all run out, got weeds and parts bare. I have top-dressed several times with rotten barn-yard manure. The ground hasn't been broken in thirty years and I don't want to plough or break it up. As I know that would be the best thing to do with it, please tell me the next best thing to do. I am thinking of harrowing it this spring and seeding it with permanent pasture seed and spread some good fertilizer on. Please let me know through your paper how much seed to use per acre, etc. Yours truly,

A SUBSCRIBER.

I would advise Subscriber to sow a good fertilizer on his ten-acre plot as soon as possible. Then to use a disc harrow both ways, to work the fertilizer in thoroughly. This would also loosen the old sod and leave the ground in good condition for seeding. Sow 15 lbs. of clean red-top and 23 lbs. of Rhode Island bent per acre, if used for lawn. If used for hay and pasture alone, use 25 lbs. of timothy with the red-top leaving out Rhode Island bent. See that the ground is well rolled after sowing.

HENRY WILD.

Conyers Manor, Conn.

TO KEEP BRUSSELS SPROUTS.

Editor HORTICULTURE:

Dear Sir—I would like to know how to keep Brussels Sprouts in the winter, if you can keep them by hanging them up in the cellar.

Yours truly,

W. H. M.

Pittsburgh, Pa.

Brussels Sprouts may be kept in an ideal root cellar but there are very few of these and it is safer to heel them in a cold frame. Do this when they are dry and protect from severe frosts, but open the frame and ventilate on every favorable occasion. We have good ones now that have been kept this way since Nov. 15th.

E. JENKINS.

The first installment of the press service of the "Nat. Council of Horticulture," by J. H. Burdett, of Chicago, includes notes on making and repairing lawns, indoor seed planting, preparing soil for a garden, substitutes for manure, points about sowing seed, and fertilizers.

ADVERTISING TALKS

BY

Ralph M. Ward

No. 2

The New York wholesale market has one cut flower buyer who can consume more than any twenty other buyers combined. At times when the market is glutted he is the salvation of the growers. Why can he consume such quantities? Because his flowers are properly advertised. After Mr. Gentleman Florist from the Avenue, and Mr. Ordinary Florist from the side street, each take a few boxes, Mr. Advertiser Florist steps in and takes the balance, generally at a price consistent with the volume. When the New York Florists' Club suggested that florists take a few tickets for the National Flower Show for distribution, most men had twenty-five or fifty in their minds. Up pops Mr. Advertiser, saying he will take 5,000. Correct advertising is the most powerful trade-getter known. Mr. Advertiser is known by the trade he has and it is impossible to down him. And, besides, people like to buy from the man who does the largest business, because of the reasons why his business is so large.

nured, thoroughly broken up soil should satisfy the earnest rosarian, and in most cases to get this it will be necessary to remove entirely about one foot of the sub-soil and cart in good loam from elsewhere to take the place of that removed. That this sounds like a big undertaking I am well aware, but for those who can afford it it is well worth while, for human nature being what it is, there is one pleasure in enjoying the exquisite color and delightful fragrance of the rose and there is another pleasure—more earthly perhaps but none the less potent—in having better, bigger, finer roses than our neighbor. The competitive spirit is strong in mankind whether it be in the display of wealth or the display of roses. What manures shall we use in preparing the soil? If it is to be had use

SPRING EXHIBITION AT BOSTON

The advent of spring was very auspiciously celebrated by the Massachusetts Horticultural Society on March 14, 15 and 16, when the three halls in Horticultural Building, Boston, were transformed into a great, radiant garden. Boston society turned out in throngs to admire the wondrous display of the florists' and gardeners' art. It certainly was an inspiring scene and it required only the music of the Cadet orchestra to complete the illusion of an enchanted land. There were great plateaus of brilliant tulips, daffodils, cyclamen and cinerarias, golden groves of acacias and genistas, banks of palms, and tropical verdure, beds of lillies and roses in the main hall, thousands of splendid carnations with roses, violets, pansies, and orchids in the lecture hall, and the small hall was redolent with the perfume of hyacinths, tulips and other sweet-smelling things. We cannot describe it all here—only some of the more notable exhibits.

Prof. C. S. Sargent, showed a most sensational group of seedling azaleas, hybrids of *Hinodegeri* with other small flowering varieties. These showed a great variety of colors. Duncan Finlayson arranged a great central group of flowering and foliage plants in which effective use was made of *Primula malacoides* and other profuse flowering subjects, including some fine acacias. Mrs. Fred'k Ayer, showed an unusually extensive collection of acacias and numerous specimens of *Erica melanthera*. From W. W. Edgar Co. came a group of roses, H. P. and H. T. and Ramblers such as are rarely seen so early in the season. A large group of *Schizanthus Wisetonensis*, of the most improved strains, plants measuring four to five feet across, was an object of admiration and the cyclamen of which there were several large displays were up to the well-known Boston standard for this specialty.

The finest specimens of *Erica melanthera* ever seen here were staged by Walter Hunnewell, T. D. Hatfield, gardener. These were a revelation of the possibilities with this useful heather. There was a little group of uncommon hard-wooded plants from Knight & Struck which attracted much attention. *Gnidia pinifolia*, several rare and beautiful ericas and "Cape plants" were in this collection. Thos. T. Watt, gardener at Wellesley College had a nice collection of odd things including the white *Strelitzia*, *Veltheimia viridifolia*, camellias, etc. In the large group from Ed. McMulklin which filled the stage in the lecture hall a specimen of the new Daybreak azalea was a conspicuous object. A. N. Pierson was represented by some magnificent specimen *Adiantum Farleyense* and a vase of Milady rose which contained some wonderfully full and symmetrical blooms. An interesting collection of hard-wooded plants from Mrs. J. L. Gardner, a group of choice conifers in tubs from Breck-Robinson Co., and some perfect diminutive specimens of *genista* from W. W. Edgar Co., and

SPECIMEN PHALAENOPSIS SCHILLERIANA
By W. A. Manda, Winner of First Prize.

Jasminum primulinum from R. & J. Farquhar & Co. were all worthy of mention.

The bulb collections in pots and pans were very extensive and the flowers have never been finer. This was particularly the case with the hyacinths which were by far the best we have seen at any exhibition in recent years. One display, that of the Breck-Robinson Co. contained thirty new varieties of bulbs, especially attractive being tulips President Taft, single early, very large crimson and white petals; Sarah Bernhardt single early, "crushed strawberry;" Rose of Holland, single early, white with bright pink flushed tips; Wm. Pitt, Darwin tulip, vermillion; *Narcissus Lucifer*, pale with short bright cup; Van Waveren's Giant Trumpet and Olympia, trumpet. Mr. McKenzie, gardener for C. B. Dane showed a very valuable collection of orchids in bloom. Among

them were several superb novelties, among these being *Brassica Catealia Rowena* (*Brassavola Digbyana* × *L. C. Doris*), *Brassica Cattleya Lee-manii* (*Brassavola Digbyana* × *C. Schroederae alba*), and *Cypripedium Maudiae Magnificum*. W. A. Manda showed a small group of choice new things including *Nephrolepis tuberosa plumosa* and *Begonia Mrs. W. S. Kimball* and took the prize for specimen orchid with a fine *Phalaenopsis Schilleriana*.

The carnation display was very extensive. All the popular varieties of the day were shown in elegant condition. Among the most noticeable were vases of Rosette, Gloriosa, Benora and White Wonder from A. A. Pembroke, who proved himself a wonder in his cultural abilities; Mrs. C. W. Barron and Princess Dagmar from Patten & Co.; Wm. Eccles and British Triumph from Scott Bros.; a seedling of glowing wine red from S. J. Goddard; Eleanor, a remarkably pure soft pink seedling from H. A. Stevens; Gorgeous from Peter Fisher; The Herald (hurt in transit), from Chicago Carnation Co.; Pocahontas from W. R. Nicholson, and Matchless and Mrs. C. W. Ward (two days on way), from Cottage Gardens.

The cut flower section was further enriched by a fine vase of Mrs. Chas. Russell from Waban Rose Conservatories; extensive displays of pansies, violets and sweet peas, all of superb quality, from Wm. Sim; gardenias and cattleyas from F. J. Dolansky, and snapdragons from F. W. Fletcher and G. E. Buxton.

The decorated dinner tables were as usual a prime attraction. First prize went to Mrs. Duncan Finlayson for a very simple decoration of sweet peas in a slender vase, corsages of *Coelogyne cristata*, boutonniere a single flower of *Cymbidium*. Wax Bros.' design, which won second, was composed of yellow daisies and blue cornflowers. Third went to Henry N. Comley for Sunburst roses, yellow pansies and *Adiantum Farleyense*. Other entries were Edw. MacMulkin, with single-flowered pink rambler roses; F. H. Houghton with Taft roses and myosotis; Boston Cut Flower Co., with two tables—one of Killarney Queen and lilacs, the other of Sunburst and Farleyense, and Harry Quint who used Sunburst roses and lilacs.

The list of awards was a lengthy one, and we are obliged to condense it somewhat. Winners of first prizes

only: For azaleas—A. W. Preston; palms, Mrs. C. G. Weld; ericas, Mrs. Frederick Ayer; acacias, Mrs. Frederick Ayer and Mrs. C. G. Weld; hard-wooded greenhouse plants, Mrs. C. G. Weld; roses, W. W. Edgar Co.; cyclamens, Mrs. C. G. Weld, and Mrs. Lester Leland; cinerarias, Mrs. J. L. Gardner and Wm. Whitman; schizanthus, Mrs. Lester Leland; hyacinths, Wm. Whitman, Mrs. C. G. Weld, Francis Skinner, H. L. Rand; tulips, Wm. Whitman (four firsts), A. W. Preston (four), Mrs. J. L. Gardner, H. L. Rand and F. Skinner (one each); narcissi, Wm. Whitman, A. W. Preston and H. L. Rand; other bulb classes were dis-

tributed among the same exhibitors; general display of bulbous plants arranged with foliage plants, Mrs. J. L. Gardner; orchids, E. B. Dane and W. A. Manda; roses, W. H. Elliott (four firsts), Waban Rose Conservatories, (two). In the carnation classes, A. A. Pembroke was first and second for vases of 100 blooms; in the classes for 50, A. A. Pembroke won four firsts and two thirds; S. J. Goddard, one first and three seconds; C. S. Strout, two seconds; W. R. Nicholson, one first; violets, Ed. Bingham (two); sweet peas, Wm. Sim (four); antirrhinums, F. W. Fletcher.

Silver medals were awarded to Peter

Fisher for carnation Gorgeous; Wm. Sim for display of pansies; Wm. Sim for artistic display of violets; cultural certificate to Wm. Sim for sweet peas.

Honorable mention to F. R. Pierson Co., for display of Nephrolepis varieties; W. A. Manda for Nephrolepis tuberosa plumosa, Anthericum Mandaiana and Begonia Mrs. W. S. Kimball.

SPRING SHOW AT PHILADELPHIA.

The annual Spring Flower Show of the Pennsylvania Horticultural Society opened on the evening of the 18th inst, lasting for three days. The exhibits filled the main hall comfortably and were of a high order of merit, both as to culture and variety. Hyacinths, tulips, daffodils, spireas, hydrangeas, were conspicuously excellent in all classes. Azaleas—usually a strong feature on this occasion—were very little in evidence. Easter lilies were also on the short side, but what few were shown were of the best and showed high skill in culture with good stock back of same. Spireas were particularly good this year. Queen Alexandra and another new pink one called Philadelphia, were a marked feature of the show. The finest hyacinth was a variety called Jacques, blush, trusses a foot long and perfectly formed. In daffodils the sensation was King Alfred, a self yellow trumpet of gigantic size and magnificent form. They say these cost a dollar a bulb, and we can well believe it. They are worth it. There was a display of the newer roses but hardly in good enough form to enthuse over. The Juliet was one of them and looks entirely different in natural light from what we saw of it at the Florists'

SPRING FLOWER SHOW AT BOSTON
The Carnations and Dinner Table Entries.

Club. This seems to be worth the watching; quite unique as a color combination and in other ways. The principal prize winners were:

Joseph Hurley, gardener for Thos. P. Hunter; Wm. Robertson, gardener for Jno. W. Pepper; Samuel Batchelor, gardener for C. E. Newbold; Chas. Weyand, gardener for Mrs. G. McFadden, Jr.; Thomas Gaynor, gardener for Countess Santa Eulalia; J. W. Geary; Wm. Comfort, gardener for C. H. Clark, Jr.; Wm. Fowler, gardener for Mrs. Chas. Wheeler; Jno. H. Dodds, gardener for Hon. John Wnamake.

The prizes for this show were all donated, the donors being: H. F. Michell Co., Phila.; Van Waverin & Kruijff, Holland; H. Waterer, Phila.; H. A. Dreer, Phila. The items called for by the Dreer schedule, campanulas, irises, lupines, myosotis, primulas, wallflowers, French hydrangeas, Adiantum Gloriosa, and roses in pots, were the most educative and interesting to the general public. They are unusual things the public ought to know about, and that's what horticultural societies are formed for. But they are not easily grown and shown like hyacinths, etc. Nevertheless, that's what a good gardener ought to take pride in. Anybody can grow hyacinths, etc. A few more of them on the difficult subjects would raise our opinions.

G. C. W.

ST. LOUIS FLORIST CLUB.

The meeting of the Florist Club held on Thursday afternoon, March 13, in Odd Fellows Hall, was one of the largest attended meetings the club has had. The Carnation Show, which is an annual event, took place at the W. C. Smith establishment and was confined to consigners to this market and they came out in full force.

The Publicity Committee made a lengthy report as to what they had accomplished of late and were encouraged by the members to continue their good work. The Trustees also made a long report. The Trustees were instructed to report at the next meeting as to the advisability of holding for this years outing either a boat excursion or a picnic. All delinquent members were given one more month's time to pay last year's dues before being dropped from membership. E. W. Guy spoke of the Ill. State Florists' Association meeting at Peoria. Alex Geranios spoke on Publicity from the Retail Florists' Standpoint. Both talks were quite interesting. After the close the members visited the Carnation Show. The following exhibitors were represented: J. F. Ammann Co., Alton Floral Co., Vennemann Bros., A. H. Ahner, O. C. May, A. S. Cerney, W. E. Ogle, F. E. Hallard, H. J. Weber & Sons, Werner Bros., W. A. Rowe, Gus and Hugo Gross.

All showed carnations, except W. A. Rowe, who staged lily of the valley of high class, and the Grosses, sweet peas and violets. The varieties exhibited were: White Enchantress R. P. Enchantress, Enchantress, White Wonder, Beacon, Sangamo and Washington. No prizes were offered and the judges made a report giving the exhibitors great credit for the quality of the stock and the staging of the exhibition. The W. C. Smith Co., served a fine lunch and were given a vote of thanks for the afternoon's entertainment.

INTERNATIONAL FLOWER SHOW

GRAND CENTRAL PALACE, NEW YORK, APRIL 5-12.

The following is the list of jurors appointed thus far to pass on the exhibits at the show:

Harry A. Bunyard, chairman; R. E. Balentyne, Canandaigua, N. Y.; Philip Breitmeyer, Detroit, Mich.; H. Brown, Richmond, Va.; Emil Buettner, Park Ridge, Ill.; Louis Burk, Philadelphia, Pa.; Nicholas Butterbach, Oceanic, N. J.; Robert Cameron, Cambridge, Mass.; A. B. Cartledge, Philadelphia, Pa.; R. W. Lucas, Sparkill, N. Y.; Geo. H. Cooke, Washington, D. C.; Lawrence Cotter, Jamestown, N. Y.; J. B. Cowell, Buffalo, N. Y.; W. N. Craig, North Easton, Mass.; H. W. DeGraaff, Leiden, Holland; J. H. Dunlop, Toronto, Can.; Wm. Eccles, Oyster Bay, N. Y.; Carl Engelmann, Saffron-Walden, England; Harry G. Eyres, Albany, N. Y.; Wm. Falconer, Pittsburgh, Pa.; R. F. Felton, London, England; Duncan Finlayson, Brookline, Mass.; Peter Fisher, Ellis, Mass.; Robert Graham, Baltimore, Md.; Wm. F. Gude, Washington, D. C.; Arthur Herrington, Madison, N. J.; Wm. Hertrich, San Gabriel, Calif.; J. J. Hess, Omaha, Neb.; J. F. Huss, Hartford, Conn.; Michael Keller, Rochester, N. Y.; Chas. Knight, New York City, N. Y.; Otto Koenig, St. Louis, Mo.; Mr. Kruijff, Holland; A. J. Loveless, Lenox, Mass.; Stuart H. Low, London, England; Geo. McWilliam, Whitesville, Mass.; Fred. H. Meinhardt, St. Louis, Mo.; A. Mickle, Newport, R. I.; Geo. T. Moore, St. Louis, Mo.; Samuel Murray, Kansas City, Mo.; Colin B. Ogston, Rochester, N. Y.; Harry Papworth, New Orleans, La.; H. Philpott, Winnipeg, Can.; Chas. A. Plumb, Detroit, Mich.; Edw. Reagan, Morristown, N. J.; Geo. A. Robinson, Montreal, Can.; Wm. L. Rock, Kansas City, Mo.; Chas. Sandiford, Buffalo, N. Y.; A. J. Smith, Lake Geneva, Wis.; Harry Turner, Yonkers, N. Y.; Wm. Turner, Oceanic, N. J.; F. Gomer Waterer, Bagshot, England; W. W. Wells, Merstham, Surrey, England; E. H. Wilson, Boston, Mass.; J. S. Wilson, Des Moines, Iowa; A. H. Wingett, Lenox, Mass.; Theodore Wirth, Minneapolis, Minn.

These do not include the special judges for the Rose, Carnation and Sweet Pea Societies.

(We are informed that two names, those of A. E. Thatcher and Edward Kirk, both of Bar Harbor, Me., were inadvertently omitted from the above list of judges but will be included in the official list to be published later.—Ed.)

Intending exhibitors should bear in mind that all entries in the general section must be in the hands of the secretary, John Young, 54 West 28th street, New York, not later than March 30th. Entries in the sections of the Rose, Carnation, Sweet Pea and Gladiolus Societies must be in the hands of the different secretaries on the dates set forth in the prize schedule.

J. H. PEPPER,
Chairman Publicity Committee.

AMERICAN ROSE SOCIETY.

Additional Prizes for International Show.

For roses from glass devoted to the growing of stock for the New York market, offered by Henshaw & Fenrich. For the best 25 Richmond, \$25; 25 Killarney, \$25; 25 Yellow roses, \$25.

This is a fine prize and offered especially for New York City market growers.

Harry O. May prize.—For the best new rose not on the market, \$25.

Entries have already been made for the Philadelphia Growers' prize, Retail Dealers' exhibit and Divisions B, C, D.

Registration.

New Rose registered by The Florex Gardens, North Wales, Pa.—"The Mavourneen." Sport of Pink Killarney,

very large bud, averaging 30 petals. Color deep pink, reverse side of petal almost as dark as the inside of petal. Very fragrant; good foliage.

Notes.

The judges so far appointed are Messrs. John N. May, Adam Graham, Patrick Welsh, Philip Breitmeyer, Robert Pyle, George Asmus, A. B. Cartledge, Alexander Cumming, Jr.

An illustrated lecture will be given on Tuesday evening, April 8th, on "Roses as Decorative Plants," by Robert Pyle, West Grove, Pa.

The membership of the American Rose Society is sending in the dues nicely; the more the better.

"A Rose for Every Home, a Bush for Every Garden." New York City homes need the roses.

BENJAMIN HAMMOND.
Fishkill-on-Hudson, N. Y.

NEW JERSEY FLORICULTURAL SOCIETY.

"Carnation Night" was observed on March 14th by the above named society. The introducers of novelties were invited to send candidates for 1913. Charles H. Totty staged "Commodore," which was awarded a first-class certificate; also "Northport." A large number of the standard varieties were shown, to the delight of visitors and members. "Carnation Night" was a decided success.

The members again discussed the matter of having professional gardeners on park boards and shade tree commissions. It was finally decided to request Assemblyman John J. Bracken of Orange to prepare a bill embodying the desires of the society and introduce it in the legislature. After the bill is passed in the house, Senator Colgate will be requested to work for its passage in the senate. Communications were received from the National Association of Gardeners, and Tuxedo Horticultural Society, approving of our stand on the above matter.

The society is receiving a number of prizes for its summer and fall shows. Among them are a silver cup from John Lewis Childs, silver and bronze medals from Michell's Seed House, \$15 in gold from Pierson U-Bar Co., and \$5 from H. A. Dreer.

The awards in the monthly competition were as follows: Wm. Reid, carnations 90, roses 90; John Dervan, roses 95; Max Schneider, carnations 80, freesia 70, violets 75; F. Bergelund, carnations 60, E. Panuska, Schomburgkia undulata 90, Primula malacoides 50.

President French announces that the special order of business for the next meeting of the Chicago Florist Club will be the election of a secretary to fill the vacancy caused by the resignation of Wilder S. Deamud, who is leaving the city permanently; to receive the report of the transportation committee and to decide on the official route to the S. A. F. convention at Minneapolis. A full attendance is desired.

ED. C. TOEPFEL, Sec. Pro Tem.

THE ABOVE PRICES ARE INTENDED FOR THE TRADE ONLY

The First Club.

Credit for having had the first floral club in the Twin Cities belongs to St. Paul. About 25 years ago the County Florists' and Gardeners' Association held a flower show and made money. For some strange reason, which even the members of the organization cannot explain, the association dissolved. Its dissolution could not have been due to lack of funds because at the time it disbanded it had a balance of about \$800.

Some years after the dissolution of the St. Paul club the Association of Minnesota Florists was organized with E. Nagel (now deceased) as president. This association had members in both cities and for a number of years progressed successfully and accomplished a great deal for the benefit of florists in general. Finally, however, due to lack of interest, it followed the St. Paul club into dissolution.

The State Florists' Association.

Upon the completion of the first greenhouse built by the Park Board of Minneapolis in 1907, Theodore Wirth, superintendent of parks, tendered an invitation to the florists of the Twin Cities to inspect the new plant and to get acquainted. From this informal meeting there developed in December of the same year the Twin City Florists' Club, which is now a vigorous, healthy organization, growing in numbers and influence every year. The officers elected at the initial meeting were Theodore Wirth, president; O. J. Olson, St. Paul, vice-president; S. D. Dysinger, St. Paul, secretary, and R. A. Latham, Minneapolis, treasurer.

The monthly meetings of this club, held alternately in the two cities, were well attended. Exhibits and papers kept the interest high. An annual winter dance and a summer picnic always drew large crowds and were helpful in promoting closer friendship between the florists and their employees.

To place the association on a business basis and to give it prestige, articles of incorporation under the Minnesota state laws were adopted in June, 1908, and the organization given the name Minnesota State Florists' Association. Mr. Wirth remained as president until 1911, when he resigned. Hugh Will was elected to succeed him. Mr. Dysinger has been secretary from the beginning with the exception of about one year.

Among other achievements, the association has been instrumental in obtaining an increase of \$500 in premiums at the Minnesota State Fair, which is the largest state fair in the country. Last year the premiums for floricultural exhibits amounted to \$1853.

Minneapolis' First Flower Show.

In 1910 Minneapolis held its first flower show under the auspices of the

Minnesota State Florists' Association. The judges pronounced it the best exhibition of its kind they had ever attended, both in regard to exhibits and artistic layout. Same showed many pretty landscape effects and won the highest praise. Particular credit for the success achieved, from a professional standpoint, was accorded Mr. Wirth. The show was not a financial success, but it accomplished an important result in the interest it engendered and in the influence it gave for floriculture in the Twin Cities. A second flower show was held in November, 1912, in St. Paul. While it made a better showing in a financial way, lack of space made it impossible to give it the setting that was desired.

The present officers of the Minnesota State Florists' Association are Hugh Will, Minneapolis, president; O. J. Olson, St. Paul, vice-president; S. D. Dysinger, St. Paul, secretary; E. P. Holm, St. Paul, treasurer. Theodore Wirth, C. N. Ruedlinger, Minneapolis, and L. L. May, St. Paul, and LeRoy Cady, St. Anthony Park, form the executive committee. There are 53 members.

Minneapolis Florists' Club and its Work.

In October, 1911, several Minneapolis florists formed the Minneapolis Florists' Club. W. Desmond was elected president and has held that office since. The club is in a prosperous condition. While floriculture receives its first attention, evidence of its strength is found in the fact that it has a good baseball team as well as a bowling team. The club has a publicity committee which is vigorously conducting a propaganda to advance the business of the florist and has succeeded in commanding the interest and the support of the public as no other movement has. Articles of information with regard to flowers and plants are written and published in the daily newspapers. These articles have been stripped of technical verbiage and have proved interesting to young and old alike. One of the committee's first acts was the preparation of a general florist advertisement for Mothers' Day, in May, 1912. On St. Valentine's Day the committee collected about \$130 which it expended for advertising, with the result that sales of flowers were increased tremendously. The present membership of the club is 52. The officers are: W. D. Desmond, president; R. A. Latham, vice-president; C. F. Rice, secretary; A. E. Rice, treasurer, W. H. Boffarding, C. N. Ruedlinger and Chas. Hauk, executive committee. The Minneapolis Club and the St. Paul Association are co-operating actively in every effort which has for its object the improvement of conditions regarding the business they are interested in. Every member of both organizations has experienced substantial re-

sults from their propaganda sufficient to justify every step they have taken.

The Convention Association.

For the purpose of conducting the arrangements for the coming convention of the S. A. F. and O. H. a special Convention Association has been formed, embracing all the members of both associations. The conventions and publicity committee of the Civic and Commerce Association has pronounced this organization of florists to be the most complete and most efficient local convention body ever organized in Minneapolis. The details of the convention arrangements have been divided among 14 committees. All the sub-organizations have entered into their various tasks with a spirit and enthusiasm that promises good results and a most successful convention. The chairman of the different committees form the executive committee.

Following are the names of the chairmen of the various sub-divisions of the general committee:

Executive Committee—Theodore Wirth, chairman; C. F. Rice, secretary.

Finance—J. S. Mitchell, chairman.

Entertainment—Hugh Will.

Reception—W. H. Boffarding.

Information—Gust Malmquist.

Souvenir Album—J. A. Ridgway.

Press—J. F. Rice.

Transportation—J. G. Taylor.

Hotel and Depot—W. S. Desmond.

Badges and Tickets—H. Rosacker.

Decoration—R. A. Latham.

Ladies' Reception—Mrs. Theo. Wirth.

St. Paul Reception—O. J. Olson.

University—Prof. L. R. Cady.

AMONG BUFFALO GROWERS.

A visit to Charles Christensen's houses found a full crop of carnations, some mignonette and lilies which are in Easter form and altogether it was a beautiful sight. At Weixman's the houses are filled with azaleas, primulas, cyclamen, ramblers and hybrids.

J. B. Wiese, since the accident happened to one of his horses, has taken a fancy to autos. An "Overland" delivery wagon is the favored proposition. The houses of S. A. Anderson were visited and a more beautiful sight could not be had. One choice lot of lilies and the azaleas could not be better in quality, also ramblers, genistas and bulbous stock superb. The retail store consumes most of the stock produced. Charles Schoenhut has a fine lot of Easter stock including azaleas, hybrid roses, ramblers, tulips, daffodils and lily of the valley. Sangster made an excellent showing for St. Patrick's Day. The first Kaiserin and President Carnot roses were seen this week and came in from Charles Guenther at Hamburg. They are the usual Guenther quality and a good crop is on for Easter. The finest lilies for church work are to be had at Neubeck's Williamsville houses. Formosum lilies, 5 to 8 feet high, with 8 to 12 blooms and the grower is Louis Hock.

Olympia, Wash.—H. E. Rees, formerly employed by Van Slyke & Seamons, Tacoma, has leased the greenhouses of Mrs. J. M. Billings, who is retiring from the business.

In writing to Advertisers kindly mention Horticulture

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

An excellent attendance of members were on hand, Tuesday evening, March 18, to greet Edwin Jenkins, who came down from Lenox to give a little talk on "Sweet Peas." The way that gentleman gathered in the prizes at last year's sweet pea show prepared the members to expect something good and practical on this occasion and they were not disappointed. Wm. Sim staged three superb vases of his long-stemmed beauties in honor of the occasion and they made a fine object lesson to accentuate Mr. Jenkins' remarks. At the close of his talk, which was impromptu, mostly, a good many leading questions were asked and promptly answered, and then a standing vote of thanks was extended.

Mr. Jenkins spoke of the distinguishing features of the Spencer type of peas, the principal one being the open keel and the greater ease with which natural cross fertilization might occur as compared with the form of the keel in the old types which made crossing, except by artificial means next to impossible—this explaining in part the tendency of the Spencer seed to come untrue. As to the possibility of the sweet pea "sporting" he was cautious and not disposed to either assert or deny. He gave an interesting account of the origin of the Spencer type and as an evidence of the tremendous size of the sweet pea growing industry, instanced the fact that California seed growers devote 17,000 acres to this specialty and ship over 5,000 tons in a good year. He talked interestingly of the various expedients adopted to ensure prompt germination of the seed, such as soaking for a few hours in warm water, filing or clipping each individual seed, etc. He favored soaking but admitted that under certain conditions of chill or dampness seed thus treated was liable to rot sometimes. He emphasized the importance of early sowing—February or early March, according to latitude, etc.—in pots and advocated a temperature of about 60 degrees for germination, but after that 45 degrees is as high as should be permitted. For the planting outside he advised trenches not less than two and one-half feet in depth and two feet wide, filled up with very rich compost; this should be prepared in the fall. As to insects and diseases he spoke at length, mentioning mildew as one of the most difficult troubles to combat and giving as the best remedy a spraying with liver of sulphur, one ounce to ten gallons of water. Plenty of soot and wood ashes in the soil would help to keep the cut-worm down. As essentials in sweet pea growing he mentioned shading, wide spacing of the plants, pinching, constant picking of the blooms, etc. Speaking on the subject of exhibiting, he said that judges should not be expected to count the sprays in every vase before making their awards.

W. P. Edgar, who was intrusted with the duty of looking up railroad and steamboat rates for the trip to the International Flower Show made a report recommending the Colonial Line of steamers via Providence as giving a low rate for specified number. The secretary was asked to send out double postal cards to the members to

BODDINGTON'S QUALITY GLOXINIAS

GLOXINIA ERECTA GRANDIFLORA

This popular flowering plant is coming into greater vogue than ever, not only as a pot plant for house decoration, but also for cut flower purposes. Our strains of Gloxinias are the true erect-flowering type, grown by a specialist in Europe.

	Doz.	100	1000		Doz.	100	1000

GLOXINIA ERECTA SUPERBISSIMA

Having during the past season been requested to secure some specially fine Gloxinias for exhibition purposes, we have made arrangements with a noted Gloxinia specialist in England to reserve for us some of the most distinct types. The bulbs are not so large as the Named Varieties, but this is a characteristic of most Erecta superbiissima varieties.

BODDINGTON'S IDEAL PRIZE GIANT MIXED. Great variety of superb colors.

CYCLOPS. Velvety crimine, shading to a broad white border, throat dotted with dark red.

DUCHESS OF YORK. Flowers of a rich dark blue, each petal being edged with a broad band of white. A most striking and lovely variety.

SPOTTED HYBRIDS. Whenever exhibited, they create intense interest. The delicate markings, in an infinite variety of forms, add a special charm to the flowers.

SUTTON'S WHITE. A giant white flowered variety.

DUKE OF YORK. Large scarlet Gloxinia with deep white edge to each petal. A magnificent flower.

HER MAJESTY. This exquisite Gloxinia is still unsurpassed by any other white variety. The flowers are as pure as newly fallen snow, and are borne on short stems, just clear of the elegantly recurved foliage.

READING SCARLET. In color this is the most brilliant Gloxinia in existence, being an intense glowing scarlet variety of the true Crassifolia habit. An admirable companion to Her Majesty.

GOLIATH. Violet and white, fine variety.
Per doz. \$1.50, per 100 \$10.00

Boddington's Quality Tuberous-Rooted BEGONIAS

Single-Flowering Tuberous-Rooted

For planting in beds and where color effect is desired. Our stock of these bulbs will be found true to color and free from mixture.

Crimson	Rose White, Pure	Salmon	Scarlet Yellow	Pink, Light Copper	Orange
---------	---------------------	--------	-------------------	-----------------------	--------

Large bulbs measuring $1\frac{1}{4}$ inches and upward, separate colors or all colors mixed, 35 cts. per doz., \$2.25 per 100, \$20.00 per 1000; extra large bulbs, $1\frac{1}{2}$ inches and up, same colors as above, 40 cts. per doz., \$2.75 per 100, \$25.00 per 1000.

Double-Flowering Tuberous-Rooted

These can be depended upon producing 100 per cent. double flowers and contain very large and choice varieties.

Crimson	White, Pure	Yellow
Scarlet	Copper Bronze	Orange
Rose	Salmon	Light Pink

	Doz.	100
Duke Zeppelin. Intense pure vermilion-scarlet.	\$1.00	\$7.50
Lafayette. Rich, brilliant crimson scarlet.	1.25	10.00

ARTHUR T. BODDINGTON

SEEDSMAN

342 West 14th St., NEW YORK CITY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Counter Trade.

The generally stormy, rainy weather of the past week interfered to a considerable extent with seed business in the east, but with the return of pleasant weather there will doubtless be greatly increased activity in all lines. Counter trade is opening up earlier than usual and as soon as the ground is sufficiently dry to be worked properly gardening operations will be on in earnest. We believe that there is very little frost in the ground this year except in northern New England and New York, but in the market gardening sections the frost did not penetrate deeply this winter.

The Canning Interests.

As predicted in these columns some week or two since, a committee representing the three allied associations connected with the canning industry, namely, the National Cannery Machinery and Supplies and the Brokers, met in New York, at Hotel Rector, on the 11th, to consider the claims of the various bidders for the next national convention. This committee is composed of the three presidents and their secretaries. It was found that nine cities had bid for the convention. The committee finished its preliminary work early in the afternoon and then adjourned to meet in Baltimore the Wednesday following for a conference with the local committee there, representing the Cannery's Exchange. Following the adjournment of the committee on location in the afternoon, a meeting of the directors of the Canning Machinery and Supplies Association was held at the Hotel Rector and much business of importance was transacted. The board finished its work early in the evening and adjourned subject to the call of the president should it be thought advisable to hold a special meeting at any time. In the ordinary course of things, however, there probably will not be another meeting of the board before next fall.

On Wednesday evening the committee on location met at the Hotel Emerson, Baltimore, and were entertained at a dinner by the local committee. Many matters affecting the next annual convention were discussed and after dinner the committee inspected the facilities of the three leading hotels. Thursday morning they inspected the Fifth Regiment Armory which has been tendered by the City of Baltimore in the event of the convention being held there. This is a very fine, large, well-lighted hall, but is not quite as large as the Machinery and Supplies Association would like. It can be used by slightly limiting the space usually allotted to exhibitors, as it contains several thousand more square feet than the armory that was used

at Louisville for the recent convention.

The committee went to Richmond, Virginia, and performed the same service there. We are advised that no selection has as yet been made, as there will probably be another meeting and it may be two or three weeks before it is definitely decided where the next convention will be located. While we have no authority for the opinion we express, it rather looks as if it lies between Baltimore and Richmond, as the delegates at the recent convention were nearly evenly divided in their preference between these two cities.

Decline in Onions and Potatoes.

Business with the trade as a whole does not seem to quite measure up to last year. There are, of course, exceptions, but we believe the rule holds good. There has been a marked de-

cline in the demand for onion seed and the cause is easily given. Last year onions were selling at \$4 to \$5 per bbl.; this year at \$1. Onion sets were also scarce and high in price a year ago while now they are abundant and moving at low figures, though somewhat firmer than three months ago. Potatoes last year sold at \$4 to \$5 per bbl. sack. At present they can be bought in Maine at 90c. to \$1, and far superior stock to that offered a year ago. These declines in values are characteristic of the general line of seeds, though it is only just to say that prices last year were abnormally high. Measured by the past five years, present values are above average excepting potatoes and onions.

Washington, D. C.—F. H. Kramer invites his customers and friends to visit his houses also special display in his conservatory at the store, 914 F Street, N. W. The latter is gaily decorated with Japanese lanterns and make a very good showing. Mr. Kramer has secured the services of F. Boyd August, who was formerly employed by a Richmond firm but who for the last six months or more has been in Winnipeg, Man., at the Rosery.

The issue of March 15, 1913, of the "Detroit Saturday Night," contained an excellent example of co-operative advertising by the florists of that city. It occupied a full-page space, the central feature being a cut of a vase of lilies and some interesting general notes about the florists of Detroit and their profession. About this, on top and bottom and sides were the Easter advertisements of nine leading retail establishments. We do not doubt it proved a winner for everyone who was represented in it and a benefit, indirectly, to others who were not.

Of Interest to Retail Florists

OVER-CROWDING.

Floral art oftentimes suffers from the above title. The designer who is satisfied to "leave well enough alone," is the one who produces the best results with the least amount of material. In this article I will attempt to illustrate this. For example take the decorating of a galax wreath; because you are getting ten dollars for it, that is no reason why you should crowd it full of roses or any other variety of flowers the order may call for. Just use enough of the right kind and stop; don't spoil your design by taking the strongest magnifying glass to look for spaces to fill in, because you are going to dissatisfy the customer and waste flowers at the same time.

Over-crowding the window display is another mistake. The decorator has attempted to show all his goods in one day; instead of making a dainty group of pink, white, red or yellow, he has a conglomeration of all, when he might have used one color each day, displaying an individuality that commands the attention of the daily passer-by.

How often has the artistic "shower-bouquet" been spoiled by too many showers, the bouquet itself being all that could be expected, and then in the anxiety to create something unusual, a lot of unnecessary showers forced upon it, when much less would suffice. Then again, appears the over-crowded corsage. Many seem to think that if it does not weigh as much as a good-sized funeral spray there is something lacking and, to cap the climax, they burglarize the ribbon case and force a couple of bows in the center of it, whereas a little touch of ribbon where the stems are tied is sufficient. True, ribbons are always essential to dainty corsages, but there is a limit.

The designers and decorators of today have not been taught the art in one large school; neither have they worked in one city, so each one has his own way of working that he thinks is right, but none are infallible. As our apprentices see us work, so will they take up the art. Let us impress

upon them that the greatest demand among the retail florists of to-day, is for the artistic, economical worker, who can do the right thing at the right time, with the least amount of material.

MR. STOREMAN.

PROVIDENCE, R. I., NOTES.

J. J. Karins of Dreer's, Philadelphia, was a recent visitor.

Johnston Brothers are exhibiting a mammoth Bougainvillea plant at their store, it being one of the best specimens ever seen in this part of the country and is attracting much attention.

Edgar L. Nock has made an early cleaning at his houses near Roger Williams Park with the intention of putting them all to orchids. Mr. Nock has already purchased a considerable quantity of stock.

Material for the new house that Albert Holscher is about to add to his range on Hartford avenue, has arrived and operations will begin the first of the week. Lord & Burnham Co. has the contract.

The funeral of Nathan D. Pierce was held from his late home in Norwood, March 10, and there was a large attendance of friends and former associates in the floral trade. There was a profusion of floral tributes forming a deep border on three sides of the room. The bearers were Eugene Appleton, Edward J. Brookes, Nils G. Pierson and Edward Mowry.

Professor A. E. Stene, State Entomologist and Nursery Inspector, has issued a warning throughout the State, calling attention to the great spread in the brown tail and gypsy moths. This state of affairs is due to the failure of the General Assembly to make the necessary appropriation to continue the battle of extermination which began two years ago and ended as soon as the appropriation was exhausted. The refusal of the Legislature to provide funds to carry on the work has resulted in the first sum expended being actually thrown away.

S. A. G.

Cleveland, Ohio—Henry D. Jones, a florist, was run down by an automobile while alighting from a street car in front of the Hotel Statler on the night of March 13, and was probably fatally injured.

PHILADELPHIA NOTES.

With the Easter rush barely over, M. Rice Co. are already preparing for Decoration Day. Several very large shipments of metal wreaths arrived this week.

Writing from San Jose, Costa Rica, March 2, C. E. Meehan of the S. S. Pennock-Meehan Co., says: "Just landed. Bought six cattleyas today, 2½c. each. The fruit business beats the flower business down here! They loaded 35,000 bunches of bananas, and 4000 bags coffee in eight hours. Mrs. Meehan and self all well—expect to be back in Philadelphia March 12th." Which they did—beating the above missive by five days!

Visitors.—S. McClements, Pittsburgh, Pa.; Wm. Duckham, Madison, N. J.; E. W. McLellan, Burlingame, Cal.; Tillie Held, J. Dan. Blackstone, J. A. Ritter, Mrs. George Diederma, George V. Smith, Mr. and Mrs. Wm. J. Halliday, all of Baltimore; George H. Cooke, Washington, D. C.; H. Graves and H. Gibson of the Zieger Co., Pittsburgh, Pa.; E. Howard Smith, Hazelton, Pa.; Mr. Blackman, Blackman Floral Co., Trenton, N. J.; J. H. Huesman, Reading, Pa.; E. Brennenman and C. Smith of Harrisburg, Pa.; H. B. Campbell, Shamokin, Pa.; Geo. Goldback, Lancaster, Pa.

Camden, N. J.—Carl W. and Ernest D. Brown have purchased the greenhouses and business of Harvey B. Snow. Mr. Snow will hereafter devote his whole attention to his seed business.

EVER READY POT COVER

The modern way of artistically decorating unsightly clay flower pots. Makes plants sell better as they are artistic and attractive. Inexpensive, durable and instantly applied.

Made in four colors and many sizes. Sample will be sent on receipt of 10c.

Ever-Ready Flower Pot Cover Co.
146 HUGHES AVE., BUFFALO, N. Y.

CHICAGO NOTES.

Tree Planting.

The ladies of the Municipal Art League are sending out their announcements to residents of the various city streets regarding the planting of shade trees this spring. Any one can place the order with the chairman and be assured that the work will be done right. Trees planted last fall by the committee will be replaced if not satisfactory. This practical way of improving an entire street at a time, promises well and property owners are responding. The Municipal Art League has a lecture each month from October to April, in the Art Institute and this month it is on The Promotion of Tree Planting. Dr. Frank Johnson of Glen Ellyn and J. H. Prost, city forester, will give illustrated talks.

Easter Plants.

This year it took an extra amount of pluck, forethought and energy, always required in considerable quantity, to bring the Easter plants to just the right stage of development, to meet the very early Easter. At Oechslein's a house of hydrangeas was a revelation of what the new French varieties mean when grown properly and are a most desirable supplement to the two prime favorites for Easter, lilies and azaleas. Genistas, this year, are particularly good and are masses of golden bloom. The store windows contained rather less of the fantastically trained rose plants than have been offered heretofore, the boat and balloon type being very scarce while the more graceful basket effects met with popular approval. Freaks are being passed by for tasty arrangements. The bulbous stock is offered in such attractive window boxes, shallow baskets, etc., that it forms a considerable part of the total sales. When the extra shelving and tables contain such an array of potted stock it is no wonder that the sale of cut flowers is facing hard competition.

Trade Items.

Green carnations were not seen on the street as frequently as in past years, the retailers stating that they were used more as favors and in decorations for social events.

The special shamrock boxes, holding two potted plants, seemed to meet with favor. This was a new addition to the offerings this year. It opened trunk fashion and had holes in the tray into which the pots fitted. The only criticism might be the shade of green inside the box, which took the color out of the shamrock.

It affords both surprise and amusement to see how plants are handled in the big department stores. The lily plants a year ago were frequently torn to shreds by rough handling. This week the writer watched the sale of the small shamrock plants and was shocked to see a clerk fill an order for a dozen by taking a paper bag and dropping the plants one by one into the bag. Each one landed with a thud, the top of the bag was given a twist and the mass of jars and broken foliage turned over to the customer. One store sold 45,000 shamrock plants and could have used more.

A new "Flower Market" sign blossomed out Saturday and it is large, showy and "different." It is in the

WE EXTEND OUR

EASTER GREETINGS

TO OUR OLD AND NEW FRIENDS

For their generous and loyal support given us. Our efforts have been fully sustained by your liberal patronage. Your appreciation of our successful efforts to furnish the completest, brightest and best line of Supplies ever distributed in the United States for an Easter period, stimulates us to still further efforts for the future. Do Not Take Any Fake Green Thread. Use the Genuine
Silkline and Get More Thread and Less Wood

JOHN C. MEYER & CO.,

Silkline also is made in all leading colors, as Violet, for bunching violets, and also for tying fancy boxes

The MEYER Green

SILKLINE

Used by Retail Florists for mossing funeral designs, tying bunches, etc., is

THE ONLY ARTICLE THAT SHOULD BE USED

by Growers for stringing Smilax and Asparagus, as it will not fade or rot in the greenhouse. The Meyer Silkline was the first green thread to be introduced among Florists and Growers. It is handled by the best houses everywhere, but it should be ordered by name—Meyer's Silkline—to be sure of getting the genuine article. Do not accept substitutes.

If your jobber cannot supply you, order direct of the manufacturers. Price for any size or color, \$1.25 per lb. Sizes, "F" fine, "FF" medium, and "FFF" coarse.

Lowell Thread Mills,
1495 Middlesex St.,

LOWELL, MASS.

new store rented by J. Muir, who has also two retail stores on the South Side, and it is located in the Goddard Building, just completed, at the corner of Wabash avenue and Monroe street. The name is The Flower Market, and a large picture of a greenhouse with the inscription, "From the grower to the consumer," is conspicuous in the window. Mr. Bohannon will have the use of the store till after Easter. With

the opening of the new Williams' Flower Store in the same building, two weeks ago, and with J. Mangel and H. Rowe in the same block, that section is well covered by the retail trade.

Visitors: John Bergstrom, Rockport, Ill.; R. C. Reicher, Michigan City, Ind.; R. J. Currie, Milwaukee, Wis.; A. L. Glaser, Dubuque, Ia.; J. M. Hoffman, La Porte, Ind.

Flower Market Reports

The middle of the week

BOSTON before Easter saw a healthy activity in the market. Nothing is scarce except American Beauty roses and the best of those in sight are poor. Richmonds will sell out early and lilies are liable to prove short of the demand by the end of the week. They are not very good as a rule, the earliness of Easter having apparently frightened the growers into pushing them along too strenuously. The usual big shipments of lily plants have been made by the wholesale dealers, to out-of-town buyers, but there seems to be more than the usual complaint of injury in transit. It is in evidence that the express employees have shown much carelessness in handling these goods this year. Bulbous stock is very much overcrowded, sales of fine trumpet daffodils at \$10.00 per 1000 being common. Roses and carnations run very fine as to quality. Carnations have appreciated in price until now they sell readily at double the price obtained one week ago. Violets move slowly and prices have ruled lower than ever before at this season; they are of superb quality. Sweet peas are seen in all grades from lowest to highest possible quality and the selling price is as diverse as the quality, the best bringing about five times the price of the worst, and even at that the latter are more often thrown away than sold. Cattleyas have stiffened up nicely and are bringing normal prices once more. Gardenias also have recovered their lost ground.

The first half of the

BUFFALO past week was not a lively one from a business standpoint of view. Receipts were heavy and there was very little doing until Thursday morning when things brightened up and continued so the balance of the week with Saturday a clean-up day, though the surplus carried along from earlier in the week was too large to dispose of with-

out injuring the market to a large extent. The receipts were heavy on carnations, especially colored, and the white had a demand on Friday and Saturday and prices held firm. St. Patrick helped us out. Other stock, especially ordinary sweet peas, were too plentiful and lilies have awakened; only a slight call for lily of the valley or violets. Tulips were again too plentiful and daffodils shortened up. There were enough roses, and white had preference. Now look out for a record-breaker.

The market can scarcely be said to have been active the last week

before Easter shipping began, but there was a very fair demand for most kinds of stock. St. Patrick's Day used up practically all the white carnations that were cut in a week, and most of the retailers report selling out fairly well. The popularity of green dyed flowers was considered very doubtful a month ago but they disappeared and no one admits losing any. Ameri-

can Beauties are a trifle more plentiful each week but the increase is very slight. The best varieties of sweet peas sell quickly and the price holds up to quotations, but the older and short-stemmed varieties are not going to bring a profit to the grower this season. The violet growers are not reaping a very large reward, prices still remaining low and the market overstocked. All kinds of roses are coming in freely but not more than can be sold to advantage. The first two days of Easter week were rather quiet, as is usual just before a holiday. Bulb stock is good in quality and little, if any, is lost.

With the approach of Easter the supply has been increasing

steadily and keeping pace with the increasing demand. While business was fairly good at the opening of this week, it was not quite as good as last week. The tulips, jonquils, daffodils and Dutch hyacinths are really in a

Flower Market Reports

(Continued from page 441)

better condition right now than they have been as Easter approached in past years. Practically all the stock that arrives shows that the bloom was cut at the proper time and sent into the market and not held on the plants or bulbs or in a refrigerator. Roses are in an adequate supply, except American Beauties, which are pretty well off crop. The carnation cut, at the time of this writing, is more or less limited.

As usual the greatest

NEW YORK activity a few days before Easter has

been with the plantsmen and the plant buyers, but there has also been an injection of life into the cut-flower trade which augurs well for that department when the end of the week is reached. The most disturbing feature of the situation is the very evident disposition on the part of some of the flower people to hold back their product instead of sending it in as fast as it is fit. This assinnity would not today be worth the trouble of even mentioning it were it not for the fact that the entire cut-flower industry suffers untold injury. If the loss could only be confined to the misguided fools who follow this worn-out practice nobody would care, but it is not so. The quality of most standard crops is excellent. Lilies have, many of them, been forced too hard and are soft in texture and weak of stem. Bulbous material is in very heavy crop. American Beauties are still far shy of the demand, but there are good Brunners in considerable quantity to help out. The weather thus far has been favorable to shipping.

Business during

PHILADELPHIA the past week, was fairly satisfactory.

Stocks cleaned up pretty well on Saturday. The best sellers were probably white carnations, these being in extra demand for St. Patrick's Day. Other flowers went at normal pace with the exception of violets, which were sluggish. Roses of all kinds were in good demand especially white roses, but the latter were on the scarce side and that doubtless had something to do with the condition. Nothing new as to Beauty; still very very scarce. Carnations remain in the pink of form and condition, with demand all that could be expected. Orchid market moderate both as to quality and sales. Gardenias slow, for some reason or other not easily defined. Sweet peas are in rather better shape, not so many of the poorer

grades arriving and the demand for the top notchers is very good. Daffodils continue in good supply with brisk call. The southerners are more plentiful but so far are selling well although at very low prices. Daisies are moving rather better; other stocks normal.

ST. LOUIS

The local market was ablaze with all kinds of good quality of stock. The wholesalers say that business was good all of the past week but stock being so plentiful clean sales were out of the question on any thing. Violets and peas glutted the market daily and sold very cheap and big lots were disposed of in this way. There are also plenty of good roses and carnations. The rose market was very heavy on Killarneys and Richmond and carnations on Enchantress in all varieties. Easter demand promises to be big this year.

WASHINGTON

Business during the early part of last week was not so good as it has been. Saturday found the stores a little busier while on Monday the first of the Easter trade was seen. The run on lily of the valley was quite heavy on that day and noon found the stores completely cleaned out. There will be

plenty of stock during the week and probably of good quality. The only possible shortages will be American Beauty roses.

Rosette Rooted cuttings.....	6.00	50.00
Rosette and St. Nicholas cuttings ready about April 1st. FRANK P. PUTNAM, P. O. Box 12, Lowell, Mass.		

Three Grand New Carnations—Wm. Eccles, first prize winner at Detroit and silver medal winner of New York Horticultural Society; rigid stem, perfectly formed 3 1/2-in. flower, non-bursting calyx, highly perfumed and free. Lady Northcliffe, beautiful salmon pink, well built flower, and just enough in it not to burst the calyx; a grand bread and butter sort. British Triumph, a striking shade of crimson; flower 3 1/2-inch and well built; sweetest perfume of any carnation ever raised; keeping qualities are the best; fine stem, good constitution, and free, \$12.00 per 100, \$100 per 1,000. Scott Brothers, Elmsford Nurseries, Elmsford, N. Y.

CARNATION STAPLE

Split carnations quickly, easily and cheaply mended. Pillsbury's Carnation Staple, 2000 for \$1.00 post paid. I. L. Pillsbury, Galesburg, Ill.

The Bowling League of the Cook County Florists' Association has completed arrangements for a game with the Milwaukee Florists' Club in their city, March 30th. A special electric car has been chartered and it will leave Central Street Station in Evanston at 12 o'clock, making it necessary for those living in Chicago to start one hour earlier. Forty names are now said to be on the list.

HORTICULTURE:

Dear Sir:—I am very thankful for what you have done; no need of a repetition for advertisement for a situation. Yours very truly,
Norfolk, Conn. J. S. N.

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Ea.	Doz.	100

PERSONAL.

Thomas Roland has been elected tree warden for the town of Nahant, Mass.

Alex. McKay of Jamaica Plain, Mass., has just received news of the sudden demise of his brother, who dropped dead in Glasgow, Scotland.

James Brown, formerly gardener at the F. L. Ames estate at North Easton, Mass., succeeds E. J. Canning in charge of Smith College Botanical Gardens, Northampton, Mass., and will assume charge, April 15th.

Adolph S. Franco, assistant gardener for August Belmont at his estate in Newport, R. I., is now head gardener at Mr. Belmont's estate at Hempstead, L. I., succeeding the late H. Gilmour.

Charles T. Beasley is about to leave the Peter B. Bradley place at Hingham, Mass., to take charge of the Ford Estate at Roseland, N. J. Mr. Burke, recently in the employ of J. H. Bowditch in landscape work, succeeds to the Bradley position.

Henry Wild, who has been in charge of Conyers Manor, Greenwich, Conn., as head gardener for a number of years, has resigned his position and will open an office in Greenwich, as landscape architect and consulting gardener, on April 1.

Washington visitors—Mr. and Mrs. Elmer D. Smith, of Adrian, Mich.; Martin C. Ebel, Madison, N. J., and E. W. McLellan, Burlingame, Cal.

New York Visitors.—J. K. M. L. Farquhar, Boston, Mass.; Edw. Kirk and A. E. Thatcher, Bar Harbor, Me.; Stuart H. Low, Enfield, Eng.; Andrew Wilson, Madison, N. J.; Paul Berkowitz, Sydney Bayersdorfer and Martin Reukauf, of H. Bayersdorfer & Co., Phila.; A. Farenwald, Roslyn, Pa.; Wallace R. Pierson, Cromwell, Conn.

Boston visitors.—W. H. DeGraaf, Leyden, Holland; Edwin Jenkins, Lenox, Mass.; W. A. Manda, So. Orange, N. J.; John Gibson, Newport, R. I.; D. F. Roy, Marion, Mass.; A. E. Thatcher and Edward Kirk, Bar Harbor, Me.; Mr. and Mrs. Thos. Knight, New York city; J. R. Fotheringham, Tarrytown, N. Y.; R. W. Brown, Queens, N. Y.

OBITUARY.

Philip Einsmann.

Philip Einsmann, of Astoria, Long Island City, N. Y., vice-president of the New York Florists' Club for 1912, died at his home on Thursday, March 13th.

Mrs. James O'Brien.

Mrs. James O'Brien, widow of the first treasurer of the Gardeners' and Florists' Club of Boston, died at her home in Jamaica Plain, Mass., on the morning of March 19, aged 83 years, 7 months. She was a hospitable, kindly, and always gracious lady.

A. Robbie.

A. Robbie, who has been superintendent on the estate of Miss Helen Gould at Irvington, N. Y., for the past fourteen years, died on Wednesday, March 5, after but three days' illness with pneumonia. Previous to his engagement on the Gould estate, Mr. Robbie was assistant superintendent of the Essex County Park, Newark, N. J.

LEMON OIL CO'S STANDARD INSECTICIDE

Guaranteed under the Insecticide Act, 1910. Serial No. 321
Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.
Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.
Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.
Effective where others fail.
1/2 Pint - - 25c; Pint - - 40c; Quart - - 75c
1/2 Gallon, \$1.25; Gallon, \$2.00; 5 Gallon Can, \$9
70 Gallon Can - - \$17.50
Dilute with water 30 to 50 parts

SLUG-SHOT

USED FROM OCEAN TO OCEAN FOR 29 YEARS.

Sold by Seed Dealers of America.

Saves Currants, Potatoes, Cabbage, Melons, Flowers, Trees and Shrubs from Insects. Put up in popular packages at popular prices. Write for free pamphlet on Bugs and Blights, etc., to B. HAMMOND, Fishkill-on-Hudson, New York.

Cocconut Fibre Soil

Trees mulched with this article will grow larger fruit, better color, and ripen more uniformly than by any other means. We have proved it.

20th CENTURY PLANT FOOD CO.
27 & 29 OCEAN ST., BEVERLY, MASS.

CINCINNATI NOTES.

Nick Weber, the Mohawk florist, is seriously ill. It is the first very serious illness he has had in his lifetime.

The Hill-Heller Co., to induce early ordering, have advised the public through advertisements in the daily press that they will have their Easter display ready on Wednesday.

The Recognized Standard Insecticide.
Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.
\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water, it does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.
All are spraying materials and are effective in the greenhouse and in the garden.

Greenhouse Materials FURNISHED IRON or WOOD SASH BARS

In all lengths up to 32 feet. Milled to any detail furnished or will furnish details and cut materials ready for erection.
Frank Van Assche, Fulton Ave., Rose Ave.
and Dwight Street
JERSEY CITY, N. J.

16 for \$13

Sixteen all cypress frames in three different sizes, every one of them bolted together with cast iron corner cleats. Made just the best way we know how.

10 Single Plant Frames $11\frac{1}{2} \times 13$ in. } The 16 for \$13
 2 Single Row Frames $34\frac{1}{2} \times 13$ in. } Shipped knocked
 4 Junior Melon Frames $19\frac{1}{2} \times 20\frac{1}{2}$ in. } down

The Melon and Single Row Frames each have movable sash—the Single Plant, slidable glass set in grooves. Every one has the iron corner bolted cleats. No nails used. Painted one coat best lead and oil. Handiest thing ever to boost your garden along. You have always wanted some melon and cuke frames—now here's your chance and at the price that you would have to pay for the wood and glass alone. Those cast iron corner pieces alone would cost you ten cents a piece—then there's the wood, the glass, the painting, and the labor. While you are making two, we would turn out two hundred—that's why we can sell them so surprisingly cheap. Order one at once—warm weather is here.

Junior Melon frame $19\frac{1}{2} \times 20\frac{1}{2}$ inches.

5 for \$4.40 or 10 for \$8.50.

Standard size melon frame $22\frac{1}{2} \times 25\frac{1}{2}$ inches

Price \$1.25 each—10 for \$12.00.

U-Bar Unusualness

THE unusual things are much sought for by those who do not care to live a life of so many peas in a pod—all alike.

They want the unusual. But they insist on the thorough practicalness of the unusual things they want. Such men are leaders—they are ahead of the procession.

For such up to date live-wire-men the U-Bar greenhouse construction met a long-sighed-for event.

Its advent broke down the moss grown traditions and there blossomed forth a new era in greenhouse building. Conditions are now met by U-Bar Unusualness in an attractive, satisfactory way—never possible before.

The U-Bar Company is not alone greenhouse builders; but skilled designers, practical planners. Their organization is one of enthusiasm—that enthusiasm which surmounts things.

If you want the usual greenhouse, go to the usual builders. If you want more than a mere house—if you want the unusual house, then you want the U-Bar.

An unusual greenhouse erected on the steep hillside grounds of Miss Margaret Jarvie, Montclair, N. J.

The Orchard and Vineyard Must Be Fed as Well as Sprayed

Money in fruit-
raising comes
from the
production of
steady crops of
first grades

Do not expect either orchard or vineyard to produce its best if you depend entirely on the natural sources of plant food in the soil. Especially must you keep up the supply of

POTASH

for on it depend in greatest measure the quantity, size, color, flavor and shipping quality that give fruit its market value. In fruit-raising, as in all farming, it is easily demonstrated that **Potash Pays**.

Peaches and small fruits that have received the right amounts of potash and phosphoric acid ship better, taste better and are better. At the time of the first cultivation, broadcast 300 pounds acid phosphate and 100 pounds muriate of potash per acre in the apple and pear orchard (150 pounds muriate in the peach orchard).

On citrus fruits or pineapples use sulfate of potash or 200 pounds double manure salt.

Some of the finest flavored strawberries and peaches are poor shippers, especially when barnyard manure is used as a fertilizer. Correct mineral fertilization will often make them firm enough to ship.

The nitrogen needs of the fruit can be learned by observing the amount of wood or vine growth. Manure alone is not the best or cheapest fruit fertilizer.

We sell potash in any quantity from one 200-pound bag up.

DID YOU KNOW

THAT there's as much difference in fields of lily bulbs as there is in fields of corn, oats, potatoes, or any other crops?

THAT the Horseshoe Brand Giganteum fields in Japan are the finest lily fields anywhere in the world?

THAT they are owned and operated by the largest and strongest association of lily bulb producers known?

THAT these bulbs are disbudded very carefully in the fields of Japan, before the buds are half developed?

THAT by this procedure the main strength of the plant is reserved in the bulb?

THAT such bulbs will give larger and better flowers, more of them, with better keeping qualities than the other kind?

THAT they cost you very little more, if any, than common brands—though they are worth much more than they cost?

THAT by buying Horseshoe Brand Giganteum you are encouraging the production of better lily bulbs and helping yourself at the same time?

THAT you can only buy Horseshoe Brand Giganteum from us—no other firm have these bulbs for sale?

THAT if you order early you will have a delivery near home, as we deliver in twelve different cities throughout the United States? This saving in freight is considerable.

THAT if you will sit right down and mail us your order for lily bulbs, for fall delivery, you will profit by it?

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Canterbury Bells

To have fine large plants of *Campanula calycanthemum* by next autumn seed should be sown now in pans or flats. Mix up a compost of loam four parts, leaf mold two parts, and sand one part. Give good drainage and fill within half an inch of the top. Make surface smooth and firm and on this sow the seed, but not too thickly. Cover with finely sifted compost and press firmly. These pans or flats can be placed in a temperature of about 60 degrees at night until they have germinated. When they are well up they can be placed in about 50 degrees and close to the glass, which will induce a stocky growth. When large enough to handle conveniently, they should be pricked off into pans or flats using a richer mixture. Water very carefully. By the end of May they can be planted about a foot apart in some rich ground where with good cultivation they will make fine plants by the fall, with fine strong crowns for forcing.

Cobaea scandens

When there is a call for something that will cover a large space in a short time there is nothing better than *Cobaea scandens*. Sow in pans or flats with good drainage and a compost of loam three parts, leaf mold one part and a little sand. The seed should be pressed down edgewise into the soil about half an inch apart and just covered lightly. Place where they will have a temperature of from 60 to 65 degrees at night and some bottom heat. Keep shaded and water very carefully and a large per cent will germinate. When they start to come up place near the glass and when large enough to handle pot into 2½-inch pots using rich soil. Grow along cool and attend to staking as soon as they need it.

They would need a shift into 3 or 4-inch pots in four or five weeks.

Cyperus alternifolius

Cyperus are readily increased by propagation. Take the tops with about an inch of the stem and trim the whorl down some. These can be inserted in a warm propagating bed and kept shaded and moist until they become rooted, when they can be put in 2-inch pots, using a compost of loam three parts, leaf mold and cow manure one part each, and a little sand. When well rooted they will want plenty of water as they are almost aquatic in their nature. To grow them on fast they will take a temperature of from 60 to 65 degrees at night. Now that the sun is getting stronger they will require shade all the time. Where you want to retain these plants in small pots they should be plunged in some material to keep them moist. To help to retain their color they can have weak doses of liquid once a week. By this treatment you can keep in small pots for an indefinite period.

Dahlias

Dahlias have been much in fashion for several years

and the quantity grown in several establishments is prodigious. Those placed on a bench the latter end of February or early in March will soon be producing a fine lot of cuttings. When large enough these can be cut off three or four joints long and inserted in the propagating bed where they will soon root and should be potted and grown on. After being once established in the small pots they should have the fullest light and plenty of syringing to keep down spider and thrips. When well-rooted shift into 4-inch pots, using a compost of fibrous loam three parts, well-rotted manure one part. These are cool-blooded plants so should be grown in a house where the temperature is about 50 to 55 degrees at night. When the weather gets settled they can be placed in a cold frame to be hardened off and can be kept here until they are planted in the open ground the last of May or the first of June. Florists should try some new ones every year as there are some handsome types produced each year; so keep up with the times and grow some of the best.

Ramblers for Memorial Day

Roses that you have been holding back for this date should be brought into heat now. When first brought into the greenhouse, allow a temperature of from 50 to 54 degrees at night; and every morning if the weather is at all clear, give a good syringing to thoroughly dampen the wood. As soon as it is seen that the buds are breaking, raise the temperature to 58 degrees at night, and this may be maintained until the flower buds appear. As these roses make active roots they will want plenty of water at the roots so give them attention. When they become covered with plenty of foliage and the buds just peeking out you can improve them by giving weekly doses of manure water. It should be borne in mind that attacks from mildew or green fly are likely to happen and careful attention to details with regard to fumigating and ventilating, will have to be given in order to avoid these troubles. Do not allow the plants to stand too closely. Elevate good specimens on pots. It is a good plan to force these roses so they will be out four or five days ahead, which will allow them to be moved into cooler quarters to harden them up which will make them better able to stand in good shape for a longer time. Keep staked and tied as they may require it.

Pyrethrums

The double pyrethrum makes a very desirable plant for Memorial Day, so all plants that are intended for this day should be far enough advanced to need 4-inch pots. To grow and flower well they want a rich compost; say, to two parts of fibrous loam use one part of cow manure and pot firm. Give them a place where they can have plenty of sun and ventilation as they like a cool atmosphere. They can be shifted into 5 or 6-inch pots by the end of April. Keep the plants fumigated so the green fly will not get a foothold.

Mr. Farrell's next notes will be on the following: *Calanthes*; *Cyclamen*; Ground for Carnations; Perennial Border; Stock for Vases, Boxes and Baskets; *Spiraeas* (*Astilbe*).

OUTDOOR VEGETABLES AND FRUIT

CONDUCTED BY

Edwin Jenkins

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Jenkins. Such communications should invariably be addressed to the office of HORTICULTURE.

Sowing Peas

Just as soon as the ground is dry enough to work get in a few rows of early peas. The round peas are better for early work than the wrinkled kinds as the latter are more liable to rot in the event of prolonged wet weather. In sowing make allowance for losses, by sowing a little thicker than you would want the plants if they all germinated. A quart sows about one hundred feet of drill. Make a sowing of several different sorts just now and try to choose such kinds as mature a week or ten days apart. About two inches deep is the right depth and after the seeds are sown and the soil raked over then it is a good plan to lay a board over the drill and walk on it. This will compact the soil to just about the right degree of firmness. Do not expect abundant crops of peas unless you sow on well-manured land. A sprinkling of bone and wood ashes will be very helpful, and lime is a prime requisite on pea land.

Sow such herbs as thyme, sage, dill, chervil, parsley, etc.

Beets, carrots, spinach and early turnips should be sown without delay.

Hot Beds

The various crops which are being brought along in hot beds will require very careful watching as regards ventilation as some days at this season the sun shines with great force and still there is a very cold wind. The

careful grower will meet this condition by tilting the sash for ventilation in such a manner that the wind will not blow directly on the plants. Commence to ventilate early, just as soon as the sun strikes the glass and proceed gradually, little by little until the maximum heat of the day is reached. Reverse this operation during the sun's waning hours and close up early enough to conserve as much of the sun's heat as possible, covering the glass at night with mats or litter and if possible with shutters.

The Asparagus Bed

Try this on the asparagus bed: To every forty square yards, 6 lbs. of superphosphate and 2 to 3 lbs. of high-grade sulphate of potash. Put these two ingredients on at once; then every week one pound of nitrate of soda to the same area. The nitrate, if at all lumpy, may be powdered and mixed with a pail of sand or fine soil; this will enable the sower to make a more even distribution than would be possible otherwise.

Gladioli

These are among the finest of all our garden plants for cutting and the season is never too long so if you have bulbs enough start some in pots in the greenhouse (they will start fine under the carnation benches) and if grown along cool until the end of April before planting, they will be in bloom a week or two ahead of bulbs planted outside in the regular way.

Thymus serpyllum

Mountain regions of high altitude have a distinct flora of their own. Trees and shrubs assume a dwarfy character and, nearer to the eternal ice of the glacier, they disappear entirely. The remaining vegetation, grasses and herbs, cling flat and close to the ground surface. This creeping growth enables plant life to withstand the long and heavy pressure of the weight of deep snow and ice in winter. The turbulent force of gales and violent storms in spring passes over without injurious effects. During the short summer the vegetation becomes the moisture absorbing and retaining factor and the direct beneficiary of the night conduction of sunheat by the earth. To the more contemplative mind the prostrate growth of Alpine plants as beautiful miniature design work testifies to the supreme wisdom of the Divine architect of the universe. Our ancestors of hardly more than a hundred years ago shunned the lofty solitude of the mountains, believing it to be the haunt of ill-disposed spirits, hurling down death and destruction in rolling avalanches. The majesty of the ice-clad

THYMUS SERPYLLUM SPLENDENS

peaks was awe-inspiring; the silence within their precincts pregnant with evil. The last century, radically revolutionizing views, made mountaineering a favorite sport. It brought about our intimate acquaintance with

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Building the First House

This is far more important than most beginners will think, and careful consideration should be given to locating the house, as the future will no doubt want more, and there is no greater loss of time and money than moving things around and tearing up the place to make room for the new-comers. How often we see a place with the houses all zigzag and running every which way, all because of a little neglect in the planning of a range. Take the heating system for instance; we would install a boiler that can easily be attached in battery to another, in case more glass is added to the range. There is very little saved in putting in boiler pipes and room just to meet present conditions; always plan to have the present met, and the future as well. Any large corporation in any line of business always moves for the future, and you will find that all florists who are real successful at the game, work the same way. To illustrate, I would have some of the readers go over a carnation growing establishment, and let them see for themselves whether there is anything in growing carnations. But "Every little movement has a meaning of its own" on this place at least, and there is no wasted energy anywhere, but all force is directed toward one single thing—the production of high grade carnations. No other plants of any kind are ever attempted. This hardly is in keeping with the heading of this page, but a little example like this will always be given space, I am sure.

Lime Water for Young Stock

Often it will happen that before the young plants have started well, a dull spell of weather will come and the plants will not dry out as readily as may be desired, this of course being responsible for the soil turning sour. Now, no plant can grow to perfection in soil that is sour, unless it is a plant that naturally grows in sour soil. It would hardly do to apply lime to the potted plants as this would mar their appearance, and a large part of it would be likely to stick to the pots, thus rendering them much less serviceable. The only and best method is to apply the lime in the form of lime water, which is made by slacking a good pailful of lime in a barrel of water.

After the mixture settles use the clear water to water the plants with, using a sprinkling can to do so. Water the plants thoroughly with clear water first and then follow with the lime water. This will give the lime water a better chance to soak into the soil and all the plants will receive the same amount of the lime water, where if they were watered when dry the water would run out of some of the pots, and of course these would not receive the amount the others would.

Cleaning the Young Stock

Keep the young stock clean at all times, free from weeds, and never allow the surface of the soil to become so green that the water cannot soak through. Good plants can hardly be expected to turn out of the green-scummed pots. Plant the plants into clean pots and keep them clean all the time, then you can look for results and no other time.

Repotting

Never allow the young plants to become so pot-bound as to suffer from lack of nourishment. We always thought it was trouble enough to make the plants grow, without hindering their growth in any way. Keep them going, as stunted little plants will hardly bring in the large cut of blooms which we all look forward to so much. If you are making the final potting the soil can be well enriched with bone meal, soot, or whatever you may wish to use. We speak of the soil, meaning well-decayed compost of cow manure and sod, there being about two-thirds of the latter; to this the bonemeal can be added, and it should be thoroughly mixed so that all the plants get an even quantity of it. It makes it hard to water the plants when one is small and another is large; therefore aim to treat the plants all alike so they will grow all at about the same rate. It is surprising how much easier it is to look after plants of even growth, than to look after plants that are all mixed as to size. In potting be careful not to fill the pot too full of soil for they must all hold water to be wet after watering. Again be careful not to fill one pot full and another less so, for then one will hold more water than another, and trouble will be experienced in watering and trying to keep the plants all even in moisture.

the flora of those regions divulging the surprising generosity of Mother Nature in the application of the brightest tints from her color palette; rich floral gayety as equivalent for the limited period of vegetation.

Some Alpine plant species are difficult to acclimatise in gardens; others respond readily to average cultivation. *Thymus serpyllum* is a charming representative belonging in the latter category. Of trailing habit, plantations soon form dense vivid green mats of vines, which, during the later parts of June and early in July, appear literally covered with clouds of little blossoms. In height not exceeding 2 to 3 inches, mountain thymes are very pretty subjects for wall and rock-gardens. The variety *serpyllum album* flowers snow-white, the blossoms of *coccinea* are bright red, while those of *serpyllum splendens*, depicted by our illustration, show a carpet of bright deep

magenta red. The species *Thymus lanuginosus* resembles in its habit of growth the *serpyllum* type. Its distinct characteristics consist of a woolly hirsute foliage of a mouse-gray shade and little flowers of purplish lavender coloring.

Mountain thymes require an open sunny exposure and, as a rule, thrive well in a light sandy loam. It is advisable to have the ground surface on a slanting grade to avoid excessive moisture, which, particularly during hot sultry weather, may cause foliage and flowers to damp off. Stock can be raised from seed, sown early in spring. Plants may be also very easily propagated by divisions early in fall. Plantations should be protected by leaf covering during winter.

"A hot time in
the old town"

One week more and all will be hustle and bustle in and around the big Grand Central Palace in New York, while from far and near enthusiastic and expectant horticulturists will be speeding to this, the Mecca for the time being, of the gardeners and florists of a continent. HORTICULTURE takes due cognizance of this important event and will issue in its honor a special edition which will be well filled with reading matter carefully selected with a view to its fitness for this particular occasion, and interesting to all, including those in attendance at the show and those who are obliged to forego the pleasure of visiting it. And the alive, up-to-date, dealers in every line of florists' material will be well represented in its advertising columns. Watch out for them and don't fail to see what they have to offer for this promising spring season.

The whole civilized world stands appalled at the awful disaster which has brought ruin and death to so many

communities in Ohio and Indiana and, a few days earlier, to sections still further West. Information that has reached us thus far does not give details sufficient to indicate what measure of the suffering has fallen to the lot of the florists and those of allied industries, but there are many such in and about the stricken communities and there is no reason to think they have all escaped. Many of our readers have acquaintances and social and business friends in the cities and towns that have been most severely damaged and all will anxiously await more definite news and hope that later information may show that the earlier estimates were overdrawn. Two of the cities most devastated—Omaha and Dayton—have in the past entertained S. A. F. conventions and our first solicitude is for the kind, hospitable friends we there made when it was our privilege to thus visit them. It has been for them a sorrowful Easter at best and we extend to them our deepest sympathy in their distress.

The Boston Journal for March 22 is responsible for this:

"A natural scarcity of violets, due to the early Easter, makes prices higher than they have been in years."

At the time the foregoing was going the rounds and serving to dissuade people from any notion that they might have a bunch of violets for self or friend, the wholesale houses in Boston were encumbered with violets by the tens of thousands and one dealer remarked what a pity it was that there was no way to get these popular flowers into the possession of the ladies who thronged every thoroughfare on that beautiful day. The Boston Traveler had a New York news note of similar purport stating that cattleya blooms were selling on Fifth avenue for from \$2.00 to \$3.00 each and gardenias \$1.50 each. Carnations from \$2.50 to \$3.00 a dozen! It is not to be believed that these statements were born in the reporters' imagination. Beyond a doubt they originated with the man behind the counter. But many of the violet growers and others are so much occupied in denouncing the commission man and in other equally unprofitable pastimes that they have no clear conception of the exact situation nor can they, in the majority of cases thus far, be induced to take a practical interest in the movements which, if properly supported, would make impossible the appearance in reputable newspapers of such injurious and misleading items as above quoted.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Second Swelling of Peaches and Nectarines

Immediately the stoning process is completed the final rush is commenced. There may be some fruits still in excess of the desired number left on the trees; these should be taken off at this, the final thinning. An approximate number should be set for each tree according to the size of the pot it is growing in. Taking the average sized tree growing in a twelve-inch pot; fifteen fruits ought to be a crop for it. There is little fear of mishap after this stage is reached. The temperature can be raised to 65 to 70 at night if the fruits are wanted at the earliest possible date. The day temperature will be correspondingly high; closing down the house in the afternoon can be done early enough to raise the temperature to 90 or 95. Syringing at this time will cause a very humid atmosphere to counteract any possibility of burning. At no time let the pots become dry enough to cause the trees to wilt. Feed them daily if they dry out oftener than once a day. Clear water is also beneficial; feeding every time water is given the trees will demonstrate one can get too much of a good thing. We find top dressing with cow manure is not to be commended for these early trees. Later when it is advisable to restrain the trees from drying out this will answer the purpose.

Pot Vines

Pot vines that are seeking all the nourishment they can get will have made roots through the bottom of the pot into the leaves now forming a mulch for them. These must not be forgotten. Seldom do we find these decaying leaves dry but should such a condition exist soak them thoroughly. An additional help to the vines will be a rim of half decayed sod laid round the surface of the pot leaving sufficient room for water in the center. It may be necessary to fill this up twice when watering. The roots will readily penetrate this new and sweet soil, gathering stimulant as they go; it also helps to keep the ball moist. If it has been the habit to water the pots by sounding them, due allowance must be made for the soil being there.

Spacing Spurs

Vines will generally break or grow from every eye or bud, providing nothing has injured it in the dormant stage. As young vines grow up the "eyes" on the young cane determine where the spurs of the future shall be. It is an easy matter at this stage to retain a spur just anywhere you please; after a reduction or thinning out has taken place it is not so easy. Lost spurs on vines are often a complete loss, so it behooves every one who is building up young vines to see that the spurs are proper-

ly placed. The distance between the eyes varies considerably so that it is impossible to say how many should be taken off; the distance between those remaining is the only thing to be considered. Overcrowding of spurs which in turn means overcrowding of laterals results in poorly developed foliage, which in turn means fruit of second rate quality. Each leaf must have room to expand itself without restraint. A knowledge of the variety is very essential, as some attain dimensions double that of their weaker sisters. Each year as a vine is being built up so much additional rod is left at pruning time, which brings so many more laterals into growth the following season; these form the fixed station of the spurs, so it is important that they are placed in the right position. Where it is possible arrange them so that they are "angled"—that is, a spur on the one side of the rod should be in the center of two on the other side. Approximate distances are, on weaker growing varieties such as Muscat of Alexandria, eighteen inches; the stronger ones such as Princess of Wales, etc., two feet. Often nothing like an exact job can be made but get as near to it as is possible and practical. Rub out all growths not wanted, soon after bursting; where two are so placed or come from the same bud retain the stronger.

Care of Young Pot Vines

Young vines intended for pot work should be moved into suitable sized pots soon after filling out the present ones with roots. It is a bad policy to let them become rootbound in 4's or 6's. They will grow away after it, 'tis true, but the foliage already formed will become stunted and hard and will not swell out as it ought to do, which means a loss to the vine. As the sixes fill out with roots prepare tens for them. This is quite a jump but with ordinary care they will make it all right. The soil should be of the best, enriched with a little coarse bone meal, with some charcoal and lime-rubble to keep it open. Have the soil in good condition when potting, which leaves room for making it firm. A wet soil for potting is very unsatisfactory. These canes can be fruited next year and if intended for this should be stopped at the required length. We have found that it pays to grow them a second year, potting them on again in the spring into fourteens. This being the case the young canes can be run up ten feet or more. After moving from the sixes it may be advisable to shade them for a time if they are not receiving any shade from other vines. Newspaper or cheese cloth will answer the purpose if hung on the stakes as soon as signs of distress are noticed. This is only intended to help them over the shock of repotting and should be gradually withheld.

INTERNATIONAL FLOWER SHOW

GRAND CENTRAL PALACE, NEW YORK, APRIL 5-12.

PROGRAM.

Saturday, April 5th.

6 P. M. Show Opens. General Exhibition and Flowering Plant Day.

7.30 P. M. Opening Exercises. Address of Welcome. Response.

9 P. M. Lecture by R. F. Felton of London, "the King's Florist." "English Floral Art." With practical illustrations.

11 P. M. Show Closes.

Sunday, April 6th.

10 A. M. Show Opens. General Exhibition and Orchid Day.

4 P. M. Lecture by R. F. Felton, London, "The Arrangement of Flowers and Color Schemes." Practically illustrated.

9 P. M. Lecture by E. H. Wilson of the Arnold Arboretum, Boston: "China and Chinese Plants." With stereopticon views.

11 P. M. Show Closes.

Monday, April 7th.

10 A. M. Show Opens. Rose Day.

10.30 A. M. Meeting of the Society of American Florists & Ornamental Horticulturists.

4 P. M. Lecture by R. F. Felton, London: "English Floral Art." With practical illustrations.

9 P. M. Lecture by J. Horace McFarland, Harrisburg, Pa.: "The Arnold Arboretum." Illustrated with stereopticon views.

11 P. M. Show Closes.

Tuesday, April 8th.

10 A. M. Show Opens. Carnation Day.

10.30 A. M. Meeting of the American Rose Society.

4 P. M. Lecture and Meeting American Rose Society.

9 P. M. Lecture by J. K. M. L. Farquhar, Boston, Mass.: "Japan and Japanese Flora." Illustrated with stereopticon views.

11 P. M. Show Closes.

Wednesday, April 9th.

10 A. M. Show Opens. Gladiolus Day.

10.30 A. M. Meeting American Carnation Society.

4 P. M. Lecture by F. C. W. Brown, Buffalo, N. Y.: "American Floral Art." Illustrated with stereopticon views.

9 P. M. Lecture by R. F. Felton, London. "How They Arrange Flowers in England." Illustrated with stereopticon views.

11 P. M. Show Closes.

Thursday, April 10th.

10 A. M. Show Opens. Sweet Pea Day.

10. A. M. Meeting Florists' Telegraph Delivery Association.

11 A. M. Meeting Society of American Florists & Ornamental Horticulturists.

3 P. M. Lecture by R. F. Felton, London: "Floral Art in England." Illustrated with practical demonstrations.

4 P. M. Lecture by Arthur Herrington, Madison, N. J.: "Whys and Wherefore of Tree Planting." Illustrated with stereopticon views.

9 P. M. Lecture by Otto Thilow,

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Officers—President, J. K. M. L. Farquhar, Boston, Mass.; vice-president, Theodore Wirth, Minneapolis, Minn.; secretary, John Young, 54 W. 28th St., New York; treasurer, W. F. Kasting, Buffalo, N. Y. Next convention, Minneapolis, Minn., Aug. 19-22, 1913.

For Full Information, Schedules, Space for Trade Exhibition, etc., write to John Young, Secretary and Manager for Trade Exhibition, 54 West 28th Street, New York City.

Philadelphia, Pa.: "Rocky Mountain Flora." Illustrated with stereopticon views.

11 P. M. Show Closes.

Friday, April 11th.

10 A. M. Show Opens. Floral Art Day.

10.30 A. M. Meeting American Sweet Pea Society.

4 P. M. Lecture by Geo. V. Nash, Bronx Botanical Gardens, N. Y. C.: "Water Gardens." Illustrated with stereopticon views.

9 P. M. Lecture by Arthur Cowee, Berlin, N. Y.: "The Gladiolus." Illustrated with stereopticon views.

11 P. M. Show closes.

Saturday, April 12th.

10 A. M. Show Opens. General Exhibition.

10.30 A. M. Meeting of the Gladiolus Society.

3 P. M. Lecture by R. F. Felton, London: "English Floral Art." Illustrated with practical demonstrations.

4 P. M. Lecture by L. W. C. Tutthill, New York City: "Frames and Greenhouses for the Amateur." Illustrated with stereopticon views.

9 P. M. Lecture by Leonard Bar-

ron, Editor The Garden Magazine: "Glimpses of Famous American Gardens." Illustrated with stereopticon views.

11 P. M. Show Closes.

ADDITIONAL PRIZES.

The following additional prizes are announced:

Philadelphia Rose Growers' prizes for 75 roses, any variety or varieties, excepting American Beauty, undisminated, to be staged April 10—First prize, \$75; second, \$50; third, \$25.

New York Cut Flower Co.'s prize for 200 cut roses, to be staged April 10, irrespective of the number of varieties shown, effect of arrangement as well as quality to count, American Beauty and undisminated varieties excepted—Silver vase, value \$200.

Toronto Horticultural Society's prizes for a display of Hardy Outdoor Roses—First, silver medal; second, bronze medal; to be staged April 10.

Benjamin Hammond's "Special Growers' prizes—First, \$15; second, \$10; third, \$7. These prizes are meant for the actual grower of any exhibit and not for the exhibitor, excepting in the case where he does his own growing. The awards go to such three exhibits as, in the opinion of the judges, reveal the best specimens of the growers' work in Rose growing. The object is to recognize the man who actually does the good work.

Harry O. May prize—Best pink "novelty" Rose not in commerce, 25 blooms, \$25; to be staged April 10.

Henshaw & Fenrich's prizes—Vase of 25 Richmond Roses, first \$15, second \$10; vase of 25 Pink Killarney Roses, first \$15, second \$10; vase of 25 blooms, any yellow Rose, first \$15, second \$10. To be staged April 10.

Corrections in Final Schedule.

Omitted from Division C, American Rose Society's section—Class 331A, 50 White Killarney Roses—First prize, \$20; second, \$10.

Class 331 of the Final Schedule is to be known as the Bonnet & Blake prize—solid silver cup, value \$50.

Class 276 is to be known as the Tuxedo Horticultural Society prize, and the first prize award is a silver cup.

Section H, Class 249, should be amended to read "not less than 8 in. pots, not more than 12 in. pots."

Additional class to Section H—Class 200A, 25 plants Amaryllis vittata hybrids, first \$30, second \$20; Julius Roebbs Co. prize.

Addition to Section F—Miniature model of estate covering 4 sq. ft. including residence, lawns, roadways and whatever the ingenuity of the exhibitor may suggest—First, \$30; second, \$20. Gardeners' and Florists' Club of Boston's prize.

In Class 87, Section C, the Horticultural Society of Chicago offers a grand silver medal in place of a silver cup for a first prize; and Class 91 is the grand bronze medal of this Society.

HOTEL ACCOMMODATIONS.

Hotel Martinique will be S. A. F. and O. H. Headquarters.

Chelsea. W. 23d St.....	1.50	2.00		

Except as stated, all these hotels are conducted on the European plan.

In the Carnation Society's schedule. Classes 441 and 443, are to be staged on April 8 instead of April 10. In Class 437 no medal will be awarded this year, as this is only a preliminary competition. Additions to Section A Class 51A, for bed of Pansies, assorted colors, 6 ft. across, first \$10, second \$5. Traendly & Schenck's prize.

Show Notes.

A. E. Thatcher and Edward Kirk, of Bar Harbor, Me., have been added to the board of jurors.

The management has been able to secure for exhibition at the show the collection of 39 pictures, in oil and pastel, by Mary Helen Carlisle, covering famous English gardens. This very fine collection was recently on exhibition at one of the leading art galleries in New York and was greatly admired. It should prove especially interesting to the horticultural profession.

The supplementary prize schedule is ready for distribution. Copies may be had on application to John Young, secretary, 54 W. 28th street, New York.

It has been decided that the show shall close at 11 P. M. each day instead of 10 P. M., as previously announced.

J. H. PEPPER,

Chairman Publicity Committee.

NATIONAL ASSOCIATION OF GARDENERS.

The National Association of Gardeners has completed its program for the International Flower Show week, in New York City, April 5th to 12th.

Its headquarters will be the Murray Hill Hotel, Park avenue and Fortieth street. The secretary will be at the headquarters every morning from eight to ten o'clock from the opening until the closing of the show, to arrange for the admission cards to the show and other entertainment of the members of the N. A. G. Season tickets to the show will be issued only on presentation of the Association's 1913 membership card.

A meeting of the Association will be held on Monday afternoon, April 9th, at two o'clock, in the lecture hall of the Grand Central Palace. R. F. Felton of London, England, will address the members at three o'clock on the practical usages of flowers.

On Tuesday evening at nine o'clock members of the Association will assemble in the men's dining hall of the Murray Hill Hotel for a "Dutch treat" and a social evening generally.

On Wednesday the National Gardeners' and Florists' Bowling Tournament will be held under the auspices of the National Association, in which the members of the Society of American Florists are invited to participate, at Thums' Bowling Alleys, Broadway and 31st street, beginning at nine o'clock in the morning and lasting throughout the day. The tournament is open to teams of three men, members of a local gardeners' or florists' society or club, and members in good standing either of the S. A. F. or N. A. G. The individual tournament is open to members in good standing of the N. A. G. or S. A. F. Many valuable prizes have already been contributed. The sweepstake prize to be competed for by the three members of the N. A. G. making the highest scores, and the three members of the S. A. F. making the highest scores, is a piece of silver of the value of \$50, donated by Presi-

dent Waite of the National Association.

Other entertainment will be provided during the week which will be announced during the first days of the show.

Members of the National Association of Gardeners should bear in mind that their membership card will be necessary to participate in the va-

ADVERTISING TALKS

No. 3

When the Chain Store idea is applied to the florist business, some of you business-bunglers will find yourselves head over heels in debt and no business. Some say it will never come—that's just what everyone has always said about new things until they wake up and find someone has done it. The business of the average retail cigar store is \$30 per day. The United Cigar Stores Co., who are advertisers, average \$150 per day. The biggest business done in any one of these United Cigar Stores in a single day was \$11,667 by a New York store. On December 11th, 1912, this company did a cash business of \$410,759 in one day in their stores. Done by advertising, chiefly in the newspapers. Now is it any more difficult to do a cigar business than it is to conduct a florist business? Cannot anyone get a license, buy tobacco, roll cigars and sell them? Does it require any more skill and capital than the florist business? Not a bit—but there is more brain work employed in the cigar business, where competition is very keen. What could prevent a Chain of Florist Stores, selling flowers at reasonable prices, advertising the product, and making it pay good, rich dividends? The best chance in the world for a good florist business is right here in the heart of New York City, where the people are, and where the money is. I mean a business catering to the great multitude at popular prices and advertising extensively. Advertise your business—make it known—tell the public what you have to sell, and what price you want for your product.

Sell your hammer and buy a horn

rious entertainments; so do not leave your cards at home when starting for the "Big Show" in New York.

M. C. EBEL, Sec'y.

There will be a meeting on Monday afternoon, April 7th, at the Grand Central Palace in New York, of the National Publicity Committee provided for at the last convention of the S. A. F. in Chicago, to consider the proposition of providing for a permanent secretary of the National Committee to aid in advancing the publicity movement. All florists' clubs in the coun-

try having a Publicity Committee and having appointed a representative to membership in this National Committee should see that their representative is notified of this meeting and is in attendance. If unable to be present another member should be sent to represent the club.

W. R. PIERSON,

Representative of the Publicity Committee of the New York Florists' Club.

AMERICAN ASSOCIATION OF NURSERYMEN.

The Portland Convention.

Much speculation is rife as to how many members of the American Association will meet their brethren on the Pacific Coast in the June convention. To those who hesitate to decide on account of the distance we commend this extract from the official organ of the Association:

"Maybe a decision not to attend is fixed by necessity, but more often we decide such matters on the spur of the moment, for such reasons as—It will cost too much; cannot spare the time; too far away, etc. If such nurserymen fully realized how necessary his presence was to the progress of the nursery business at large, he would strain a point to go. There he will have the opportunity to measure himself up against the best in the land in his particular line. Even though he does not sell a dollar's worth of goods at the convention, there will be something wrong with him if he does not get full value for his time and money. The trip to the great Empire of the West will be an education that he can get in no other way. He will get a glimpse of the magnitude of his own country and begin to see the stupendous possibilities of the nursery business of the future."

There is no need for us to expatiate on the beauties of nature to be seen en route, but we can give a hint at one feature that will both interest and instruct those who are fortunate enough to participate—the day "stop-over" at Toppenish, Washington. Train will arrive early in the morning, the "official car" will be sidetracked, and, an auto trip of about forty miles, as the guests of the Washington Nursery Co., the party will view the irrigable portion of the Yakima Indian Reservation, with its fine agricultural and fruit lands; various nurseries, and the fine orchards which lie on the bench lands under the famous Sunnyside Canal. Our hosts write that "the trip will be of utmost interest to those who wish to see the Yakima Valley in all its phases, including the matured bearing orchards." Dinner and supper will be served to the guests and the special car will be attached to the midnight train. Those who wish a copy of the tentative itinerary may write to M. B. Fox, Rochester Lithographing Co., Rochester, N. Y., or to Secretary John Hall of the same city, to whom those who decide to go to the convention should also report quickly.

There is still a little doubt as to hotel headquarters, but members will be advised soon as known. The secretary is rounding-up members by means of a stirring letter, and J. McHutchinson, special committee to create new memberships, is prosecuting a vigorous campaign with encouraging results.

Davenport, Ia.—Wm. H. Mast and W. J. Duppert have purchased the Davenport Nursery, which has been conducted for over forty years by Nichols & Lorton.

CLUBS AND SOCIETIES

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The regular monthly meeting of the Society was held in Doran's Hall, Greenwich, Conn., on March 14th. The attendance and enthusiasm maintained at our meetings is excellent, especially considering the long journeys some of the members have to make. Regret is felt over the resignation of Vice-President Oscar Addor, who finds that he cannot maintain that office to the welfare of the Society. By unanimous vote H. Wild was elected vice-president for the ensuing year.

The best wishes of the Society were extended to James Aitchison, who is about to take up his residence elsewhere. The speaker for the evening was Wm. Scott, of Scott Bros., Elmsford, N. Y., who delivered a very practical address on the "Growing of Carnations." This meeting being chosen as Carnation Night brought out a large number of exhibits. Prizes were awarded as follows:

First, James Aitchison; second, A. L. Marshall; third, E. Johnson; A. L. Marshall, honorable mention for *Nephrolepis magnifica*; James Aitchison, cultural certificate for cyclamen and *Primula malacoides*; A. Wynne, honorable mention for *Schizanthus Wisetonensis*; Alex. Geddes, honorable mention for carnation seedling; Thos. Aitchison, cultural certificate for vase of callas; Geo. E. Baldwin Co., highly commended for *Cattleya Lawrenceana*; P. W. Popp, honorable mention for carnation California Giant and lily of valley; Thos. Aitchison, honorable mention for seedling amaryllis; Louis Wittman, honorable mention for roses Madison and My Maryland; Thos. Ryan, vote of thanks for shamrock (the real goods).

Professor Jarvis of Yale has promised to deliver an illustrated lecture at our next meeting on "The Diseases of Fruit Trees." This lecture should prove of vital importance to all.

OWEN A. HUNWICK,
Cor. Sec'y.

FLORISTS' CLUB OF WASHINGTON.

At the annual meeting of the Florists' Club of Washington, the election of officers took place. It took two ballots before a selection could be made to fill the two vacancies existing in the board of trustees. The fight for the presidency was a tight one.

David J. Grilbortzer, O. A. C. Oehmler and Otto Bauer were the candidates, but Mr. Grilbortzer, in a short speech before the balloting began, asked that his name be withdrawn.

This left Messrs. Oehmler and Bauer the sole contestants, and the latter won by a single vote. Upon a motion made by the defeated candidate, Mr. Oehmler, the election was made unanimous. George Cooke was unanimously elected vice-president, William F. Gude treasurer, and Elmer C. Mayberry secretary. For the board of trustees David Bisset and William Earnest were elected as members each to serve three years.

Plans were discussed for a banquet in April at which time the new officers will be installed. This will also be ladies' night and from the fact that fifty reservations were immediately made a large assemblage may be expected. An informal report was made on the work of the committee in

charge of the New York and Minneapolis trips. A special car will be chartered to carry the members to the National Flower Show on April 4.

The Ex-Secretary of Agriculture, Hon. James Wilson, was unanimously elected an honorary member.

Louis and Joseph Freeman presented for exhibition a vase of exceptionally fine carnations; Rose Pink and White Enchantress, White Wonder and Beacon. There were also a dozen or more amaryllis on display through the courtesy of Mr. Byrnes of the Propagating Gardens.

MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

"Carnation Night" was a most successful event. Members came out strong and the carnations were grand. Standard varieties as well as novelties were much above the average. Awards were as follows:

Matchless from Cottage Garden, certificate of merit; Enchantress Supreme from Dailledouze, certificate of merit; Northport from James D. Cockcroft, previously certificated; Dimple Widener, Wm. Kleinhertz's pet, certificate of merit; Wm. Eccles from Scott Bros., with the lighter colors, formerly certificated, holds her place well as a top-notch red; Salmon Beauty, Traendly & Schenck, certificate of merit; Seedling No. 7 from Chas. H. Totty, judges asked to see it again before making award; Mrs. C. W. Ward and Woodenethe, from W. H. Duckham, certificate of culture; Woodenethe, from Robt. Tyson, Florham, cultural certificate; Mrs. C. W. Ward and Woodenethe, from Percy D. Witney, Wheat Sheaf, cultural certificate; Gloriosa and White Wonder, from G. F. Neipp, Chatham, cultural certificate; Edward Reagan brought mixed carnations, receiving the Society's award; Ernest Wild's *Schizanthus Wisetonensis*, in 10-inch pots, received a cultural certificate and a \$5 gold piece.

C. J. W. Ottolander of F. & F. Nurseries, read an essay on "Rare Shrubs and Trees," as seen by him at the Arnold Arboretum. It was a painstaking, edifying, and entertaining paper.

Altogether, we had a fine evening of it. Wm. H. Duckham and C. H. Totty called on everyone to respond as far as possible to the call of the International Flower Show. E. R.

NASSAU COUNTY HORTICULTURAL SOCIETY.

At the regular monthly meeting of this society, at Glen Cove, N. Y., on March 12th, the exhibits of plants and flowers were specially good. Jame; Duthie exhibited *Freesia Tubergini*. The colors of this freesia are very pleasing and it is sure to become a favorite for conservatory and house decorations; the varieties were Dainty, La Phare, and Sweet Lavender. The society's prizes for cineraria, cauliflower and stocks were awarded to A. MacKenzie, P. Charbonniad and J. MacDonald. A certificate of culture was awarded to J. W. Everitt for mushrooms; honorable mention to J. Ingram for narcissus, and to J. Duthie for carnations. Andrew Wilson offered a substantial cash prize for the next fall show. Next meeting, April 16, at 7 P. M., and prizes are offered for 12 roses, 12 Darwin tulips and one calceolaria.

JAMES MACDONALD, Cor. Sec.

TARRYTOWN HORTICULTURAL SOCIETY.

The regular monthly meeting of the Tarrytown Horticultural Society was held on Wednesday evening, March 19. A fine vase of the new rose, Milady, was staged by the A. N. Pierson Company; also a fine vase of the new rose, Mrs. George Shawyer, staged by C. H. Totty. Both varieties were awarded a certificate of merit at the fall show and were at this time highly recommended. The prize offered by James W. Smith, for the best twelve roses of any variety other than American Beauty, was awarded to John Elliott. A very interesting discussion on the culture of roses was opened by Joseph Mooney and taken up by Messrs. Bradley, Scott, Angus and Weeks, which brought out some very interesting remarks.

For the April meeting John Elliott offers a prize for the best flowering plant.

E. TRETHEWEY,
Corresponding Secretary.

CLUB AND SOCIETY NOTES.

The New London Horticultural Society had their monthly meeting on the 13th inst., when President John Malona read a most interesting paper on the Growing and Care of Palms and Ferns in the Greenhouse and Home. A good discussion followed.

The Northampton and Holyoke Florists' and Gardeners' Association held a meeting on the evening of March 11, at the greenhouses of H. W. Field, and an illustrated address was given by Prof. Waugh of the Massachusetts Agricultural College on "Ground Improvement."

The Chicago Florist Club have selected the Chicago Great Western railroad as the official route to carry its members and their friends to the 28th annual convention of the Society of American Florists, to be held in Minneapolis, August 19-22, 1913. They have arranged for a superb special train to leave Grand Central station, Chicago, at 6.15 P. M., August 18th, arriving at Minneapolis the following morning. A complete itinerary will be issued shortly.

A new organization, the Medford Horticultural Society, has been formed at Medford, Mass. The officers are: Charles M. Hayden president; Mrs. Lester H. Williams and J. W. Rockwell, vice-presidents; Miss Kate M. Buss, secretary; Vernon H. Hall, treasurer. The directors are: Mrs. Daniel F. Puffer, William H. Randall, Archibald L. Jackson, George O. Foster and Wilton B. Fay. Other directors will be added from the different wards of the city.

The Tri-City Florists' Club met at the home of John Staack, Moline, Ill., where they were hospitably entertained. After inspecting the houses there was a business meeting where the topic for discussion was "Lawns," and officers were elected as follows: President, John Staack; vice-president, H. Pauli; recording secretary, Wm.

In writing to Advertisers kindly mention Horticulture

Goos, Bettendorf, Ia.; financial secretary, C. A. Anderson; treasurer, Julius Staack. The next meeting will be at H. M. Bills', Davenport, Ia.

The regular meeting of the Florists' & Gardeners' Club of Rhode Island was held in Swart's Lodge Hall, Providence, Monday evening, March 17 with a small attendance. Aside from several routine matters, nothing of importance was taken up. Present indications are that few of the leading florists of this city and vicinity will be among those present at the National Flower Show which takes place in New York next month. Those who are determined to be on hand are Mr. and Mrs. Robert Johnston, Albert Holscher, Joseph A. Kopelman and Olney H. Williams.

At the March meeting of the Rochester (N. Y.) Florists' Association the following resolutions were adopted:

Whereas, The growth of floriculture and the production of flowers and vegetables under glass has been the most notable in horticulture in this state in recent years and the large capital and number of people now employed demand that the increasing number of problems which threaten the industry, and with which the individual grower cannot cope because of lack of scientific knowledge, be given consideration by the agricultural experiment station; and

Whereas, No provision has hitherto been made to equip the agricultural college and experiment station to carry on scientific investigations relating to greenhouse crops, be it

Resolved, That the Rochester Florists' Association, at its monthly meeting, heartily indorses the efforts of the New York State Federation of Florists' Clubs to secure the passage of a bill by the Legislature making suitable appropriations for providing equipment for the teaching of floriculture and vegetable gardening.

The publication in a daily paper of interviews with clergymen in Rochester in regard to the "high cost of dying," in which the clergy denounced the use of flowers at funerals as a sinful extravagance, was the cause of much discussion at the March meeting of the Rochester Florists' Association. A resolution was offered making it a misdemeanor for any member of the association to either give or lend flowers or plants of any kind to an organization, and that a card bearing words to that effect be posted in each store. It was decided to defer the matter to the next meeting. A. H. Secker read an admirable paper on the "Indoor and Outdoor Growing of Sweet Peas." Mr. Secker has promised a paper on the "Diseases of the Sweet Peas," at a later date. At the next meeting R. G. Salter will entertain the members with a paper on "The Flower Business of Rochester."

Between 300 and 400 people attended the annual reunion and banquet of the Worcester County Horticultural Society in Horticultural Hall, Worcester, Mass., March 12. The program included a reception from 6 to 6.30 o'clock, banquet at 6.30 o'clock, followed by speechmaking and dancing from 9.30 o'clock until midnight. Guests and speakers were Lieut.-Gov. David I. Walsh, Mayor George M. Wright, William P. Rich, Boston, secretary of the Massachusetts Horticultural Society; Wilfrid Wheeler, secretary of the State Board of Agriculture; Walter D. Ross, president of the Worcester County Agricultural Society; Harold L. Frost, president of the Massachusetts Fruit Growers' Association; Joseph K. Greene, C. L. Gold, West

C. R. BURR & CO., Manchester, Conn.

Cornwall, Ct., vice-president of the Connecticut Fruit Growers' Association, and R. M. Bowen, vice-president of the Rhode Island Fruit Growers' Association. Edward W. Breed, president of the Worcester County Horticultural Society presided at the dinner.

One of the most interesting meetings held since the New Orleans Horticultural Society was formed took place March 19th, and as a result of a general discussion on the topic of "Tree Planting" it was decided to invite Dr. Joseph Holt, president of the Park- ing Commission, to make an address at the next meeting on the various phases of the ordinance under which it is conducted.

It was also decided in future to hold the meetings at the Progressive Union. In leaving Kolb's Restaurant, a room on the upper floor for many years being at the disposal of the society, it was determined that the generosity of Conrad Kolb should be formally noted in a letter of appreciation.

The society plans to have many interesting features in connection with its future meetings, including addresses, not only by members, but others, on various topics, at which a round robin discussion will be in order. This will make the organization a factor in the development of the city, and it is expected to attract much favorable attention and build up the membership. The social features will not be overlooked, because their value is recognized. There will be displays of plants and flowers, and as a whole the society never had a brighter future.

A few things which the Tariff Committee of the American Association of Nurserymen has accomplished:

Secured a tariff equitable and satisfactory to nurserymen. Had the duty upon French fruit stocks made per 1,000, doing away with the old-time controversies over valuation. The committee recently visited Washington, and expects to prevent the threatened tariff reduction. The work of this committee has been of immense value to nurserymen.

The Transportation Committee of this Association is also a wide-awake part of the Association, and has saved more than the membership fee of every individual nurseryman in the land.

It has had classifications defined and freight rates reduced. It has caused railroads to give carloads rates for less than carload lots, etc., etc.

The Legislative Committees have prevented much unwise and unfair

legislation, both State and Federal; and at this time are testing the constitutionality of several state laws which operate injuriously to nursery business interests.

The Committees on Publicity, Root Gall, Standardization of Grades, etc., have done and are still doing equally good work. Like the watchman on the tower, these committees must be constantly on the alert, for there is no limit to the necessity for eternal vigilance.

LOMPOC (CAL.) NOTES.

Anton O. Zvolanek left for the East, March 20, en route for the great National Flower Show, to be held in New York, stopping off occasionally on his way—at St. Louis, for instance, Chicago and other important points. On same day H. W. Buckbee of Rockford, Ill., called at Floradale. This is the thirty-ninth visit Mr. Buckbee has made to California and he enjoys his trips annually. He admires the way much of the vegetation behaves in the Golden State. He is enthusiastic about the \$1000 cup offered by the Panama Pacific International Exposition for a new rose to be exhibited in San Francisco, 1915, and he tried his very best to impart that enthusiasm to the working force at Burpee's Floradale Seed Farm. Mr. Buckbee was shown the stock of rose seedlings on hand and, while they appeared small and not at all promising, he said "keep at it, you'll get there all right."

The Spencerized winter flowering sweet peas are surely attracting a lot of attention these times. It is stated on reliable authority that the winter flowering types of sweet peas when Spencerized are much more satisfactory as a cut-flower industry than are the original. Geo. W. Kerr, the sweet pea expert at Burpee's Fordhook, Penna., Seed Farm, has been hard at work doing his level best to give us all the color types and shades in the winter flowering section, and seeds have been forwarded to Floradale for seed growing purposes. In addition to about two acres of mixed Spencerized winter flowering varieties we have three of Prince Edward of York, twenty-five Countess Spencer types, and all through the various color shade sections, aggregating nearly three hundred, which, as will be understood, means some detail, and from indications we had last year from same source, some startling novelties are in store for those who are interested in this branch of sweet pea growing for cut flowers in winter time. E. L.

IF IN NEED OF ANYTHING IN HARDY PERENNIALS

Get them at Dreer's 50,000 Anemone Japonica

NOT the usual winter killed style, but strong plants, well established in three inch pots, in a growing condition which will give quick results.

Every florist growing flowers for his retail sales should grow a block of these beautiful late summer and fall flowering Anemones, which, besides making an attractive display, will furnish an abundance of useful cut flowers which will be admired by everyone.

J. H. SPRAGUE, Barnegat, N. J.

Boddington's Quality Cannas

Are true to name, have two to three good eyes, are well cured, sound and dormant, and give absolute satisfaction. Our sales last year were nearly 700,000, and not an overgrown kick. The Canna crop this year, however, is very short, and we advise placing orders early to secure stock. Delivery can be made at purchaser's option. Remember, you may deduct 5% if cash accompanies the order.

ARTHUR T. BODDINGTON

SEEDSMAN

342 West 14th St., NEW YORK CITY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Lilium Formosum will probably be exceedingly scarce this fall, according to the present reports, as the crop does not promise to be nearly as large as the demands require.

Waterloo, Neb.—The plant of the Waldron Seed Company here was totally destroyed by fire on the morning of March 18. Loss about \$65,000. Insurance will cover about two-thirds of the loss. The fire started at the side of the building next to the railroad track and is supposed to have originated from sparks thrown out by a passing locomotive. The burned building was valued at \$7000 and the machinery and seeds stored in it made up the balance of the loss.

GREENHOUSES FOR CORNELL.

New York, March 25, 1913.

Editor HORTICULTURE:

Dear Sir: I have just been advised by Wm. F. Kasting that a bill authorizing an appropriation of \$60,000 for greenhouses at Cornell University, to be used in experimental work in flowers and vegetables, is very likely to pass the Senate. On behalf of the legislative committee of the New York Florists' Club, I would urge every florist in the state of New York to write to his Senator at once urging him to vote for the bill. I would also urge them to write to His Excellency, Governor Wm. Sulzer, Executive Mansion, Albany, urging that he sign the bill. Stress should be laid on the fact that the florists want this appropriation, for the better development of horticulture in the state of New York, and that if the Empire State is to hold her prestige as a flower producer in competition with other states, it is essential that this bill be passed and become a law. PATRICK O'MARA.

Of Interest to Retail Florists

Los Angeles, Cal.—G. Rossi & Co., of San Francisco, expect to open a wholesale house here in the near future.

Middletown, N. Y.—J. Meiklejohn, florist, has sold his business to Mr. Dienst, on account of poor health. As soon as his health permits, he will engage in some other business.

Providence, R. I.—Easter was a record-breaker for the florists of this city and nearby sections, the sale of flowers surpassing all previous records, according to several of the leading florists. There was an abundant supply of good stock and firm prices. Notwithstanding this some of the stores were cleaned out entirely of

certain flowers early in the afternoon and on the whole about all of the large dealers were nearly sold out at the close of business.

Violets were one of the leading sellers. This flower was plentiful and of excellent quality. A big demand for American Beauties and Richmonds made a shortage in these roses, while there were plenty of the white and pink Killarney and My Maryland. Bulbous plants were in great demand. Many churches adopted a plan to distribute growing plants and that tended to drain the supply. The supply of lilies was insufficient. Combination baskets and novelty baskets of azaleas and roses were offered by the trade and readily accepted. The excellent weather conditions are given credit for the especially good season, both from a producing point of view as well as the day which made the sale possible.

NEWS NOTES.

Fort Madison, Iowa.—Henry Bend-
lege corner of 8th and Lincoln streets,
suffered a \$1,000 loss to greenhouses
by a wind storm.

Syracuse, N. Y.—A cyclone struck
the two new greenhouses of Bannister
Bros. on the Genesee turnpike on the
afternoon of March 15th, completely
demolishing them. One house was 30x
200 and the other 30x100 and both
were filled with Easter stock, and the
loss is estimated at \$10,000.

OF INTEREST TO RETAIL FLORISTS

WINDOW DISPLAY.

Keen competition has forced many florists to pay more attention to their windows the past few years, and those striving for honors in this line rarely have anything to regret for doing so. By all means this should not be overlooked if you are in hopes of increasing your business, as the public is not slow to observe a display that has become stale. Your competitors see it at once and set to work immediately to take the glory that once was yours, and, behold, your trade goes with it! Therefore see that your windows have a daily change, no matter how slight, as this is one way of advertising. Very often the general public judge your work by the appearance of your windows.

When decorating your window use discretion, bearing in mind the season and making your display accordingly. People enjoy looking at a pretty window that has character and when this lacks, you fail to attract; whatever you put in, let it be the best you have. As an example, if roses be the attraction, let the stems be a credit to the flowers, not weak and limp as though they were about "all in." Let the people see you have the goods and that you are not afraid to show them.

When flowers are not coming in as they should, then as a quick change for a snappy looking window, get together a group of your prettiest baskets and the window arrangement has taken on another aspect, ever keeping the public and your competitors guessing what you are going to show next. Fancy vases and jardinières mounted on velvet with a background of ferns and palms make a pretty window display. Many interesting and striking effects can be produced by using birch-bark, cedar-bark and seasonable foliage.

Though we see quite a few windows with large groups of plants artistically arranged, they lack something, and that is color. There is nothing that will draw the attention of the passer-by quicker than a flash of color. A green window may be pretty, but too often tiresome, whereas a touch of color appeals. In my various observations I have often noticed what might have been a pretty window spoiled by the decorator allowing the red clay pots to show, and by the use

A PROFITABLE SHOW HOUSE.

Our cover illustration shows the interior of a show house in connection with the florist store of Whittle Bros., Albany, N. Y., erected by Lord & Burnham Company. On this page also appears a view in the store proper, showing its relationship to the show house. Messrs Whittle make a statement that their sales have very materially increased since the conservatory was

added, especially in potted plants, customers who come to buy flowers and who never before were known to purchase plants often selecting plants and having them sent home. We believe that Whittle Bros.' experience is identical with that of all store florists who have had plant houses erected in connection with their store. Where there is room for such an addition it is a sure paying investment.

of cork or laurel branches, etc.; this can be overcome.

The window always acts as a silent

salesman, and many wide-awake florists make their windows talk.

MR. STOREMAN.

CHICAGO NOTES.

Storm Wrecks.

That Easter and equinoctial storms are not desirable companions is the verdict of Chicago florists, both wholesale and retail. The unfavorable weather of the latter part of the week culminated in a downpour, which lasted all day Sunday and just after midnight a storm burst which did much damage to growers in Chicago and vicinity. High wind accompanied rain and in some localities hail. The storm entered the city from the northwest and the suburban towns in that direction suffered most. At Hoerber Bros.' plant, Desplaines, which is comparatively new, the loss is heavy, two large houses being completely uncovered, the west end of the range broken and the big smokestack, 122 feet high, is only a mass of brick. It fell just as an engine and caboose were passing and struck the latter, killing two brakemen. No bricks fell upon the houses. The other Desplaines florists suffered little loss except the Desplaines Floral Co., where considerable glass is broken. Poehlmann Bros. Co. at Morton Grove, was also in the worst of the storm and Plant A suffered severely. Several houses are said to be down. Telephone wires are down and exact information is meagre. The Deerfield Nurseries at Deerfield, Ill., are badly damaged, some of the houses being torn to pieces. The gardenias for the Chicago market come largely from here and a nice stock to be cut in June is completely demolished. One large new greenhouse is entirely destroyed. Frank Schram of Arlington Heights, August Priebs, Hunt Bros., and others of Park Ridge, are all reported to have lost much in the storm. John Munro, of Rogers Park, lost two greenhouses as the result of the falling of the smokestack. At Wellworth Farms, the new plant erected two years ago for John F. Kidwell, president of the Flower Growers' Association, was badly damaged. Within the city the loss is mostly in broken glass and those with such large areas as Peter and George Reinberg, J. A. Budlong, Frank Oechslein and others consider themselves fortunate. More than one smokestack rocked and seemed each minute to be on the verge of toppling over. It was a very severe strain on nerves that had just been put to the test of a strenuous Easter week and one that growers will not soon forget.

Easter Plants.

A perceptible leaning toward colored flowers was especially noticed in plant sales. Retailers say they sold more azaleas, rhododendrons and hydrangeas than usual, and these in the brighter colors. At Fleischman's the sale of rhododendrons was larger than ever before, while fancy colored hydrangeas did not sell particularly well. The shortage of American Beauties was a feature which turned more orders to plants. The floor of the great rotunda of the Railway Exchange building was covered each night with plants, and 18 large trucks were needed for delivery. The system of numbering different styles of filled baskets, etc., and selling from number only, was again adhered to, and as a result time was saved and confusion avoided.

HART MAKES HANDLES FOR POTS

With Paper or Porto Rican Mats They Make Baskets. These are the Well-Known HART'S HANDY HANDLES.

Shipments are being made daily eastward to Boston, westward to San Francisco—and everywhere else. Once used always used, because they are SO HANDY.

Prices per dozen—No. 1, \$2.50; No. 2, \$3.50; No. 3, \$4.00; No. 4, \$5.00; No. 5, \$6.00.

GEORGE B. HART, 24 Stone St., Rochester, N. Y.

Trade News.

Now is the opportunity for the manufacturers of greenhouse materials to say, "I told you so," when it is not their peculiar brand that went to pieces.

Poehlmann Bros. were still receiving Easter orders Monday. Telegrams that failed to reach them, on account of wires being down, were picked up by operators and sent on by mail.

Just as the storm from the West had passed came the report of one from the South. The Adams Express could receive no shipments East on Tuesday and trains from Indiana bringing in stock were not arriving on time.

To the telephone most of the retailers owe their Easter sales, and they are all willing to give the credit due to the indispensable adjunct of modern methods of selling. Without it the steady downpour would have kept the flowers in the florists' ice boxes on Easter Sunday.

The new store for the La Grange Floral & Seed Co., at 9 South Fifth avenue, was completed in time for handling the Easter trade. Mr. and Mrs. Walter Scott have now a well established business, Mrs. Scott having charge of the store while Mr. Scott looks after the landscape work.

Duncan A. Robertson of the Adams-Robertson Co., regards the Easter trade as unusual this year. The warm weather in the early winter kept many of the heaviest buyers in the city during January and February, but they left when the March storms came on. Mr. Robertson believes the average winter sales to the social patrons of the city will average fully as high as in former years, though sales cover a slightly different period and many who bought heavily for past Easters were South or West this year.

Minneapolis, Minn.—R. A. Latham and O. H. Carlson, florists, have effected a business consolidation and leased the property at 83 10th street (south) for 100 years. The deal is one of the largest that has been negotiated in down-town property and the firm will build a handsome fireproof building this spring. The property has a frontage on 10th street of 42½ feet and a depth of 110 feet. The new building, which will be of brick, steel, terra cotta and glass, will cover the entire lot. A conservatory will be a special feature of the building.

PHILADELPHIA NOTES.

The Easter plant trade in Philadelphia was first class in every way and about everything that was fit to sell found a buyer, and much that was not so fit at the final round-up. Good lilies were scarce and azaleas and hydrangeas were also on the short side. All the usual staples and standbys were in plentiful supply and fairly well done generally. There was little of anything in the way of novelty. Coronilla glauca was about the only thing we noticed. This is a yellow flower something like a genista but smaller and not quite so shrubby. Fragrant and attractive; also, according to A. B. Cartledge, very lasting.

Easter Market Reports

BOSTON Easter in Boston was almost an ideal day, only marred by the drizzling rain which set in towards evening. The florists were particularly favored all through, the temperature being such that no protection from cold was needed for plant or flower. Saturday was simply glorious—like a day in May—and Friday went even a bit too far with its 69 in the shade. The effect of this warm and sunny spell was to hasten the blooming of everything that had a bud on it and the result was, as might be expected, a rather unwieldy accumulation on Saturday of such things as daffodils, tulips, violets and some varieties of carnations. Most things were of excellent quality. Violets have never been so fine—large, long-stemmed and intense in color and it is a great pity that so many of them remained in wholesale hands unsold, because of the restricted means of getting them into the hands of the people. Carnations were of extra good quality and so were roses. But the most important flower of all for the Easter trade—the lily—made a remarkably poor showing, evidently weakened and crippled by overforcing in the haste to get them in bloom for the early Easter. There were some that were superb, but more that were not, with flimsy wilted flowers not fit to offer to a customer. Many more lilies could have been sold, all the stores being practically cleaned out by Saturday noon and vainly clamoring for more. Plants of all kinds sold up close to the limit, only a few azaleas—which by the way were not up to standard—and rambler roses being left over in retailers' hands. In the aggregate it was probably by far the biggest Easter ever enjoyed by the Boston florists and we are glad to have the story to tell.

BUFFALO Easter, 1913, will be remembered to be one of the best if not the very best in years. Weather conditions the early part of the week were ideal and everybody had the Easter spirit. Plants came in early and the hustle was began on Wednesday and continued till Sunday. There was a heavy supply of plants and it is hard to state which sold best; it was a general cleaning for the trade at large. There were plenty of lilies. Azaleas was also in good supply and sold out clean; there were some fine rhododendrons, hydrangeas, Rambler roses and a fine lot of bulbous stock, which all shared in the demand. The delivery of plants found the weather excellent up to Saturday noon when the temperature registered freezing. In the cut-flower line there is much to be said and as usual the wholesaler has his troubles, and this time the fault is not laid to late shipments, but on days when good stock is expected, especially violets, and there comes a lot of rotten stuff which is a disgrace to the flower business, it is certainly some disappointment not alone to the wholesaler but to the merchant who is in waiting to purchase. Such was the violet situation. Sweet peas were the heaviest in demand and not enough could be had. Lily of the valley sold exceptionally well as did Bonsilene roses, and corsage flowers had a good call. Carnations were good and the last day

IRISH FIRE FLAME

Will be at the National Flower Show in all its glory; don't fail to see it there, then come over to Philadelphia to see it growing in its splendor of beauty, charm, vigor and growth.

again saw too many. There was an oversupply of cut lilies and for some reason the sales were lighter than other years. Beauties had a good call, but were on the scarce side and the quality poor. In many cases Richmond and Red Killarney filled the bill.

Another Easter with a few extra plants thrown in is passed, and the florist who thought he had lived through all possible variations of the business knows how to get it.

Special Attention to the Shipping Trade

Easter Market Reports

(Continued from page 477)

had not. Shipping was handicapped by the storm and orders were held up on account of fallen wires during the last three days of Easter week. Early orders met with no difficulties and were readily filled with good stock. Lilies proved that the prediction of scarcity had been well-founded, though the extent was not enough to be serious. The scarcity of American Beauties was an assured fact and other stock had been provided for to take their place. All kinds of roses were in great abundance and still there was no surplus for prices held pretty closely to quotations to the last, due largely to the general good quality of the stock. Violets were the only flowers that did not sell well and this refers to doubles only, home-grown singles finding favor with buyers. Carnations weakened in price towards the last but there were great quantities to be handled. Monday and Tuesday following Easter have been very dull, with stormy weather holding back local trade and all kinds of obstacles to shipping.

Business for Easter was very good in both plants and cut-flowers. The latter were plentiful excepting Beauties, which were a little scarce, and also too expensive for the average buyer. Plants were not as good in quality as in previous years and were rather soft, but taking everything into consideration they were pretty fair, inasmuch as Easter was so early. Everyone seems well pleased so far as we can learn, this including both wholesale and retail people. Roses did not bring as high prices as at former Easters. There were many complaints that roses, especially those of the higher grades, showed the effects of the weather or else had been "salted." Lilies moved slowly until Thursday and Friday and on Saturday they were rather shy on supply, so that the price for good blooms advanced materially. Carnations were actually scarce on Friday, the growers preferring to hold them back till Saturday and take chances. In this venture they had the customary result—nothing gained. The supply of violets was prodigious. Those of good quality found a pretty good sale, but there were tens of thousands of them too far gone—in fact, dropped to pieces when taken from the boxes—and these went to their proper destination, the dump, on arrival. With the exception of violets, stocks and some of the bulbous things the market was cleaned out fairly well.

Do Not Take Any Fake Green Thread. Use the Genuine Silkline and Get More Thread and Less Wood

JOHN C. MEYER & CO.,

Lowell Thread Mills,
1495 Middlesex St.,

LOWELL, MASS.

Silkline also is made in all leading colors, as Violet, for bunching violets, and also for tying fancy boxes

The MEYER Green

SILKLINE

Used by Retail Florists for mossing funeral designs, tying bunches, etc., is

THE ONLY ARTICLE THAT SHOULD BE USED

by Growers for stringing Smilax and Asparagus, as it will not fade or rot in the greenhouse. The Meyer Silkline was the first green thread to be introduced among Florists and Growers. It is handled by the best houses everywhere, but it should be ordered by name—Meyer's Silkline—to be sure of getting the genuine article. Do not accept substitutes.

If your jobber cannot supply you, order direct of the manufacturers. Price for any size or color, \$1.25 per lb. Sizes, "F" fine, "FF" medium, and "FFF" coarse.

Everyone seems to be satisfied with the Easter trade this year. Prices were moderate all along the line, and an immense volume of business was done. Wednesday and Thursday were hot and moist and this was against the keeping quality of stocks generally. Hudson River violets were especial sufferers—arriving here in wretched condition. Local stock both in singles and Lady Campbell were much more satisfactory. All the Beauty growers except one were off crop. This condition we believe was general both east and west. In pink roses Maryland

Easter Market Reports

(Continued from page 470)

was the favorite on account of its bright color. The Killarneys were also very fine flowers. White roses and lily of the valley were in exceptional demand. Good sweet peas went well but there was an awful lot of low grade stock which buyers did not care for and the same may be said of cattleyas. The Schrodærae is the only cattleya at present and it is too light colored for popular fancy. Mossiae will be in soon and will take better. Other stocks were plentiful and nearly everything sold well.

One of the best Easter florists we ever had. Florists with show houses say that plants, above all, had the call and that Easter lilies cleaned up early as plants quite as well as cut-flowers. Many sales were lost by not having enough stock. All blooming plants had one big sale all through. As to outlook the market was so well supplied that orders were filled in full except in lilies. There was a full crop of roses, and they came in in fine quality. Carnations cleaned up well. An immense crop of violets and sweet peas was consigned to this market on Saturday and Sunday and these cleaned up early at stiff prices. All bulb stock sold well so it's safe to say that the Easter of 1913 was the best the local florists ever experienced.

Washington florists as a whole are well pleased with the results of the Easter trade. Fair weather materially aided the sale of flowers and there was enough stock to be had to fill all demands except of orchids and American Beauty roses. The supply of these was short and they were very much in favor. Cut flowers, corsage bouquets, potted plants and made-up baskets all moved equally well. To meet the heavy increase in the business of the week end it was necessary that considerable extra help be hired both in the stores and on the delivery service. Regardless of the inexperienced help everything ran along smoothly. The only accident known to have occurred during the Easter rush in which a florist was interested was that resulting from the collision between one of the automobile delivery wagons of Z. D. Blackstone and a bicycle boy. The injuries to the lad were such as to make it necessary that he receive hospital treatment.

Benjamin Hammond, secretary of the American Rose Society, has been elected President of Fishkill Landing, New York, by a vote of 435 to 378 for his opponent. Mr. Hammond is a public spirited citizen and a man of character and ability and will fill the office with zeal and credit.

SITUATIONS WANTED

SITUATION WANTED—As superintendent or head gardener by Englishman, 34; married, one child. Abstainer and non-smoker. Twenty years' extensive experience; five years in this country; over four years in present place. At liberty April 1st. Well recommended. Address S. W. S., care HORTICULTURE.

Tel., 2886-1 Brookline.

MISCELLANEOUS

BUY OR LEASE, 10,000 to 20,000 feet of glass. H., HORTICULTURE.

PERSONAL.

William F. Gale, for a long time city forester of Springfield, Mass., notifies us that after April 1, 1913, he will be out of that position, for political reasons.

Bernard Eschner, president of M. Rice Co., and his wife, sailed for Europe, Saturday, March 22nd, on the steamer George Washington for an extensive purchasing trip.

S. J. Rueter, of Westerly, R. I., who suffered a severe shock at his home on March 16, is reported as slightly improved, although his condition is still serious. He remained unconscious until the 22nd, inst., when he became partially conscious. Mr. Rueter is one of the largest rose growers in New England and a highly esteemed member of the craft.

Edward J. Canning for the past 19 years Superintendent of grounds and head of the Botanic Gardens at Smith College has resigned his position in order to devote his whole time to landscape gardening. Besides his college work he has drawn plans for and planted a great number of private places, and the work has come to him

Obituary.

Francis Brill.

Francis Brill, widely known as a grower of choice cabbage seed, died on Monday, March 24th, at his home in Hempstead, L. I., N. Y., at an advanced age. More particulars in our next.

Alexander D. Broadfoot.

Alexander D. Broadfoot, Washington, D. C., for thirty-one years a landscape gardener in the employ of the District Government, died on Sunday last at the Providence Hospital as a result of a complication of diseases. He was born in Scotland in about 1852 and came to this country at the age of eighteen. He worked at the Botanical Gardens for a number of years and then secured the position he held when he died. He had been ill for about six months. He is survived by a son.

Fred W. Ostertag.

Fred W. Ostertag, St. Louis, died Tuesday, March 18th, at the home of his brother, H. C. Ostertag, after a lingering sickness. For the past few years he had not been active in the business of Ostertag Bros., having disposed of his business to his brother. He was well known as one of the best floral decorator workers in the city. He was 42 years of age and leaves a mother, brother and sister to mourn his loss. Many in the trade sent floral pieces and extended sympathy to the bereaved family. The burial took place Thursday afternoon, March 20th, at Bellefontaine Cemetery.

Otis Chapman.

Otis Chapman of Westerly, R. I., died on March 24th, after a long illness. For several years he and Mrs. Chapman have conducted an extensive dahlia business in Westerly, growing both tubers and flowers for the trade.

Mr. Chapman was a true dahlia enthusiast, spending much time and money in getting together a collection of varieties which is probably the most up-to-date in Rhode Island. His system of cultivation was also admirable, producing flowers of first quality and always keeping the field clean and well arranged as to color of flowers. He was a man of very pleasant manners and sound judgment. The business will probably be continued by his widow.

Fewer Rafters Fewer Columns Fewer Purlins

Are Used in Our Cantilever Construction

ALL of which, of course, means more light and greater freedom in working the house.

Just to give you a rough idea how it works out, let's take a house 200 feet long and 70 feet wide. In the standard Flat Rafter construction, you must have 25 rafters, no matter whose construction it is. In the Cantilever construction, you need but 17.

16 purlins are required with Flat Rafter, only 12 with the Cantilever. 4 columns with the Flat Rafter; 2 only with the Cantilever.

Admittedly the rafter is of necessity deeper, but it's being *open lattice* constructed, it casts no more shade than shallower rafters of *solid iron*.

As to price—when you get right down to sharpening your lead pencil, it costs no more than the flat rafter house.

This being so, you better look into it pretty thoroughly, point by point, before putting your money into anything else.

“Complete Satisfaction” Says A. A. Pembroke of No. Beverly, Mass.

“THE LORD & BURNHAM house 450 feet by 60 feet, built for me is giving complete satisfaction.

Since completion (six months ago) not a single light of glass has broken or cracked, notwithstanding the very severe winds of this Winter and last Fall.

I think a wide house desirous from several standpoints; for instance, saving of material and labor in construction, economy in heating and working, with a larger and better volume of air at all times—therefore better results with a saving of time and money.

I consider your double angle iron columns and compression

truss make the house perfectly rigid and strong enough to stand any strain that may be put on it.

The angle iron eave plate and the drip gutter also are a favorable feature.

In fact for quality of material used, quickness of erection, standard of workmanship, and in all other details, your house stands in the very first class.”

APRIL 5, 1913

No. 14

INTERNATIONAL FLOWER SHOW NUMBER

The Big Blow That Did Not Blow Enough To Blow Down Any Lord and Burnham Big Houses

THE recent far-reaching destruction throughout the middle West of all sizes of various constructed green-houses points an object lesson we have been endeavoring to impress on growers for years.

Over and over again we have used these pages to show up the wind resisting strength of our Iron Frame Construction.

Some of the "wise ones" have gone so far as to flatly state that our houses "had too much iron in them," or that we "were unnecessarily fussy about the number of columns we placed in a house."

Yes, and we have even been accused of being "behind the times" by not adopting some of the new fangled framing methods. It now happens that two of the biggest iron frame houses in the west, were new fangled construction, and in that blow they went down like a pack of cards.

Not a single Lord & Burnham house suffered. Of course, glass was broken, but the frame

work on all sides stands firm and true today as when erected.

It is apparent, then, that many growers have been led to put too much confidence in certain kinds of frame houses.

The recent destruction of hundreds of thousands of dollars' worth of houses simply backs up what we have been continually claiming; and that is—half the iron frame houses being put up by firms with but a few years experience in that type of construction are nowhere near as safe and sure as our Pipe Frame.

It's not a question of *how much iron* you use in a house; but how *that iron is put to use*. Mind you, we don't claim that our iron frame houses will never blow down, (although one never has) but we do claim, *that if any house will stand a blow, Lord & Burnham's will*.

Drop in at our show at the International Flower Show and talk over our blow-proof houses.

If you can't come, let us come to you.

NEW CARNATION—"BENORA"

This variegated carnation, sent out by Mr. Peter Fisher last season, is the finest variegated variety, and one of the very best carnations of any color ever sent out.

It has immediately attained a commanding position among the very choicest sorts, and will add to Mr. Fisher's already enviable list of introductions. It is indispensable. It is a very early and free bloomer, matures quickly, making very perfect flowers of the largest size on long stems; does not split the calyx.

Strong rooted cuttings ready for immediate delivery, \$6 per 100; \$50 per 1000

**In Writing Advertisers Kindly Mention
HORTICULTURE**

THE SPECIALIST

WHEN this nation of ours was born nearly everyone was a generalist. The merchant sold a general line; the doctor was also a farmer and a horse trader and so on. As time passed some of the wiser men turned specialists and succeeded. The doctor who is a generalist now cannot excel in any one branch of medicine, or compete with the specialist who devotes his entire time and study and practice toward one point. The merchant who sells everything cannot compete with the man who makes one class of goods his specialty. The general florist of today cannot compete with the specialist who grows one thing and grows it well. It is the same in the bulb business. With the keen competition of these days it is necessary for the individual to be a specialist in business. We are specialists in lily bulbs, and have been for some years. It is a business in itself, and done right, is not as simple as it looks. We devote more time to lily bulbs than anyone else in the business. In point of quality and price, which is the combination necessary for ultimate success, no one can excel us. Horseshoe Brand Lily bulbs already have a reputation, as the very best produced anywhere. The prices are as reasonable as good business judgment will permit. A catalogue upon request, with prices.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Calanthes

Every florist who grows any orchids should have some of these truly superb orchids in his collection. Where you have not started them as yet you should not lose any time in getting them under way. Prepare some flats by placing plenty of crocks over the bottom and on this spread a layer of moss, then fill with sharp sand. The bulbs can be placed in these flats quite close together, in a house where they can have a temperature of from 65 to 70 degrees at night. These flats should be watered sparingly with water that has had the chill taken off until they have established good root action, after which they can be potted in a mixture of fibrous loam two parts, that has all finer particles screened out, well decayed cow manure one part, and some gritty sand. One bulb to a 5 or 6-inch pan or three bulbs to 8 or 9-inch pan. Fill pans one-third full of crocks. Give them a bench in a house where they can have the above mentioned temperature.

Care of Cyclamen

Cyclamen are free-rooting plants, but by no means want overpotting; yet when the roots have filled the pots they should not be stunted, but should at once be given a shift. From the pans they will need a 3-inch pot and from 3-inch to 4-inch and finish with a 6-inch or 7-inch, or perhaps from 3-inch to a 5-inch, and the last shift into an 8-inch depending on size and vigor of plant. For a compost use fibrous loam two parts, leaf mold two parts, rotted cow manure one part, and some sand. Cyclamen should have an average temperature of not over 55 at night. In order to keep them sturdy they should have plenty of ventilation, avoiding any cold drafts. Be very careful when watering not to let them get in a soaked condition. They do better when allowed to go on the dry side once in a while. Give an overhead sprinkling on bright days, now and then a spraying with tobacco water and a syringing with it from underneath so as to reach the lower surface of the leaves.

Ground for Carnations

Carnations will grow on almost any soil, but it is all important when planting them out in the field, that it is well drained, either naturally or artificially for they will not do well on soil where the water does not freely pass off. It is well ever to keep the fact in mind that it will always be more profitable to fertilize one piece of ground well than imperfectly. Ground that was plowed and manured last fall will prove the best. New soil, particularly when broken up from

pasture land that was turned over in the fall makes excellent land for carnations. Such land, however, should be well pulverized by the use of the smoothing harrow or good results may not follow. A proper amount of plant food can be supplied by well rotted manure, followed by a good sprinkling of bone dust and wood ashes which should be thoroughly incorporated with the soil. Ground in good condition is an important factor in carnation growing.

Perennial Border

Now is a good time to make a new border or extend the old ones. See that the soil is deeply dug or, still better, trenched, as these plants are left undisturbed for some years. They require a soil that has been well enriched with plenty of rotted manure, bone dust, and wood ashes. The time to plant a perennial border is just as the plants are emerging into renewed life. Do not plant while the ground is in a wet condition. Select an open and sunny situation, far away from the food robbing roots of trees or large shrubs. See that each plant has enough of room when they are full grown. Mass your plants instead of dotting them here and there. Blend the colors throughout so as to prevent too many of one shade of color coming together.

Stock for Vases, Boxes, and Baskets

See that all climbing and drooping plants have every attention from this out. As they advance in growth see that they do not become all tangled up. Climbing plants should be staked as they may need it and the drooping plants given a place where they can hang down. They should never be allowed to become dry at the roots. Coleus, achyranthes, petunias, ageratums, acalyphas, centaureas, dwarf nasturtiums, crotons, salvias and Vinca rosea are all desirable vase plants, while geraniums should be used in the majority. For trailers use tradescantia, Kenilworth ivy, selaginellas and moneywort. For centers there is nothing to equal Dracaena indivisa or other grassy-leaved species of the cordyline, which stand sun and wind well.

Spiraeas (Astilbe)

Plants wanted for Memorial Day will require attention in the way of watering from this out for if they are neglected in this line they will soon show bad effects. To improve them both in flower and foliage they should have manure water twice a week now. It may take a little time but it pays in the end. To keep them in perfect shape give them plenty of room. When they are out in full bloom a light shading over them will be found very beneficial.

Mr. Farrell's next notes will be on the following: Bougainvilleas; Camellias; Flowers for Memorial Day; Hardy Roses; Planting Shrubs; Pansies.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Finishing Melons

Melons sown December 1st will soon be showing signs of ripening. Continue the usual routine until a few fruits assume an additional attractive color and emit that delicate aroma which is a sure sign of ripening. With these as a signal gradually accustom the plants to more air, increasing as more fruits ripen, until the house can be left almost wide open in mild weather. The night temperature can be reduced to 65 at this stage, advancing 5 degrees by day and 10 more with sun heat. The atmospheric conditions are of the greatest importance at this stage, temperatures being only secondary. Discontinue syringing and gradually withhold moisture from other sources until, as the fruits are ripe, all is nearly dry. This does not mean the plants should be allowed to wilt or flag; keep them just off this and all sections of the vines will be performing the allotted functions and so contribute to the welfare of the fruit. It is early to talk of shading in some localities where HORTICULTURE's readers reside, but if a house of ripe melons is to be extended to the maximum length a shading put on the glass soon after the first fruits are cut will cause the others to ripen slowly.

Stopping and Tying Figs

Figs are grown in pots and tubs and also as trained trees. In whatever form they take, a method of stopping must be adhered to, to obtain the best results. As each growth extends to four or five leaves the point should be pinched out of it; this causes a check to the growth and more sap is brought to bear on the fruits growing in the axils of the leaves. Any parts of the tree likely to become crowded should have the very small growths rubbed off at this time. There is nothing gained by tying two shoots in where one is enough. Trellis trees must be gone over at regular intervals to secure the growths in the proper place, and at the same time stopping can be attended to. Pot trees and tubs making a natural-shaped tree are generally strong enough to support themselves until the second stopping takes place, when strong stakes are necessary.

Watering

Watering is a most important factor in the ultimate success of all crops, a thing to be studied from the cutting bench until the last flower is cut, or from the time the fruit house is started until the last leaf has fallen; yes, even longer—until the house is started up again, an evergreen subject never to be neglected. No man can water his borders correctly through the growing season and after the crop is cut afford to let them go any old way. I have in my mind at this time properly constructed borders with good drainage, borders that need watching through the growing season just as much as a bench of chrysanthemums or roses does. There are borders in existence that make the necessity of watering a novelty. Bad drainage and also leaky roofs account for this.

Ascertaining the dryness or otherwise of the soil to a depth of 18 inches or more may seem a perplexing problem. It is, until one is accustomed to it, for they are not raised in any way and the body of soil to be gauged is considerably more than any bench. The eye is one of the surest means of determining the texture of a border, both by observing the border itself and the foliage, for extremes at the roots will show themselves in the foliage before any wilting is to be seen. Where this is doubted, the use of a border tester will be potent. This is made of half-inch iron rod pointed at one end and having a handle at the other, made long enough to reach the bottom of the borders. If this is inserted into the border and turned around before drawing it out the condition of the soil can be traced by examining the iron. It must always be borne in mind that the tester must be inserted in a spot likely to average for the whole border. Watering itself may look easy; so it is, so long as you keep your thinking cap on. It is of no use to water one end thoroughly and the other one only half, or to make a patchy job of it,—in other words to leave dry spots. Remember that part of the border immediately below the heating pipes will be one of the driest places to be found and will take more water to soak it through than the other parts.

Now about the speed of the water. Is it policy to open up the faucet and "let her go" with a spreader on the end of the hose to cover a greater surface of soil with the greater pressure of water. Theoretically this would be all right, but try it. Before sufficient water has been applied to soak the border through, you will find a quantity still on the surface and when this does go down quite a crust is forming. Better results are obtained by letting the water run slowly and see it soak into the soil as you go on without washing the whole surface of the border.

Broken Laterals

Broken laterals are very vexing and often cause a fellow to go away down deep in his vocabulary to express his feelings. These things happen all too suddenly; there is no time to prevent it in any way. The only solution is to be wary and treat the laterals with a gentle hand. When the system is followed of allowing the vines to be suspended until they are nearly in flower the chances of breaking laterals are decidedly less, for after that stage is reached they are more pliable. The lateral breaking half-way is not so injurious to the after-welfare of the vine as when the whole of it breaks out from the spur. All is to be lost in the latter case. The former is not so bad, as apart from perhaps losing a bunch, the sublaterals will fill in the space. These breakages can sometimes be repaired by wrapping damp moss around the base of the lateral and the spur after securing the growth into its normal position, thus bringing all the various tissues in contact with their own, which will make a quick union. Keep the growth

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Mulching Outside Roses

Now is the best time to apply a good mulch to all outside roses before the buds start. Apply a good coating of bonemeal to the beds first and follow with a light mulch of manure. Then any coarse material that will keep the weeds down and help to hold the moisture which is so essential to the growth of the plants. Of course all outside roses will have been pruned by this time, and if they have not been pruned as yet they should be pruned at once.

The object of the early mulch is to have all the work done before the young shoots appear, so as not to break, or otherwise damage them. Then, too, where water is bound to be a little scarce this early mulch will help greatly to keep the soil from drying out as it naturally would if no protection was given. Mulched beds go many weeks without showing effect of drought, long after those not mulched have succumbed to the dry weather.

The Ventilators at Night

Now that the warmer weather is here to stay do not be afraid to leave a crack of air on all night. This will especially apply to new houses that are almost air tight. During the heavy March winds it would not be advisable to carry much air, but any still night should find the ventilators open a little at least even though a little artificial heat has to be used to hold up the temperature of the houses.

Letting the Fires Out

It would hardly be advisable to let any of the fires out with the first few rays of warm sunshine. Keep the houses up to the standard as far as temperature is concerned. It will pay in the long run, for letting the houses go down below normal, mildew will surely follow, and with the foliage spoiled by mildew the cut blooms never sell so well. We cannot tell what kind of weather this year will bring; last year we had to have steam all summer long, with the exception of a week or two.

Cracked Ice in Boxes

For shipments that have to travel and great distance cracked ice is the only way to keep the roses from opening up. Growers should bear in mind that the cut blooms have to pass through two hands usually before the customer who buys from the retail florists gets them, and such customers expect them to last a while.

The Young Stock

We do not know how other sections of the country fared in regard to weather the last few days, we having only rain, fog and wind. This is by no means ideal weather for promoting plant growth, and to say the least it is poor weather for young plants. Young

shaded and the moss moist all the time until the union is formed.

Packing Strawberries

It is easy to crate strawberries in the small baskets when you have them in quantity. Those grown in the greenhouse are scarcely able to be numbered by the crate.

Beauties will take a little air slacked lime almost every night, if the day has been dull and damp. This should be applied with a pair of bellows, blowing it well underneath the foliage of the plants. Of course do not white-wash them by any means, and have the lime as dry as practical, so it would absorb as much of the moisture in the air as possible.

Greenfly

If the plants are free from this pest a little tobacco dust scattered over them every now and then will keep it out almost altogether without use of other insecticides. If, however, there are traces of fly this tobacco will never rid the plants of them, although it may keep them from spreading so fast.

Syringing

Never neglect this important feature in the production of roses. There has been enough in these columns about Mr. Spider lately so that there is little excuse for anyone to feel unacquainted with the little brute. Be careful and syringe the young plants with a steady stream of water, so as not to shake them loose in the pots. Be careful to syringe out all the corners well, and examine the plants carefully every now and then to make sure there is no such thing as a nest of spiders around. Often we have found what we term a "nest" in places where we least expected, too. This goes to show that even the best growers are likely to have a little spider here and there, but as long as they know it is there and do their best to rid the plants of it there is little cause to worry.

Picking Yellow Leaves

It is no credit to a place or grower to have his benches strewn with dead leaves, and we are sure every one could find time to dispose of some of them at least. The best way is to pick them all up right after syringing, as there are only a few then, and afterwards keep the benches clean. Once you allow them to accumulate dirt, they will be very hard to get into order again. In picking leaves do not scratch over the surface of soil much, as this would disturb the tiny rootlets and damage the plants somewhat, although no visible sign of the harm done would appear.

Sod Heaps

If your sod heaps have not been put up in the fall, you certainly ought to get busy, and as soon as the soil is dry enough to handle, have them all put up and ready. Should you make a practice of plowing land, and taking the soil direct to the benches, begin plowing at once, if the soil conditions will allow. Sod heaps put up in the fall can be cut down now and receive their first turning. This will greatly help in preparing the soil so that the young plants can take a hold into it as soon as they are planted.

Every individual berry will be wanted, consequently greater care must be exercised in packing. Use shallow wooden boxes deep enough to take one layer only. Line these with cotton wool and wrap each berry separately in wax paper, placing more cotton on the top before tacking on the lid. Berries for shipping should be under-ripe.

Hardiness

The recent symposiums in HORTICULTURE on subjects abstruse and otherwise and the interest manifested in the same even to the West, lead me to again ask the question, What constitutes hardiness in plants? Many years ago I asked the same of the late Dr. George Thurber who, in his day, was one who should know but he shook his head.

Probably it is a world-old question, for the caravans that strewed the seeds of dried peaches along the trail from China through Central Asia to Persia where for many generations we supposed the peach was indigenous, must have started people thinking thousands of years ago, it being even then a question of having to eat to live.

It is safe to say that there is no phase of gardening that exercises the cultivator from one generation to another quite as much as that of hardiness. We are living it over again anew in the introductions of Wilson from China, only a tithe of which are available to cultivators as yet.

The most I have seen from investigations of scientists is contained in the statement that "When the temperature goes below certain degrees of cold, the tissues of some plants burst." This is a purely mechanical action and we cannot derive much comfort from it.

We will take the instance of the Douglas fir and *Abies concolor*. They occur both in California and Colorado; seedlings raised from the last named State are hardy, but those from California are tender even in parts of Britain, and yet it is the same tree, seemingly, with some element left out, and that spells hardiness.

It is often the case that we find one specimen taken, and the other left after a severe winter. A year ago some *Diervillas* (Wiegeliæ) were killed to the ground; others were uninjured and flowered finely. All are practically of one common origin from the same set of Chinese species much mixed in gardens. An eminent horticulturist was here last week and when speaking of things that will live here and stand the winter, he asked "Do the *Diervillas* live here?" and it may be taken for granted that where they do not thrive, the list of available shrubs is cut in twain. Sometime since, another wise man from Philadelphia visited here, and he was asked to name off-hand ten shrubs of distinct genera, all to be as good as *Spiraea Van Houttei*, and, if memory serves, the task was not completed—he had no book with him. There was a distinct pause when the fingers on one hand were counted off. W. C. Egan of Highland Park makes the broad statement that we have no broad-leaved evergreens that will thrive here, and he is right, for *Mahonia aquifolia* but ekes out an existence.

Much has been done in the past to render plants hardier by obtaining seeds from the northern limit, planting these and selecting those that survive for propagation. This is of necessity a slow process with trees, for the survivors take a long time to bear seeds in their turn.

Grafting with a view to hardiness often accentuates tenderness unless a hardier stock is available. Jackson Dawson told me years ago that the beautiful flowering crabs should be grafted on the Siberian crab stock. I found they would grow well on the common wild apple seedlings, and in New England had *Malus Arnoldiana* 12 feet in diameter on a wild apple stock. Two years ago we grafted 500 of the choicest obtainable flowering crabs on seedling apple stock, over 20 varieties, and during the winter of 1911-12 the whole of them died from winterkilling at the roots; the tops were alive in the

spring, but the roots dead. It might be added as a postscript that Siberian crab seedlings were not obtainable at the time from any source, and the apple stocks were bought in far Minnesota. We have now 500 Siberian crab seedlings on hand, and hope the end is not yet, but it was necessary to get out, find the place where the parent tree was growing, 1000 miles away, beg the seeds and raise the same.

A few weeks ago, a specimen of what is known there as *Glyptostrobus sinensis pendula*, was seen in a cemetery in Lexington, Kentucky. It is not a *Glyptostrobus* and is not Chinese, but a weeping form of our southern cypress—*Taxodium distichum*, propagated or increased only by grafting, not found in any American lists but is listed in Europe. The type can be seen thriving as far north as Lake Geneva, Wisconsin, but the weeping form, naturally rare, is probably of southern origin, and Lexington may be its northern limit.

The English walnut, so called, was naturalized on Long Island, N. Y., by the late Charles A. Dana. It fruited freely, and I once gathered seeds there while visiting William Falconer. These were raised and planted 200 miles north, but the trees, though covered and protected well the first winters, always killed to the ground.

A method of increasing hardiness is being practiced by many of the Experiment Stations in the Northwest with a view to getting fruit trees to stand the climate there. The hardy Russian apples and other fruit trees are being crossed with our own best kinds, and this must bring good results. It is now proven by a very careful series of experiments made in France, that two really good varieties of apples crossed, produce in every seedling an apple as good as the parents. Previous to this we believed every good apple was an accident, at least as much so as the Baldwin.

It has been demonstrated time and again that one severe winter-killing will make ligneous plants tender for a period afterwards. The cutting down to the ground induces strong soft shoots that are an easy prey the next winter, and another factor is a long drouth during the growing period in summer. In our soil, after a drouth, most trees and shrubs start a secondary period of vigorous growth that goes into the winter poorly ripened and susceptible to injury.

An old "Axiom" is, plant all doubtful subjects in poor soil, and in this there is wisdom in that the growth made is sure to be well matured. A south exposure often brings the same results, especially if the soil is well drained by having a gravel sub-soil. With us there is no choice—nothing but an unmitigated clay without a single redeeming vice—and the problem of extending the planting list is eternal in its importance. A clay soil can be rich in food for certain growths, as witness the wonderful native oaks and other hardwoods here, but when it comes to the decorative part of the gardener, and where 100 car-loads of rhododendrons could be used, except for the iron, lime, magnesia and a few other elements found in the water that leaches out of the soil, it is not at all a question of hardiness, for *Rhododendron* maximum is found far north of here growing in profusion, likewise the trailing *arbutus*, and other ericaceous plants, but with us a huckleberry would not live. This, however, is a part of another story,—The chemistry of soils.

Coelogyne pandurata

Here is an ideal flower for St. Patrick's day. How ridiculous it seems to go to work and color or dye white carnations green for St. Patrick's day! I have on numerous occasions been asked what is the name of these green pinks which people saw in the florist's store prior to and on Patrick's day, but at no other time of the year, and these people were innocent enough to believe the fake to be natural.

Now if florists are anxious to serve the dear people from the Emerald Isle with green flowers on St. Patrick's day, why don't they look around Nature's storehouse first and see what they can find in that line before degrading our honorable profession by putting a faked article on the market. Ever seen *Coelogyne pandurata* in bloom? Why here you have the most lovely shade of green anybody could possibly ask for, and it usually blooms about this time. This is no joke; the only part of the flower that is not green is the pandurate (or fiddle-shaped) lip which has some jet black blotches bordered in part with white. Too bad that that lip isn't harp-shaped instead of fiddle-shaped! How appropriate it would be. Perhaps someone of HORTICULTURE's esteemed readers know of a green flower where the harp is represented in place of the fiddle. This, like all *Coelogyne*s, is of the easiest possible culture; a shady

place in a warm greenhouse or stove will suit it. During the growing season it must have a liberal supply of water, and it must not be kept dry for any length of time, even during its resting periods.

M. J. O'Keefe

Naugatuck Conn.

Ananassa sativa variegata

Ananassa sativa variegata is one of the handsomest variegated plants we have, and I have often wondered that it is not more generally grown by florists. One quite often sees a few sickly, badly colored pandanus plants, but here is a plant that can be relied on to always show its rich variegation. It is very largely neglected by the trade, on account of an erroneous idea that a stock of it is hard to obtain. We have fruited a plant in a seven-inch pot, and after cutting the fruit have procured twelve young plants from the old stem below the fruit in less than a year, each cutting forming a nice plant in a five-inch pot before the year was up. Judging from the prices asked for *Ananassa variegata* in the catalogues, for five-inch pots, I don't see why there shouldn't be a dollar in it. One thing also in its favor is that it makes an excellent house plant, lasting for a long time if not overwatered. As stated above young plants are raised from the stem of a plant that has fruited, and there is not much difficulty in fruiting them, in a temperature from 60 to 70 by night, with a rise of 10 or 15 degrees during the day.

The young shoots start from the base of the leaf very soon after the fruit has ripened, and may be removed when large enough to be potted singly in a 2¼-inch pot, the compost being a sandy peat with some fine charcoal

added. Place the small plants in a bottom heat of not less than 70 degrees, in which they will root in from three to four weeks. They may be moved along into larger pots as they require it. We find the best potting material is a rough fibrous peat, with enough sand and charcoal to make it have a gritty feel. At all times place the plants as near the glass as possible and maintain a night temperature of not less than 60 degrees. This treatment will bring out that rich golden tinge to the variegation which is the delight of the cultivator. Like all pineapples this plant is very sensitive to overwatering and may be allowed to become much drier than the majority of plants before watering. When the plants have attained the desired size, the night temperature may be lowered to around 55 degrees, with air freely admitted during the day. This hardens them nicely for house decoration or shipping to customers. We have seen these plants affected by red spider, mealy bug and scale. The former may be kept in check by the syringe, the bug and scale by Hydrocyanic gas.

An editor
honored

We extend congratulations to Mr. Walter H. Page and to his firm, Doubleday, Page & Co., on his appointment as ambassador to Great Britain. HORTICULTURE hopes and believes that he will be as eminently successful in the field of diplomacy as he has been in journalistic work.

Awaiting the
verdict

This issue of HORTICULTURE reaches the majority of its readers just as the finishing touches are being given to the exhibits at the big International Flower Show. Enough is already known concerning the extent and character of the displays in both the competitive and trade sections to assure the success of the undertaking in all respects excepting only that of public support. However strong our faith may be yet this must remain a tantalizing uncertainty until the receipts of the first day or two, at least, have been counted up. The indifference of the public of the metropolis towards flower shows in the past naturally serves as a curb to over-confidence now and perhaps it is better that it is so. We hope the expectations of the most sanguine will be far exceeded for there has been a vast amount of hard and unselfish work done and the outcome will have a far-reaching influence on similar enterprises in the future and on the growth of horticulture generally.

A wise
philanthropy

We offer felicitation to the people of Cleveland, Ohio, on the good fortune which has come to them in the promise of a horticultural edifice which will be an ornament to their city and a powerful stimulant to the more general appreciation and use of plants and flowers by the people. We understand that the building is to be erected in Wade Park and will be paid for by a number of the wealthy men of the city who conceived the idea and will see that it is fully carried out. Of the many ways in which men of means can make provision for the enjoyment and intellectual uplift of their fellow citizens none can be more directly effectual than this most commendable project or more free from the possibility of misuse. There is reason to hope that we shall soon see Boston also equipped with a winter garden that will do justice to the refined taste of her people and amply supplement the wholesome influence of her splendid system of public parks.

A mild winter

The season has now advanced sufficiently to warrant an expression of opinion as to the effect of the winter on various shrubs and other garden occupants that sometimes get badly scathed in certain exposures. We in New England have been favored with a winter of unusual mildness but that fact does not invariably suffice to ensure the broad-leaved evergreens, some of the more susceptible conifers, etc., against injury, for there are many factors besides Arctic temperatures to be reckoned with. But this time they certainly do show up well which is all the more welcome because of the im-

OUTDOOR VEGETABLES AND FRUIT

CONDUCTED BY

Edwin Jenkins

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Jenkins. Such communications should invariably be addressed to the office of HORTICULTURE.

Some General Thoughts

There are two ways of treating the vegetable and fruit garden. First the method which is so dear to the hearts of most of us; because it is associated with our early training. This method is generally to treat a piece of land varying in size to suit the requirements of the establishment by laying it out in rectangular plots and dividing it by walks or roads, edged with a strip of turf or a low growing hedge. Next to the walks are flower borders and then behind the flower border a row of fruit trees, such as apples, pears, plums or cherries. Enclosed by the fruit trees is the place where the vegetables are grown. This ensemble makes a very pleasing and satisfactory arrangement especially if the whole is enclosed by a neat evergreen hedge about five to six feet high. But it means a great deal of labor to keep it as it should be kept and further it means staying there with your vegetables and flowers year after year. This I consider the great drawback of the nicely planned and laid-out vegetable garden.

The other method is what might be called the field treatment or truck gardeners' style, and this system has much to commend it. From half an acre to five acres of a field where the soil and aspect are suitable may be selected and the vegetables planted in long straight rows; this will facilitate either horse or manual cultivation and will generally mean that the gardener can grow larger quantities of each kind which will enable him to make a better selection of those samples most suitable for table use. It means that in the autumn or winter he can get in with the plow or with the wagon of manure. If after a few years of cultivation of this spot there are any good reasons for changing, the land will be in ideal condition for any farm crops and very little trouble or expense is involved in the change. Under this system one man will produce more good vegetables than two or three would in the more formally laid out vegetable garden.

Working Land in Wet Weather

We are all so anxious to get the seeds sown and the garden planted in spring that we have no patience to wait for the soil to dry up and providing it is not actually pouring rain we are very apt to get to work on the land.

pairment of vitality which this class of plants has had to suffer during several years immediately preceding. Unless some very unlikely check should ensue, these things can now start off under most favorable auspices, well prepared to make a growth and establish a sturdiness and restored vigor which will stand them in good stead when Old Boreas again resumes business at the old stand. The situation should be particularly fortunate

By so doing great harm is done as any soil, excepting the very sandy, that is tramped while wet sustains an injury from which it takes a long time to recover. It is impossible to tell in words just the exact state of dryness that a given soil must reach before it can be worked without injury, but a little thought and care on the part of the grower will soon enable him to recognize the right condition and it will suffice here to utter the warning.

Some Good Resolutions

The new year is not the only time at which good resolutions are in order. They are desirable any day in the year and just now is a good time for the vegetable gardener to make a few. Resolve not to tramp the soil when too wet if it is possible to avoid it. Resolve to fight the potato bug, the currant worm, the caterpillars generally and all the other insect pests, "from the drop of the hat," giving them no quarter. Resolve to watch all your crops carefully for variations; if you see a pea in a row which flowers and matures its pod a few days earlier than its fellows mark it and save seed from it; you may find that you have a valuable sport. The same will apply to size, quality, or freedom from disease or any other favorable variation. We gardeners are a great deal more keen in watching for a variation or sport amongst the carnations, roses or chrysanthemums than amongst the vegetables or small fruits and still 'tis thus that our early and late kinds have originated. Cross-fertilization and careful selection are the means of producing all the varied improvements in every crop, and the gardener is very favorably placed to watch for and select improved kinds. Resolve to familiarize yourself with the time that it takes each crop to mature on an average (always making allowance for local influences of soil, climate, etc.) so that successions may be kept up. The following list may help.

String beans, about 50 to 60 days from seed; Lima beans, 70 to 75; beets, 55 to 65; cabbage (early), 100 to 110; cabbage (late), 145 to 155; corn, 70 to 80; egg plant, 145 to 160; lettuce, 60 to 70; onion, 135 to 145; pepper, 140 to 150; radish, 30 to 40; tomatoes, 140 to 150.

for the quantities of young new material collected by Wilson in the mountain regions of China which is now in the various seedling stages and is certainly entitled to a fair start in life, for it is destined to play a very prominent part in garden planting and garden aspect in the near future and all doubt as to hardiness is often dispelled when a plant has had a chance to become well established.

INTERNATIONAL FLOWER SHOW.

Grand Central Palace,

New York, April 5-12.

PROGRAM OF PROCEEDINGS.

Saturday, April 5th.

6 P. M. Show Opens. General Exhibition and Flowering Plant Day.
7.30 P. M. Opening Exercises. Address of Welcome. Response.
9 P. M. Lecture by R. F. Felton of London, "the King's Florist." "English Floral Art." With practical illustrations.
11 P. M. Show Closes.

Sunday, April 6th.

10 A. M. Show Opens. General Exhibition and Orchid Day.
4 P. M. Lecture by R. F. Felton, London; "The Arrangement of Flowers and Color Schemes." Practically illustrated.
9 P. M. Lecture by E. H. Wilson of the Arnold Arboretum, Boston: "China and Chinese Plants." With stereopticon views.
11 P. M. Show Closes.

Monday, April 7th.

10 A. M. Show Opens. Rose Day.
10.30 A. M. Meeting of the Society of American Florists & Ornamental Horticulturists.
4 P. M. Lecture by R. F. Felton, London: "English Floral Art." With practical illustrations.
9 P. M. Lecture by J. Horace McFarland, Harrisburg, Pa.: "The Arnold Arboretum." Illustrated with stereopticon views.
11 P. M. Show Closes.

Tuesday, April 8th.

10 A. M. Show Opens. Carnation Day.
10.30 A. M. Meeting of the American Rose Society.
4 P. M. Lecture and Meeting American Rose Society.
9 P. M. Lecture by J. K. M. L. Farquhar, Boston, Mass.: "Japan and Japanese Flora." Illustrated with stereopticon views.
11 P. M. Show Closes.

Wednesday, April 9th.

10 A. M. Show Opens. Gladiolus Day.
10.30 A. M. Meeting American Carnation Society.
4 P. M. Lecture by F. C. W. Brown, Buffalo, N. Y.: "American Floral Art." Illustrated with stereopticon views.
9 P. M. Lecture by R. F. Felton, London. "How They Arrange Flowers in England." Illustrated with stereopticon views.
11 P. M. Show Closes.
Thursday, April 10th.
10 A. M. Show Opens. Sweet Pea Day.
10. A. M. Meeting Florists' Telegraph Delivery Association.

11 A. M. Meeting Society of American Florists & Ornamental Horticulturists.

3 P. M. Lecture by R. F. Felton, London: "Floral Art in England." Illustrated with practical demonstrations.

4 P. M. Lecture by Arthur Herrington, Madison, N. J.: "Whys and Wherefore of Tree Planting." Illustrated with stereopticon views.

9 P. M. Lecture by Otto Thilow, Philadelphia, Pa.: "Rocky Mountain Flora." Illustrated with stereopticon views.

11 P. M. Show Closes.

Friday, April 11th.

10 A. M. Show Opens. Floral Art Day.

10.30 A. M. Meeting American Sweet Pea Society.

4 P. M. Lecture by Geo. V. Nash, Bronx Botanical Gardens, N. Y. C.: "Water Gardens." Illustrated with stereopticon views.

9 P. M. Lecture by Arthur Cowee, Berlin, N. Y.: "The Gladiolus." Illustrated with stereopticon views.

11 P. M. Show closes.

Saturday, April 12th.

10 A. M. Show Opens. General Exhibition.

10.30 A. M. Meeting of the Gladiolus Society.

3 P. M. Lecture by R. F. Felton, London: "English Floral Art." Illustrated with practical demonstrations.

4 P. M. Lecture by L. W. C. Tut-hill, New York City: "Frames and Greenhouses for the Amateur." Illustrated with stereopticon views.

9 P. M. Lecture by Leonard Barron, Editor The Garden Magazine: "Glimpses of Famous American Gardens." Illustrated with stereopticon views.

11 P. M. Show Closes.

A meeting of the National Gardeners' Association will be held on Monday afternoon, April 9th, at 2 o'clock, in the lecture hall of the Grand Central Palace. R. F. Felton of London, England, will address the members at 3 o'clock on the practical usages of flowers.

Bowling Tournament.

On Wednesday the National Gardeners' and Florists' Bowling Tournament will be held under the auspices of the National Gardeners' Association, in which the members of the Society of American Florists are invited to participate, at Thums' Bowling Alleys, Broadway and 31st street, beginning at 9 o'clock in the morning and lasting throughout the day. Many valuable prizes have already been contributed.

The sweepstake prize to be competed for by the three members of the N. A. G. making the highest scores, and the three members of the S. A. F. making the highest scores, is a piece of silver of the value of \$50, donated by President Waite of the National Association.

The Schedule of Prizes.

The prize schedule includes nearly 600 distinct classes. These comprise medals, certificates and cash premiums offered by the exhibition management and by numerous societies and clubs, as well as cups and cash prizes contributed by firms and individuals, commercial and private, all aggregating a value exceeding any prize list ever scheduled in America.

The final schedule published several weeks ago, together with a supplementary list recently issued, cover all these prizes in detail, giving also full tables of rules and regulations, etc., and copies of these lists will be available to all who may apply for same at the manager's desk. We give as follows only a condensed grouping of the classes under their respective sections and divisions and in this form they may serve as a handy reference for those who wish to promptly locate any particular group.

Section A: Flowering Plants.

Classes 1 to 67 inclusive.—Acacias, Amaryllises, Anthuriums, Azaleas, Begonias, Bougainvilleas, Calceolarias, Camellias, Chorizemas, Clerodendrons, Chrysanthemums, Cinerarias, Cyclamen, Epiphyllum, Ericas, Forced Shrubs, Gardenias, Genistas, Geraniums, Bedding Plants, Heliotropes, Hydrangeas, Imantophyllum, Lilacs, Marguerites, Pansies, Phyllocactus, Primulas, Rhododendrons, Rhynchospermum, Spiraeas, Wistarias.

Section B: Bulbous Classes.

Classes 68 to 82 inclusive.—Callas, Lilies, Narcissi, Tulips, Miscellaneous Bulbs.

Section C: Ferns and Selaginellas.

Classes 83 to 98.—Adiantums, Cibotiums, Davallias, Gleichenas, Nephrolepis, Stags Horn Ferns, Lycopodiums, Tree Ferns, Miscellaneous Groups and Collections.

Section D: Orchids.

Classes 99 to 126.—Orchid Groups, Brasso-Cattleyas, Cattleyas, Cypripediums, Coelogynes, Dendrobiums, Hybrid Orchids, Lælio-Cattleyas, Miltonias, Lælias, Odontoglossums, Oncidium, Phalaenopses, Vandas.

Section E: Palms and Foliage Plants.

Classes 127 to 165.—Arecas, Bays, Buxus, Cacti, Cocos, Crotons, Cycads,

**Dracænas, Alocasias and Ar-
oids, Botanic, Economic and
Medicinal Plants, Ficuses,
Kentias, Marantas, Nepen-
thes, Phoenix, Groups of
Stove and Greenhouse Plants,
Yew Trees.**

Section F: Miscellaneous.

Classes 166 to 176A.—As-
paragus, Bamboos, Conifers,
Dieffenbachias, Hollies, Japan
Maples, Miniature Landscape
Gardens.

**Section G: New Plants Not
in Commerce.**

Classes 177 to 194B.—Medal
of Massachusetts Horticul-
tural Society, Horticultural
Society of Chicago and Mis-
souri Botanical Gardens for
Anthuriums, Conifers, Climb-
ing Greenhouse Plants, Cycad
Species, Cyrtipediums, Dra-
cænas, Hardy Evergreens,
Foliage Plants, Flowering
Plants, Ferns, Herbaceous
Plants, Nephrolepis, Orchids,
Palms, Hardy Shrubs.

**Section H: Miscellaneous; for
Private Growers Only.**

Classes 195 to 264.—Aca-
cias, Allamandas, Amaryllis,
Annuals in Flower, Antirrhin-
ums, Azaleas, Begonias, Bo-
ronias, Calceolarias, Cam-
panulas, Cinerarias, Cyclam-
en, Chorizema, Crotons,
Dracænas, Dwarf Evergreens,
Ericas, Gardenias, Genistas,
Gloxinias, Hydrangeas, Lilacs,
Nepenthes, Hardy Perennials in
Flower, Primulas, Bulbs, Palms, Rho-
dodendrons, Roses, Schizanthus, San-
severias, Spiræas, Foliage Plants,
Flowering Plants, Stove Plants, Wis-
tarias, Sweet Corn Grown Under
Glass.

**Section I: Ferns, Private Gardeners
Only.**

Classes 265 to 273.—Ferns, Collec-
tions and Specimens.

J. K. M. L. FARQUHAR,

President Society of American Florists and Ornamental
Horticulturists

**Section J: Bulbs in Flower. Private
Gardeners Only.**

Classes 274 to 292.—Bulbs in Pots
and Pans. Collections, etc.

**Section K: Orchids, Private Garden-
ers Only.**

Classes 293 to 300.—Groups and
Specimens.

AMERICAN ROSE SOCIETY.

Section L.

Div. A. Roses in Pots or Tubs.

Classes 301 to 318.—Climbing, H. P.,

H. T. and Polyantha, Collec-
tions and Specimens. 319-
320-321 Medals and Certifi-
cates for Novelties. 322-323
Specials.

Div. B: Cut Blooms.

Classes 324 to 327.—50s to
be staged April 7.

Div. C: Cut Blooms.

Classes 328 to 343.—100
American Beauty and 50s in
other disseminated varieties,
to be staged April 7.

Div. D: Cut Blooms.

Classes 344 to 368.—25s to
be staged April 7.

Div. E: Cut Blooms.

Classes 369 to 373.—50s and
25s, New Roses Not Dissemi-
nated.

Div. F: Cut Blooms.

Classes 374 to 378.—Deco-
rative Work, by Retailers
Only. To be staged April 5.

Div. G: Cut Blooms.

Classes 379 to 397.—12s, to
be staged April 5.

Div. H: Cut Blooms.

Class 398.—Display. 398A
and 398B.—Display to be
staged April 10. 398C.—Dis-
play of Hardy Outdoor Roses.
398D.—Cup for 6 Roses.
398E, F and G.—Vases of 25.
398H.—Pink Novelty Rose, 25
Blooms. All to be staged
April 9.

AMERICAN CARNATION SOCIETY.

Section M.

Div. A: Cut Blooms.

Classes 399 to 408.—Vases of 100, to
be staged April 8.

Div. B: Cut Blooms.

Classes 409 to 429.—Vases of 50, to
be staged April 8.

Div. C: Cut Blooms.

Classes 430 to 434.—Vases of 50,
varieties disseminated 1911-1912.

THEODORE WIRTH,

Vice-President Society of American Florists

JOHN YOUNG,

Secretary Society of American Florists and
International Flower Show Committee.

W. F. KASTING,

Treasurer Society of American Florists.

Div. D: Medal Classes.

Class 435.—Vases of 100 blooms. Class 436.—Perpetual Flowering Carnation Society of England Medals for Vases of 100 blooms. Class 437-438.—Preliminary Competition for Fred Dörner Memorial Medals. To be staged April 8.

Div. E: Certificates.

Class 438.—Certificates of Merit. Class 439.—Preliminary Certificates.

Div. F: For Artistic Arrangement.

Classes 440 to 446 for Decorative Work, to be staged on April 10, excepting Classes 441 and 443 for Table Decorations and Hampers which are to be staged April 8.

Div. G: Special Premiums.

Classes 447 to 451, to be staged April 8.

AMERICAN SWEET PEA SOCIETY.**Section N.**

Classes 452 to 462.—Varieties introduced prior to 1912, Vases of 50, to be staged April 10. Classes 463 to 483.—Standard Varieties, Vases of 25. Classes 484 to 490.—Novelties of 1912, Vases of 25. Classes 491 to 493.—Medals and Special Prizes. Classes 494 to 497.—Retailers' Decorative Exhibits. All Sweet Pea exhibits to be staged April 10.

AMERICAN GLADIOLUS SOCIETY.**Section O.**

Classes 498 to 506.—Forced blooms; open to all. Classes 507 to 514.—Forced blooms; amateurs only. Classes 515 to 523A.—Special prizes.

Sec. P: International Flower Show Prizes.

Classes 524 to 531.—Special prizes for Decorative Work.

WILLIAM H. SIEBRECHT
President New York Florists' Club

Sec. Q: Cut Flowers.

Classes 532 to 542.—Collections and Single Sprays of Orchids. Classes 543 to 551.—Miscellaneous Cut Flowers.

A WORD ABOUT NEW YORK.

The horticultural gaze of the continent is focussed on New York this week. As we write, lively times are in order in many a big greenhouse. The pet plants and flowers being finished and groomed for their journey to the Grand Central Palace where, in the mind of each fond owner, each

and every exhibit is destined to win honor and renown. Many visitors are speeding on their way to attend this long-talked-of event and some of the advance guard are already on the spot. Probably many who had looked forward with pleasure to this visit to the Metropolis will now be among the missing, their hopes rudely dashed to the ground in the wild orgie of flood, fire and tornado which has within the past few days swept over so large a section of the country. To all such, in their misfortune we extend sympathy, and in our succeeding issues shall endeavor to tell them something of what happened at the great exhibition.

Our front cover picture shows the new Grand Central Palace which will be the great centre of activity all through the coming week. We might fill many pages of this paper with views of New York City, its magnificent business blocks, public edifices and private mansions, its wonderful harbor, its historic spots, its parks and boulevards, its munificent citizens, but in these days of innumerable

post cards and other illustrated mediums delineating every spot of interest in and around the city, perhaps our readers will be just as well pleased that we have not attempted it.

New York's horticultural eminence is well known to all who read these lines. Vast ranges of greenhouses stretching out over Jersey, Long Island and "up-the-state" pour their product daily into the capacious wholesale markets of 26th and 28th street and countless flower stores, palatial in equipment, cater to the demands of

W. C. RICKARDS
Treasurer New York Florists' Club.

L. MERTON GAGE
Corresponding Secretary American Gladiolus Society.

ISAAC S. HENDRICKSON
President American Gladiolus Society.

ARTHUR T. BODDINGTON
Treasurer American Sweet Pea Society.

HARRY A. BUNYARD
Secretary American Sweet Pea Society

WILLIAM SIM
President American Sweet Pea Society.

a society clientage unequalled anywhere on the American continent if in the world.

Here are centered seed stores, horticultural manufacturers and dealers known in every corner of the land and each year sees their number multiply and their business expand. New York, as a center of population and business, is growing with inconceivable rapidity, but the horticultural industries of New York are keeping pace with her other activities and fill no small part in the sum total of her progress.

New York has entertained two conventions of the S. A. F. and frequent gatherings of other influential horticultural organizations. Hospitality is lavishly bestowed on such occasions and the event now about to mature will be no exception. In the front rank always, in the preparatory work and its carrying out for the comfort

and enjoyment of the visitor, will always be found the New York Florists' Club, without whose zealous efficiency such a gigantic affair as is to blossom forth on April 5, 1913, would be hardly possible. We present in the accompanying pages the portraits of a few of the public-spirited men who are officially at the helm, but there are others, too, who are doing unselfish work for the common cause and whose only reward is the consciousness of self-imposed duty well done and delight of having done their best to help along the common cause.

NATIONAL BOWLING TOURNAMENT.

Entries to the bowling tournament of the National Association of Gardeners, which will be held on Thum's alleys, Broadway and 31st street, New York, on Wednesday, April 9th, must

be filed with the secretary of the association not later than nine o'clock on the morning of the tournament. To facilitate completing arrangements, those intending to participate are earnestly requested to file their entries at once, sending them to M. C. Ebel, secretary, care Murray Hill Hotel, Park avenue and 40th street, New York, which will be the headquarters of the association during the show week. The secretary will be found at the hotel daily from 8 o'clock to 10 o'clock in the forenoon, during the show week, excepting Wednesday, on which day he will be at Thum's alleys. No entries will be accepted after the tournament opens, nine o'clock in the forenoon of April 9th.

Teams of three men, members of a local gardeners' or florists' club, and members in good standing either of the N. A. G. or S. A. F. will be eligible in the team tournament. One team only

M. C. EBEL
Secretary National Association of Gardeners.

JAMES STUART
Treasurer National Association of Gardeners.

W. H. WAITE
President National Association of Gardeners.

BENJAMIN HAMMOND
Secretary, American Rose Society.

ADOLPH FARENWALD
President, American Rose Society.

HARRY O. MAY
Treasurer, American Rose Society.

can be entered from any local club or society.

All members in good standing of the N. A. G. or S. A. F. are eligible in the individual bowling tournament. Team bowlers can enter by waiving their team scores from counting in the individual tournament.

Rules governing the tournament will be posted at the N. A. G. and S. A. F. headquarters in New York City on the 7th and 8th of April, and on Thum's alleys during the bowling.

A long list of prizes has been secured in which are included many valuable trophies.

CARNATIONISTS PLEASE NOTE.

On account of the flooded condition of a large territory around Indianapolis, which is making mail deliveries very uncertain and in some directions impossible, it would be well for all those who are entering the competition in the carnation classes at New York,

to bring a list of their entries along to the show with them.

Your entries may reach me here, and if they do I will have your entry cards made out, but should they not reach me, it would be a great help if you have a list with you.

Please also note that Sections A, B, C, D, G, and classes 43 and 45 will stage on April 8th. Classes 42, 44, 46, 47 and 48 will stage on April 10th. Through an error in printing the schedule for the entire show, classes 43 and 45 were included with the April 10th staging. Our classes 43 and 45 appear as classes 441 and 443 in the National Flower Show schedule. Entries in Section E may stage at any time during the carnation show.

We are planning to leave Indianapolis on Saturday evening, April 5th and expect to arrive in New York, Sunday evening at 5 P. M. Any mail which is not certain to reach here by Saturday morning should be addressed in care of Hotel Manhattan, New York.

In the Dorner Memorial Medal class, no medal will be awarded this year. Only a preliminary competition will be conducted this year, for which 50 blooms are required.

Bring with you the pink slip, which was sent you along with the receipt for your dues. Without it you will be unable to get your season ticket to the show.

A. F. J. BAUR, Secy.

WHAT THE SHOW MEANS.

There is at once a happy and a useful thought behind the international flower show to be held in the Grand Central Palace, New York City, under the auspices of the Society of American Florists and Ornamental Horticulturists. The show will bring together not only the floral exhibits, but the florists of many countries, and the result should be an interchange of views and experiences in floriculture that must be incalculable value to the whole industry. Few people have

PHILIP BREITMEYER
President, American Carnation Society.

A. F. J. BAUR
Secretary, American Carnation Society.

F. E. DORNER
Treasurer, American Carnation Society.

given thought enough to the subject to be able to appreciate the tremendous strides that have been made in floriculture during recent years. Gardening in its highest expression, it is true, has been thoroughly commercialized in these recent years, but, when judged by its results, this can hardly be regretted. Flowers that were once the peculiar and exclusive possession of people of means have been made of late years accessible to all, and this may be said notwithstanding that retail prices are sometimes far in excess of what the plain people can afford to pay.

But the plain people are not compelled to buy flowers in the highest market. As a rule, they have found means whereby they may purchase the blooms and plants at first hand. The street stands of the larger cities, too, cater to the wants and tastes of the populace in this particular, and it is a wholesome sign of the times that

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

The adjourned meeting of the Society will be held in the Lecture Room in the New Grand Central Palace at the time of the International Flower Show, as follows:—

Monday, April 7th, at 10.30 A. M.

Thursday, April 10th, at 10.30 A. M.

JOHN YOUNG, Sec'y.

There will be a meeting on Monday afternoon, April 7th, at the Grand Central Palace in New York, of the National Publicity Committee provided for at the last convention of the S. A. F. in Chicago, to consider the proposition of providing for a permanent secretary of the National Committee to aid in advancing the publicity move-

stated this would be the best of its kind ever held in this country. He suggested that the Washingtonians join those going from Baltimore on the train leaving this city at 7 o'clock, Monday morning. A special car is to be provided and an entertaining trip is to be expected. Fred H. Kramer promised to look after the transportation facilities and notices will be sent to all members advising them of this action.

For the banquet committee, W. F. Gude reported that this event would be given the latter part of this month at one of the down-town hotels.

Following the adjournment of the business meeting the members partook of a buffet luncheon, after which they discussed matters of interest. The members of the bowling team got together on certain plans concerning the Minneapolis trip while the others talked mostly shop.

W. H. DUCKHAM

Superintendent Competitive Exhibition

these stands are increasing in number and likely soon to contribute to the formation of flower marts on the European plan.

The New York show will afford visitors an opportunity of judging between the skill of the practical florists of some of the foremost nations of the world, and this of itself will be a feature of the exhibition that will be certain to attract great attention. The United States, compared with France, Germany and Holland, is rather young in the art of flower development, but it has probably made more rapid strides than any other nation in this respect during the last twenty-five years. For this it is indebted largely to the splendid work of the horticultural societies, to the skill displayed in public gardens and parks, and to the modest yet effective achievements of the greenhouse men, who are themselves representative of all the nations. The international exhibition should have the good effect of giving floriculture in the United States a new impetus. Doubtless this country has much to learn in return for all it may be able to teach the participants of sister nations in the Grand Central Palace show.

--Boston Christian Science Monitor.

CHARLES H. TOTTY

Chairman Local Governing Board and International Flower Show Committee.

ment. All florists' clubs in the country having a Publicity Committee and having appointed a representative to membership in this National Committee should see that a representative is in attendance.

W. R. PIERSON.

Representative of the Publicity Committee of the New York Florists' Club.

FLORISTS' CLUB OF WASHINGTON.

Richard Vincent, Jr., was a guest of the Florists' Club at the regular monthly meeting. Mr. Vincent was well received and was called upon for a few remarks regarding the Minneapolis Convention. He gave a very interesting account of what is to be expected and suggested a trip by water from this city to Boston and thence via the Great Lakes with the Boston aggregation. The expense incident to the trip according to Mr. Vincent would not exceed that of the through rail trip. He expressed a desire to see all present at Minneapolis at the proper time.

Regarding the New York Show he

THOMAS ROLAND

International Flower Show Committee.

FLORISTS' CLUB OF PHILADELPHIA.

A feature of the monthly meeting held on the 1st inst. was a splendid vase of the grand white carnation, Matchless, exhibited by the Pennock-Meehan Co. In form this is a rather loose flower like Prosperity, but charming in outline, and a flower to send the artistic soul into raptures. It is claimed that it will produce 20 per cent. more per square foot than any other variety at present grown. Mr. Teylinjen gave a talk on Darwin tulips. Charles E. Meehan gave an interesting account of his trip to the West Indies and Panama. The transportation committee to arrange for the convention trip next August was announced by President Thilow: John Westcott, George Watson, Edward Reid, Dennis T. Connor, and Charles E. Meehan.

The new retailers' club applied for accommodations. Mr. Rust told them that the regular charge for a meeting was \$15. Robert Craig moved that they be allowed to meet for nothing—at the convenience of the house committee.

CLUBS AND SOCIETIES

HORTICULTURAL SOCIETY OF CHICAGO.

The spring exhibition of the Horticultural Society of Chicago opened very auspiciously, Tuesday, April 1st. The number and quality of the exhibits were considered satisfactory to the officers and executive committee and at this writing the first day of the five closes with every prospect of a successful, if not the most successful, spring flower show yet given. There were some disappointments. The space in the Art Institute is always limited to do full justice to the exhibitions, and this year two rooms usually used are not available, being occupied by the International exhibit by Cubist and Futurist artists. This exhibit, by the way, seemed to offer a rival attraction and a more hilarious audience was always found there. The parks did not respond so generously as heretofore, Lincoln Park alone sending a group of plants. The fact that the opening day was election day and therefore a holiday caused the Art Institute to be open to the public. Wednesday and Saturdays are always free days, so out of the five days but two brought admission fees. Evenings will help out in this, however. A flower booth in charge of Miss L. A. Tonner was well patronized.

The grand marble stairway was decorated just enough with palms and half way up was a large group of lilies. At the head of the stairs the orchestra was stationed and in the rooms beyond the retailers gave full evidence of artistic ideas of decorating. A noticeable one in this group was that done by the E. Wienhoeber Co. showing a wedding decoration. Still further to the south were the groups of bulbous plants and these exhibits would be hard to excel. Frank Oechslein had sixteen entries, fifteen of them consisting of ten-inch pans and one large bed of single plants of 100 or more. The finest bulbs in Holland were sent to Mr. Oechslein for forcing for this show. August Jurgens and Vaughan's Seed Store also had fine displays in bulbous plants. A large group of flowering shrubs containing lilacs, weigelia, virburnum, spiraeas, prunus, etc., showed up well on the main floor. A very conspicuous group of 200 rambler rose plants, most of them tall and well trained, occupied one of the main rooms. These were exhibited by the Mount Greenwood Cemetery Association. This firm showed a novelty in the form of a group of potted sweet peas trained about wire netting six feet tall, and some fine specimen plants of S. A. Nutt geranium, four feet in diameter and well in bloom.

The new varieties of hydrangeas added much in the way of color, their beautiful shades of pink and the deep blues of the French varieties being very striking and attractive. There were some unusually good specimens of rhododendrons, azaleas, lilac and Japanese maple.

The judges were Emil Buettner, Park Ridge, Ill.; August Koch, Chicago; E. O. Orpet, Lake Forest, Ill.

Tuesday was Rose Day and entries were made by Geo. Wittbold Co., Poehlmann Bros. Co., Wietor Bros. and Wendland & Keimel, but at this writing the awards were not complete. A vase of Milady rose sent by A. N. Pierson of Cromwell, Conn., arrived in

April 10 at the Union Restaurant, West Randolph street.

Henry Wild of Greenwich, Conn., lectured before the Mass. Horticultural Society, March 29th, on "The Making of a Country Estate." This was the closing lecture of the series of 1912-13 and was one of the most practical and interesting in the whole list.

ADVERTISING TALKS

BY
Ralph M. Ward

No. 4

A little newspaper advertising is a mighty good thing. More of it is much better. The daily newspaper goes into thousands of homes and has a tremendous pulling power.

In the retail business the newspaper is the advance agent that goes ahead and creates the desire. Everyone knows newspaper advertising is one of the greatest forces in the business world today. Such advertising is cumulative and builds for the future, as well as produces results for the present. No man can do a large retail business without it. The great trouble with some men is that they think newspaper advertising is good for the other fellow, but would not do in their particular case. Many advertisers have lost out because they got cold feet and quit before the results could reach them. A little persistency would have won out.

Women are especially great readers of newspaper ads. Most women would rather read news of some good rousing sale, than anything else in the paper.

The business man who omits his advertising from the paper for a week or so because he thinks by so doing he is saving, is as unwise as the merchant who would close his store on certain days because business was dull.

The man who takes it for granted that everyone knows him because he has been established so many years, and occasionally does a little advertising, is simply fooling himself and giving his competitors the chance they want. Take nothing for granted but keep pegging away, advertising every day in the year. Persistent advertising is like a clock—keeps ticking all the time. Of course, you are not constantly looking at the clock, but when you want to know the time, you would not think of looking anywhere else. Same with persistent floral advertisements—when you want to buy flowers you look at the ad.—and if you can't find it, it's just like missing the clock.

splendid condition and were much admired.

CLUB AND SOCIETY NOTES.

The next regular meeting of the Chicago Florists' Club will be held on

The St. Louis Florist Club meets Thursday afternoon April 10 in Odd Fellows' Building. The trustees will see to it that all those who attend will be well repaid. Secretary Beneke says he has arranged with F. K. Gorley to read a paper on his experience with telegraph delivery orders, which should be interesting.

The Engelman Botanical Club meets next week Saturday at 3 P. M. at Shaw's Garden. This meeting will be known as the meeting of the Cycads. Dr. G. R. Hill will lecture on Fossil Cycads; J. R. Schranz on Relation of Cycads to other plants and G. H. Pring on Geographical Distribution, Growing and Garden Collections of Cycads.

The Retail Florists' Association of St. Louis held its meeting last week Wednesday at the Washington Hotel with a general talk on Easter business. After the business session the members sat down to a fine spread. While the inner-man was being refreshed a collection was taken up for the flood sufferers and a good sum was realized.

Breck's Club of Salesmen, connected with Joseph Breck & Sons, Corporation, held their regular bi-monthly meeting and dinner at the Quincy House, Boston, on the evening of March 29. A. E. Robinson, manager of the Breck-Robinson nurseries of Lexington, gave an interesting lecture on nursery work, illustrated by many fine views. William Downs, superintendent of the E. S. Webster estate, Chestnut Hill, gave a talk on "Care of Greenhouses." Thos. J. Grey gave some pleasant reminiscences. Breck's orchestra of six pieces, John Russell, leader, furnished music. Thirty-five members were present. James T. Carroll presided.

The regular monthly meeting of the Cook County Florists' Association was held at The Tavern, Chicago, on Thursday, March 27. After routine business and installation of officers A. C. Zvolanek gave a very interesting talk on "Sweet Peas." Many beautiful specimens were on exhibition, grown by Herman Wehrman of Maywood. As a general subscription, this Association turned over to the relief fund for flood sufferers in Ohio and Indiana \$101.60. President A. C. Kohlbrand appointed a number of committees, the chairman of each respectively being as follows: Publicity, Peter Pearson; Good of the Club, Walter Scott; Membership, Geo. Wienhoeber; Transportation, A. Miller; Sports and Pastimes, A. J. Zech.

OUTDOOR ROSES

A PAPER READ BEFORE THE NEW YORK HORTICULTURAL SOCIETY ON MARCH 15 BY EDWIN JENKINS.

(Continued from page 125)

Planting.

I shall assume that you make your own choice of varieties, consulting some good nurseryman's catalogue or some of the later standard works upon roses, getting the number of plants to suit your garden and the colors to suit your taste. But I should like to make an appeal on behalf of a few of the old-time favorites such as the beautiful moss rose, the cabbage or Provence rose, the Damask rose, and the old Persian Yellow, the yellowest of yellow roses. These are but a few of the roses of another day which are well worthy of a place in every rose garden both for the fond remembrances they bring back to most of us and for their intrinsic beauty. Nor would the garden be complete without some of the fine Rugosa hybrids of which Conrad Ferdinand Meyer is the prince, and then there is the newer Irish single roses of Dickson's of which Irish Elegance is perhaps the best, but I promised to leave the selection of varieties to the grower and will do so. When stock is procurable in autumn, roses planted at that time will thrive better the following summer than spring-planted stock will, so if possible plant in the autumn. But whether planting in spring or autumn the ground should be moderately dry and the day to be ideal should be cool, cloudy and still. If the plants are on their own roots there will be no trouble from suckers and shallow planting will be all right, but it is advisable to plant budded or grafted stock so that the union is two to three inches below ground for by so doing we lessen the trouble from suckers and keep the graft in better condition. The distance apart to plant will depend upon the variety, whether it is a strong or a weak grower, and upon this the planter should inform himself before planting. About three feet would be the extreme distance for the strongest growers and eighteen inches to two feet for the weaker ones. Prune back the tops to three or four good buds and likewise trim out any bruised or broken roots, and if there are any large, coarse roots, these should be shortened, as it will help to the formation of smaller fibrous roots. Make the hole for each plant large enough to lay out the roots all around and in replacing the soil do not be afraid to tramp it till it is firm; that is, providing it is in the proper

condition for planting, not too wet. Amateurs are very apt to fail in this particular matter of thoroughly firming the soil.

Pruning.

To the unprofessional rosarian pruning seems the most perplexing problem, but if the object and principles of pruning are once thoroughly grasped, then ordinary common sense will make its application to suit the varying conditions a more or less simple matter. The object of pruning roses is, first, a rejuvenation of the plant, getting new wood; next, the removal of weak or superfluous branches so as to throw all the plants' energy into the remaining growths, and to let in a maximum of air and light. Personally, I believe that there is something in mutilation that tends to produce floriferousness, but this is merely a hypothesis, and is given for what it is worth. There are certain rules, however, which may be laid down in regard to pruning of outdoor roses; not hard and fast rules, but rules susceptible of modification. One of these rules is that the weaker growers should be pruned back harder than the stronger growing ones. A few good buds of last season's growth left annually may be taken as a guide for pruning the weak growers, but if the very strong ones, such as Margaret Dickson, for instance, were treated this way we should get but few flowers and exceedingly thick, strong wood. The way to treat these is to shorten back the longest growths by a foot or two and then tie or peg them down, hence the reason for allowing lots of room for these when planting. Should too many buds on these long stems start into growth so that they look like crowding one another, just practice a little judicious thinning. Of course, there are intermediate growers between the very strongest and the very weakest, these must be treated accordingly. The climbing and rambling type of roses require very little pruning, except for the removal of dead or decaying wood, and after flowering in summer the old flower growths may be removed advantageously; in fact, much may be done with roses as well as fruit trees by a little careful summer pruning, especially in removing old flowering wood. In pruning, try to cut back to a bud on the outside of the shoot so that the coming growth will be outward and not inward, and always try to make a nice clean cut close to the bud, so that there will be no ugly spur sticking up, which can not heal over, and which will surely die back to the injury of the plant.

Propagation.

The propagation of roses is fortunately a very easy matter. Budding, grafting, layering, seeds and cuttings are the several means employed. Most

of the hardy roses which come from Europe are budded or grafted on the dog rose stock or else the Manetti, while in America a great many are grown from cuttings, on their own roots. I shall not attempt any detailed account of the methods of budding and grafting roses as those who would learn this, had better consult some of the standard works on roses where very plain illustrations will be found, which will be far more helpful than any words from me would be. Cuttings from growing wood may be put in sand through the summer in a cold frame with a northern exposure, and if kept shaded and well watered will root freely enough. The best shading is a piece of cheese-cloth tacked to a frame of wood to fit where the sash ordinarily fits. Cuttings should be about four or five inches long and have one or two leaves on; it is well to make a nice clean cut near a bud at the bottom. Cuttings of dormant wood put in flats of sand and set in a cool greenhouse will root through the winter and grow away when spring comes. Layering consists in taking a shoot and making a slit in it, cutting it part way through, then bending it to the ground and burying it two to three inches deep at the point where the cut is made. After a while roots will be emitted at the cut and when these roots have made some growth the layer might be entirely cut from the parent plant and transplanted. Propagation by seed is only resorted to for the purposes of raising new varieties or for raising the various wild stocks for grafting and budding.

Insect Enemies.

The competitive spirit has been previously referred to as one of the prominent characteristics of human nature, and the rose grower is engaged during the growing season in another kind of competition—a competition to see whether the various beetles, caterpillars, aphids and mites shall have the lion's share of the roses, or not. However, it has been said that difficulties are made to be overcome and the enthusiastic rosarian will engage these enemies as they appear, and with vigilance and care will emerge victorious. Aphids, or greenfly or green louse is so well known that a description is unnecessary. As soon as any of these are seen on the plant, and they are generally found on the growing tips, measures should immediately be taken for their eradication as they are extremely prolific. One authority tells us that one aphid may become in five generations the progenitor of nearly six thousand millions of descendants. I confess that I have not verified this statement by actual count, but my observation of their possibilities of increase have shown me that it is wise to lose no time in setting about their destruction. Fumigation being impracticable outside, our remedy must be a spray of some soap and tobacco compound of which there

are a number in the market. Aphine, an American remedy and X L All, an English preparation, are both excellent for this purpose. Thrips are a great deal more troublesome on the rambler type of rose than on the other kind. It is large white thrips which causes the yellow, sickly appearance in rambler foliage which is only too common. The same remedies will destroy thrips as are recommended for aphids. Red spiders are sometimes troublesome on the outdoor roses, but if the hose is within reach and they be thoroughly and forcefully syringed on the underside of the leaves, the spider will be easily controlled. The rose bug or beetle is a rather disgusting and a very difficult pest to control, and if they are not too numerous, handpicking is at once the simplest and most efficient means of destroying them, as they easily fall off. A sheet may be spread on the ground and the bushes shaken over it. After gathering the beetles this way they may be destroyed by burning or by putting them in kerosene. Most of the different caterpillars which prey upon the foliage of the rose may be killed by spraying with arsenate of lead, one pound to ten gallons of water. This is a safe and effective spray for all the biting insects, and the wise thing to do is to spray early and spray several times through the summer on the principle that prevention is better than cure. Remember that you are dealing with two kinds of insects; biting, such as the beetles and caterpillars, and sucking insects such as aphids and thrips, for those that eat the leaves use a poison like arsenate of lead and for those that suck the juices of the plant use tobacco and soap sprays. The larvae of the June bug, a large white grub that spends three years in the soil before emerging as the full-fledged bug, sometimes does serious damage by feeding upon the roots of roses and should you find out that they are working at the roots or that there are

SUMMER BEDDING IN LORING PARK, MINNEAPOLIS.

Ornamental Grasses and Subtropical Foliage.

many in the beds, make holes about a foot apart and four or five inches deep and pour a spoonful of bisulphide of carbon into each hole, covering it up quickly so that the gas will diffuse all through the soil.

Fungoid Diseases.

Mildew is naturally the first of these to come to mind and is perhaps the worst. Sulphur dusted over the foliage with a bellows is one of the commonest remedies, but liver of sulphur, one ounce dissolved in ten gallons of water and sprayed on the foliage, is by far away the best, both as a cure and as a preventive. Black spot and orange fungus are both very destructive at times, for which the liver of sulphur is the best remedy

known to me. But cleanliness and general good cultivation are among the best preventives for nearly all diseases.

Winter Protection.

Most of the roses require some degree of winter protection if grown, say north of Philadelphia. The climbing roses will come through the average winter if a few evergreen branches are tied over them to keep the sun from them. But the Teas, hybrid teas, and hybrid perpetuals must have something more, especially to protect them from the ravages of field mice, which cause great destruction in some places by gnawing all the bark away for three or four inches near the base. The only way to prevent this as far as I know, is the banking of some soil or manure sufficiently high, so that even if the mice eat the plant above there will be enough wood left to start again. The protection that this soil or manure affords is that freezing hard, the mice are kept away from so much of the plant as is covered. Beyond this, evergreen branches or any coarse litter will answer for further covering. But any very tender roses had better be bent over and entirely covered with soil. You will note that I have made no special mention of standard roses. The treatment of these will be the same as the others, the only difference being that they will require more elaborate winter protection. Grafted on rugosa stocks, they may, with great care, be laid over and buried with soil. If this is not possible a good covering with straw bound around them and supported by a stout stake will do.

The successful grower of roses must be an optimist, as there is much to contend with, but the reward is commensurate with the effort, and as Dean Hole so beautifully expresses it: "He who would have beautiful roses in his garden must have beautiful roses in his heart. He must love them well and always."

SUMMER BEDDING IN LORING PARK, MINNEAPOLIS.

Mixed Borders of Camus, Gladioli, etc.

BALM IN GILEAD.

Robert Craig is among the "silver locks" now; yet his smile and his answer is as free and frank as ever. He sees nothing in the recent decision of the Supreme Court except the rout of the lawyers and schemers! The Pennsylvania Horticultural Society still stands on solid ground. They go right back now to the William Schaeffer will.

All that the building syndicate has to sell is an unexpired lease of eleven years. The past nineteen years of the same lease—debit side. Why should anyone pay them anything for the eleven years to run? Nothing to it. We are told that Rudolph Ellis and others working with him, are trying to mix things up and get control of the property for little or nothing. It looks as if the Supreme Court decision has put a quietus on all that. The only thing that could help them would be the death of the P. H. S. But Miss Schaeffer, surviving legatee, took care of that. Philadelphia Hospital—which means City of Philadelphia—becomes then the reversionary.

The proper course for the trustees under the Schaeffer will to pursue is to put the society out of the money-making class. Run the property as a pure and simple institution for promoting horticulture. The city ought to endow it, but if it won't, get private people to do so. At the least the city should not exact taxation from a non-mercantile institution.

Frank Miles Day did some most beautiful things. The Art Club Building for one. But he never did a finer thing than Horticultural Hall. Frederick Phillips said to me one day as we walked down Broad street, "Stop! I love to gaze on it a while. The loveliest and most charming structure in the whole world. Rome, Athens, the East. Here we have it—the apotheosis; and mighty few Philadelphians have the sense to see it."

I thoroughly agreed with Mr. Phillips. Not only that, but I appeal to Mr. Craig to see to it that Horticultural Hall—the Frank Miles Day masterpiece—is held for all time for the city—like another Independence Hall.

Ways and means can be found. Prominent newspaper men I have talked to are thoroughly in sympathy. Men like them are trained to sense public opinion. Public opinion is the thing that makes us do things. When everybody in a community wants a thing—they get together and its done.

All things considered, the best thing to do with the Horticultural Society is to put it on a purely educational basis and demand not a fine in the shape of taxation from the city, but an endowment to help it carry on the good work it has been doing for nearly one hundred years.

And I, for one, have faith in the good sense and good judgment of Robert Craig to feel that he will use that wonderful personality of his in persuading the trustees to do exactly as William Schaeffer said they should do with the property—neither to sell it nor to mortgage it.

CATTLEYA × A. DIMMOCK.

A few weeks ago we published a picture of the beautiful Cattleya Mossiæ A. Dimmock, but, unfortunately, found out too late that we had our description of it confused with some notes on C. × A. Dimmock. Before making the proper correction we waited until we could secure a photograph of the latter. This we have now received through the kindness of Mr. Clement Moore of

Hackensack, N. J., at whose place this interesting hybrid was raised, and an engraving therefrom appears herewith.

Cattleya × Alfred Dimmock is a cross between C. aurea and a very fine form of C. Lawrenceana. The color is intense and in size the flowers are midway between Aurea and Lawrenceana. The plant is a vigorous, almost rampant, grower and promises to be a very free bloomer.

SHAKESPEARE'S GARDEN.

We were wandering around that very attractive North London park, presented to the inhabitants by Sir Sydney Waterlow some years ago and called by his name when we came across an old-fashioned herbaceous garden, the occupants of which were nearly done for, so far as the year 1912 was concerned. It is intersected by cross-paths and at the corner of the junction we read a tablet upon which appears the following:

"This garden contains the herbs and garden plants mentioned in Shakespeare's works."

The reader will observe it does not say "all" or "some" but simply "the" herbs and garden plants. Now if we take Beisley's "Shakespeare's Garden" we shall find, excluding trees and shrubs, probably more than fifty herbs and garden plants. Canon Ellacombe in "The Plant Lore and Garden Craft of Shakespeare" gives as many or perhaps even more if we could dissect

Of course, if another syndicate comes along and wants to lease the building under conditions—that's a different thing. We would much rather see the city take the matter up. And don't forget that the "city" means you and me and Jim and Sue and every one of us. We get in the habit of thinking, "Well, the city ought to do it," and forget that ourselves and others like us make the city, and the compelling force must come from us in the first place.

The interior arrangements of the hall are just as beautiful, poetical and artistic as the outside. No change should be made on them. They are a dream of beauty in every way.

GEO. C. WATSON.

Philadelphia, Pa.

The April meeting of the Indiana State Florists' Association will be held with W. Frank & Sons, Portland, instead of at Anderson, Ind., with Stuart & Haugh, as previously announced.

his index, and Leo H. Grindon in "The Shakespeare's Flora" certainly mentions a far greater number, if the total of vegetable productions referred to by the great English poet were all taken into account. In some one way it is a pity that this Shakespeare garden is not one by itself, but we must take it as we found it. Among the numerous occupants passing into decay there were many of the ordinary summer occupants of our modern gardens struggling in their last effort to make a show. We did not trouble to ask ourselves if these were Shakespeare's flowers for they were tallied with long white labels that the English gardener commonly employs.

But what we did notice was another type of label, a little green-painted square tablet with the word "Shakespeare" painted on the top. Then beneath that the common name of the plant with its Latin equivalent. We may of course have missed some but when our search was over we came to the conclusion that the so-called Shakespeare garden was just a little pretentious if not actually misleading. This is what we found there:

Heath (*Erica carnea*).
 Hyssop (*Hyssopus officinalis*).
 Rosemary (*Rosmarinus officinalis*).
 Pansy (*Viola tricolor*).
 Daisy (*Bellis perennis*).
 Heath (*Erica vulgaris*).
 Anemone (*Anemone nemorosa*).
 Thyme (*Thymus vulgaris*).
 Gillyflower (carnation).
 Lark's-heel (*Delphinium ajacis*).
 Scarlet Pimpernel (*Anagallis Brewerii*).
 Cowslip (*Primula officinalis*).
 Violet (*Viola odorata*).
 Camomile (*Anthemis nobilis*).
 Oxlip (*Primula elatior*).
 Saffron Crocus (*Crocus sativus*).
 Columbine (*Aquilegia vulgaris*).
 Hemp (*Cannabis sativa*).
 Poppy (*Papaver somniferum*).
 Parsley (*Petroselinum salivum*).
 Rue (*Ruta graveolens*).
 Mandrake (*Mandragora autumnalis*).
 Mint (*Mentha viridis*).

This, as far as we could see, was all there were. There may have been others but if so they were not distinguished by the special label and it occurred to us that there would not have been much difficulty in enlarging the number if there were any necessity for having a Shakespeare garden at all. If only intended as a curiosity—well there it is.

C. HARMAN PAYNE.

PROPAGATING FERNS.

Multiplication of ferns is effected in several ways, depending principally upon the types. Propagation by spores is the most general. By this method consideration must be given to the preparation of the soil. Most soils contain the lowest forms of plant life, such as mosses, liverworts, and the various confervoid growths, which vegetate as quickly as the spores of the ferns and thereby choke the prothallus in its early stages, and these must be eliminated by sterilization. Loam and leaf mold in equal parts with some finely broken brick, make an ideal mixture. Shallow pans are most convenient to use. They should be thoroughly drained with either broken pots or cinders, and these covered with a layer of sphagnum. The pans are then

PRIMROSES AS ROCKERY PLANTS.

Beds of Hardy Primroses in the Rock Garden, Goodwin Estate, Hartford, Conn.

filled to within one-half inch of the top with the mixture and pressed down firmly and smoothly. A thorough watering should then be given by immersing the pans up to their rims in a vessel of water, allowing them to drain off for an hour or so before sowing. The spores should then be sprinkled thinly and evenly on the surface, for, if crowded, the prothallia are very liable to dampen off. The pans are then plunged in sand or fine ashes, in a shaded section of the propagating frame, where the atmospheric conditions may be controlled to a great extent. Cover the pans with panes of glass tilted to one side to avoid the drip from the condensed moisture on the glass.

Great care must be taken in moistening the soil in order to insure success. If it is allowed to become too dry it means absolute failure in the germination of the fern spores; therefore, great caution will have to be used by the grower, especially during the periods of heavy firing that we experience at this season. Keeping the plunging material damp between the pans will usually supply the necessary moisture, but if the soil in the pans should show the least signs of becoming dry, take them out and water from the bottom by standing them in a bucket or other vessel containing three or four inches of water and leaving them there until thoroughly soaked.

When the prothallia develop into very minute plants—a stage that varies considerably with different ferns in

the time taken to reach it—the glass covers may be removed to harden the seedlings before pricking off. A few days later, prick off into other pans filled with similar soil. They may then be watered with a fine rose. Keep a close watch for slugs, as they have a wonderful appetite for young fern fronds.

Many failures in germinating some of the rare kinds of ferns may be attributed to harvesting the spores at the wrong time. The fronds should be examined at frequent intervals when they are about to ripen and with the aid of a hand magnifying glass when it is seen that the cases are about to burst or when the sori begin to turn brown, cut off the frond and place between two sheets of white paper to dry. In a few days the spores will have fallen from the frond; if not, rub gently between the fingers and they will become released.

Several species of *Pteris* are easily raised from spores; among them are *P. cretica albo-lineata*, *P. tremula*, *P. quadriaurita*.

Many species of *Adiantum* vegetate very rapidly from spores. *Cryptomium falcatum* and *C. Fortunei*, used extensively for decorating purposes, are raised from spores, as are also *Lomaria gibbi* and *L. ciliata*, and many others too numerous to mention.

Other methods of propagation are by division of crowns and rhizomes. The viviparous ferns are increased by sinking the pots up to their rims in a suitable mixture of soil, so that the fronds provided with the bulbils are easily pegged down and encouraged to make roots quickly. When a sufficient supply of roots are made to self-support the plantlets, they may be separated from the frond and potted separately into small pots.

RICHARD J. HAYDEN.

EDUCATION FOR GARDENERS AND FLORISTS

An address delivered before the Gardeners' and Florists' Club of Boston, Nov. 12, 1912, by Prof. E. A. White, Amherst.

The American people have now reached a point where they are demanding vocational education for their children. We hear it along all lines, and the trend seems to be in the right direction. Education today is very different from what it was in my boyhood days and as I hear the young people preparing their lessons it seems to me that my own school days would have been brightened and my interest intensified if I could have been given similar methods. Education is not now given in the abstract. It is concrete, precise and along those definite lines which touch the pupil's lives closely. In all of the larger cities technical high schools and manual training schools are established to teach boys and girls those subjects which have a vital bearing on their life work. The day of the American apprentice is rapidly passing and the broadly educated skilled mechanic is the consequence.

The average American farmer of the last century would be considered today the uneducated man. As a rule he attended school in his boyhood and

young manhood long enough to obtain a fair knowledge of the three "R's" but it was not considered essential that he become proficient in the higher branches of learning in order to successfully till the soil. Doubtless this was true and many of our ancestors were able to derive a good living from the farm. Times have changed, however; population has increased, competition has increased and discoveries have been made in all branches of science. The farmer of fifty years ago would find himself incapable of competing with the methods demanded in scientific agriculture of today. The farmers of the present have been quick to appreciate the need of education along scientific lines and the agricultural colleges have larger enrollments than ever in their history.

But education along agricultural lines for the farmers' boys is not now confined to the curricula of agricultural colleges. Students of education have come to realize that there is a demand and a need for instruction along these lines for the boy and girl who cannot go to college and who can spend but the minimum amount of time in high school. Therefore instead of teaching the so-called higher

branches of learning in rural high schools, distinctly agricultural topics have been inserted in the curricula of many of these schools which have already given splendid results.

But what of the need of better educational facilities for the boys and young men who are to become the American florists of the future? Let us take a brief glance at the history of the industry. It has been hardly seventy-five years since the business began to assume any considerable importance in the United States and it has been only within very recent years that the industry has developed along broad business principles. The day of the general commercial grower is passing and the specialist is the prominent florist of today. The owner of large enterprises, or manager of the same, however, must not be limited to a specialty, but must have a broad general knowledge of all branches of the industry. Competition was never greater than at the present time, the margin of profits has decreased and the business now demands men trained to the fullest extent of their intellectual ability.

As in general farming the flower growers are coming slowly to realize that theirs is a distinct profession, as definite and important as the profes-

AT THE GRAND CENTRAL PALACE NEW YORK CITY

Visit *Horticulture's* Stand, where copies of this issue may be had and where *subscriptions* and *advertisements* will be received during the time of the International Flower Show, April 5 to 12 inclusive.

To Exhibitors—A Word of Caution

Read the Schedule carefully and note specially when and what dates different sections and divisions are to be staged. All staging must be concluded by noon of the staging date and day unless otherwise specified or directed.

sion of medicine or law. The business world demands "captains of industry" to conduct large operations. These men are of necessity broadly educated. Many of our florist establishments are passing from the "small mill" stage into the huge factory with its many departments of specialized labor. The florist of the future must be the progressive man, the educated man, who can supervise and direct these large enterprises.

While it is true that many men develop an aptitude for business without special training, history has shown that those most successful are the educated men. Many times this education has been self-acquired and has come after long years of patient labor, but it has nevertheless been essential for the success of the individual.

Frequently it is said that there are no good American florists. The men who have been the most successful have received their preparation through a period of apprenticeship and training in England, Germany, or some other European country. I do not in the least question the splendid impetus these men have given the industry and skill which they have shown, but I think that the time has come when the sons of these men and the sons of American-born florists should have even better educational facilities and training in this country than can be obtained abroad.

America boasts of her splendid educational systems, and it is true that along many lines there are no better methods of teaching in the world than are found in our public and private schools and colleges. There has been an effort to furnish those branches in the curricula of educational institutions which meet a demand. That there are not better schools in which to train gardeners and florists seems to be not so much the fault of the institutions as the fault of the people. We have not made the demand for vocational training for our sons along this line of work.

Horticulture was formerly considered to deal principally with the growing of plants and to include mostly those grown for ornamentation or for table use. As we understand the subject today it is much broader in its scope; so broad in fact that few individuals can expect to acquire a thorough knowledge of all its many branches. There are departments of forestry, landscape gardening, market gardening, fruit culture and floriculture.

As has already been stated, this has come to be an age of specialization, and in order to become a specialist one must be trained in some definite branch of plant growing so that he knows more about that particular crop and can produce better results in its culture than can anyone else.

However there is a danger and a real danger that our gardeners and florists become too narrow in their knowledge of plant life through intense specialization. There is probably no position which demands that a man have a broader knowledge than in the work of the private gardener. Too frequently he must not only be well equipped in his knowledge of plants, but he must know all about the management of the live stock, the cook, the butler, and even the chambermaid. In the plant world he must not confine his studies to ornamental flower growing, but must be well versed in the principles of fruit culture, vegetable growing and general agriculture.

While, as has been said, the specialist is the important grower of the present period, there is now and probably always will be a class of men who do a wholesale and retail business and whose trade demands that they grow a miscellaneous collection of plants. Those doing the largest amount of business either in a wholesale or retail capacity will have their work so thoroughly organized that there will be a series of important sections with the special grower in charge of each section. The owner himself, however, cannot afford to be ignorant of how the different departments should be run, or to be dependent upon his grower for his information. His education and experience must of necessity have been broad in order to successfully

manage the business. The man who personally constructs his own range, arranges the heating system, propagates and grows his miscellaneous crops and markets the same successfully must of necessity be a man with a well developed intellect in order to successfully compete in the business world.

So we see that it is not sufficient therefore, that we have our schools of general horticulture, although these are necessary for the training of the best equipped "all-round" men; it is not sufficient that we have our divisions of these horticultural schools into departments of floriculture, market gardening, and the like, although they are essential for training general growers. There is a need in America today for definite and extended courses in the growing of conservatory plants for the young man who is to make the culture of these his life work; special courses in rose growing, carnation growing, orchid growing and the like, also courses in the culture of outdoor trees, shrubs and herbaceous perennials. In other words, we should train specialists as well as general growers.

In this connection it may be said that the best training for a specialist comes through his practical experience in the range. Much is said in favor of the apprentice system practised in the older countries and I do not question the value of this system for those countries, but American conditions are very different. There is no question in my mind but what the best material out of which to develop educated plant growers and specialists comes from those young men who have been brought up in the actual work of the range. However, a better knowledge of science is developing daily and these young men must be brought into

FLOWER MARKET SHOW

ON APRIL 12th, 1913

The Boston Co-operative Flower Market

will hold an exhibition of all kinds of commercial flowers, plants and floral designs. We expect this exhibition to exceed all previous shows which we have held and the premiums, amounting to over eight hundred dollars, should induce strong competition. All flowers, plants and designs should be staged and ready for the judges to pass on not later than 11 A. M., positively. The exhibition will close at 8 P. M.

W. W. TAILBY, Sec'y

intimate touch not alone with the ordinary details of the growing of plants, but they must know the principles which underlie the process of plant breeding; they must know of the micro-organisms at work in the soil and the various chemical actions which are going on in the soil and add to its fertility and productiveness; they must know the nature of the various insects and diseases which prey on plant life, in order that they may successfully combat these enemies. Therefore, while the physical environment of the plant has much to do with its growth and development, a knowledge of these factors alone is not sufficient if one is to become a specialist.

In the Massachusetts Agricultural College two years of the four required are devoted to cultural and fundamental studies. There are few definitely agricultural or horticultural studies before the junior year. The men then elect their major subject and the instructor in charge of the course in which they elect their major work acts as an advisor regarding correlated subjects which should be studied. In this way the student gets a well-balanced course. As an example, he elects floriculture as his major and his advisor requires that he also take courses in plant pathology, entomology, plant materials, soils and fertilizers, or chemistry. Each of these courses is given by a man with special training, which fits him for his work. In this way the man graduates with a general knowledge of all branches of floriculture. If he has had several years of practical work in a range of greenhouses before taking his college course he derives better results, for he has a clearer insight into his subject and can get much more out of it. While this course turns out men well equipped in fundamental studies and in general principles of floricultural knowledge, it does not, of course, turn out specialists. Neither does it turn out men who have mastered all the details of the practical work. It does, however, equip men with a splendid foundation on which to build a strong life of service in the business. If the men are to become specialists this specialization must come later by concentration on some one branch of the industry and a determination to master that branch in all its details. This may be brought about partly by a period of practical work on the special branch in some large range where the specialty is grown to its best perfection, but it seems to me that the greatest benefit may be derived if this practical experience is later supplemented by a period of graduate work at the Agricultural College. I might say in this connection that I am now considering a project with the head of the graduate school whereby our graduates who go out into practical work may return after a prescribed period and after a supplementary scientific study of their specialty be given the degree of Master of Science in Floriculture.

But not everyone can afford to spend four years or longer in study of fundamentals, nor is it for the best interests of the industry that they should. To meet the needs of these individuals, the college now offers a special course for men of mature years who have had a high school training and who want to devote a little time for special train-

ing. These men come to the college for one or two years and take special work in those definite subjects in which they are especially interested. For the most part these same subjects are given to the regular junior and senior students. These men are given no diploma or certificate. They come only for what they can get out of the courses offered.

Then again the college offers exceptional opportunities by a ten weeks' short course during January, February and the first of March when men may come to the college to get in a condensed form in this short time much that is given in the longer courses. They meet men with kindred interests and derive much benefit from an interchange of ideas. Practical men come to the college for lectures on special subjects and these men give to the students many suggestions which their experiences have proven to be valuable.

Then there are correspondence courses in floriculture for those who cannot leave their home duties. To my mind these courses are of minor importance, for my experience with them has seemed to prove that this subject does not lend itself to those courses. The lectures, text books and questions are sent out to the people taking the courses, but in the majority of cases these individuals do not take sufficient time to read over the subject matter and to transpire it into their own language. They look up the answers to the questions in the lectures and text and answer them verbatim in the words of the lecturer or the writer of the text. It seems that the individual gets little lasting benefit from such a course.

I believe, however, that there is a splendid opportunity for extension work in floriculture along other lines. Massachusetts is a state where the industry ranks of major importance and where the amount of capital involved is considerable. I believe there is room for one or two extension schools of floriculture in this state and I should like to see these started perhaps in connection with some of the horticultural societies in Boston or in Western Massachusetts. The Connecticut Valley is well cared for by the Smith's Agricultural School and the Massachusetts Agricultural College. Courses such as these would give the industry a splendid impetus and they would be the means of giving many young men who are already engaged in the business, on private estates, in retail establishments and in commercial ranges, a chance to learn much of

benefit at a minimum expense of time and money. What the industry needs today is a higher grade of workman and this will never come until the young men have better chances for learning the business. One of the most prominent New Jersey growers told me recently that he was convinced that it paid him to employ a high quality of labor even at higher wages, and I know for a fact that another large corporation is employing men of this grade as managers and foremen in the different departments. Too frequently men employed in the larger ranges get training only in one or two branches and therefore are not well balanced in their development. They are specialists in the narrow sense of the word. There is then again an unfortunate opinion among some growers that it is detrimental to their best interests for young men to learn the secrets of their success. As in every industry where competition is keen, there are certain methods which any grower may legitimately keep to himself, but there is much general information which might be given to the younger generation without injury in the least to the business of any individual.

I believe it is up to the present generation of florists to expand and to get out of narrow conservative ruts, if there be such, and to give the coming generation such a preparation for their life work that the business will take on new value and dignity because of the increased mental vision of the men engaged in it.

The gardeners and florists of today are as a class broad-minded, progressive men, but we who are bound up heart and soul in the interests of the industry want the next generation to go far ahead of the present in every phase of the work.

THE BLOSSOM.

Only a little shrivelled seed
It might be flower or grass or weed;
Only a box of earth on the edge
Of a narrow, dusty window ledge;
Only a few scant Summer showers,
Only a few clear, shining hours
That was all. Yet God could make
Out of these, for a sick child's sake,
A blossom wonder as fair and sweet
As ever broke at an angel's feet.

Only a life of barren pain,
Wet with sorrowful tears of rain;
Warmed sometimes by a wandering gleam
Of joy that seemed but a happy dream;
A life as common and brown as I
As the box of earth in the window there,
Yet it bore at least the promise there
Of a perfect soul in a narrow room—
Pure as the snowy leaves that fold
Over the flower's heart of gold.

QUESTION

Where in all the world can you find a good commercial White Gladiolus, from which you can cut a **spike of flowers and buds**, measuring from **three to four ft.** in length, without appreciable damage to the bulb?

ANSWER

The variety "PEACE." Besides possessing all of the other attributes which combined make it the most valuable white variety yet introduced, it also grows such a **tall, stately and strong plant**, that no other white variety and few varieties of other colors will permit the cutting of such **long, perfect spikes** without injury to the plant and bulb. This feature alone more than **doubles the value** of this variety, as will be appreciated by every grower of Gladioli for the market.

If you are interested in such varieties and wish to know more about them, write me, or better still, try a few bulbs of "PEACE" and see for yourself. Better also try a few bulbs of "WAR," companion of "PEACE." A deeper red, more brilliant or a larger flower you have never seen. I will make no exception to any variety either of Domestic or Foreign origin.

PEACE, large blooming bulbs, \$2.00 per dozen; \$100 per thousand
WAR, large blooming bulbs, \$1.50 each; \$15 per dozen

You should have my illustrated catalog, write for it

PETER HENDERSON & CO., 35 and 37 Cortlandt St., NEW YORK

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Flood Damage.

There are rumors of considerable damage having been done to the stocks of seedsmen in the flooded districts of the west and to some extent in New York state. We are reliably informed that H. W. Gordinier & Sons of Troy have suffered a loss of several thousands of dollars as a result of the recent flooded condition of the Hudson river. The loss was not so much in

seeds as in the general miscellaneous stocks carried by a first-class seed house, also—in this instance—damage to feed, hay and grain in which this firm are very extensive dealers. As there was no insurance carried by the house to protect them against loss by water, whatever this may amount to will be a dead loss.

Reports from Indiana, Ohio and Kentucky while not as authentic as the case just cited are doubtless more or less well-founded. In Dayton and Columbus, the losses sustained by dealers must have been considerable, to say nothing of those suffered by smaller concerns in the less important towns. As soon as dealers are able to take an inventory of their losses and what they will require to carry them through the season the wholesale houses are likely to be quite heavily drawn on for supplies. Probably by another week the situation will have

sufficiently cleared up so that we can get something like a reliable estimate of losses.

Freakish Weather.

In the meantime the weather has not been especially favorable and outside of the zone of flood and tornadoes, there has been snow and wintry weather which has seriously retarded active operations and, while a few weeks ago everyone was predicting an early spring, it does not look quite so promising at this moment. However, as there is very little frost in the ground a few warm days will probably dry it out sufficiently to make early plowing possible and, in fact, we have heard of peas being planted in New England within the past two weeks; the seeds of some other hardy vegetables have gone into the ground and, with favorable weather, farmers should be able to market their early vegetables at an earlier date than usual. It is all a

BODDINGTON'S QUALITY GLOXINIAS

GLOXINIA ERECTA GRANDIFLORA

This popular flowering plant is coming into greater vogue than ever, not only as a pot plant for house decoration, but also for cut flower purposes. Our strains of Gloxinias are the true erect-flowering type, grown by a specialist in Europe.

GLOXINIA ERECTA SUPERBISSIMA

Having during the past season been requested to secure some specially fine Gloxinias for exhibition purposes, we have made arrangements with a noted Gloxinia specialist in England to reserve for us some of the most distinct types. The bulbs are not so large as the Named Varieties, but this is a characteristic of most Erecta superbiissima varieties.

BODDINGTON'S IDEAL PRIZE GIANT MIXED. Great variety of superb colors.

CYCLOPS. Velvety crimine, shading to a broad white border, throat dotted with dark red.

DUCHESS OF YORK. Flowers of a rich dark blue, each petal being edged with a broad band of white. A most striking and lovely variety.

SPOTTED HYBRIDS. Whenever exhibited, they create intense interest. The delicate markings, in an infinite variety of forms, add a special charm to the flowers.

SUTTON'S WHITE. A giant white flowered variety.

DUKE OF YORK. Large scarlet Gloxinia with deep white edge to each petal. A magnificent flower.

HER MAJESTY. This exquisite Gloxinia is still unsurpassed by any other white variety. The flowers are as pure as newly fallen snow, and are borne on short stems, just clear of the elegantly recurved foliage.

READING SCARLET. In color this is the most brilliant Gloxinia in existence, being an intense glowing scarlet variety of the true Crassifolia habit. An admirable companion to Her Majesty.

GOLIATH. Violet and white, fine variety.
Per doz. \$1.50, per 100 \$10.00

Boddington's Quality Tuberous-Rooted BEGONIAS

Single-Flowering Tuberous-Rooted

For planting in beds and where color effect is desired. Our stock of these bulbs will be found true to color and free from mixture.

Crimson	Rose White, Pure	Salmon	Scarlet Yellow	Pink, Light Copper	Orange
Large bulbs measuring 1¼ inches and upward, separate colors or all colors mixed, 35 cts. per doz., \$2.25 per 100, \$20.00 per 1000; extra large bulbs, 1½ inches and up, same colors as above, 40 cts. per doz., \$2.75 per 100, \$25.00 per 1000.					

Double-Flowering Tuberous-Rooted

These can be depended upon producing 100 per cent. double flowers and contain very large and choice varieties.

Crimson	White, Pure	Yellow
Scarlet	Copper Bronze	Orange
Rose	Salmon	Light Pink

Large bulbs measuring 1¼ inches and upward, separate colors or all colors mixed, 50 cts. per doz., \$3.50 per 100, \$30.00 per 1000; extra large bulbs, 1½ inches and up, same colors as above, 65 cts. per doz., \$4.00 per 100, \$35.00 per 1000.

Single Crested Begonias

This strain of Begonias ranges in all colors—salmon, pink, white, yellow, copper and scarlet; petals carry on the upper side a crested-formed cockscomb. Separate colors, 80 cts. per doz., \$6.00 per 100; mixed, 75 cts. per doz., \$5.50 per 100.

Single Frilled Begonias

These are of the finest types of the single Begonia, the petals being heavily frilled on the edges. To color, 10 cts each, 65 cts. per doz., \$5.00 per 100; all colors mixed, 60 cts per doz., \$4.50 per 100, \$42.50 per 1000.

Single Begonia Bertini

A beautiful bedding Begonia, brilliant vermillion flowers of rare beauty. As a bedder it stands unrivaled. 80 cts. per doz., \$6.00 per 100.

Double Begonias

	Doz.	100
Duke Zeppelin. Intense pure vermillion-scarlet.	\$1.00	\$7.50
Lafayette. Rich, brilliant crimson scarlet.....	1.25	10.00

ARTHUR T. BODDINGTON

SEEDSMAN

342 West 14th St., NEW YORK CITY

matter of weather, however, and we are rather sceptical about continued favorable conditions in view of the freakish season we have passed through.

New Methods.

We learn that the Jerome B. Rice Seed Company are erecting a large spacious warehouse at Bozeman, Mont., in which they will do more or less hand-picking and will be able to ship a part of their stocks direct from there to customers. It seems that the matter of securing help for hand-picking of peas and beans is troubling all of the seed growers now operating in the northwest and doubtless this will be a factor to be reckoned with for some time to come and may prevent the complete handling of these lines in the far west. As we understand it up to the present time, most of the growers have been shipping the product east in the rough and doing the hand-picking and screening at their old plants. This involves a considerable expense, however, which they all wish to avoid and were they able to make direct shipment in all cases, they would be able to save their customers at least the local freight from their present plants. This problem will doubtless be worked out in time and especially if the conditions in the northwestern states encourage the growers to remain there permanently.

The Winter Flowering Spencers.

We are all much interested in the Lonsdale notes from Lompoc promising us winter-flowering Spencer sweet peas in abundance in the near future. It may be of interest to many to report that when the regular late-flowering Spencers appeared on this market this season, about March 1st, the flowers commanded double the price of the old winter-flowering types. If they could be had earlier they would supersede entirely and also make a wider market.

ABOUT PROHIBITIVE PRICES.

Editor HORTICULTURE,

Dear Sir:

In your Editorial "Inexcusable Now" in issue of March 29, you state probably the facts regarding retail prices on violets, but just the same, we had to pay \$1.25 per 100 for violets and \$6 per 100 for carnations from one of your commission houses, and could have moved a lot of these, if the price could have been reasonable. The week before 75 to 85 cents for violets, \$3 for carnations. Now the class of people that on special occasions would treat themselves to a few flowers are obliged to go without, because these people shove the price up. I don't mean that I like to sell cheap, but would like to be able to sell at a price that people would buy freely and often.

the market green—yes, green—carnations for St. Patrick's day. No, the flowers were not dipped in green paint, or touched up with a brush, but were simply made to grow that way. They are white blossoms variegated in green, are beauties and ought to make their producers amazingly popular with the wearers of the green. Some mysterious treatment of the roots causes the white carnation to take on this appearance."

We shall soon need a special directory of wizards. They're springing up all around.

OF INTEREST TO RETAIL FLORISTS

BOOKKEEPING.

Abstract of a Paper read before the Kentucky Society of Florists by J. Able.

A good accountant is a joy to the business man. Book and record showings are the guide-posts to success.—*Good Advertising.*

In this paper, I dwell chiefly upon the value of perfection in bookkeeping and its relation to the florists' trade. It is naturally understood that each of us has his own system of bookkeeping. That alone prevents me from dwelling upon details and confines me to those phases of the work, which apply to all systems. My experience in bookkeeping in the florist business has been entirely with the retailing end but in all branches of the business the same fundamental rules will apply.

Bookkeeping, as we all know, is the operation of keeping accounts in such a manner as to give a true record of the transactions of your business. It does not matter how small it may be, or whether you are a grower, wholesaler or retailer, you will find that the successful management of your business can only be attained by keeping an accurate record of every transaction. The records enable us to look ahead and see where improvements can be made in decreasing losses and increasing profits of the future. They help us to economize in many ways which we could never think of, were it not for the knowledge we gain by looking back over our past records and locating little loopholes for losses which had escaped our attention at the time of transaction. It will also have a tendency to make us hustle, especially when we find that sales are not coming up to our standard, or possibly when the running expenses are too large in proportion to the profits. It shows us what we have on hand, what we have received, what we have paid out, what we owe, what is owing to us, what losses we have incurred, what profits we have made, and much other information of vital importance to the business man.

Bookkeeping, consisting mainly of daily routine, dealing with figures day after day, is one of the most monotonous parts of the business. I would like to suggest several ways of simplifying the work. First of all, the clerks should realize the importance of the sale-ticket, especially when it is a charge. It should be explicit in every detail, giving particular attention to the name and address of the party to whom the charge is to be made. You will often find it necessary to refer to these tickets at some future time, and, by having them filed away properly, you are always ready to straighten out any misunderstanding which might arise. Another great assistance, which the bookkeeper now receives from the majority of the growers, is the ticket rendered with each delivery. It does not matter whether the goods are to be charged or paid for at the time of delivery, this itemized invoice is a great help, especially when you are buying from a number of growers, enabling you to determine the amount of stock you receive each day and the

cost of same. The grower should keep duplicates of these tickets, by all means. This alone will assist in correcting any mistake which may have been made by either party.

Another suggestion would be the use of the loose-leaf ledger. Owing to the fact that quite a number of the personal accounts have so many items, and, consequently, rapidly fill the pages, using this system enables you to transfer these filled pages into another book or binder, and thus having only the active accounts to handle, considerable time and labor are saved.

In conclusion, I would like to impress upon you the importance of correct books no matter whether your business is large or small. Leading business men will undoubtedly tell you that their success is not only due to their efforts put forth in building up their trade, but largely to the fact that they have kept a watchful eye over their business through their bookkeeping.

PLANT TALK.

"Well, I thank you, but that is not just what I am looking for." This is a remark heard daily in the flower shops after a prospective buyer has looked over your dirty and dusty stock of palms, and sometimes you wonder why they are not selling faster. Would you go into a haberdashery and buy a shirt or a half dozen collars that were soiled or shopworn, even though you knew they could be laundered? No, you would not; neither would the prospective buyer purchase any plants, that show they lacked attention at first sight.

If the palms, dracaenas or ficus had been cleaned up and the pot mold removed you possibly would have sold one or more, as a well-kept, clean plant needs no recommendation; it speaks for itself.

There are many large stores employing plant-men and no doubt they keep their stock as it should be kept, but the trouble lies with the store not having a plant-man; in this case let the porter spend an hour or two with a sponge and a pail of water; in this space of time he can accomplish a great deal each day under the supervision of one of the salesmen who will be glad to show him how to do it.

Remember, a person may enter your shop to purchase a birthday or wedding anniversary gift and may want a plant and jardiniere so don't let your shop be condemned by having a dirty plant placed in a dusty jardiniere that had been on a shelf for a few months.

When a person leaves your shop without being satisfied, your competitor has the chance of taking this customer from you, and if he can satisfy the party it is pretty safe to say you will not see them again. Don't get caught by such negligence as indicated by dirty plants and jardiniere while you have help. Give this part of the store work, the same attention as the arrangement of cut flowers for the ice chest, or the window and if you are called upon suddenly to loan out

one dozen or more palms for some decoration, you will not be obliged to stop the general routine of work and get all hands busy washing them.

See that your plants are well watered and trimmed when brought back from a decoration, and the soil replaced, as handling them is oftentimes the means of loosening plants from the pots or tubs and the soil falls out. These things may be overlooked when busy and only noticed when the plants show signs of going back.

MR. STOREMAN.

DURING RECESS.

Forty-three made up a very congenial party in the special car chartered to carry the Chicago bowlers and their lady friends to Milwaukee, Sunday, March 30th. They were met at the station by their Milwaukee friends and the ladies were taken in automobiles to the bowling place, where the ladies of the two cities had a game of their own. Several Chicago bowlers, who had come over earlier, joined the party and three teams were formed, playing three games each with scores as given below. These annual affairs are looked forward to and enjoyed by all participating. The return game will be played in Chicago, April 13th.

FLOWER MARKET SHOW.

On April 12th, 1913, the Boston Co-operative Flower Market will hold an exhibition of all kinds of commercial flowers, plants and floral designs. We expect this exhibition to exceed all previous shows which we have held and the premiums, amounting to over eight hundred dollars, should induce strong competition. All flowers, plants and designs should be staged and ready for the judges to pass on not later than 11 A. M., positively. The exhibition will close at 8 P. M.

"A meeting of the Florists' Telegraph Delivery will be held April 9th at 10 A. M. National Flower Show, to which all Retailers interested in florists' business, whether members of the Florists' Telegraph Delivery or not, are cordially invited."
"Our list is growing steadily, so is the Telegraph Business. When can we add your name to this list?"

PHILADELPHIA NOTES.

Samuel S. Pennock has leased a cottage at Beach Haven, N. J., for the summer.

The latest recruit to the retail end is The Pansy Flower Shop, 1022 Arch street, Herbert Steinmetz, Mgr. Mr. Steinmetz used to be located at 8th, near Arch.

Arthur Niessen declares that what we need is a first-class, up-to-date flower store on Market street. If Tom Galvin can pay \$35,000 rent on Broadway, N. Y., the modest figures on Market street, Philadelphia, should not scare an up-to-dater!

A good delegation from this city will be on hand at the International Flower Show; but singly and as it pleases them, and not in a body as was proposed at last meeting of the club.

More could have been enthused if the committee had got busy when they were appointed, instead of at the 11th hour. It takes a month to do that kind of thing right.

The Pennock-Meehan Co. report that their contracts for the Mrs. Chas. Russell rose have now been mostly all delivered in satisfactory condition, reflecting credit on the growers and all concerned. Orders are still coming in from the smaller growers and the private conservatories. The same may be said about their other great rose novelty, Irish Fire Flame.

Visitors: Jno F. Ratcliffe, Richmond, Va.; Heinrich Mette, Jr., of Henry Mette, Quedlinburg, Germany; H. Van Beylingen, Hillegom, Holland; Frank Clark, Trenton, N. J.

W. Hooper has been appointed head gardener at the Whitney estate at Rochester, N. Y.

PERSONAL.

W. P. Edgar, advertising representative of HORTICULTURE, sustained painful injuries to feet and legs by being pushed from a crowded platform against a train in one of the subway stations on Tuesday of this week.

New York visitors—W. Wells, Merstham, England; H. E. Philpott, Winnipeg, Man.; Thomas Roland, Nahant, Mass.; Paul Berkowitz, S. Green, and I. Bayersdorfer, Philadelphia, Pa.

Boston visitors—Paul Berkowitz, Stephen Green and I. Bayersdorfer, representing H. Bayersdorfer & Co., Philadelphia; R. J. Irwin, New York; C. B. Knickman, representing McHutchinson & Co., New York; A. C. Zvolanek, Lompoc, Cal.; J. Horace McFarland, Harrisburg, Pa.; Wm. Wells, Merstham, England; H. E. Philpott, Winnipeg, Man., Canada; S. S. Skidelsky, Philadelphia, Pa.; Winfried Rolker, New York; Stuart Low and daughter, Bush Hill Park, Enfield, England.

"CARNATION CULTURE."

Extracts from a paper read before the Morris County Gardeners' and Florists' Society by J. Dunn.

Propagation. I advocate an early start in December as soon as good cuttings can be secured, as a strong plant cannot be expected from an inferior cutting. The best cuttings are those found near the base of the flower stem, being more wiry than the softer growths and not so likely to damp off.

Prepare the propagation bench in the usual way, which must be lime-washed, also good clean sand is necessary. Press the sand down firmly and turn on the bottom heat to warm the bed for the reception of the cuttings. The temperature, however, should not exceed 55 degrees and have sufficient air to avoid damping, also to induce a stocky growth.

Directly they are rooted no delay should take place, but prepare clean pots 2½ size, using at this potting three parts loam and one part half soil and sufficient sand to keep porous. After potting see that they are not checked in any way from draught or sun and during bright parts of the day shade lightly with paper, removing when the sun has declined. After they have commenced to root, place in the carnation house where they will get the proper amount of air and light so essential for a healthy growth, but they must not experience a check in any form. Water with care and on all favorable occasions spray overhead lightly and see that they are dry before closing time. This is one of the secrets of keeping away rust, so much dreaded by the grower. As time goes

on they will need to be moved into a size larger pot, using at this stage a little stronger compost to which may be added a dash of bone meal to try to maintain a healthy growth. When nicely rooted take out the points to induce them to break and form good bushy plants before their final potting.

The next shift will be into 4 or 4½ inch pots, using a compost three parts loam, one part cow manure, bonemeal and a light sprinkling of soot and fine lime rubble if procurable; if unobtainable sand can be used. Give a good watering from a rosed can and try to keep your night temperature not more than 50 to 55 degrees.

Plants started in December will be ready for their final quarters about the first week in May, and a decision must be made as to their summer quarters. I recommend indoor culture. Some prefer outdoor planting because they object to throwing out their old plants at this time of the year when they are blooming freely, but to my mind they are of inferior quality and flowers are getting plentiful outdoors to replace them. Given indoor culture throughout the plants do not experience the check they would if planted outdoors because in the latter case they are lifted from the field during August, when the weather is hot, which necessitates the plants being shaded because of the loss of roots.

Final planting. On having the benches ready, which should be well limewashed and the house thoroughly cleaned, prepare compost, using coarse loam three parts and one part cow manure, a little bone meal, sand

and lime rubble, also a sprinkling of soot is beneficial. One very important feature must not be overlooked, namely, the carnation is a lover of potash and to give this item of food we must have wood ashes and give a fair sprinkling throughout the compost. Having prepared the soil by turning several times to thoroughly mix the ingredients and placed same in benches, water your plants the previous day so they will be in good condition for planting. Be careful to avoid deep planting, which is a sure cause of stem rot. Press firmly around the ball of the plant and if the soil is in good condition, no water is necessary for three or four days, and then do not water the whole bench, but water each plant individually, because the soil becomes sour before the roots penetrate it and the carnation dislikes stagnant soil. When planted, lightly spray several times a day during the hot weather, keeping the ventilators and doors wide open day and night, with the exception of during a thunder storm, when they must be closed down; as soon as it is over, however, they must again be thrown open. A close atmosphere is fatal to success. The plants now require heavier syringing, but avoid getting your soil sodden, examining it from time to time to ascertain the condition of the roots.

When well rooted and the plants show by the paler green in their foliage that they have almost exhausted the food in the soil, we must aid nature by artificial feeding. Begin first with weak cow manure, but a change in diet is very important and two weeks later give a light top dressing

Less Ice With Better Results

The McCray System of Refrigeration, which insures a perfect circulation of cool, dry air, will not only reduce your ice bills, but will keep your stock in the best condition—fresh, fragrant and attractive.

McCray Refrigerators

Are made so as to display your flowers to the best advantage. They can be lined with white enamel, opal glass, tile, mirrors or marble to suit your convenience. Write for our beautiful Free Catalog No. 73, which shows refrigerators for florists, both stock and built-to-order, in all sizes and styles.

McCray Refrigerator Co.

of Clay's fertilizer, for the old way so often recommended is the best, viz., a change little and often. As an all-round food for the carnation, I consider bone meal the ideal food. From now on the surface soil must be lightly cultivated, but not deep. Continue stopping the growth when a fair-sized plant is secured and a safe date to cease all stopping operations is around the third week in August. Each grower should use his own discretion, as weather conditions sometimes warrant a little earlier or later date.

When the flower stems push up, green fly usually makes its appearance and a light fumigating with Nicotinic acid will destroy this and help to keep away many other insects most injurious to the carnation. The plants will now receive great benefit by giving a little top dressing of wood ashes and the next time of feeding soot, both of these being so beneficial to the formation of a vigorous flower stem, and the latter is a preventive of disease.

When the flower buds begin to expand be careful to avoid extremes in temperature in order to prevent splitting of the blooms. Syringing must be discontinued and only done on bright days and if you have sprayed and find that the plants have not dried off before closing time turn on a little heat.

Daily operations from now on will be in supporting the plants with wires and attending to disbudding and also to see that no dust is allowed to get on the blooms. If the foregoing instructions have been faithfully carried out, we can hope for a fair measure of success.

CHICAGO NOTES.

P. L. McKee has the sympathy of the trade in the loss of his father.

Mrs. Peter Olsen recently submitted to an operation for appendicitis and is doing well.

W. J. Neissen had his house damaged by fire when a neighbor's house was blown over on it.

Fred Lautenschlager left for New York, April 1st, to take charge of the exhibit of "The Kroeschell Boiler" at the International Flower Show.

A. E. Hunt at Evanston expected to see his houses leveled when five dwellings on the opposite side of the street

blew down, but his loss was but a few panes of glass.

Just after a shipment of greenhouse material left Chicago for Dayton, O., a telegram was received by the J. C. Moninger Co. to hold it as the place was destroyed by the floods.

J. F. Kidwell says he thinks the type of smoke stack built for his range can stand any storm. It is built with 36-inch flue all the way and has a base 16 feet wide. It is 85 feet high.

John F. Kidwell, president of the Flower Growers' Association, was probably the first man to begin repairs after the storm. At 6 A. M., four hours after the storm broke, he had Michael Winandy engaged for the work.

One of the freaks of the first storm was the falling of two telephone poles at the Hunt Bros.' place at Park Ridge, one of them causing some damage and the other falling free of the house. About forty wires crossed one of the houses and during the second storm held the house secure.

Petition was made by Clifford Pruner and A. F. Longren, former salesmen for E. H. Hunt, that a receiver be appointed by the court to take charge of that company's affairs. No opposition was made by the company, which consists of Charles M. Dickinson and his mother, Katherine Hunt, and T. T. Clark, their bookkeeper, was appointed receiver on March 24th. Under date of March

22nd, Albert T. Bacon, certified public accountant, issued the following statement of conditions: Liabilities, \$12,065.49; assets, \$18,163.15. The firm is negotiating for a new three-years' lease and expects now to continue the business.

E. S. Kurowski of the J. C. Moninger Co., returned Sunday from Council Bluffs, Ia., where he went to make an estimate on the loss to the greenhouse plant of J. F. Wilcox & Sons. The two large new houses, each 65 by 1000 feet, he says, are practically demolished and the loss will be from fifty to seventy-five thousand dollars. When asked his opinion as to the endurance of the large greenhouses as compared to that of the smaller ones, Mr. Kurowski said: "No house of any size could stand up under such a cyclone, but smaller houses may be easier to repair." Mr. Kurowski saw Mr. J. J. Hess of Omaha who said that city escaped most of the storm.

Jefferson Thomas, vice-president and manager of The McFarland Publicity Service, from its organization six years ago, has resigned this position and in the future will be connected with the Eugene McGuckin Company, Philadelphia, as manager of their sales promotion department. E. Fred Rowe, who has been Mr. Thomas' confidential assistant for the past two years succeeds him with the McFarland people.

Flower Market Reports

BOSTON Business here took a quiet turn directly after Easter and still continues to be very unsatisfactory and uncertain as to outlook. Prices have gone down on everything, but this does not seem to accelerate the movement of the stock with which the markets are burdened. Shipping trade has been hampered by wash-outs on railroads and wrecked bridges and thus the outlets which usually help the Boston market are unavailable. The activity usually experienced for the season following an early Easter appears to be missing this year, but it may materialize yet. We have a suspicion that the automobile is largely responsible for this. Time will tell.

Easter Monday, opened **BUFFALO** up with a drizzling rain which continued until Thursday when a snow storm set in. There was little or no business the early part of the week and the receipts were heavy on carnation, roses, peas, lilies, and everything along the line and a good portion was carried along until Saturday. Speculating was light and stock accumulated heavy. Bargain signs were displayed by the merchants, but this had little effect. This week, trade is on the upward course, and the outlook is better. Wm. F. Keating Co., reports a good Easter shipping trade in violets, lily of the valley and roses. The sale of carnations was a little disappointing, the demand lighter than usual. Bulbous stock went exceptionally well this year.

CHICAGO Business has been very quiet since Easter. The floods of the South and East have greatly crippled the shipping trade and will continue to do so for another week. Local trade has been about up to the average, but there is more stock than is needed and prices weakened considerably. Carnations felt the situation rather more than roses and any quantity can be had now. American Beauties are getting more plentiful, but that favorite flower is still in short supply. All kinds of roses are to be had in quan-

tity and the supply of bulb stock, sweet peas and violets seems to be more than equal to all possible demand. In brief, there is more stock this week than the market is using to good advantage.

Ever since Easter time the market has been more or less upset owing to lateness of trains or—as it is in some instances—the trains failed to arrive at all. Before midnight Monday night all train service north and west was stopped. About

Flower Market Reports

(Continued from page 531)

the same time all east-bound service except on the C. & O. was stopped. The raging torrents of the Big and Little Miamis and the Whitwater have either taken down the various bridges or have weakened them so as to render them unsafe to cross, while the water is still up as high as it is. On Tuesday one wholesaler received a shipment that had been shipped on the 22nd and should have arrived here on the 23rd. Another had a shipment held up twenty-two miles from town. All trains south are moving regularly. Business since Easter has been fair. The supply is adequate and consists of excellent stock in every line.

(This report delayed on account of floods.)

The market here, directly after Easter, took a big tumble. Many things that had maintained a standard price up to Saturday night dropped in quoted value 25 to 50 per cent. and many others were actually unquotable. It was probably one of the most sudden and serious breaks ever experienced here. It is unnecessary to attempt to assign the causes, in these brief notes. Suffice it to simply state the fact. No signs of recovery are yet visible. The crop is exceedingly heavy on all lines and wholesale dealers are glad to unload at "job-lot" figures to anyone who will come along with a proposition for a good-sized load. Those who buy a few dozen flowers for immediate needs will have to pay an average price, as a rule, but those who are disposed to take a speculative chance on a van-load can pretty nearly dominate the situation just now.

Monday after PHILADELPHIA Easter very good. Balance of week very bad. Crops seemed to come in with a rush and business dropped off amazingly—the consequence being a glut all along the line. A good demand was expected for after-Easter weddings, but there was very little doing apparently in that line. The overload was gotten rid of somehow at some price—with some exceptions—notably southern daffodils. The latter were poor, and a great part went to waste. American Beauty and other roses, also carnations, were plentiful and good. In orchids a few Mossiae are now to be seen but the bulk is

MISCELLANEOUS

	Last Half of Week ending Mar. 29 1913	First Half of Week beginning Mar. 31 1913
Cattleyas.....	15.00 to 40.00	15.00 to 50.00
Lilies, Longiflorum.....	3.00 to 6.00	3.00 to 6.00
Callas.....	8.00 to 10.00	6.00 to 10.00
Lily of the Valley.....	1.00 to 2.00	1.00 to 2.00
Daffodils.....	1.00 to 2.00	1.00 to 2.00
Tulips.....	1.00 to 2.00	1.00 to 2.00
Violets.....	.15 to .40	.15 to .40
Daisies.....	.50 to 1.00	.50 to 1.00
Mignonette.....	2.00 to 5.00	2.00 to 5.00
Snapdragon.....	3.00 to 6.00	3.00 to 6.00
Wallflower.....	1.00 to 2.00	1.00 to 2.00
Sweet Peas (per 100 bunches).....	3.00 to 6.00	3.00 to 6.00
Gardenias.....	6.00 to 20.00	6.00 to 20.00
Adiantum.....	.50 to 1.00	.50 to 1.00
Smilax.....	10.00 to 15.00	10.00 to 15.00
Asparagus Plumosus, strings (per 100).....	35.00 to 40.00	35.00 to 40.00
" " & Spreng. (100 bunches).....	15.00 to 25.00	15.00 to 25.00

still the less popular Schroederae. Easter lilies, callas and lily of the valley were in fairly good demand and suffered less from the glut than most other things. A great part of the sweet pea crop was below par. Really good flowers were the exception. There was a good demand for spring smilax—with supply rather limited.

ST. LOUIS The market has had an abundance of stock all during the last week.

Retail business somewhat quiet but in the later part it picked up, but the stock at the wholesale market was so large that the demand scarcely made an impression on it. Prices went down in a hurry. Violets and sweet peas have been the special glut since Easter with prospects for a continuance of this for this week. Bulb stock too is coming in heavy on all sides.

HORTICULTURAL CLUB OF BOSTON.

The Horticultural Club of Boston entertained at its March meeting as guests, Wm. Wells, Merstham, England, A. C. Zvolanek, Lompoc, Cal., and H. E. Philpott, Winnipeg, Man. Mr. Wells made a charming address on his pet flower—the chrysanthemum, asserting that the big flowered varieties are still in the ascendancy and giving some very interesting facts concerning the hardy sorts. Mr. Philpott told of the beautiful and attractive homes that are being established in the great Northwest. Mr. Zvolanek presented a paper giving facts concerning the origin of the winter-flowering Spencer sweet peas. In illustration of Mr. Zvolanek's story Wm. Sim had decorated the table with a glorious display of the Zvolanek sweet peas, twenty-five varieties being represented in the aggregation. Mr. Sim predicted that within a couple of years the Spencer type would be the only winter sweet peas grown for commercial purposes. Robert Cameron deprecated the crude way in which flowers are handled in the markets.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

THE PUBLICITY PROPAGANDA

By M. C. Ebel.

No more perplexing problem confronts the business man than what to do, and how to do it, to get the greatest return from his expenditures in creating a selling market for his products. More money is wasted in this branch of a business than in any other department because it is next to impossible to trace returns on all that is expended, and so we must be content to strike a happy medium, whereas cost of production may be accurately figured.

I have, however, been quietly watching the course of events since I fired my first shot at publicity in the trade papers last May, and the interest which has been manifested among the florists generally in this subject since then must assure anyone, not a pessimist, that the publicity movement will not be permitted to wane, but that it will progress until it will finally make its power and influence felt in the florist industry just as it is doing among the younger industries today.

The power of the press, and nothing else, has built up many industries in the past quarter of a century so that where their resources a decade ago were reckoned in the hundred thousands, they are today counted in the hundred millions. And let me tell you some of these industries did not have the foundation to build on that the old florist industry has, but which up to now it has not undertaken to develop. I say, the old florist industry, for it is the oldest industry in the world. What other industry can trace its ancestry as far back as the Garden of Eden? And had the first partners in the business been alive to conditions as they exist today, they would probably not have trafficked so unwisely with the fruit, but would have begun to create a better market for it, by which we might all have benefited before the cost of high living for everything but flowers overtook us.

The consequence of the lack of wisdom on the part of the first planters is that some of the boys have risen above the old man and our younger industries have become prosperous and powerful enterprises, though some of them have admittedly been founded on very flimsy superstructures. Now there is that stability behind the florist industry which as it develops cannot be shaken, for it will be builded differently than, you may say, practically all other industries, in that it will never be created as a monopoly or trust; and thus it will remain separated from that greatest of all evils, political intrigues which are seriously affecting the business life of this country today.

There is no question, however, that the florist business, and in that I mean the various branches of horticulture and floriculture, already unconsciously following in the evolution through which other successful industries have

passed from their minor state into great enterprises. I refer principally to the large commercial florist establishments which are producing along the same lines that the large manufacturers produce, studying all the phases where economies may be practiced and then taking advantage of the economies to reduce the cost of production, and so as in other fields of endeavor the large grower can make money at prices at which the small grower cannot afford to produce.

This feature of the florist business is never again going to diminish, but on the contrary will continue to increase, and with this development of the business the chances of your ever seeing much higher prices for flowers than those now prevailing become more and more remote. It is true that in food products and in other necessities of life there has been a constant increase in prices due to a large extent to manipulation but among manufacturers generally the selling price if anything has been lessened, brought about by modern manufacturing systems which have helped the strong and driven out the weak in various trades, and this is the situation which sooner or later is bound to confront the florist.

Mr. Wallace R. Pierson in his paper, "The Florist and His Market," presents some arguments which should make grower, wholesaler, and retailer sit up and take notice. He says they are all in the same boat. He is right, taking the florist business collectively and this he has done, for I am satisfied that the establishment with which he is identified is not concerned over the selling markets. His plant is one I had in mind where every branch is carefully watched and where the cost of production is regarded more essential than the going market prices. He urges co-operation between the grower, wholesaler, and retailer, rather than competition and warns of the possibility of a chain of stores handling flowers as they do other commodities.

This is no longer a possibility but will soon be an announced fact; for a strong organization is already under contemplation having associated with it a man heavily interested in several similar successful, what might be termed, endless chain store enterprises. It will seek direct outlets for its productions, and as its retail business expands, it can continue to increase its growing capacity, if it chooses, or exercise the privilege if it finds it more profitable to do so, of going direct to growers and contracting for their entire output. The opportunity is a great one. The mystifying part of it is that it has not been taken advantage of before. It brings to mind an old saying that it takes an outsider to discover the inside of one's opportunities.

No general publicity campaign will be required by such a concern. It will do its own advertising and create its own markets; but this is individual advertising and will not help its neighbor in the business. Individual adver-

tising only helps the individuals to whom it is directed.

Then we have our local publicity or advertising campaigns. They may have some good features, but I have failed to discern any in watching what has so far been undertaken. No doubt some of them have been productive of results, but could they be declared a success when the expenditures are taken into account. For arguments sake let us concede that one of the local publicity committees would hit on a plan whereby a greater demand and better prices for flowers could be established within its region. How long would it be before the growers from elsewhere would swamp that locality with shipments to get some of those better prices and they would again be confronted with the problem how to overcome the glut.

Curtailement of products can not be successfully maintained in the florist industry although the suggestion was offered at the Philadelphia meeting, where Mr. Pierson first read his paper, that the florists' devote some of their glass for a time to vegetable growing. The weak point here is that the vegetable grower is confronted with the same problem as the florist—no proper selling market,—but were this not so and the experiment tried and proved successful, and prices of flowers would advance, Mr. Vegetable Grower would soon be found giving some attention to the florist business. It is but human nature.

Universal publicity, educating the public to the usages of flowers and plants, instructing them how to grow and care for them, how to employ them, and convince them that they are not luxuries but comforts which gladden the heart and mitigate sorrow and suffering, that is what is now required to increase the selling market for the florists and there is nothing else left to accomplish this for you.

Some will dispute my idea and say that we are having lots of education already and are getting it for nothing, but let me ask you if you ever obtained anything for nothing that was worth anything?

I know the Sunday supplements are furnishing a lot of gardening talk about this season of the year as an incentive to get the florists and seedsmen to advertise in them, but it is not of the right sort. For instance, I picked up a paper yesterday which told how to care for plants during the winter to carry them over into the spring. This information is given in February and will be useful to some next fall. How many people do you imagine that article interested? Such matter is not instructive and will not hold the attention of readers long. Tell them something they can do now and they will be interested. Our garden magazines are already doing much good instructive work in floriculture and horticulture, but they reach a very small percentage of the people. To get at the public, the daily newspaper is the great channel.

CAMBRIDGE, MASS.PLANT QUARANTINE DECISION
NO. 1.

The Federal Horticultural Board recommends that Regulation 6 of the Rules and Regulations for carrying out the Plant Quarantine Act, published in Circular No. 41, Revised, Office of the Secretary, be amended by the addition in the first paragraph of a proviso reading as follows:

Provided, however, That nursery stock which can be cleaned by disinfection or treatment may be delivered to the importer, consignee, or agent for the proper care and treatment thereof, upon the filing of a voluntary bond, with approved sureties, double to the invoice value of the property (the amount of the bond in no case to be less than \$20 or less than \$1 per plant in case of date palms and date-palm offshoots, conditioned upon the delivery thereof) to the collector of customs 40 days from the date of arrival, and provided that the same shall not be removed from the port of entry until a written notice is given to the collector of customs by the inspector of the Department of Agriculture that the nursery stock in question has been properly treated.

Regulation 6, as amended, shall become and be effective on and after April 1, 1913, and the regulation in full shall read as follows:

Regulation 6. Entry of Nursery Stock.
(Section 1.)

On and after July 1, 1913, entry of nursery stock will not be allowed unless the invoice is accompanied by the original certificate and unless each container bears a copy certificate, issued by a duly authorized official of the country from which it is shipped, stating that the nursery stock covered by these certificates has been thoroughly inspected by him or under his direction and was found, or believed to be, free from injurious plant diseases and insect pests: Provided, That for stock to be shipped between October 1 and May 31 such inspection shall be made on or after the 1st of October and for stock shipped during the growing season inspection shall be made at the time of packing: Provided further, That on and after July 1, 1913, nursery stock from countries which do not maintain official nursery stock inspection will be admitted into the United States only for experimental purposes and in limited quantities. For such importations a special permit will be required. (See Reg. 5.) Applications for such permits should be addressed, in writing, to the Federal Horticultural Board, specifying the amount and kinds of nursery stock which it is intended to import. Any such shipments will be allowed to enter only through a port which the Secretary of Agriculture will designate in the permit. Such nursery stock shall not be delivered to the importer or consignee until it has been examined by an inspector of the Department of Agriculture and found to be free from plant diseases and insect pests: Provided, however, That nursery stock which can be cleaned by disinfection or treatment may be delivered to the importer, consignee, or agent for the proper care and treatment thereof, upon the filing of a voluntary bond, with approved sureties, double to the invoice value of the property (the amount of the bond in no case to be less than \$20 or less than \$1 per plant in case of date palms and date-palm offshoots) conditioned upon the delivery thereof to the collector of customs 40 days from the date of arrival, and provided that the same shall not be removed from the port of entry until a written notice is given to the collector of customs by the inspector of the Department of Agriculture that the nursery stock in question has been properly treated.

Prior to July 1, 1913, it will not be re-

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Ea.	Doz.	100
10	20 in.	\$1.45	\$16.00	\$130.00

BUY OR LEASE, 10,000 to 20,000 feet of glass. H., HORTICULTURE.

quired that the original certificate of inspection accompany the invoice, but each container of imported nursery stock must bear a copy of the certificate of inspection in the form authorized by the responsible inspection official of the country of origin.

Prior to July 1, 1913, nursery stock from countries which maintain no official nursery-stock inspection will be admitted into the United States only through the ports of New York, San Francisco, Seattle, Jacksonville, New Orleans, Honolulu, and San Juan after examination by inspectors of the Department of Agriculture at the port of entry, if found to be free from plant diseases and insect pests.

Collectors of customs will be notified from time to time, through the Secretary of the Treasury, of the countries which maintain official nursery stock inspection.

Entry will not be allowed unless the case, box, or other container or covering is plainly and correctly marked to show the number of permit, the general nature and quantity of the contents, the district or locality and country where grown, the name and address of the exporter, and the name and address of the consignee.

Nursery stock offered for entry without compliance with these regulations will be refused admission. Nursery stock, inspected as provided herein, which is found to be carrying dangerous insects or plant diseases may be treated or destroyed, as circumstances require.

Obituary.

Frank Banning.

Frank Banning, of Kinsman, O., well-known as a gladiolus specialist and raiser of several sensational varieties, died on March 19, aged 55 years.

Mrs. August Mirring.

Mrs. Caroline Mirring, wife of August Mirring, a well-known florist of East St. Louis, Ill., died on Wednesday, March 25th. Mrs. Mirring was 36 years old and was the mother of seven children—three boys and four girls, who with the husband mourn her loss.

A. J. Thompson.

Adolphus J. Thompson of 757 Campbell avenue, West Haven, Conn., died Saturday morning March 29, of pneumonia following an illness of two weeks. Mr. Thompson was a well-known florist. He was born in New Haven in 1850 and had been a resident of New Haven and West Haven ever since. Left to survive him are two daughters, Mrs. R. L. Smitley, of Mt. Vernon, N. Y., and Mrs. E. J. Greene, with whom he made his home.

We are sorry to learn of the bereavement of R. W. Clucas, of Sparkill, N. Y., whose son, 17 years of age, died on March 26. This affliction follows close after a fire which destroyed the barn connected with Mr. Clucas' nursery establishment, with horses, and in which a hired man lost his life.

"KEYING" ADVERTISEMENTS.

Much has been said and written about keying advertisements. In many cases the keying system is advisable. It is the only means by which the merits of a paper so far as inquiries are concerned may be determined. It doesn't always signify in an exact way the best method. It is our belief that inquiries from certain papers are worth vastly more than others. One advertiser stated that he would rather have one inquiry from a leading agricultural paper, which he named, than ten from a much larger, but a more general purpose agricultural paper, which shows us clearly that if we are to consider inquiries alone the paper of greatest value would not be first in favor. The merit of an inquiry is something for consideration just as the possibility of that inquiry is of all importance to the man who buys and pays for it.—*Good Advertising.*

EFFECTIVE PUBLICITY.

The Minneapolis Journal, devoted the greater part of three columns of its issue of March 27th to Hints on Flower Culture for Minnesota gardens. The notes which comprised cultural directions on snapdragons, marguerites, tulips and peonies and were very complete, are part of a series written by different members of the local Florists' Club and edited by the Press Committee. The Minneapolis Journal has done much to help interest the public in floriculture and has cordially co-operated with the club in this movement.

LEMON OIL CO'S STANDARD INSECTICIDE

Guaranteed under the Insecticide Act, 1910. Serial No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

TORNADO'S WORK AT COUNCIL BLUFFS.

The most severe property loss in Council Bluffs as a result of Sunday night's tornado was that of the new Wilcox greenhouses at Lake Manawa. The loss here is enormous.

The immense structure of steel and glass is almost ruined and with its destruction came ruin to the hundreds of thousands of American Beauties, carnations and other plants just coming into bloom and upon which thousands and thousands of dollars had been expended. The plants were just beginning to produce. Only a very small section in the center of the plant will be saved. The loss is impossible to estimate, but Roy Wilcox said Monday morning that a rough guess would not put it below \$50,000 to \$75,000. No tornado insurance can be carried on this class of structure. Some hail insurance is carried, but does not cover loss from tornado.

Here, as elsewhere, the storm played some strange freaks. The cottages in which the superintendent and other workmen of the plant live are located within a few rods of the west end of the greenhouses. Not one was harmed in any way, though the big steel and glass structures at the west end were entirely wrecked. Iron posts imbedded four feet in concrete were pulled up and twisted about like reeds. Millions of square feet of glass were broken. At either end of the greenhouses the destruction was complete, but a span in the center was comparatively unharmed.

Five employees were in the service building when the storm struck. This building was entirely destroyed, and the men had a very narrow escape.

NEWS NOTES.

Davenport, Ia. — The Davenport Nursery is now under the management of Wm. H. Mast and W. J. Duppert.

Waltham, Mass. — Albert and James Cartwright have leased the F. R. Mathison greenhouses and will do business under the name of the Mathison Rose Co.

Toronto, Ont. — The big wind storm on Friday, March 28th, completely demolished W. I. Lawrence's large house on Richmond Hill, about 16 miles north of Toronto.

Salt Lake City, Ia. — The flower business of C. S. Martin has been purchased by the Empress Floral Co., consisting of Charles Van Dyke, president; G. F. Flashman, vice-president; J. R. Whitney, Jr., secretary and treasurer; J. F. Walk, manager.

New Orleans, La. — Louis Buchner and Henry Kraak, who have been doing business under the name of the Nashville Avenue Rose Garden, have dissolved partnership. Mr. Buchner will go into business for himself at Iberia as landscape gardener and florist.

Fort Dodge, Ia. — Mr. Demester has resigned as foreman of the North Floral Company and gone into business with W. M. Colwell under the name of the Park Floral Company. As soon as weather permits they plan to erect greenhouses on property which they have leased on North 15th street.

Saginaw, Mich. — In the wind storm of March 21, the brick chimney at the J. B. Goetz Sons' greenhouses, 75 feet high, was blown down and in its fall it cut one greenhouse in two and smashed the boiler house and workroom. The foreman, Mr. Hamilton, had a close call having passed through the house just before the stack fell.

Dreer's Peerless Glazing Points
For Greenhouses

Drive easy and true, because both bevels are on the same side. Can't twist and break the glass in driving. Galvanized and will not rust. No rights or lefts.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

WHAT THE USERS SAY

KROESCHELL HEATS LARGE OFFICE BUILDING.

Enclosed please find another order for No. 9 Kroeschell Boiler. This boiler is for a new office building. In reference to the two No. 3 boilers which you furnished for three buildings last year, will say that we are getting excellent results. The No. 13 is doing duty in a six-story building with 208 radiators and the owner is so well pleased with it that he has ordered a No. 10 Kroeschell for another building which he is erecting, also ordered another No. 11 Kroeschell.

KING HOUSES
BULLETIN No. 38
KING CONSTRUCTION CO.
NORTH TONAWANDA N.Y.**

Thomas Roland, of Revere, Mass., Gives His Reasons For Building a Second L. & B. House

IN 1911 Lord & Burnham built for me at Revere, an Iron Frame, compression truss house, 50 feet wide by 600 feet long.

This house is located on an open piece of ground across which the ocean winds sweep with terrific force. After withstanding so successfully the terrific winds of last year, I was convinced that Lord & Burnham constructed houses were without a doubt, the best houses to build.

When I decided this year to build a house 60 feet wide and 500 feet long, they received the order. Although the house has but two columns, with a space between them

of 39 feet and 8 inches, the rafters are so strongly reinforced by the compression trussing that the house is entirely rigid.

The columns are made of double angle irons separated by cast iron washers, and bolted together at intervals. This makes a column fitting of tremendous strength, eliminating the possibility of buckling.

The use of the compression truss, I believe to be the best of building practice. It is the theory upon which all the large bridges are now being constructed. It allows a construction of great framing strength, while still being unusually light.

I had the sides of the house made seven feet, eleven and three quarters inches high, so I could have ample room to grow anything I wanted to grow, at any time.

I think there can be little question as to the economy of the houses as compared to small or medium ones, both in construction, heating and operating.

Thomas Roland

FACTORIES:

Why the U-BAR

IF you want to prove the U-Bar *whys* up point by point, come and see our exhibition at the NATIONAL FLOWER SHOW.

We will have a full grown house right there in a garden plot. You can make comparisons with other constructions right then and there. There will be some one of us always on hand to give you the glad welcome.

If you can't come, then read what follows, carefully.

Look at the wheels of a bicycle—see what slender little, wire-like spokes they have—yet what strong, sturdy wheels they are. Surely no one would think of going back to the clumsy, old wooden spoked wheel.

By the same token did you ever stop to think how like the bicycle wheel, U-Bar greenhouses are?

No heavy wooden roof bars or large iron framing members—but in their place a complete, all steel frame of U-Bar as light and strong in proportion as are the bicycle spokes.

The cypress core bar is steeped in a chemical preservative before it is placed in the U-Bar.

The galvanized steel U-Bar completely protects the core bar from the inside moisture of the house.

The drip does not drip. It follows down the bottom of the U-Bar, to the purlin lead-offs, or to the cast iron sill. No drip grooves to get stopped up.

Then there's the curved eave—everybody knows the U-Bar curved eave was the original curved eave. It is admitted to be the most practical and attractive of all curved eaves.

No reinforcements of the curved parts of the U-Bar are needed—no heavy iron members to break the view from the inside looking out; or show a heavy line from the outside, looking in.

There's only one U-Bar curved eave, and that's the eave *made with the U-Bar*.

Others may look like it, but that's *the only way* they are like it. We tell you these things as a matter of protection to yourself. If you want the finest greenhouse sold today, for private estates, public institutions or florist show houses—you want the U-Bar. See to it that you get it.

THE CORE BAR.

It is made of Cypress steeped in a chemical preservative.

THE U-BAR.

It is made of steel, heavily galvanized and then aluminum painted.

LILY BULBS

THERE are more men ruined in a day by adventurous trading than in all the gambling houses in the World in a week.

Why risk your business? Sit down and figure it out. Suppose you do get an allowance from allowance-makers for poor lily bulbs.

Who is to help you fill orders? Who's to hold your steady trade? Allowance money won't do it—but your competitors will. Who will pay your normal profits over the flowering period? Have you ever thought of that?

Any allowance that a poor business man might make you for bad lily bulbs won't begin to pay for your loss from bad lilies.

Florists in the United States have made more money in the last five years by using Horseshoe Brand lily bulbs than they made in the previous ten years. They are absolutely the very best that can be obtained.

Send for the Book of Bulbology, out this month.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Bougainvilleas

Bougainvillea cuttings may be struck in April from half-ripened wood, cut up into 6-inch lengths, placed in sand over bottom heat, and in a night temperature of 70 degrees, allowing it to rise 10 degrees with sun heat. Keep moist and shade from the sun and they will root in a few weeks. Give them a good watering; afterward frequent sprinkling or syringing will afford the necessary moisture. When rooted they should be taken out of the sand and placed in small pots filled with good loam containing a liberal sprinkling of clear sand. After the first potting it will be well not to give them very much water at the root for a week, but instead to syringe them twice daily, and protect them from the sun by some shading. When the young plants get established they will make roots rapidly, and should therefore be shifted frequently until they are in 6 or 7-inch pots. A good compost for their shifts is turfy loam four parts, well-rotted manure one part, and some sand; the last shift can be made richer. When the plants are in active growth they will need every attention.

Camellias

Plants of camellias that have been in their resting quarters should be brought into a house where the temperature is from 50 to 55 degrees at night. Some will probably need repotting. For a compost give them a turfy loam four parts, well-rotted cow manure and leaf mold one part each. Give plenty of drainage with clean crocks and pot firm. The soil in the pots should be kept moist and give good syringing in all bright weather which will keep mealy bug and red spider in check. They will require some shade but do not overdo it. During their summer growth they like plenty of ventilation. These plants will be benefited by an occasional turning them around so as to admit every branch to the light. These plants are good subjects for the holiday trade.

Flowers for Memorial Day

Lilies should now be well above the ground. If six inches high now they will be in season. Give them a night temperature of 60 degrees but do not water too freely until satisfied they are well pot-bound. Hydrangeas should now have their heads just peeping. In order not to draw the plants, a night temperature not exceeding 55 degrees is to be preferred, but in case they are late give them 10 degrees more for a time. A spraying overhead on clear days will greatly refresh the plants. They will take water from this out in great abundance and manure water can be applied two or three times a week until the flowers show color. *Spiraea japonica* and its various forms should be brought along now. A temperature of 55 to 60 degrees at night will suit them better than a higher one. Where fine plumes of flowers are wanted give liquid manure twice a week and an abundant supply of water. Benches containing ten-weeks' stocks, gladioli, snapdragons, candytuft and other Memorial Day

crops should be scratched over at least once a week and have all weeds removed.

Hardy Roses

These can be planted any time from now and up to the 20th of April. A proper site for roses is one with a southern exposure where they can have all day sun, with some shelter from the north winds, and clear of all roots of trees or shrubs. While roses will grow and give good returns in any fertile soil, the ideal soil for them is a deep loam that is well-drained. The soil should be plowed or dug deep and if poor renew with sod from an old pasture, which should be liberally enriched with well-rotted manure, cow manure preferred. When planting Teas and Hybrid Teas give them about 18 inches apart each way; Hybrid Perpetuals will need at least two feet apart each way and where lots of space is available six inches more for both will be better. Dig holes sufficiently large and work the soil well through the roots leaving it well firmed. If the weather becomes dry they will need some water at the roots until they get a start.

Planting Shrubs

Every florist who has the ground to spare should make a planting of shrubs and by a plan of careful selection he can have flowers from April until September. All that is necessary is to plow or dig the soil to a depth of 12 or 14 inches and give them a square deal in the way of plenty of manure incorporated through it. When planting give each shrub plenty of room to grow and set them just as deep as they were before; put high shrubs at the back and the low ones to the front. Cut back the tops rather severely so as to balance the loss of roots. In order to hustle them along they should have water at the roots during summer droughts. When the hot weather sets in give the surface a covering of two or three inches of stable manure. This will add tenfold in keeping them moist at the roots. The choice of varieties is perplexing because there are hundreds of lovely shrubs, but these embrace some of the best for April and May flowering: *Forsythia*, *Cornus florida*, spireas, deutzias, flowering almond, *Calycanthus floridus*; for June and July, *hale-sia*, lilacs, *lonicera*, *Azalea nudiflora*, weigelas, hawthorns, syringas, *laburnum*, *viburnum*; for August and September, *althaea*, *Hydrangea paniculata*, *Desmodium pendulifolium* and *Clethra alnifolia*.

Pansies

There are many growers who make a large sowing of pansies either in December or early in January, and prick them out in flats. These now should be large enough to be planted out in a frame, where with a little attention they will grow into fine stock for late sales. Where you want to push them along there is nothing better than a mild hot-bed where they will develop in the shortest time possible. Here they will make fine, stocky and bushy specimens. Give them plenty of ventilation and water at the roots.

Mr. Farrell's next notes will be on the following: Allamanda; as; Cocclygne cristata; Ramblers for Next Easter; Pansies; Peonies; Stevia.

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Cherries Ripening

Cherries, in common with all ripening fruit, require all the air they can get and as the temperature in the cherry house is not so high as it would be for melons or grapes in a similar stage a greater amount of air can be given them. Avoid cold draughts, however, in any cooler weather opening up the ventilators both top and bottom when it is mild. A crack of air should be left on all night to keep a gentle circulation. Syringing should cease when the fruit is half colored; if this is continued longer the fruits are liable to crack. It will not be safe to take the trees outside after the crop has been gathered without giving them some protection, as a late frost will easily damage the foliage which has been subjected to considerable heat recently. Have them taken out to a cool house where they will get hardened off and an occasional syringing for a few weeks. Continue to stop any growths that may be made at four or five leaves which will help to form flower buds for next season.

Muscat of Alexandria in Flower

As the first flowers open in the Muscat house raise the temperature five degrees, making it 70 to 75 during the night, with the usual advance through the day. The night temperature here is of the greatest importance and should not be reduced while the vines are in flower. The usual syringing must stop and the house be kept a little dryer. I am afraid this dryness is sometimes carried to excess, to the detriment of the set. Should the weather be wet or dull very little damping will be needed, but bright sunshine will necessitate occasional dampings, one of which should be done after fertilizing. The soft piece of fur used in earlier houses can again be brought into use to gently distribute the pollen. The rods can also

have a good shake. The sun power we experience in America being so much greater than that of Great Britain must be taken into consideration by those who had their early training there and now are growing fruit in America. More atmospheric moisture and shading are needed in all the warmer states.

Keeping Melons

Last week I referred to prolonging a house of melons; now I will take up the keeping and storing of them. Cut at the proper time from plants that have been treated normally, a melon can be kept in good condition for some considerable time. It must be understood that the flavor never will be better than a day or two after cutting, yet if they have to be cut they can be stored for a time without impairing the flavor to any great extent. While they are hanging, a careful watch must be kept on them to detect the first signs of the sap oozing out at the top of the fruit where the stem joins it. A safeguard to this is to partly cut through the lateral bearing the fruit. This will diminish the supply of sap and often save a crack or burst. After cutting, handle the fruit very carefully as a bruise is fatal. Have a receptacle in the form of a flat box or basket already lined with excelsior and covered over with wax paper ready to receive them.

The storing place is next consideration. Ice boxes are not to be commended for any length of time. If a fruit room has a steady, cool temperature, as it ought to have, this is the place. Failing this, select the coolest cellar and see that no moisture is made around them. Even in the hottest weather melons will be found to keep two weeks in this way. Look over them twice a day to wipe away any moisture that may show itself around the stem. Should this be left it will start decay.

OUTDOOR VEGETABLES AND FRUIT

String Beans

String beans may be sown now in cold frames, but care must be taken to keep them warm and reasonably dry while germinating as they very easily rot if cold and wet. Such varieties as Triumph of the Frames or Canadian Wonder are among the most suitable for this work.

Musk Melons

For outdoor planting these should be sown now in the greenhouse or hot-bed. Sow in pots or pans and as soon as the seeds germinate pot off singly in small pots. As these are going to be subjected to considerable ranges of temperature a little later, it is well to grow them cool and sturdy and in a soil that is not over rich; a temperature of sixty should be the maximum.

Care of Exhibition Stock

The Ailsa Craig onion should be in four-inch pots by this time, as it is poor policy to let them get the least bit pot bound, for that means a check to the growth, and checks must be avoided, both because it affects the ultimate size and perfection of the onion and because it tends to make the plant run to seed, having the same effect as if the plant had been grown two years. This is

true of leeks as well and celery—in fact of any biennial. Allowing plants to get dry is, of course, the commonest form of check, and sudden changes of temperature such as taking the plants from a warm greenhouse to a cold frame without proper hardening off is still another very common form of check, all of which must be carefully avoided if the grower is to produce the best of high-grade exhibition stock.

Globe Artichokes

These plants are very rapid growers and must be treated liberally in regard to potting and manuring. The very reverse of what has been said of leeks, onions and celery is true of these as regards the desirability of the plants receiving a check. As we are very anxious for these plants to flower the first year from seed the best way to bring it about is by growing them along fast and flourishing; then when they have reached about four-inch pot size keep the plants cooler and only apply sufficient water to prevent their wilting too severely. After this process for a couple of weeks resume the ordinary treatment and most of the plants will be sure to flower during the coming summer. Of course the explanation of this is that

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Nitrate of Soda

This fertilizer we always class among the stimulants, and as far as plant growth can be considered, the very best for promoting rapid growth with dark green foliage. If used to excess it will either burn or ruin the plants by making them grow thin and spindly, therefore its use in the rose houses should always be limited to very small doses in the form of liquid and then should only be trusted to an experienced grower to be applied. We like to add about a pound to each one hundred gallons of water. We think it best to add it to the liquid manure which can be applied quite freely at this time of the year. However, we would not advise using nitrate with each watering as it would be bound to make the plants soft. Once in two weeks is quite sufficient.

Lime

At this time of the season when the plants are receiving considerable feed, and especially if a little nitrate is applied as above mentioned, the plants are likely to be a little soft in spite of the precaution taken by ventilating properly. A little lime applied to the benches direct or mixed in with the liquid manure will greatly help in keeping the plants hard and more mildew-resisting than they would be otherwise. Do not apply the lime in any great quantity, but just dust the benches over so that the surface appears white. It is much better to apply a dose quite often and never a heavy dose all at once. When it has to be a heavy dose it is best to let the lime lie on the benches for two or three days. This will cake the lime and it can then be rubbed over and watered. This way the plants will not get all the lime at once but will continue to absorb it as fast as they require it, and no harm whatever can be done.

Houses That are to be Planted Early

In cutting roses in houses that are to be planted early it is just as well to cut as far down as possible making no allowances for eyes or joints of any kind. By doing this, from one to three inches can be added to the stem of the cut bloom, and you will find that the No. 2's are nice No. 1's, to say nothing of the increase in the returns. All such feed as bonemeal should be discontinued,

for if the soil is not used in the garden a large part of this would be wasted.

Among the Young Stock

Keep your eyes open for fly and spider, for there is nothing that will give the plants a more severe set back than any of the two. Tobacco stems can be burned in the houses containing young stock, and no harm will be done to the plants if care is taken while fumigating with the above. The drier the stems can be used the more effective the smoke will be. We have used the stems almost dry with no bad effect on the plants, but of course we would not trust this to everyone. The main point is to keep the stems from burning with a flame. This produces very hot smoke, and it is this that ruins the tender foliage of the plants. Dry smoke is also much more effective than steam laden smoke, and therefore it is well not to fill the houses too full of it. Better smoke lightly and oftener. With the many real good tobacco papers on the market, especially made to make fumigation very simple, we hardly think it pays to bother with the time-wasting method of using tobacco stems. Make sure the plants are wet enough. It is well to fumigate just the night before syringing, as the syringing will finish many pests that have not succumbed to the smoke. On bright, sunny days the potted plants will dry out quite rapidly and should be carefully watched, as if allowed to become too dry they are likely to get a check in growth from which it will take them weeks to recover.

The Repotting

Do not neglect to repot the plants as soon as they begin to crowd the pots in which they are at present. You do not want to begin the season with sickly stunted plants. There are enough of troubles as we all know, therefore let us not invite any more than what come uninvited. Have the soil well enriched with well decayed cow manure, and a little bonemeal, as has been advised time and time again, and the plants simply have to grow, although too much bone is likely to destroy the roots that come into contact with it. The last potting should always be into soil that is especially prepared as this shift prepares the plants for the bench, where the season's results will be determined.

by sowing early and giving the check prescribed we approximate the effect of two seasons' growth, desirable in the case of the Globe artichoke but very undesirable for onions, leeks or celery.

Jerusalem Artichokes

This vegetable is not grown very extensively, but is worthy of a place in most gardens as it is extremely easy to grow, requiring very little care or attention and can be kept on the same ground for years. Nearly any piece of ground will do for this crop. Take medium-sized tubers and plant them in rows three feet apart with about eighteen inches between each tuber, covering with five to six inches of soil. These artichokes will grow so fast that weeds will not be much trouble. In the fall the tops are cut down and the tubers are dug

and stored like potatoes, leaving a portion of the small ones for next season's crop. As a winter vegetable the Jerusalem artichoke is superior to the turnip. The white-skinned kind is more delicate than the purple.

Special Mixtures for Raspberries and Strawberries

To be applied now.

Raspberries:—To every square rod apply, 6 lbs. superphosphate, 3 lbs. kainit, 1 lb. sulphate of ammonia.

Strawberries:—To every square rod apply, 6 lbs. superphosphate, 6 lbs. wood ashes, 1½ lbs. sulphate of ammonia.

Greenhouses Building or Contemplated.....	581

The first four days of the Third National Flower Show, which is as far as we can go at present writing, appear to have settled beyond any question the complete success of this stupendous undertaking. The name "International" as applied to it proves to have been rather a misnomer, but in all other respects the most sanguine hopes have been realized. When and where the next in the series will be located is, of course, a question for the future but we should not be surprised to see New York making a most

emphatic bid in due time for that honor. No doubt can exist now that a similar enterprise in the same hall two or three years hence would be a success as great as, or even greater than the present one.

Popular classes

One thing, often demonstrated in the past and again in evidence at the New York Show, is the partiality of the public for displays of cut roses and carnations and florists' decorative work. The interest manifested in the special cut flower exhibits from day to day was very noticeable and the throngs that surrounded the sections devoted to these classes were made up of all degrees of society including the most exclusive. The dinner table entries were especial centres of attraction and might advantageously have been doubled in number even if it became necessary to increase the number of prizes offered.

Between two fires

While the American Rose Society is said to be slowly forging ahead as to membership it would seem from the report of Secretary Baur that the American Carnation Society has been losing some ground in that respect. Mr. Baur may be right in his explanation of the cause for this falling off and if he is correct then nobody can consistently blame the Carnation Society if it should return, as Mr. Baur urges, to its former plan of independent meetings and exhibitions in mid-winter. It is quite possible, however, that the root of the trouble lies elsewhere and that a withdrawal of the Carnation Society from its alliance and co-operation with the S. A. F., the Rose Society, and others, would fail to bring about the desired result. The proposition strikes us as inopportune—a retrograde expedient which if adopted might injure rather than benefit the Society. Certainly no other one of the affiliated bodies has suffered from the joint arrangement which Mr. Baur from his viewpoint deprecates.

Commercial versus amateur

President Farenwald's comments on the membership question as expressed in his address to the American Rose Society at its meeting in New York this week are worthy of thoughtful perusal by every one interested in the rose and its position, not only commercially but in the estimation of the public. We are in full accord with Mr. Farenwald as to the futility of trying to rally the amateur to the active support of an organization such as the American Rose Society. If the Society will put all its energy into securing a compact, loyal following among the trade and the professional gardeners, it will grow strong and lusty and will then be in a position to deal liberally as to providing medals and other inducements to encourage the formation of local guilds as missionary agencies for the advancement of rose knowledge among the amateurs through neighborhood competition and in other ways. This is the position we have held for years on this much-discussed question and after hearing all the arguments to the contrary we see no reason to change our opinion.

INTERNATIONAL FLOWER SHOW

A Pronounced Success—A Triumph of Horticultural Art—
New York Public Enthusiastic—Throngs of Trade
Visitors from all Sections—Extensive Trade
Displays—Prizes of Great Value Dis-
tributed—Meetings of Affiliated
Societies

This is a big week in New York for the flower-loving public and both parties in the affair appear to have made good. The florists and gardeners have nobly fulfilled their obligation to put up a creditable exhibition and the exposition company have done their part in getting the public to see it. Naturally, the first question one hears is as to the comparative merits of the present show and the one held in Boston two years ago. The Grand Central Palace does not lend itself architecturally to broad effects and impressive vistas as does the Mechanics Building, where the Boston show was staged. The numerous heavy columns and the peculiar limitations of a mezzanine floor interfere as sadly with any attempt to mentally grasp the exhibition as a whole as they do any attempt to photograph it in its entirety.

So there are differences of opinion as to whether the Boston show has yet been outranked. We believe, however, that the present show stands first. We miss the great Dutch garden of Farquhar, the lovely rose garden of Roland and the grand specimen Ramblers of Walsh, but Roland's group of acacias and other hard-wooded greenhouse plants as shown at the Grand Central Palace has certainly never been equalled in this country—if, indeed, in any country under like conditions and there were also collections of ericaceous material of great beauty.

And the Roses—well, Stuart Low, a veteran in flower show matters abroad, gazing on these assembled products of the American rose forcers' art, exclaimed, "I have never seen roses until now." And it was the unanimous verdict of all who saw this superb array last Monday that nothing to

equal it had ever been seen in this country. Words cannot adequately convey an idea of their splendor.

Certain it is, also, that the carnations as shown on Tuesday, although less in number perhaps than on some former occasions, made a new high record for quality. The best displays of over five years ago would make but a sorry spectacle if placed in comparison. So the American Rose Society and the American Carnation Society have won proud laurels and the S. A. F. is a sharer in the honor thus jointly achieved. We do not doubt that we shall be able to record a like superiority in the displays by members of the Sweet Pea Society, for the majority

of the new winter-flowering Spencers were practically unknown two years ago.

The attendance of members of the florist and gardener fraternity was very large. Throughout a considerable section of the Eastern part of the country it was indeed an obscure community that was not represented in the gathering. The West did better than expected considering the recent meteorological disturbances. The "international" character of the affair was upheld mainly by a very creditable representation of Canadians, the only special visitors from across the Atlantic being Messrs. Wm. Wells, Stuart Low and H. DeGraaff.

GENERAL VIEW IN PLANT SECTION

LIST OF AWARDS

IN THE COMPETITIVE SECTION AS REPORTED UP TO WEDNESDAY, APRIL 10.

In the following list it will be noticed that in the interests of brevity we have omitted the class numbers, also the cash amount of the various awards, as superfluous for present purposes. In classes where second or third prizes only were awarded we have omitted same entirely. Awards made later than Wednesday, April 10, will be published in our issue of next week.

OPEN CLASSES.

Flowering Plants.

Acacias, Collection, 100 sq. ft.—Gold Medal and 1st prize, Thomas Roland, Nahant, Mass.
Six Acacias—1st, Thomas Roland; 2nd, L. Dupuy, Whitestone, L. I.
Three Acacias—1st, Thomas Roland; 2nd, Anton Schultheis, College Point, L. I.
Acacia, Specimen—1st, Thomas Roland; 2nd, Mrs. F. A. Constable, gard. J. Stuart, Mamaroneck, N. Y.
Acacia pubescens, Specimen—Thomas Roland.
Acacia paradoxa, Specimen—Thomas Roland.
Amaryllis vittata hybrids—Mrs. D. Willis James, supt. Wm. Duckham, Madison, N. J., three 1st.
Anthurium—W. A. Manda, So. Orange, N. J.
Azalea Indica, Specimen—Mrs. H. McK. Twombly, gard. R. Tyson, Convent, N. J., one 1st; C. B. Newbold, gard. S. J. Batchelor, Jenkintown, N. J., two 1st.
Begonias, Flowering—Henry Siegel, Mamaroneck, N. Y., gard. T. Aitchison.
Bougainvillea, Specimen—Thomas Roland.
Chorizema—Mrs. F. A. Constable.
Cyclamen, 50 sq. ft.—1st, Thomas Roland, Nahant, Mass.; 2nd, Mrs. F. A. Constable.
Cyclamen, twenty-four plants—R. & J. Farquhar & Co., Boston, Mass.
Cyclamen, twelve plants—C. B. Newbold.
Cyclamen, six plants—1st, Mrs. D. Willis James; 2nd, J. H. Ottley, gard. Jas. McDonald, Glen Cove, N. Y.
Ericas—1st, Louis Dupuy, Whitestone, N. Y.; 2nd, Thomas Roland.
Erica melanthera—Louis Dupuy.
Flowering and Foliage, Stove and Greenhouse plants, arranged for effect—Gold Medal and 1st prize, Julius Roehrs Co., Rutherford, N. J.
Forced Shrubs, Herbaceous Plants; arranged for effect—Gold medal and 1st to Bobbink & Atkins, Rutherford, N. J.; 2nd, W. A. Manda, So. Orange, N. J.
Gardenia—1st, John T. Pratt, gard. J. W. Everitt, Glen Cove, N. Y.; 2nd, Louis Dupuy.
Genista—1st, W. W. Edgar Co., Waverly, Mass.; 2nd, Louis Dupuy.
Geraniums—1st, F. Marquardt, Middle Village, N. Y.; 2nd, W. A. Manda.
Heliotrope, six standard—Mrs. Willis James.
Heliotrope, Specimen plant—Silver Cup, J. H. Ottley.
Hydrangeas, ten plants—1st, Louis Dupuy; 2nd, Anton Schultheis; 3rd, J. H. Fleisser, North Bergen, N. J.
Hydrangeas, six plants—1st, Louis Dupuy; 2nd, Bobbink & Atkins, Rutherford, N. J.; 3rd, Anton Schultheis.
Hydrangea, Specimen—1st, John W. Pepper, gard. W. Robertson, Jenkintown, Pa.; 2nd, Bobbink & Atkins; 3rd, Anton Schultheis.
Imantophyllum—Mrs. H. McK. Twombly.
Marguerite, Specimen plant—1st, Madsen & Christensen, Wood Ridge, N. J.; 2nd, Mrs. Oliver Hoyt, gard. J. Foster, Stamford, Conn.
Fansies—1st, Wm. Sim, Cliftondale, Mass.; 2nd, A. L. Miller, Brooklyn, N. Y.
Primula Kewensis—Percy Chubb, gard. A. McKenzie, Glen Cove, N. Y.
Primula obconica—1st, John Wanamaker, supt. J. H. Dodds, Wyncote, Pa.; 2nd, Adolph Lewisohn, gard. J. Canning, Ardsley, N. Y.; 3rd, Charles M. Wernig, York, Pa.
Primula in variety—Percy Chubb.
Rhododendron group—1st, Bobbink &

Atkins; 2nd, F. R. Pierson Co., Tarrytown, N. Y.
Bulbs in bloom, Collection—Anton Schultheis.
Lilies, 50 sq. ft.—1st, H. Mode Flower Cup and Medal to Anton Schultheis.
Easter Lilies, 100 pots—The Mitchell Lily Cup and Medal. Anton Schultheis.
Narcissus, twenty 10-inch pans, six or more varieties, Double and Single, and for effect, to cover 150 sq. ft.—1st, Anton Schultheis.
Tulips—Anton Schultheis, Silver Cup and three 1st.
Bulbous Plant, Specimen—Warnaar & Co., Sassenheim, Holland, Narcissus King Alfred.
Miscellaneous Bulbs, Collection—Anton Schultheis.

Ferns.

Adiantum Farleyense—1st, Mrs. D. Willis James; 2nd, A. N. Pierson, Cromwell, Conn.
Adiantum cuneatum—Wm. B. Thomson, Yonkers, N. Y.
Cibotium Schiedei—1st, C. B. Newbold; 2nd, W. A. Manda.
Davallia—W. A. Manda.
Ferns, Stove and Greenhouse plants, 12 plants—Grand Silver Medal, W. A. Manda.

VanVorst, gard. A. Anderson; 2nd, W. A. Manda.
Cypripediums—1st, Lager & Hurrell; 2nd, W. A. Manda.
Dendrobium, twenty plants—Gold Medal, W. A. Manda.
Dendrobium nobile—1st, Sidney M. & Austin Colgate, gard. Wm. Reid, Orange, N. J.; 2nd, W. A. Manda; 3rd, Lager & Hurrell.
Dendrobium Wardianum—W. A. Manda.
Dendrobium, Specimen—1st, Julius Roehrs Co.; 2nd, W. A. Manda.
Hybrid Orchid, raised in America—Gold Medal, 1st, James Goodier; Silver Medal and 2nd, W. A. Manda.
Laelio-Cattleya—1st, W. A. Manda; 2nd, Lager & Hurrell.
Any other Bigeneric Hybrid—1st, W. A. Manda; 2nd, Lager & Hurrell.
Odontoglossum—1st, Julius Roehrs Co.; 2nd, Sir Jere Colman.
Oncidium—W. A. Manda.
Nanda—1st, Lager & Hurrell; 2nd, W. A. Manda.
Specimen, any other Orchid—1st, Lager & Hurrell; 2nd, Clement Moore.

Palms and Foliage Plants.

Areca lutescens, two plants—Metairie Ridge Nursery Co., New Orleans, La.

PARTIAL VIEW OF ROLAND'S PLANT GROUP

Ferns, Stove and Greenhouse plants, six plants—Silver Cup and 1st, W. A. Manda.
Nephrolepis Bostoniensis—1st, Howard Gould, gard. W. W. Vert, Ft. Washington, N. Y.; 2nd, Frank N. Eskesen, Madison, N. J.
Nephrolepis, any other variety—Grand Bronze Medal and 1st, F. R. Pierson Co., 2nd, W. A. Manda.
Collection of Nephrolepis—F. R. Pierson Co.
Stag's Horn Ferns—W. A. Manda.
Stag's Horn Fern, Specimen—1st, John W. Pepper; 2nd, R. Delafield, gard. Wm. Brock, Tuxedo Park, N. Y.
Selaginellas—W. A. Manda.
Selaginella, Specimen—1st, Benj. Stern, gard. W. D. Robertson, Roslyn, N. Y.
Tree Fern—1st, Julius Roehrs Co.; 2nd, W. A. Manda.
Fern, Specimen—1st, John W. Pepper; 2nd, R. W. Delafield.

Orchids.

Orchids in flower, 100 sq. ft.—Gold Medal and 1st, Julius Roehrs Co.; 2nd, James Goodier, Trenton, N. J.
Orchids, twelve plants—Silver Medal and 1st, Anton Schultheis; 2nd, W. A. Manda.
Orchids, six plants—Clement Moore, gard. John Mossman, Hackensack, N. J.
Brasso-Cattleya—1st, Clement Moore; 2nd, Lager & Hurrell, Summit, N. J.
Orchid, Specimen—Silver Cup, 1st, Sir Jere Colman, Galton Park, England; 2nd, W. A. Manda.
Cattleya Mossiae—1st, Lager & Hurrell; 2nd, W. A. Manda.
Cattleya Schroederiae—1st, Mrs. F. B.

Areca lutescens, Specimen—1st, Mrs. F. A. Constable; 2nd, Metairie Ridge Nursery Co.
Bay Trees, pyramidal—1st, Bobbink & Atkins; 2nd, Julius Roehrs Co.
Bay Trees, standard—1st, Mrs. H. McK. Twombly; 2nd, Julius Roehrs Co.
Bay Trees, columnar—Julius Roehrs Co.
Box Trees, pyramidal—1st, W. A. Manda; 2nd, Bobbink & Atkins.
Box Trees, standard—1st, W. A. Manda; 2nd, Bobbink & Atkins.
Box Trees, bush—1st, Bobbink & Atkins; 2nd, Julius Roehrs Co.
Box Trees, trained plants—1st, Bobbink & Atkins; 2nd, W. A. Manda.
Crotons—Robert Craig Co., Philadelphia, Pa., two 1st.
Cycad, Specimen—W. A. Manda.
Dracaena, 100 sq. ft.—Gold Medal and 1st, John Wanamaker, supt. J. H. Dodds, Wyncote, Pa.; 2nd, W. A. Manda.
Dracaena, twelve plants—1st, Robert Craig Co.; 2nd, W. A. Manda.
Dracaena, Specimen, red—1st, John Wanamaker; 2nd, W. A. Manda.
Dracaena, Specimen, green—1st, John Wanamaker; 2nd, Adolph Lewisohn, gard. J. Canning, Ardsley, N. Y.
Dracaena, Specimen, any other color—1st, John W. Pepper; 2nd, Adolph Lewisohn.
Alocasias and Aroids, 50 sq. ft.—1st, Silver Cup, W. A. Manda.
Ficus pandurata—1st, Mrs. F. A. Constable; 2nd, Julius Roehrs Co.
Kentia Belmoreana, two plants—1st, W. A. Manda; 2nd, Bobbink & Atkins.
Kentia Belmoreana, Specimen—1st, Mrs. H. McK. Twombly; 2nd, W. A. Manda.

LIST OF AWARDS

Kentia Forsteriana, Specimen—1st, Mrs. F. A. Constable; 2nd, W. A. Manda.
 Phoenix Roebelenii—1st, John Wanamaker; 2nd, Wm. B. Thompson.
 Phoenix rupicola—W. A. Manda.
 Palms and Cycads, 200 sq. ft.—Gold Medal and 1st, W. A. Manda.
 Palms, twelve plants—1st, W. A. Manda; 2nd, Bobbink & Atkins.
 Palms, six plants—1st, John Wanamaker; 2nd, W. A. Manda.
 Palm, Specimen—1st, W. A. Manda; 2nd, John Wanamaker.
 Stove and Greenhouse Plants—1st, W. A. Manda; 2nd, John Wanamaker.
 Stove and Greenhouse Plants Climbing—Silver Medal and 1st, John Wanamaker; 2nd, W. A. Manda.
 Asparagus—W. A. Manda.
 Bambusa—W. A. Manda.
 Conifers, three plants—1st, F. R. Pierson Co.; 2nd, Bobbink & Atkins.
 Conifers, two plants—1st, F. R. Pierson Co.; 2nd, W. A. Manda.
 Dieffenbachia—John Wanamaker.
 Holly—Bobbink & Atkins.
 Rhododendrons—1st, A. Schultheis; 2nd, Bobbink & Atkins.

New Plants Not in Commerce.

Conifer, hardy—Silver Medal, W. A. Manda.
 Cycad, species—Silver Medal, W. A. Manda.
 Dracaena—Silver Medal, W. A. Manda; Bronze Medal, Julius Roehrs Co.
 Fern, species—Silver Medal, W. A. Manda.
 Fern, variety—Silver Medal, W. A. Manda; Bronze Medal, John W. Pepper.
 Palm, Specimen—Silver Medal, W. A. Manda.
 Shrub, hardy—Silver Medal, W. A. Manda.

New Flowering Plant—Adolph Lewisohn.

PRIVATE GROWERS' CLASSES.

Amaryllis, twenty-five plants—Silver Cup, Howard Gould.
 Amaryllis, six plants—1st Howard Gould; 2nd, Mrs. D. Willis James.
 Anthurium, Specimen—John W. Pepper.
 Azalea Indica—Sam'l Untermyer.
 Azalea Indica, Specimen—C. B. Newbold.
 Begonias—W. D. Thompson.
 Calceolaria—Percy Chubb.
 Cineraria stellata—1st, C. B. Newbold; 2nd, W. B. Thompson.
 Cineraria stellata, Specimen—Bronze Medal of Excellence, Percy Chubb.
 Cyclamen, twenty-five plants—Silver Cup, J. J. Albright, gard. Chas. Sandford, Buffalo, N. Y.; 2nd, Percy Chubb.
 Cyclamen, twelve plants—C. B. Newbold.
 Crotons, twenty-five plants—Mrs. D. Willis James.
 Crotons, eighteen plants—F. V. Burton, gard. Wm. Cordes, Newburgh, N. Y.
 Crotons, six plants—Silver Cup, F. V. Burton.
 Dracaena Sanderiana—1st Mrs. D. Willis James; 2nd, John Wanamaker.
 Dwarf Evergreens, Collection, American grown—Silver Cup, Mrs. A. A. Anderson, gard. Robt. Williamson, Greenwich, Conn.
 Gloxinias—W. B. Thompson.
 Hydrangeas—Silver Cup, Wm. Ziegler, Jr., gard. A. Bieschke, Noroton, Ct.
 Imantophyllum—1st, C. B. Newbold; 2nd, Benj. Stern, gard. W. D. Robertson, Roslyn, L. I.
 Hydrangeas, French—1st, Wm. Ziegler, Jr.; 2nd, John Wanamaker.
 Lilacs—1st, Mrs. D. Willis James; 2nd, H. Darlington.
 Primula Kewensis, twelve plants—Percy Chubb.
 Palms, two plants—Geo. F. Baker, Tuxedo Park, N. Y.
 Palm, Specimen—1st, Wm. Ziegler, Jr.; 2nd, Geo. F. Baker.
 Palms, twelve plants—Mrs. D. Willis James.
 Roses in pots, display, 100 sq. ft.—Silver Cup, Sam'l Untermyer; 2nd, Mrs. D. Willis James.
 Schizanthus—1st, C. K. G. Billings, gard. J. Bell, New York; 2nd, Percy Chubb, gard. Alex. Mackenzie, Glen Cove, L. I.
 Schizanthus, Specimen—C. K. G. Billings.
 Sansevieria—1st, Geo. F. Baker; 2nd, Wm. Ziegler, Jr.
 Spiraea or Astilbe—1st, C. B. Newbold; 2nd, Sam'l Untermyer.
 Stove and Greenhouse Foliage Plants—1st, Mrs. D. Willis James; 2nd, John Wanamaker.

Stove and Greenhouse, three Foliage Plants—Sam'l Untermyer.
 Stove or Greenhouse, Specimen—Geo. F. Baker.
 Flowering Plant, Stove or Greenhouse—1st, J. T. Pratt; 2nd, Sam'l Untermyer.
 Stove Plants, group—Mrs. D. Willis James.
 Wistaria—C. B. Newbold.
 Adiantum Farleyense—Bronze Medal, Mrs. H. McK. Twombly.
 Adiantum Farleyense "Ruhm von Mor-drecht"—John W. Pepper.
 Cyrtomium falcatum Rochfordianum—John W. Pepper.
 Davallia, Specimen—William. Thatcher, Brookline, Mass.
 Stag's Horn Fern—1st, Wm. Ziegler, Jr.; 2nd, Jas. Goodier.
 Bulbs—Silver Cup, Mrs. A. M. Booth, gard. E. Fardel, Great Neck, L. I.
 Hyacinths, eight pans—1st, R. Hughes, gard. J. A. Macdonald, Flushing, L. I.; 2nd, Mrs. A. M. Booth.
 Hyacinths, white—1st, Mrs. A. M. Booth; 2nd, J. T. Pratt.
 Hyacinths, pink or red—1st, Mrs. A. M. Booth; 2nd, J. T. Pratt.
 Hyacinths, light blue—1st, R. Hughes; 2nd, J. T. Pratt.

servatories, Natick, Mass.; 2nd, Jos. Heacock.
 50 Double White Killarney—1st, A. N. Pierson, Inc.; 2nd, Bedford Floral Co.
 50 Richmond—1st, Jos. Heacock; 2nd, Poehlmann Bros.
 50 Sunburst—Myers & Samtman.
 100 American Beauty—1st, Poehlmann Bros.; 2nd, Henry Hentz, Jr.; 3rd, Louis A. Noe.
 50 American Beauty—1st, Poehlmann Bros.; 2nd, H. Hentz, Jr.; 3rd, Myers & Samtman.
 50 Dark Pink Killarney—1st, A. N. Pierson, Inc.; 2nd, Jos. Stevenson's Sons.
 50 Double Pink Killarney—1st, A. N. Pierson, Inc.; 2nd, Jos. Stevenson's Sons.
 50 White Killarney—1st, Waban Rose Conservatories; 2nd, A. N. Pierson Co.
 50 Killarney Queen—1st, A. N. Pierson, Inc.; 2nd, F. R. Pierson Co.
 50 Radiance—1st, John Stevenson's Sons; 2nd, Gude Bros.
 50 Lady Hillingdon—1st, A. N. Pierson, Inc.; 2nd, Edward Towell.
 50 Mrs. Aaron Ward—1st, A. N. Pierson; 2nd, Poehlmann Bros.
 50 My Maryland—1st, Edward Towell; 2nd, John Welsh Young.

PARTIAL VIEW OF ROLAND'S PLANT EXHIBIT

Hyacinths, dark blue—1st, J. T. Pratt; 2nd, Mrs. A. M. Booth.
 Lilies—C. K. G. Billings, gard. J. Bell, New York.
 Narcissus, Bicolor—J. T. Pratt.
 Narcissus, Emperor—J. T. Pratt.
 Narcissus, Double Von Sion—Benj. Stern.
 Tulips, Early Single—1st, Mrs. A. M. Booth; 2nd, J. T. Pratt.
 Tulips, Darwin—R. Hughes.
 Miscellaneous Bulbs, Collection—Silver Cup, Sam'l Untermyer.
 Orchids, twelve plants—Clement Moore.
 Orchids, three plants—Mrs. F. B. Van Vorst.

OPEN CLASSES.

Rose Plants.

Display of Roses in pots or tubs, to occupy 300 sq. ft. arranged for effect—1st, Anton Schultheis; 2nd, H. C. Steinhoff Co.
 Climbing, Specimen—John W. Pepper.
 Hybrid Perpetual—1st, H. C. Steinhoff; 2nd, Louis Dupuy.
 Polyantha, pink—1st, Louis Dupuy; 2nd, H. C. Steinhoff.
 Polyantha, white—Louis Dupuy.
 Collection Hybrid Perpetuals—H. C. Steinhoff.
 Rose, "Silver Moon"—Percy Chubb.
 Rose, "Dr. W. Van Fleet"—Percy Chubb.
 In Sec. 2 devoted to cut orchid blooms, one stem to each class, W. A. Manda won four firsts, S. Untermyer and W. D. Robertson one each.
 Anthuriums—Manda, one.
 Antirrhinums—Percy Chubb, three, and Geo. E. Buxton, Nashua, N. H., one first.
 Violets—Howard Gould, one.

Cut Roses.

50 Killarney—1st, Waban Rose Con-

50 Melody—1st, Robert Scott; 2nd, Poehlmann Bros.
 50 Mrs. Taft (Prince of Bulgaria)—1st, Poehlmann Bros.; 2nd, Bedford Floral Co.
 50 Any other disseminated variety white—1st, Louis A. Noe; 2nd, F. H. Kramer.
 50 Any other disseminated variety pink—1st, F. H. Kramer; 2nd, W. H. Elliott.
 25 American Beauty—1st, Myers & Samtman; 2nd, Louis A. Noe; 3rd, Jefferson Doremus.
 25 Killarney—1st, A. N. Pierson, Inc.; 2nd, John A. Andre.
 25 Double Pink Killarney—1st, A. N. Pierson, Inc.; 2nd, Myers & Samtman.
 25 White Killarney—1st, Joseph Heacock; 2nd, A. N. Pierson, Inc.
 25 Killarney Queen—1st, A. N. Pierson, Inc.; 2nd, Bedford Floral Co.
 25 Richmond—1st, Poehlmann Bros.; 2nd, L. B. Coddington.
 25 Radiance—1st, Jos. Stevenson's Sons; 2nd, L. B. Coddington.
 25 Lady Hillingdon—1st, F. R. Pierson Co.; 2nd, L. B. Coddington.
 25 Mrs. Aaron Ward—1st, A. N. Pierson, Inc.; 2nd, Poehlmann Bros.
 25 My Maryland—1st, John Welsh Young; 2nd, Jefferson Doremus.
 25 Melody—R. Scott & Son.
 25 Mrs. Taft—1st, Poehlmann Bros.; 2nd, Bedford Floral Co.
 25 Bride—1st, Louis A. Noe; 2nd, F. H. Kramer.
 25 Bon Silene—Harry O. May.
 25 Any other red—Guttman Floral Co.
 25 Any other white—Brant-Hentz Floral Co.
 25 Any other pink—1st, Robert Simpson; 2nd, Myers & Samtman.

LIST OF AWARDS

FOR RETAILERS ONLY.

Most artistic display of Cut Roses, with such accessories as the exhibitor may desire.

Corsage Bouquet Roses—1st, S. A. Anderson, Buffalo, N. Y.; 2nd, A. T. Bunyard, New York.

Bridal Bouquet—1st, Max Schling, New York; 2nd, A. T. Bunyard.

Basket Roses—1st, S. A. Anderson; 2nd, A. T. Bunyard.

Table Decoration—1st, A. T. Bunyard; 2nd, Max Schling.

Mantel Decoration—1st, A. T. Bunyard; 2nd, Max Schling.

PRIVATE GROWERS' CLASSES.

Roses, Killarney, Double Pink Killarney, My Maryland, White Killarney—1st in each, J. Wanamaker.

Vase 25 Roses—1st, F. W. Vanderbilt; 2nd, J. Wanamaker.

OPEN CLASSES.

Carantions.

100 blooms, white—1st, Cottage Gardens Co., Queens, N. Y.; 2nd, E. A. Stroud, Stratford, Pa.

100 flesh pink—1st, F. B. Adams, Blue Point, L. I.; 3rd, E. A. Stroud.

100 light pink—1st, Cottage Gardens Co.; 2nd, A. A. Pembroke, Beverly, Mass.

100 red or scarlet—1st, Cottage Gardens Co.; 2nd, Poehlmann Bros. Co., Morton Grove, Ill.; 3rd, A. S. Burns, Jr., Spring Valley, N. Y.

100 crimson—M. A. Patten, Tewksbury, Mass., with Princess Dagmar.

100 white variegated—1st, A. A. Pembroke; 2nd, John Barr, South Natick, Mass.; 3rd, F. R. Pierson Co.

100 mottled or overlaid—M. A. Patten.

100 any other color—Cottage Gardens Co.

50 White Perfection—1st, Cottage Gardens Co.; 2nd, S. J. Goddard, Framingham, Mass.

50 White Enchantress—1st, A. A. Pembroke; 2nd, A. S. Burns, Jr.; 3rd, A. N. Pierson Co.

50 White Wonder—1st, U. S. Cut Flower Co., Elmira, N. Y.; 2nd, A. A. Pembroke; 3rd, S. J. Goddard.

50 Any other White—1st, Strout's, Biddeford, Maine; 2nd, U. S. Cut Flower Co.

50 Enchantress—1st, A. S. Burns, Jr.; 2nd, U. S. Cut Flower Co.

50 Any Dark Pink—1st, A. A. Pembroke; 2nd, A. N. Pierson; 3rd, C. B. Dreyer.

50 Beacon—1st, Strout's; 2nd, S. J. Goddard; 3rd, Cottage Gardens Co.

50 Victory—Henry Western, Hempstead, L. I.

50 Harry Fenn—1st, S. J. Goddard; 2nd, W. D. Howard, Milford, Mass.

50 Any white variegated—1st, A. A.

Gold Medal for the best vase of 100 blooms of any undisseminated seedling Carnation—Peter Fisher, Gorgeous; M. A. Patten, Princess Dagmar, and Cottage Gardens Co., Matchless.

Table Decoration—1st, R. Tyson, Convent, N. Y.; 2nd, George H. Cooke, Washington, D. C.; 3rd, Alfred T. Bunyard, N. Y.

Best hamper of Carnations—Alfred T. Bunyard.

RAMBLER ROSE GROUP—THE UNTERMAYER EXHIBIT

Bronze Medal for third best vase in above class—M. A. Patten.

THE TRADE EXHIBITS

The "Trade" exhibits were numerous, many of them very extensive and they were well-located on the mezzanine floor mainly where there was abundant light and plenty of room for interviewing customers. The New York seedsmen made particularly large and elaborately arranged exhibits as did also the leading plant growing establishments, many of whom were, in addition, represented in various competitive classes.

Following is a list of the trade exhibitors:

C. H. Totty, Madison, N. J., an attractive booth with new carnations and rose novelties.

F. R. Pierson Co., Tarrytown, N. Y., handsome group of *Nephrolepis* varieties, carnations, etc.

Julius Roehrs Co., Rutherford, N. J., attractive group of greenhouse plants in commercial sizes.

Robert Craig Co., Philadelphia, crotons, of course—a choice lot.

P. Hamilton Goodsell, New York, group of rhododendrons and other hardy plants.

H. F. Mitchell Co., Philadelphia, booth elaborately laid out in parterre effect.

Bobbink & Atkins, Rutherford, N. J., large displays of trained English ivy, clipped buxus and other topiary objects.

Knight & Struck, New York, a beautiful collection of ericas, epacrises, boronias, acacias, chorizemas and similar material.

Joseph Heacock, Wyncote, Pa., palms and ferns.

Wm. Tricker, Arlington, N. J., made a very attractive arrangement of aquatic plants and water side shrubbery and grasses.

R. J. Irwin, New York, florists' young plant stock.

W. E. Marshall & Co., New York, large display of seeds and bulbs.

Burnett Bros., New York, seeds, bulbs and implements.

A. N. Pierson, Cromwell, Conn., a very large space elaborately laid out and arrayed with great masses of Farleyense ferns, vases of new roses and carnations, plants, etc. A very live corner and constantly crowded.

Peter Henderson & Co., New York, made a very extensive display. The scene was a Holland landscape with a Dutch cottage as the central feature, and over the door the inscription "From Holland to America." The foreground was a garden scene with lawns and flower beds of tulips, hydrangeas, etc.

Bobbink & Atkins, Rutherford, N. J., cedar plant tubs and garden furniture.

H. Bayersdorfer & Co., Philadelphia, made a very extensive display of florists' supplies of every description. This booth was elaborately decorated and in fine taste and business was active.

Reed & Keller, New York, are always large exhibitors at these shows. A great variety in supplies, baskets and ingenious novelties of wire construction were shown here.

S. S. Pennock-Meehan Co. of Philadelphia, New York and Washington,

made the most attractive display of florists' ribbons. They were shown against a white background, making a very tasteful booth.

Max Schling, New York, baskets and other floral arrangements artistically displayed.

John Lewis Childs, Flowerfield, N. Y., a booth tastily adorned with calla Elliottiana and vases of summer bulb bloom.

Benj. Hammond, Fishkill, N. Y., display of paints, putty, insecticides and other specialties.

Lion & Co., New York, ribbons.

Russin & Handling, New York, baskets, etc.

M. Adler, New York, pearl flower pins.

Wertheimer Bros., New York, a large display of ribbons.

Schloss Bros., New York, ribbons.

J. G. Neidlinger, Philadelphia, artificial flowers, baskets, etc.

Meade, Suydam Co., E. Orange, N. J., concrete greenhouse benches.

Revere Rubber Co., Boston, showed Revere hose. A big coil of hose with the center left open and filled with a miniature illuminated garden scene attracted a crowd constantly.

Johnston Heating Co., New York, greenhouse boilers.

Kroeschell Bros. Co., Chicago, heating apparatus.

Quaker City Machine Co., Richmond, Ind., ventilating apparatus.

H. V. Pearce, Detroit, steam traps.

American Auxiliary Heating Co., Boston, circulator.

Wm. S. Haines & Co., Philadelphia, vacuum heater.

N. Y. Stable Manure Co., New York, pulverized manure.

Plantlife Co., insecticides.

J. P. Dahlborn, Weehawken Heights, N. J., Hontsch greenhouse boiler.

Bon Arbor Chemical Co., Paterson, N. J., plant food.

Consumers' Fertilizer Co., New York, plant food.

Dunham Co., Berea, O., water-weight lawn mower.

R. M. Ward & Co., New York, a superb display of Horseshoe Brand Lily Bulbs.

J. M. Thorburn & Co., New York, seed, corn and potatoes, with a brilliant garden scene and wicket gate for a setting.

Lemon Oil Company, Baltimore, Md., exhibit of their Standard Insecticides.

A. Cowee, Berlin, N. Y., Gladiolus Bulbs of High Degree.

B. Hammond Tracy, Wenham, Mass., Gladiolus booth tastefully furnished.

Coldwell Lawn Mower Co., Newburgh, N. Y., motor mowers.

King Construction Co., North Tonnawanda, N. Y., section of truss greenhouse.

Aphine Mfg. Co., Madison, N. J., Insecticides and Fungicides.

Lord & Burnham Co., New York, section of greenhouse, modern construction, curved eave and improved ventilating apparatus.

Weathered Co., Jersey City, N. J., section of greenhouse with heating apparatus, etc.

Hitchings & Co., New York, section of greenhouse construction, ventilation, heating and fittings.

H. G. Dreyer & Son, New York, florists' sundries, adjustable plant stands, etc.

Means & Thatcher, Boston, Mass., paints.

Pierson U-Bar Company, New York. Section of greenhouse, with U-Bar construction and special heating and ventilating improvements.

Metropolitan Material Co., Brooklyn, N. Y., section of commercial greenhouse and heating apparatus.

Fottler, Fiske, Rawson Co., Boston, seedsmen's sundries.

Arriving at Grand Central Palace by Autocar from Philadelphia.

THE MEETINGS AND LECTURES.

"The King's Florist" who was booked for half a dozen lectures on Floral Art, did not show up. A telegram received by the secretary stated that sickness in his family prevented his leaving London. The "Opening Exercises" and addresses of welcome scheduled for the first evening were largely of the wireless character. On Sunday evening E. H. Wilson, of the Arnold Arboretum, was right on his job at the hour announced and gave a very interesting lecture on China and Chinese Plants, much handicapped, however, by an unsuitable slide machine and other inconveniences as well as the uproar of music and applause in the exhibition hall adjoining.

The meeting of the S. A. F. set for Monday forenoon failed to materialize. On Monday evening J. Horace McFarland, of Harrisburg, gave his stereopticon lecture on the Arnold Arboretum under exasperating difficulties with the slide operator, but it was greatly enjoyed by the audience who were close enough to hear.

On Tuesday afternoon Robert Pyle, of West Grove, Pa., gave a lecture on Roses and Decorative Plants and on Tuesday evening J. K. M. L. Farquhar held the stage with a fine lecture on Japan and Japanese Flora, and had the largest audience thus far. In our next issue we shall have the story of the rest of the proceedings for the balance of the week.

AMERICAN ROSE SOCIETY.

The American Rose Society held its meeting according to schedule, in the lecture room of the Grand Central Palace on Tuesday, April 9. President Farenwald read a cheery address. Reports were made by Secretary Hammond and Treasurer May. The election of officers resulted as follows: President, Wallace R. Pierson; vice-president, Robert Pyle; secretary, Benj. Hammond; treasurer, Harry O. May; executive committee members, J. H. Dunlop and S. S. Pennock. Several protests on the judge's decisions in the exhibition were heard and the judges were unanimously sustained. Alex. Cumming of Hartford, Conn., read an interesting paper on Roses and Rose Gardens. Robert Pyle presented a communication from Prof. B. T. Galloway, advocating the establishment of a rose garden in Washington and expressing confidence in the possibility of practical co-operation and support for the project by the U. S. Department of Agriculture. Several members spoke approvingly and the appointment of a committee to work in conjunction with Prof. Galloway and the S. A. F. was approved.

Eber Holmes read an instructive paper, which we hope to publish in our columns at a later date.

President's Address.

A little over a year ago we met in Detroit, under raw, chilly conditions. Although the weather was so much against us, the American Rose Society can look back to it with pride only. The exhibition was never surpassed in quality and quantity. Our members

showed a loyalty and enthusiasm which was highly commendable, to come at such an unfavorable time of the year, and in severe winter weather. It was a great pity that this splendid show was not better patronized by the public.

Our membership is slowly increasing, but not at the rate it should be for such a worthy cause, the advance of the Queen of Flowers, the main stay of the business, the bread and butter of most everybody. Why are so many standing pat, when we need them so badly? Do they think we have reached the high water mark of popularity? I hardly think so. There is lots of room for expansion. So we need you, Mr. Stand Pat. See the hustle and bustle everywhere in our business today, better to unite, to come together, to help one another; that is the spirit of the times. Anybody who shuts his eyes to these conditions and refuses his help is not worth his salt. That's my candid opinion.

Regarding our amateur membership agitation, I want to express myself as against that movement, for various reasons. We are a body of commercial men, specialists. We are not in it for pleasure, though most of us derive pleasure from attending to the Queen of Flowers, but pleasure does not pay our coal bills, and others, so with us the financial side of the question is the primary issue. All this does not interest the amateur, and the history of our Society will back me up in what I say. The most of you will remember our early struggles with this amateur problem. It was useless to attract the amateur to a body of professional men. It was a waste of effort in every way; it brought our Society down to its knees; only the untiring, loyal work of our commercial members saved it from utter collapse. Let us take a leaf from this past history, and give it up. Let our efforts be directed to the making of a strong commercial Society, so that we are not swayed first one way and then the other, vainly trying to accomplish something we are not able to do, as has so long ago been proved. The public is gradually being educated to the value of roses in home decorations and the most enthusiastic amateurs will finally start their own societies, with a sprinkling of professional men among them, like the horticultural societies are doing today. Those are the true amateur societies which will grow and prosper, but in my estimation, no commercial body of men can interest the amateur.

Affiliation is the watchword of today. Some little while ago, the present president of the S. A. F. and O. H., Mr. J. K. M. L. Farquhar, said to me, "How can the Rose Society and S. A. F. come into closer touch with each other?" I confess, I don't know that we could get closer. We are an offspring of the S. A. F., doing the work which the S. A. F. is not able to do, specialize in a certain line, the growing of roses for cut flowers. I do not think we have a member who is not a member of the S. A. F. as well. To give up any of our privileges would mean to give up

our Society, which would be a detriment to the business. I am sure the American Rose Society would always willingly work in conjunction with the National S. A. F. This vital question of affiliation I have outlined in another article in the "Florists' Exchange" a week ago, urging the merging of the florists' clubs' membership into a national society, to increase its membership and its usefulness. But let our Rose Society keep up its own good work, nation wide, as we have been doing, creating and stimulating a love for the Queen of Flowers.

Secretary's Report.

The American Rose Society during the past year has tried an experiment for the purpose of gaining a wider membership among admirers and growers of roses than heretofore enjoyed. This was done by the publication of a "Rose Journal" which has been distributed in a limited way, and sent to societies of one sort or other all over the country. Much favorable comment has resulted, but very few new members of any class have been secured thereby. On the other hand, according to observations made, the publications of the country of the higher class have been given more than ordinary attention to rose culture. When the American Rose So-

THE MT. DESERT NURSERIES, - Bar Harbor, Me.

ciety held its first exhibition in the city of New York, its first support were largely amateurs. The present show is made up of specimens from some of the largest commercial establishments, small greenhouses and private gardeners.

The cost of the Journal was guaranteed by five members of the society, namely, Messrs. McKendrick, Good, Pierson, Pyle and Elliott; in addition to this, one of our life members, Samuel Thorne, subscribed an equal amount, which was \$50. The advertisements received also increased the income, so that the experiment was no drain otherwise.

The American Rose Society represents growers in various parts of the country, but there is one matter that has seemed of importance for permanent value, and that is the accurate record of the names and origin of roses that have been originated within the United States. Invitations have been sent through the press, asking for reports from people who have been originators; few have responded, but such as have, have been carefully recorded. This matter is an important one for future use. The use of roses for outdoor decoration is certainly increasing year after year.

One of our life members has written me from Boston, especially referring to bargain sales of roses, and that a quantity may be furnished at a low price, but the quality is misleading, consequently this sort of traffic would do much harm in public view.

The American Rose Society medals, if we could come in touch more extensively with local horticultural socie-

ties, if offered as a prize in the June shows to some extent, would perhaps tend largely to interest the amateurs, and as the Society gave its first exhibition in the city of New York, this question of membership may at the present time be considered with propriety.

The financial and general condition of the Society is clearly stated in the president's and treasurer's reports.

AMERICAN CARNATION SOCIETY.

Report of Secretary in Part.

We are able to report progress in all departments this year save one. This one exception being one of the most important departments, and of vital

interest to the Society, we will ask you to carefully consider a number of recommendations which will be submitted at the end of this report.

At the directors' meeting there was drafted a schedule of premiums for the carnation show which is running at this time. Alterations were made in the rules governing entries for competition, eliminating all restrictions in regard to membership in this Society, except in the A. C. S. medal class, which is reserved for our members only. Including premiums from all sources, the schedule carries a larger total than any previous list, which means that there is offered at this exhibition, more money, medals and plate, than has ever before been offered for carnations at any one exhibition. The National Flower Show Committee agreed to pay the first \$1,000 cash premiums awarded. A special effort was made to interest the retail men in the

When writing to Advertisers kindly mention Horticulture

exhibition by offering liberal premiums in a number of attractive and practical classes.

The one department in which we are unable to report progress is that of membership. Ever since the meeting in Boston, two years ago, the membership has decreased in numbers. About the usual number have run delinquent each year, but less than the usual number of new members have been added. During the past year the delinquents were 45, while the accessions were only 20, making a decrease of 25 for the year. There are now 261 annual members in good standing, and 12 life members.

We can account for this in only one way and that is the letting down of all barriers to outsiders coming in and getting all the benefits which should rightfully be reserved for our members only. This Society cannot endure for long if this policy is continued, and we would respectfully submit the following recommendations for your careful consideration:

We should hold our conventions regularly each year, regardless of National or other exhibitions, and we should hold our conventions and exhibitions alone.

Our regular meeting date (the last Wednesday in January) should be strictly adhered to.

The idea of alternating the meetings between the East and West is conducive to a growing membership and should be continued.

We should allow no admission fee to be charged the public at the door of the exhibition, as the charging of a fee, be it ever so small, tends to reduce the number of visitors.

Only members in good standing should be allowed to compete for premiums of any kind, including certificates of merit. Nor should anyone, except members of this society and the local entertaining society be allowed to attend any of the social functions connected with the convention.

Efforts should be continued to interest instead of decreasing, our membership should at least keep pace with the growth of the carnation industry.

The thanks of this society are due the trade press for printing promptly, and gratuitously, all matter sent to them for publication.

Final Report on Fred Dorner Memorial Fund.

At the time of the last meeting in Detroit, the canvass among the members of this society for small contributions to the Fred Dorner Memorial Fund, which had been ordered at the Boston meeting, was completed. A total of some \$437 had been collected in contributions of one and two dollar amounts. Instructions were given to continue the soliciting of contributions, and to take advantage of numerous offers of larger amounts which had

been made to the committee. These additional contributions swelled the total to \$979. We are pleased to state that the Perpetual Flowering Carnation Society of England generously sent in a draft for \$10. These funds were deposited by the treasurer to

ADVERTISING TALKS

BY
Ralph M. Ward

The horticultural trade papers cover a field in the florist and seed line better than any other mediums. The florist who don't take a trade paper is like a sand burr on a woolen stocking—merely a business nuisance. The florist who takes a trade paper and don't read it, loses the benefit of the experience of others, besides all the modern news connected with his business. The man who has something to sell to the trade should avail himself of these mediums. In September, 1911, Martial Bremond, the French bulb house, had a large surplus of Paper Whites and Romans, unexpectedly delivered by growers who had contracts for their crops. Without sufficient notice this surplus was shipped to Ralph M. Ward & Company, the American representatives. They came at a time when practically all orders had been placed and delivered, and as French bulbs cannot be safely shipped in cold weather, what to do with such a quantity so late in the year was considered a problem. After careful consideration a page advertisement was given to each of two trade papers, and as a result of these two advertisements, printed only once, about half a million French bulbs were sold within two weeks; and orders came in long after the goods were disposed of. Counter-offers were all tabooed and not answered. At that time of the year they could have been sold in no other way.

The advertisements of Horseshoe Brand products in the trade papers cost less than 1% of the business done. In the beginning this cost was much higher, and the results much less, but by continued advertising this has been reduced. Advertisements must be backed up with the best merchandise possible to furnish, and good deliveries—otherwise your money is wasted.

Of course the very nature of the bulb, seed and flower line embodies a certain risk, due to circumstances which are generally beyond control. This risk is becoming better understood every day, and is now taken into consideration by all buyers. Good, persistent advertising always pays, in spite of the risks incurred.

draw interest, which up to date amounts to \$39.71, bringing the total in the fund up to \$1,018.71.

The Board of Directors, at its meeting in Detroit, January 12th, 1912, delegated Mr. J. A. Valentine to secure designs for a medal, which is to be bought each year with the interest accruing from this invested fund. Mr.

Valentine submitted at the directors' meeting at Chicago, last August, a design from Mr. Henning Ryden, an artist in New York City, which the board approved with instructions that Mr. Ryden be commissioned to prepare a set of dies for striking these medals. The Messrs. Dorner having agreed to bear the expense of having these dies made, this matter was turned over to them for final execution. The dies have been made and a 10-karat gold medal delivered to us.

At this same meeting in Detroit, Mr. Peter Fisher was delegated to devise a plan for awarding this medal. Mr. Fisher submitted the following plan to the board at the Chicago meeting and it was approved by the board:

"A gold medal will be awarded to the best 100 blooms of any undisseeded seedling carnation (sports not admissible). The variety must have been in cultivation not less than three years and must score not less than 85 points, judged by the American Carnation Society's scale of points.

The medal to be awarded to the originator, who need not necessarily be the exhibitor, and can be awarded to the same variety only once.

To be eligible to compete for this medal, 50 blooms of the variety must have been shown at a previous exhibition of the American Carnation Society in a preliminary class, and scored not less than 80 points."

With this report, the work of the committee is finished. The fund is deposited with the Lafayette Loan and Trust Co., where it draws 4 per cent interest. The committee wishes to thank each and every contributor for the ready response with contributions. A complete list of contributors is on file in the secretary's office.

NATIONAL ASSOCIATION OF GARDENERS.

A meeting of the National Association of Gardeners was held in the Lecture Hall of the Grand Central Palace on Monday afternoon, at 2 o'clock. Preceding the meeting the Executive Board of the Association met and acted on several matters which were later reported at the general meeting. President William H. Waite, after welcoming the visiting members, introduced President J. K. M. L. Farquhar, of the Society of American Florists, who lauded the gardeners and their splendid exhibits which, he said, made it possible to produce such a magnificent show as they were assembled at, and followed this with a forcible address which can aptly be summarized as a heart-to-heart talk with the men of the gardening profession and in which he urged the cultivation of a closer confidence between the gardener and his employer.

Mr. Farquhar was heartily applauded at the conclusion of his remarks. W. J. Kennedy, president of the Boston Gardeners' and Florists' Club, was next introduced. Born, as he said, a gardener, he spoke with authority under development of the profession, endorsing all the previous speaker had to say on the opportunities which are presenting themselves for the advancement and elevation of the profession. Mr. Kennedy spoke of the great interest which has sprung up over the activities of the National Association and pledged his efforts to its further progress. He was followed by John Shields, of Monticello, Ill., one of the directors of the Association. Next came Mr. J. J. MacKey, also of Monticello, who spoke on the development

"Get them at Dreer's"

ALL SEASONABLE PLANTS, SEEDS, BULBS AND SUNDRIES

HARDY PERENNIALS. The most complete collection of varieties and the largest stock in the country. Our Perennial plants have a national reputation, we spare no expense to have them in the best possible shape for the planter. Such varieties that move better when pot grown are prepared in this shape; this does not mean little seedlings, but in the majority of cases the plants were field grown, were dug and potted during the fall and winter months and are of just the right size to give immediate results; they are not to be compared with so called field clumps. Try them and be convinced. See Our Current Wholesale List for Varieties and Prices.

ROSES FOR OUTDOOR PLANTING TO GIVE IMMEDIATE RESULTS. We have three hundred thousand 5 and 6 inch pots, the usual Dreer stock and the style of plants your retail customers are looking for. These are all two year field grown plants which have been potted during the winter months and which were stored in cold houses and frames and which are now in prime condition for out-door planting. The collection is the most up-to-date, including many new varieties not offered by anyone in the trade.

Early-flowering Hardy Phlox.

HYBRID TEAS, HYBRID PERPETUALS, TEA AND EVERBLOOMING, RAMBLERS, BABY RAMBLERS, MOSS ROSES, HYBRID SWEET BRIARS, AUSTRIAN BRIARS, WICHURIANA, ETC., ETC. See Our Current Wholesale List for List of Varieties and Prices.

AQUATIC PLANTS—WATER LILIES, NELUMBIUMS, VICTORIAS. Tender and Hardy Aquatics have been a special feature with us for nearly a quarter of a century. Over eight acres of artificial ponds are devoted to their culture. If we can assist you in making plans, or selecting varieties, the services of our expert are at your disposal for the asking.

OUR CURRENT WHOLESALE LIST also describes the following, all of which are handled as Specialties:

DECORATIVE PLANTS, PALMS, FERNS, FANDANUS, BAY TREES, BOXWOODS, DRACAENAS, etc., etc.

HARDY SHRUBS, HARDY VINES, HARDY CLIMBERS, RHODODENDRONS, AZALEAS, etc.

BULBS, DAHLIAS, TUBEROUS ROOTED BEGONIAS, GLADIOLUS, GLOXINIAS, FANCY LEAVED CALADIUMS, CANNAS, etc., etc.

HENRY A. DREER, INC.,
714 Chestnut Street **PHILADELPHIA, PA.**

of agriculture in the West. H. H. Bartsch, vice-president of the Boston Gardeners' and Florists' Club, was next introduced. Harry A. Bunyard announced that owing to sudden sickness in the family of Mr. Felton of London, England, who was to lecture at the meeting, he was prevented from sailing for this side at the last moment.

The secretary was called on next to report on the doings of the Executive Committee. After briefly reviewing the financial condition of the Association, showing a most substantial balance in bank, read a communication received from the New York Horticultural Society, inviting the National Association of Gardeners to hold its annual convention in New York City this fall, in connection with the fall show of the Horticultural Society. The invitation was accepted.

Mr. Farquhar as president of the Massachusetts Horticultural Society extended an invitation to the Association to hold its summer meeting in July next at Boston, at the time of the Summer Show of the Horticultural Society in conjunction with the Sweet Pea Show of the American Sweet Pea Society. This was also favorably acted on by the committee which decided to hold the summer meeting in Boston.

An invitation was read from President C. C. Moore of the Panama Pacific International Exposition, addressed to the National Association of Gardeners to hold its 1915 convention in the city of San Francisco, during the time of the Exposition. Resolutions were passed extending thanks to the Exposition Company, and that the Association go on record that it was the sense of the meeting that the 1915 Convention be held at San Francisco.

The ratification by the Board of Directors for the establishment of a Service Bureau to offer an opportunity to the younger men in the profession for a source to which they can look for betterment, was also reported at the meeting.

Notes.

Chrysanthemum Glory of Seven Oaks showed up well in several exhibits.

The Ladies' S. A. F. held a meeting at the Hotel Woodstock on Wednesday forenoon.

The New York daily papers, despite some boastful exaggerations, did pretty well in their notes on the exhibition.

J. Ausin Shaw made his first appearance at the show since his severe illness and was joyously greeted by a host of friends.

The exhibition was exceptionally favored as to weather which, at least up to the time of this writing, has been just right.

The souvenir program is a record breaker in amount of advertising and when the returns are all summed up it will prove no small factor in the asset column.

The giant bay trees which adorned the grand stairway and flanked the main aisles of the grand hall were the finest specimens ever seen here. They came from Julius Roehrs Co.

Two Lawn Mowers In One

**The Coldwell
"Imperial" Lawn Mower**
with its double cutting edge, has revolutionized the lawn mower industry.

The "IMPERIAL" has a bottom knife that can be instantly reversed. You don't have to wait to send your machine to be sharpened—two lawn mowers in one.

Coldwell Lawn Mower Co.

NEWBURGH, N. Y.

The collection of some twenty-five varieties of Astilbes of the Arendsi and Lemoinei types from the Bar Harbor Nurseries was greatly admired. Some of the flower spikes were three feet tall.

A German sectional greenhouse boiler, exhibited by Mr. Dahlborn, seemed to attract much attention from the visitors on account of novel features. Several orders were taken for installation.

The white-robed ladies comprising the orchestra were a potent attraction for the susceptible young men who crowded around the music pavilion, not only to hear the music but to gaze upon the players.

Fred Lautenschlager, the popular Kroeschell Bros. representative was taken sick with grippe and compelled to go to bed in his hotel under the care of a physician. At last accounts he was getting along nicely.

The principal component of the decorations of the two winners in the rose dinner table classes were Irish Fire Flame, Sunburst and other yellow roses. Mrs. Russell and Mrs. Sawyer were centers of attraction in the vase classes.

A crowd constantly surrounded the educational exhibit by J. F. Huss, showing the different stages of fern raising from spores under glass up to fully developed specimens. *Adiantum nebulosum* in this exhibit was a much admired novelty.

A much sought-for exhibit was the sensational *Odontioda Bradshawiae* (*Cochlioda Noetzeliana* × *Odontoglossum crispum* var., Mary Colman), sent over by Sir Jere Colman from England. The flowers are rich vermilion and the plant bore two fine spikes.

A late arrival at the show was a case of orchids from W. A. Manda's English branch, which came in re-

markable condition after being on the water nine days. Hybrid *odontoglossums*, plants and cut blooms, and *cypripediums* were the principal items.

Vice-President Theodore Wirth was making a big hustle among the trade visitors for advertising in the Minneapolis Souvenir Program, in connection with the S. A. F. convention next August, and appeared to be doing a "landoffice" business. The book promises to be a beauty.

Helen Keller, the wonderful blind, deaf and dumb girl, was an enrap-

ARTHUR T. BODDINGTON

SEEDSMAN

342 West 14th St., NEW YORK CITY

tured visitor on two successive days. August Poehlmann presented her with an armful of American Beauty roses and was rewarded with an ecstatic smile. The daily papers made quite a feature of this incident.

We understand that there were no less than fifty-two judges in service on the prize awards in the various classes. Everything considered, the work and the recording were efficiently done—creditable alike to the earnestness of the judges individually and of the officials under whose guidance they worked.

Stuart Low expressed amazement at the horticultural advancement here since his last visit some 25 years ago. He said he had many friends he longed to visit but was compelled to forego the pleasure, having so short a time at his disposal. He had a royal good time and expects to come again soon.

The attendance at the "International," from the different horticultural centres was probably equal to that at any S. A. F. convention. Boston made a good showing there being at least 100 Bostonians in evidence. Boston was "high liner," also, in several departments of the show as indicated in the list of awards.

The roping off of the various areas occupied by plant and flower exhibits was a great protection and indeed absolutely necessary, but it had its defects, as many of the exhibits were so remote from the aisles that it was impossible for visitors to read the names of either exhibitors or exhibits on the label cards.

The finest exhibition of lily bulbs ever seen in this country was undoubtedly that of R. M. Ward & Co. The bulbs were of extraordinary size and uniformity and included all the Japan commercial sorts. They were shown in boxes covered with plate glass and were the object of engrossed interest on the part of florists and gardeners. Mr. Ward was in attendance personally, and distributed his new book, "Bulbology."

As on similar occasions in the past it proved much easier to assemble the members of the special societies for their business session than to get even a quorum of the S. A. F. members. The reason is obvious and in this direct personal interest of each member in the proceedings of the organization devoted to his specialties it is easy to see why the autonomy of these intensive organizations is so jealously guarded.

Lilium myriophyllum which won the gold medal as the best new plant in the show, arrived after the trip from Boston in prime condition. It was a surprise to see plants from tiny bulbs in 2½ in. pots bearing a full-sized bloom on an 18 in. stem. One bulb in a 6-inch pot carried six stems bearing nine flowers. Other attractive novelties in this Farquhar collection were *Berberis levis* with graceful sprays of glossy evergreen foliage, *Syringa Wilsoni*, *Deutzia longifolia*, *Ligustrum Pratii* with foliage like a *Cotoneaster*, *Deutzia discolor* and many others collected by Wilson.

Of Interest to Retail Florists

Buffalo, N. Y.—Miss Burns has purchased the flower store of Miss Sauer, 1375 Main street.

A letter from W. G. Matthews of Dayton, Ohio, says that his business in that city is completely gone. He had greenhouses and a retail store.

C. H. Fallstrom and Louis Knice have purchased the greenhouse establishment of N. H. Long and will take charge, June 1, as the Dixon Flower Shop. Mr. Fallstrom will conduct the store and Mr. Knice will manage the greenhouses.

BOSTON RETAIL FLORISTS FORM AN ASSOCIATION.

At the City Club April 3rd the first steps were taken toward the formation of an association of retail florists. There were about thirty members of the trade present, and following a banquet officers were elected. A committee of five was selected to draw up a set of by-laws. It was decided that the organization shall be known as the "Boston Florists' Club." The officers elected were: Henry Penn, president; Julius Zinn, treasurer; Henry Comley, vice-president, and B. H. Green, secretary.

Princeton, N. J.—On account of ill-health, George Allan has sold his business to John Heereman of Morristown, N. J. The plant includes greenhouses on Spruce street and store on Nassau street.

Of Interest to Retail Florists

COMPETITION.

The flower show of this week and those of previous years impressed many of the competitors for prizes in the retailers' section that they must be careful as well as artistic when entering these contests, ever bearing in mind that the judges do not always look at your exhibit in the same light that you do.

For instance, one of your entries called for a table decoration and you used Farleyense fern and orchids for centerpiece; corsages consisted of orchids or lily of the valley; you feel you are entitled to the prize because your choice of flower was more select than the other contestants; but the one that used the inferior flower captured first prize, contrary to your expectations, and why? Because he was careful.

The prize winner studied the size of the table to be decorated and made his centerpiece accordingly, while yours was out of proportion, too large, and too high, leaving little space for plates, glasses, etc., and the judges could not give your orchid table the choice, for this reason mainly.

In the next exhibit beauty promenade in the form of a bridal bouquet. This artistic creation did not turn out to be a prize winner because it was too heavy to suit the judges and they decided on a lighter bouquet. Again the artist was not careful, owing to the use of too much wire, which

weighted his bouquet and lost the prize for this reason alone.

In regard to competitions along this line, I have a bit of advice to offer for the benefit of those interested; when making up work for exhibition purposes, try to work as though you were doing something for one of your fussy customers, and not for the purpose for which it is intended. There is far better work turned out daily in the flower stores than we usually see in our exhibition halls.

When flowers in any form leave the store, they then become an exhibit, and no matter how few or how many people may see it they are judges, even if not officially appointed.

I recall a flower show held in a large city in the East where one of the contestants lost a valuable prize, due to the fact that he overlooked counting the specified number of flowers to be used in this particular case, and consequently his entry was disqualified, it, though being by far the handsomest arrangement in this class. In this man's anxiety to carry off honors he used a few more blooms than were stipulated and thus carelessness again defeated art.

When the inspiration to win prizes strikes you, don't worry about the artists you will have to compete with, as they fail more often than they win, the dark horse usually capturing the prize with something simple and practical. Do likewise and you will not fail to attract the attention of those awarding prizes.

The public often wonder why a certain exhibit did not draw first prize. The card attached announces the

name of the "leading florist" of the city, while on the next appears the name of an obscure dealer with the blue ribbon attached. The public has not taken into consideration the scale of points required to win; but we, the more experienced in our line of work thoroughly are more likely to understand why the less prominent man outclassed the "leading florist."

MR. STOREMAN.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The club had a good attendance at its meeting, April 1st, in the Fort Pitt Hotel. Walter Breitenstein, whose reputation is high in Western Pennsylvania as an artist in flowers and color harmonies, entertained and instructed the club with a demonstration in the art of combining pleasing colors in bouquets and flower designs, and also showed us what to avoid. His pet aversion is quantity of pink of one shade. Pink he denominated a heavy color, and requires some touch of any light shade to brighten it, while if combined with yellow some of the heaviness of carmine pink shades is absorbed, and the result is more pleasing. Pale pink is helped if combined

1220 Race St. M. RICE CO. Philadelphia, Pa.
Leading Florists Supply and Ribbon House

with blue or gray, and purple shades and white look well together. Pinks and yellows selected with discrimination are very pleasing; assorted pinks are better than one shade. American Beauty rose looks its best combined with blue, lilac gray or yellow flowers and ribbons.

Some of the other pleasing combinations of colors are red, violet and orange; buff, gray and blue; buff and yellow or orange with bronze foliage; crimson and lilac; crimson and azure; crimson and orange; in fact, almost any assortment of colors can be blended, if the key is used, as easily as the soft tones, and the ordinary eye will detect discord. Some of the colors to avoid are pink and white. In high-class work this combination is overdone. He considers bronze or autumn colors with orchid, violet and pink very inharmonious. White ribbon is cold in effect; use cream-colored ribbon. Really white flowers are scarce. Blue is a color that is needed, and he called for more of the deep blue delphinium and larkspur, and the blue gladiolus, or any clear blue.

The gist of his talk was for the dealers in flowers to get out of the ruts, especially the pink and white. The flower buyers want novelty and are willing to pay for it, but in the flower shops they are presented with the same old things season after season "until the heart is sick and the brain benumbed as well as the weary hand." In other words, the dealers in flowers standardize their business on a few kinds. It is less work and less bookkeeping to handle but a few kinds, and perhaps it is all right commercially for a time at least, but art suffers and the real flower lovers are denied their rights in being presented with but a tithe of what Nature would be willing and glad to give if only asked. There are thousands of other flowers beside roses, carnations and chrysanthemums, but if you frequent the flower shops you would scarcely think so.

Do not be afraid of using strong colors; with a little harmony in the arrangement they can be made very striking and beautiful, and again in our Pittsburgh modern house interiors they are required.

A rising vote of thanks with applause was given Mr. Breitenstein at the conclusion of his demonstrations. Most of the points he made he illustrated with the flowers before him, of which a large collection had been placed at his disposal by one of our wholesalers and it is safe to say that no more inspiring or thoughtful talk has been given before the club in years.

It was suggested by the president that the next meeting be held on the second Tuesday of the month, instead of the first, and that it be held in the Herbarium at Carnegie Institute, and that after the regular business was transacted, we should inspect the treasures of the Herbarium under the expert guidance of Dr. Jennings in charge, ladies to be welcome. This met with approval and the next meeting accordingly will be on May 13th, Tuesday, 8 P. M. sharp, in the Her-

barium of Carnegie Museum, Schenley Park.

Fine Dendrobium nobile and cypripediums were on exhibition from the Pittsburgh Bureau of Parks.

PHILADELPHIA NOTES.

M. Rice Co. report that the prospects for an enormous sale of metal goods for Decoration Day are very promising.

Visitors: Bert E. Brotherton, Detroit, Mich.; W. C. Langbridge, Cambridge, N. Y.; Ed. Roehrs, Rutherford, N. J.; C. B. Coe, Detroit, Mich.; J. Frank Palmer, Van-Lindley Co., Greensboro, N. C.; J. A. Pennypacker, Phoenixville, Pa.

NEWS NOTES.

St. Peter, Minn.—G. H. Towley has purchased the greenhouses of S. C. Smith, who with his family have moved to Rock Island, Ill.

New Iberia, La.—Louis Buchner has started in business here as a gardener. He was formerly in partnership with Henry Kraak in the Nashville Avenue Rose Garden, New Orleans, but this firm recently dissolved.

Flower Market Reports

A slight improvement is discernible in the market this week. Carnations have shortened up quite noticeably and the result is a better price and fewer shrinkages. Roses are very plentiful and, although excellent in quality, are forced to extreme measures at times in order to unload. There is a very light demand, anyway, and whatever improvement in tone the market may show is evidently due to shortened production caused by the cooler weather rather than to any increase in call. Bulbous flowers are not coming in so heavily as they were and that helps the market in a general way. Orchids sell for a better price as do gardenias, also, the supply of both having diminished. Violets are about finished, the single ones being almost completely out of the running. Sweet peas are abundant and good and sell pretty freely. Lilies are a bad proposition just now; overstocked and harder to move than at any time during the past season.

A decidedly oversupply in practically all kinds of flowers is the condition which faces the wholesalers. Chicago has long produced flowers enough to supply a vast area of country and with the crippled condition of the railroads, shipping has diminished to a fraction of its usual volume in April. Ever since the wind storms delayed the Easter orders, March 20th, and the floods following immediately after, there has been no assurance that out-of-town orders could be relied

upon to reach their destination. Express companies are doing their best but transportation to the South and East is almost cut off. The glut is not so great as might be expected because vast quantities were moved at a low figure, purchasers dictating the price. One house reports selling 172,000 sweet peas in one day. Southern bulbous stock has managed to arrive, despite the flood. No green is arriving from Florida which makes greenhouse greens more in demand and the supply is getting scarce. Violets are about through. Some singles from cold frames were excellent and sold readily.

The market is decidedly quiet. The calamities that have befallen the surrounding cities plus our own flood seems to have reacted upon business. There has been no

shipping business to speak of for there were no regular trains leaving the city except to southern points. Local business is almost as slack for there are very few social affairs to take up a supply of flowers. Many of the suburbs have been isolated by the flood. The great bulk of the local supply consists of carnations. The receipts of these were not affected by the lack of railroad service for under normal conditions only a small part of the carnations used in town come from other points. The rose supply was, however, hard hit. The supply, small as it was, was easily able to take care of the demand for roses. The sweet pea and Easter lily cuts were almost up to normal, for most of them have been coming from growers about this vicinity.

Flower Market Reports

(Continued from page 573)

The centre of disturbance has moved up from the wholesale flower market district to the Grand Central Palace for the time being and the Rialto has a rather deserted look this week. Business is, however in such an inert and chaotic condition that little is lost by the temporary forsaking of the neighborhood by its more active denizens. The situation has not changed from what we reported last week unless indeed it is a little worse. There is practically no standard of value for anything on the long list of seasonable flowers. As to quality it runs high as a rule on most things and no fault can be found in that respect. The real cause for this unlooked for lethargy is not easily determined but it is a stern reality which naturally causes consternation among the wholesale fraternity.

We are glad to be able to report a slight improvement in this market. While stock is still very plentiful the demand improved, especially towards the end of the week. On Saturday the weather was fine and gave the street men an excellent chance to help in the clean-up. Prices were nothing extra, but they might have been worse. The Beauty market is now redundant, in sharp contrast to recent conditions. Prices accordingly. The quality is all that could be desired. There is a fair demand for Richmond and no overplus. During the past ten days Killarney has brightened up very much in color and is now really splendid stock. No change in the carnation market. Quality and quantity top-notch. There was a big lot to move off at the wind-up, but most of them went at some kind of a price. Lady Campbell is the most satisfactory in the violet situation. Singles are over and the Hudsons are poor. Greenhouse daffodils moved better, as the Southern are all gone. We think the rest of the market was considerably helped also by this happy demise. Gardenias, callas, lilies, lily of the valley, and other staples, normal. Good supply, good quality, and fair demand.

The market was in a bad condition last week, stock being too plentiful and a great deal of it going to waste. Local growers are all on full crop. Wild smilax is still scarce, owing to floods; all other greens are in plenty at any time.

LANCASTER COUNTY FLORISTS' CLUB.

March 20th, at 4.30 P. M., a car of florists left Lancaster for the greenhouse establishment of W. B. Girvin of Leola, Pa., on a fraternal visit and after an inspection of this modern place and a little time to recover from the shock of seeing so many chrysanthemum cuttings at one place returned to the city for the evening meeting of the club, at 8 P. M.

Considering the closeness to Easter the attendance was phenomenal and after hearing and discussing a paper by Ira Landis of Paradise on "Soils," Frank Kohr of Dillerville told us how the club had benefited him and how it could be made of further benefit to us, in a well-written paper. Co-operative buying was discussed at some length and a free discussion was urged on all subjects. The president urged every member to attend the National Flower Show, and some twenty expressed their intention of going.

At our next meeting on the 17th we expect to have Mr. S. S. Pennock, of the Pennock-Meehan Co., tell us of some of the faults of the consignors in dealing with the commission houses,

this being a phase of the subject not often enough dwelt on.

ALBERT M. HERR.

NEWS NOTES.

The Boston Co-operative Flower Market has issued a schedule of prizes to be awarded at its exhibition at 2 Park St., Boston, on Saturday, April 12. The prizes are decidedly liberal and should bring out a lively competition.

The meeting of the North Shore Horticultural Society, April 4th, was pretty well attended. Vice-President E. H. Wetterlow presided. A very nice paper on Poultry was presented by H. A. Moulton. Considerable interest was shown in the discussion which followed.

JAMES SALTER, Sec'y.

Cantril, Iowa—The great storm that did so much damage west of here divided and did us no more damage than painting our greenhouse with red clay, which is finally washed off after several rains. This red dust must have been carried over 500 miles by the storm.—ALBERT TROTH.

P. O. Box 12, Lowell, Mass.

Three Grand New Carnations—Wm. Eccles, first prize winner at Detroit and silver medal winner of New York Horticultural Society; rigid stem, perfectly formed 3½-in. flower, non-bursting calyx, highly perfumed and free. Lady Northcliffe, beautiful salmon pink, well built flower, and just enough in it not to burst the calyx; a grand bread and butter sort. British Triumph, a striking shade of crimson; flower 3½-inch and well built; sweetest perfume of any carnation ever raised; keeping qualities are the best; fine stem, good constitution, and free. \$12.00 per 100, \$100 per 1,000. Scott Brothers, Elmsford Nurseries, Elmsford, N. Y.

CAMBRIDGE, MASS.

CHICAGO NOTES.

Mothers' Day is to be brought into new prominence this year in Chicago. A street sale of flowers for a hospital benefit has been arranged for.

David J. Haskins, John W. Harris and Frank Amberg have incorporated under the name of the Haskins Floral Co., capitalized at \$25,000, and purchased the Reid & Chambers place at Elmhurst, Ill.

The large group of handsome lily plants at the exhibition last week from the Metairie Ridge Nurseries, New Orleans, was a distinct novelty, inasmuch as they were grown from bulbs produced in our own country.

A new retail store, under the name of the Lake Shore Greenhouses, was opened about April 1st, by F. A. Parkmire, at 1429 Morse avenue. The north shore has been very popular lately with those seeking a location for flower stores.

J. A. Budlong's blue ribbon lily of the valley was something that constantly drew a crowd. The great length of stem and size and number of the bells easily won it first prize, though there were other splendid exhibits to compete with it.

Mrs. Anna Kochman has the sympathy of the trade in the death of her brother, Bruno W. Kreitling. Since the death of Walter Kreitling, another brother, Mrs. Kochman has been in charge of the store at 77 E. Van Buren street, which is still operated under his name.

The management of the Spring Flower Show decided to add another day to the five as scheduled and Sunday found the Art Institute still housing a very creditable exhibit. In everything except receipts the show was a great success, and the fact that four out of the six days were free to the public, owing to the established rule of the Art Institute, the small receipts reflect no discredit upon the public. The two days upon which admission was charged were both rainy ones, further cutting down the returns. The attendance of the week footed up about 50,000.

A flower sale for United Charities and flood sufferers was held at the store of J. L. Raske, 170 W. Jackson Blvd., April 3, netting about \$1000. Among those who contributed the flowers were Wieter Bros., Poehlmann Bros. Co., Chicago Flower Growers' Association, Peter and George Reinberg, Zech & Mann and Chicago Carnation Co. Frank Oechslein and Henry Witthold gave plants. Unsold flowers were sent to the various hospitals. Eight delivery cars were also furnished free.

Another small park has been added to Chicago's long list. The new one

consists of 40 acres and is located at Berteau avenue and 60th avenue, on the northwest side.

Personal.

A. Lange left on Sunday for a visit with relatives in Omaha.

A. L. Vaughan has been ill for two weeks and this week is not able to be at his store.

Visitors: E. G. Hill, Richmond, Ind.; M. E. Wyatt, Watseka, Ill.; Robert Lathrop, Oscar Carlson and Emanuel Doetsch, Minneapolis, Minn.; Mr. and Mrs. Z. Muhlen, Fort Wayne, Ind.

DURING RECESS.

The Cook Co. Bowling League broke every record this week scoring 943 in high team game and 865 high team average three games. J. Zech scored 241 for individual single game and Frank Ayers 207 for high individual average three games.

The Ladies' Auxiliary of the Rochester Florists' Association held its monthly meeting at the Pinnacle Club April 1, with Mrs. A. Rapalfe as hostess. It was voted to contribute \$10 to the fund for the flood sufferers in Ohio. The meeting was followed by bowling, at which Mrs. W. Keller and Mrs. John Dunbar won prizes. Mrs. George Hart, Mrs. E. Fry and Mrs. F. Vick will entertain the club at the Elm Bowling Hall on April 29th.

NEWS NOTES.

Bowling Green, Ohio—The Mercer Floral Co. has been purchased by W. W. Milner.

Fremont, Neb.—C. H. Green has added a new seed department to his greenhouse business.

Stuart Low and daughter sailed on Tuesday morning for England. A party of congenial friends desiring to give him a "bon voyage" send-off captured Mr. Low on Monday evening and proceeded to carry out their purpose. President Farquhar, of the S. A. F., filled the position of master of ceremonies with characteristic ability and with Mr. Low on his left and Mr. DeGraaff, of Leyden, Holland, on his right, succeeded in working up an enthusiasm which must have left no doubt in Mr. Low's mind of the cordial feelings entertained here toward our horticultural cousins across the Atlantic.

Doubleday, Page & Co., A. T. Delamare Pr. & Pub. Co., J. Horace McFarland, Fred A. Stokes Co., and HORTICULTURE Publishing Co., all had stands at the International on which were displayed their various publications.

Tel., 2886-1 Brookline.

Obituary.

J. W. Pratt.

Joseph W. Pratt of Malden, Mass., gardener, died on March 29, after three weeks' illness, following a paralytic shock. He leaves a widow, two sons and two daughters.

Mrs. J. W. Arnold.

Mrs. J. W. Arnold, of Omaha, Neb., died March 26th in her 66th year. She was a member of the firm of J. W. & E. E. Arnold and had been well-known as a florist. She is survived by one son and three daughters.

Miss Janette Eadie.

Miss Janette Eadie, daughter of the late James Eadie, and niece of Adam Graham, died at the home of her sister in Cleveland, O., on March 29, aged 57 years. Miss Eadie assisted her father in his flower store on Euclid avenue for many years and after his death took full charge of the same. She was a good business manager, a cheery companionable woman, and highly regarded by everyone who knew her. She has been in failing health for about two years.

George Rosmarin.

George Rosmarin, pioneer florist and one of the best known residents of Alameda, Cal., died on March 26th. Death was due to a general breakdown, and was probably hastened by the sorrow incidental to the death of his wife, who passed away three months ago. The deceased florist had been a resident and business man of Alameda for the past 42 years, having during that time conducted a nursery and florist business. Mr. Rosmarin came to Alameda from San Mateo County, where he settled 45 years ago, coming to California from Germany, his birthplace.

Frank Williams.

Frank Williams passed away at a sanitarium in Kenilworth, Ill., a suburb of Chicago, March 30, where he has been for nearly a year. He was born in Greece 45 years ago, and with his adoption into America he also adopted a new name, under which he built up a prosperous business, with the able assistance of Mrs. Williams. Two years ago Mr. Williams gave evidence of mental trouble and a visit to his native land was planned in hope of restoring him. This failed and Mrs. Williams went after him and there placed him in a sanitarium, where everything was done, but without relief. Mrs. Williams has in addition to the store in the Atlas Block a store just opened in the basement of the new Goddard building, Wabash and Monroe.

INCORPORATED.

The "One Lunker" Against a Six Cylinder

An Automobile Comparison With A Greenhouse Moral

SUPPOSE it were possible to pick out the six best separate concerns in the country, each making the best of each kind of greenhouse material; and then move their factories and entire working force and managers to either of our factory grounds at Irvington, N. Y., or Des Plaines, Ill.

Suppose it were possible to bring such together under our well organized watchful management; a cypress mill; an iron foundry; a heating, fitting and boiler foundry; a ventilating factory; a paint and putty mill, and lastly a group of greenhouse construction and heating engineers and mechanical draftsmen, the best the country afforded.

Suppose, it were possible to do such a stupendous thing; wouldn't you at once recognize the tremendous advantage it must be, to do business with such a wonderful concern; who manufactured for themselves everything that goes into a greenhouse, excepting only the glass?

Of course you would!

You would at once see the money saving advantage of being able to buy all your material

from the one highly responsible concern. You would also be keen to take advantage of putting the entire responsibility up to them for the entire house, instead of dividing it among six different concerns all over the country.

All of which would be highly endorsing Lord & Burnham, for that's exactly what this concern is—

A combination of six factories, mills and foundries and an engineering concern, all in the one factory under the one skillful management. Each one of these six separate "departments," as we call them, have their own separate manager or head. Any one of these departments is larger than any one single concern in the country. Each of the six departments work **with and for** every other department in producing the entire materials for your house.

It's just like a fine big well oiled six cylinder automobile working smoothly, riding easily and getting you there safely and surely in the shortest time and by the smoothest roads.

Wouldn't you rather ride in this 6 cylinder car of ours, than in a "one lunker?"

AN UNIQUE CARNATION DINNER TABLE DECORATION
By George H. Cooke at the International Flower Show, New York

DEVOTED TO THE
Florist, Plantsman, Landscape Gardener and Kindred Interests

PUBLISHED EVERY SATURDAY AT 11 HAMILTON PLACE, BOSTON, MASS.

SUBSCRIPTION, \$1.00

Does This Solve Your Problem?

Have your Conifers, Hardy Shrubs or Hedges the appearance of being stunted?

Have you learned what ails them?

Is it not an attack from the red spider which has done so much havoc to the Evergreens the past few seasons?

If so, you can overcome it by using **SCALINE** which will rid your plants of this pest and will promote a healthy growth.

SCALINE is an effective material that can be used in the growing season for aphids, thrips, red spider, mealy bug, soft scale and all sucking insects. It can be safely applied to all hardy plants.

As a winter spray for San Jose and all hard scale it has no equal.

SCALINE is composed of a high grade of petroleum and contains the properties of the well known fungicide, Fungine, also making it an excellent preventive against various blights affecting trees and shrubs.

It is readily soluble in water, contains no sediment and can be applied through the finest spray nozzle; being more economical than the old-fashioned Kerosene Emulsion and Fish Oil Soaps and much more effective.

Gallon \$1.50—10 Gallon Keg \$10—50 Gallon Barrel \$37.50

All Men Are Different

Take two men and a stream of water. One will fish in it, while the other will make it turn a saw mill. The first is simply a lazy man.

A lazy man isn't any worse than a dead man—but he takes up more room.

The other fellow is the worker, and the successful man. When he locates himself he makes the best of his circumstances. He works the stream for all it's worth and gets more real joy out of it than the fellow who fishes for suckers.

The florist who works Horseshoe Brand lily bulbs will get the same joy as the fellow with the saw mill. He must work—not merely plant the bulbs and let inexperienced help take care of them—he must watch them himself, or have a reliable man do it for him. Horseshoe Brand Giganteum and Formosum will satisfy the demands of any grower for 1913 deliveries. Send for the Book of Bulbology—just out.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Allamanadas

Allamanda Williamsii is one of the most valuable of summer-flowering pot plants. With the rush of the bedding-out season and Memorial Day they are liable to be neglected. If they have been somewhat crowded, now that space is most abundant, spread them out and where necessary give them one or two short stakes. They will now need water almost every day and liquid manure two or three times a week. Continue the use of the syringe. The night temperature may be kept at about 70 degrees with a rise of 10 or 15 degrees in the day. It is essential to give ventilation so as to keep the temperature at the right mark. Damp down two or three times a day to keep the atmosphere of the house in a moist state. If you are short of Allamanadas they are easily propagated from soft-wood cuttings of this season. Place in sand over a bottom heat of 75 degrees. Probably the better method is that of putting each cutting into a thumb pot, first filling the pots with sand and peat, or sand and leaf mold in equal proportions. Shading will be necessary for a while. In about three weeks the cuttings will be rooted.

Coelogyne cristata

When these orchids are through flowering give them a good sponging with some good insecticide. At this period is a proper time to repot or top dress those that have outgrown their pans or pots or to give them new compost where it has become exhausted. They do well in a compost of equal parts of fresh sphagnum and fibrous peat, intermixed with some broken charcoal. Give the pans or pots plenty of clean broken potsherds, say about half full; this will allow the water to pass away freely. When potted up place them in a moist house that is kept rather close and keep quite a heavy shade; this will induce them to make new roots. When the roots have started to take hold of the new compost they can be placed in their summer growing quarters. As growth advances they can be given abundance of water at the roots as these are a thirsty class of plants when making their growth. They can be given manure water after they have become thoroughly established about once a week but start to use it in a weak form at first. Give plenty of ventilation through the summer and syringe overhead once or twice a day.

Ramblers for Next Easter

The best plan to follow in order to have fine Ramblers by next Easter is to plant one-year-old stock now. Give them either 6 or 7-inch pots and see that each pot has good drainage. It is well to prepare your compost with care as you want them to make fine wood by next fall.

For a compost use fibrous sod that was cut last fall three parts, well decayed cow manure one part. To a barrow load of the foregoing you can add a 5-inch potful each of bone meal and wood ashes. When potting work the soil well in and around the roots so that when finished they will be good and firm. They should be cut back to three or four good eyes which will make them break away into five or six strong canes. Place them on a bench in a house that is kept as cool as possible and all through the summer they should have plenty of ventilation. Give water carefully at first, but when top growth and root action start off they require plenty of it. Leave five or six of the strongest canes, removing the rest. Syringe two or three times a day in bright weather and keep them under glass until the end of July.

Poinsettias

Stock plants of poinsettia which have been resting under the benches for the last ten weeks should be overhauled some time during the present month. Shake the soil away from the roots, cut the tops back well and place in as small a pot as the roots can be comfortably squeezed into. Place on a sunny bench over steam or hot water pipes, give a good soaking of water and then keep them rather on the dry side until the plants start to break into growth and produce a fine lot of cuttings. These root most easily when rubbed off with a heel, care of course being taken to allow no sun to strike them and to water well daily. Sand of a moderately coarse nature from which water passes away at once is preferable to the finer sort which is more liable to scum over. As soon as the roots are an inch long pot up. Care must be taken not to break the roots and it is a great mistake to allow them to make long roots before removing them from the cutting bench. It always results in a loss of foliage. When potting them give a good rich soil, say to three parts of fibrous loam add one of well rotted manure which will push them along in growth.

Peonies

Beds of peonies that received last fall a good application of manure can be dug over, but where they did not have this they should have about three inches of well-rotted manure spread on and worked in with an ordinary digging fork. In about three weeks they should have some additional plant food that is quickly available such as dried blood, pulverized sheep manure, or fine bone. For peonies to do well you want to keep the ground rich by these yearly mulches of manure as it is hard to overdo the peony's greedy appetite for plant food. Keep the ground well cultivated every week as this constant cultivation is just what they like. When the buds are big enough for disbudding give liquid manure once a week until they show color. This treatment will produce fine

FRUIT AND VEGETABLES UNDER GLASS

CONDUCTED BY

George H. Penson

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Penson. Such communications should invariably be addressed to the office of HORTICULTURE.

Cropping Vines

What a blessing it would be if all fruit trees were as productive as the vine! With one or two exceptions there is always an excess of the number of bunches required to make a crop, which no doubt originated the old proverb "to be as fruitful as the vine." It is not uncommon to see two flower trusses on one lateral, one of which should be taken off as soon as it is large enough to take hold of. One bunch on each lateral would mean over two crops and to over-crop a vine is to court disaster. On the free-setting varieties a reduction can be made soon after the bunches show which will throw more energy into those remaining. With any shy setters it will be advisable not to reduce to any great extent before they are set. What shall be a crop to finish is a question to study on each vine. Excess will spell poor crops to follow and without a cessation an early death or what will cause the ultimate removal of the vine. Shankling, half-colored, small berries soon render a vine worthless. Do not over-crop young vines as they are growing up and when come to maturity do not think of quantity alone. A few good bunches will weigh up equal to double the number of small ones. One bunch to every thirty inches of rod will keep the vine above its work so to speak and the best crops will be produced.

Packing Melons

Melons are easily packed to travel any distance; being a solid fruit and one which can be cut a few days before it is ripe enables the packer to make it firm in whatever box he chooses to ship it in. Wrapped first in a sheet of wax paper to keep it clean, followed by a thickness of cotton-wool and then made firm with excelsior they will travel without being damaged in any way. When placing the fruit already wrapped in cotton in the box, see that the cotton does not break away as it is pushed into the excelsior. For regular shipments special boxes can be made to hold two or four fruits. If more than four are packed in one box a division should be made which will relieve the pressure on the bottom fruits should the box get turned on its side during transit.

flowers. Peonies are gross drinkers as well as gross feeders, so it is well to make some provision to have the hose handy when the dry weather comes. Keep the plants well disbudded as it greatly improves the size of your flowers.

Stevia

Where you have old plants with an abundance of new growth do not fail to propagate so you will not have any

Non-Conductors

It is difficult to find a more suitable name for this subject, for it is one very little heard of—one of the tiny grains of sand that go to make the shore. Perhaps the necessity of it has been brought to our notice in a rather unpleasant way in the past, so obviate this by the "do it now" principle. When making a few remarks on the winter tying of peach and nectarine trees I referred to the heated trellis during the summer months damaging the stronger wood when tied closely together. From now on this will be the result if there is no non-conductor between. See that the piece of rubber hose or wood is in its place. When shaking the trellis when the trees were in flower some may have fallen. Replace these without delay; as the young growths are being tied into position these can be looked over.

Tying

About the time the second swelling commences on peaches it will be found advisable to tie all the newly-made growths into position—correct position I might have said—for each one should have a vacant place to fill. There will be an overcrowding if disbudding was not carried out to the full degree. In such cases cut away a growth sooner than overcrowd them. Endeavor to keep each one straight and do not cross them over each other, neither should they cross strong wood unless it is to fill in a bare place which cannot be done otherwise. A little attention to this now saves a quantity of time and labor later on and the trees will look so much better.

Cucumbers

Continue to topdress cucumbers as the roots show through the surface. Periodical stopping and tying of the young growths must be attended to. Any old and worn out foliage can be cut away to make room for the young growths. Syringe twice daily in good weather and keep a sharp lookout for greenfly or other pests; fumigate before they get established. The plants will require a copious supply of water right along; manure water occasionally will be beneficial. Although the sun power is increasing do not be in a hurry to shade; wait until the plants show signs of distress from it and then only apply a light one.

deficiencies in this highly valued holiday plant. They can be inserted in a moderately warm propagating bed. Keep moist and shaded and they will soon root. They like to be grown as cool as possible and make the best plants when grown under constant pot culture. As they fill their pots with roots keep shifting until an 8 or 9-inch pot is reached. By the end of May they can be plunged outside where they can have plenty of water at the roots.

Mr. Farrell's next notes will be on the following: Alocasias; Begonia Gloire de Lorraine; Gardenias; Gloxinias; Phalaenopses; Shading.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

One Way Out

There has been considerable thought and work expended upon a very serious question in our line of business. That one subject is: How to relieve the so-called glut in the market? We know of one way that may not do away with all the surplus stock but would no doubt take such large quantities of cut flowers as to be of some importance to the growers, retailers and commission men as well. The only way this can be done, however, is for all to get together at times and work hand in hand. We cannot see why Mr. So-and-so should not wish to speak to his neighbor just because he happens to be his competitor. We never have any ill feelings toward any one, always treating business as a game and applying the rule "Let the fittest survive." But to proceed: In a little country town a florist opened a retail store. Suicide! so many said. However, judging from present appearances the store is prospering and netting good returns to the owner. At the very beginning it was decided to try to give as much as possible for the people's money, and the rule "small profits, quick sales," was to be followed as much as possible. As other lines of business have sales, every now and then to help move a lot of stock it was decided to have sales also. But for the fact that a sale in a flower shop would be altogether out of place, a neat little plan was decided on and the results were far greater than ever had been expected. There being a large crop of carnations at the time and the price ranging less than a cent each for good seconds, the plan decided on was to have a special sale of carnations for one week. Instead of advertising a sale, the week during which these carnations were to be sold at a reduced price was advertised as "carnation week." Neat little posters were printed and tied in a roll with elite pattern red ribbon. All people asked to be given one, instead of being annoyed when given an ordinary poster as is the general custom to hand them out to all the people. Very few were left unread we are positive. That carnation week was also advertised in all the local papers, not only in the home paper but in papers in other towns as well. Over a thousand carnations were sold during the first day of the carnation week. This may look like a small

number to florists in larger towns, but as this town had only a population of three thousand, it was doing very nicely. And right here is the way out. Why could not all the retail florists large and small be notified if the market shows any signs of being overcrowded with flowers? Usually when the country florist sends to the city for a few roses or something of the kind, he is soaked all he will stand. This only hurts the trade and should be abolished. There are thousands of people in the country towns that would gladly spend money for flowers if they could only buy flowers. But usually it is much more trouble to secure a dozen roses in the country than they are worth. There are many retailers who could no doubt get up something similar to the carnation week and rose week which has been on the program since, and was equally as successful as the carnation week. Do not for a minute think that no other flowers were sold during this time. Many people who had never been to the store came to get a dozen carnations. Little children bought them for their parents and for their school teachers. Automobile parties going through town stopped to get a dozen carnations, as no labor was spared in distributing the circulars, and all garages, hotels, etc., had some somewhere. Now we are positive this could be done in other towns, and would certainly unload some flowers from the glutted market, besides advertising the use of flowers far and wide. Needless to say, not a box of cut flowers left this shop unless it bore the name of the store. And every box delivered in town was tied around the center with a narrow ribbon with a flower of some sort in the bow.

Houses That Are to be Carried Over

It largely depends on when you want to start cutting in the houses again and so it is rather difficult to say just when to start drying them off a little bit. Houses for summer-flowering should be dried off at once or as soon as the crop is cut off. A little of the coarse material from the top of the benches may be removed and a good dressing of bonemeal applied. A little cow manure may also be applied and the plants gradually allowed to grow again after their rest of a week or two. Not more than that, for they might get the habit and do as they did on one place once—rested nearly all season as the grower afterward told us. So do not prolong the rest to an extreme, for bench space is valuable.

Tariff absurdities

We are well aware of the fact that our readers have many divergent views regarding tariffs in general and the import duty on horticultural products. But whatever our opinion may be on the advisability of high or low tariff or no tariff at all on the goods we use, we can, at least, agree with Mr. McHutchison in his plea which appears in another part of this paper as to the essential requirement that the law, whatever it may be, should be consistent throughout and stated in such definite terms that it will be readily understood, mistakes in classification eliminated and that the possibilities of misinterpretation and incentive to fraud and litigation be reduced to a minimum. We strongly advise that all who may be interested read what Mr. McHutchison sets forth on this very important subject. His indictment of the bill as it stands is certainly an eye-opener.

An outdoor exhibit

The plan to have an outdoor display of ornamental planting in connection with the Minneapolis Convention next August, strikes us as an excellent idea. It has been often suggested as a desirable convention feature but it happens very rarely that a piece of ground near the meeting hall is available. Dayton was an exception, the convention being held on the Fair Grounds, and on that occasion a moderate but quite attractive display was made. The opportunity offered in Minneapolis is a rare one and should be taken fullest advantage of. Mr. Wirth's position in the park department is an assurance that the work of preparation and care will be properly attended to and the feature if carried out as he proposes will make a fine setting for the Convention Hall and attract much attention among the public. The most urgent requirement, however, is that the planting of hardy material be done at once. Those who intend to show should send the stock at the earliest possible moment.

Well-grown, then well-presented

The experience in the New York International Show and in the recent Co-operative Growers' Exhibition at Boston furnishes cumulative evidence that the florist as an artist is beginning to assert himself and is coming to realize the folly of leaving all the show honors to the disposal of the growers. The sentiment of the growers seems also to be undergoing a great change and they are disposed to recognize the indispensability of the floral artist as a medium through which to make an effectual and fruitful appeal for public interest and patronage. "Leading florists," so-called, are reluctant to enter the lists in competition with young or obscure concerns, but this policy if persisted in, may cost them dearly for the obscurity is very liable to shift around. Let the schedule makers, the judging committees, and the competing florists themselves, however, watch out and keep this department of the flower show from degenerating into an undertaker's adjunct. Keep the "casket cover" and all its depressing tribe out of sight and help the public to forget, when in the exhibition at least, that neither flowers nor florist have any other mission except to "fill the air around with beauty."

CO-OPERATIVE FLOWER GROWERS' EXHIBITION.

This show which took place on Saturday, April 12, at the Flower Market on Park street, Boston, was a most remarkable demonstration of the possibilities in such an enterprise when undertaken with a united front and will. The skill of Boston growers and the art of Boston floral artists was never in better evidence than on this occasion. Of the latter line, indeed, it may be said beyond fear of contradiction that it was the finest exhibit of floral design work ever presented in Boston, in quality and excellence comparing favorably with that seen at the recent International Exhibition in New York. The entries comprised table designs, wreaths, bridal bouquets, baskets, etc., by Zinn, Penn, Comley, The Rosary, Houghton, Wax, Hoffman and McFarland. Worthy of especial mention was a bridal bouquet of white sweet peas by Zinn in which the graceful trailing tufted sprays of *Asparagus pubescens* took the place of the usual baby ribbon in forming the "shower." It was distinctly unique and lovely. We have never seen anything more beautiful in its way than a standing wreath of pansies and Farleyense fern by F. H. Houghton, in which the blending and contrasting of colors and the posing of the flowers were done with consummate skill. A wreath of Richmond roses, *Coelogyne* and *erica* by H. Comley was another impressive piece, and Zinn showed a lovely wreath combination of blue pansies and Richmond roses. All the above-named firms contributed several pieces each and there was not one which was not admirably done. Wax showed the possibilities of yellow daisies and corn flowers in basket work, Hoffman the use of Mrs. Charles Russell rose in high handled basket with pale blue ribbon, The Rosary a combination of Ward roses, Spanish iris, sweet peas and lily of the valley; J. McFarland a massive wreath of white lilacs and lily of the valley, Penn two charming bridal bouquets, etc.

The carnation exhibits were very extensive, many of the most able growers of eastern New England being represented. Gorgeous, Mrs. C. W. Barron, Princess Dagmar and all the other recent sensations were seen in fine form. Among the debutantes were John Barr's giant white and pink striped Mrs. B. P. Cheney and A. Roper's bright pink seedling 1000.

In the rose section the New England Rose Company with Killarney Queen and Pink Killarney, Charles Holbrow and W. R. Morris with White Killarney, Exeter Rose Conservatories, W. H. Elliott and Neal E. Boyle with Richmond, R. Montgomery with Mrs. Ward, were among the leaders, and Waban Rose Conservatories showed among others their new rose Rex, a brilliant crimson, deliciously scented and for which we predict a proud future. Snapdragons in almost countless ranks were shown by Jas. Wheeler, F. E. Palmer, Paul E. Richwagen, W. S. Phelps and others. Wm. Sim, of course, had a fine array of sweet peas. L. E. Small and N. F. Comley with cornflowers, Lively & Bond and Mann Bros. with daffodils, W. C. Ward with pansies, Ed. Wood with superb Roman anemones, A. F. Calder and J. H. Newman

with violets, Edw. Bingham with primroses, J. W. Simpson, N. A. Hudson and several others with yellow daisies, Robert McGorum with mignonette, Mrs. J. F. Flood with callas, D. W. Duncan with Marechal Niel roses, Arthur Griffin, L. E. Small, J. W. Foote and many others with carnations, were among the demonstrators of the versatile abilities of the market growers.

In plants there were extensive groups of decorative material by A. Leuthy and W. T. Walke, geraniums by A. F. Coolidge, miniature pelargoni-

ADVERTISING TALKS

BY

Ralph M. Ward

No. 6

The man who doesn't advertise because he has "all the business he can attend to" admits he is incapable of handling a large business. He is satisfied and to be satisfied in business means stagnation, for business must either progress or decline. The man who realizes his business should be advertised and neglects to do it, is a lazy man; a lazy man is no worse than a dead man, only he takes up more room. Sometimes a florist can get an advantage in advertising for little money. The recent New York Flower Show was an instance; and yet only two or three were smart enough to grasp the opportunity. The reflections cast upon some of the New York retail florists for not taking part will take some time to wear off, and it will cost them more in loss of business than participation would have cost, aside from the publicity it would have given them. The time has come when advertisers are going to win in the florist business; and the time will come when prices will be advertised, too. The Flower Show was a great advertisement for the business; and for a greater Show which should follow in New York. Several of New York's leading retailers should be thoroughly ashamed of themselves for not taking part. They had better look out—times won't always be the same. It's time now to let people know who you are; what you are; where you are; what you have to sell that will benefit them to buy; and why they should buy from you. There is nothing better for the retailer than such shows and there's no business on earth to compare with the flower business in opportunities to write beautiful, entertaining and instructive advertisements.

ums by E. K. Farr, roses and hydrangeas by A. M. Davenport, and a new reservoir window box filled with ivy geraniums by John D. Twombly.

LIST OF AWARDS.

ROSES—Vases of 25.

1. Killarney, Wax Bros.' cup—New England Rose Conservatories.
2. Richmond, S. Hoffman prize—Exeter Rose Conservatories.
3. White Killarney, A. T. Stearns Lumber Co. cup—New England Rose Conservatories.
4. Killarney, Dark Pink, J. A. Zinn watch—Waban Rose Conservatories.
5. American Beauty, Market prize—New England Rose Conservatories.

6. Mrs. Aaron Ward, D. J. Lamey, cut glass—W. H. Elliott.
7. Lady Hillingdon, S. J. Dangel, cut glass—New England Rose Conservatories.
8. Killarney, Fottler, Fiske, Rawson prize—W. H. Morris.
9. Richmond, T. J. Grey Co. prize—N. E. Boyle.
10. White Killarney, J. M. Cohen cup—W. H. Morris.
11. Dark Pink Killarney, Joseph Breck, cut glass, vase of 50—No entry.
12. Mrs. Aaron Ward, W. Holden, cut glass—Robert Montgomery.
13. Lady Hillingdon, Means & Thatcher, cut glass—Robert Montgomery.
14. Best new rose of 1913 or undisseminated, Boston Plate & Window Glass Co. prize—Waban Rose Conservatories.
15. Sweepstake prize in above classes for best vase of roses, H. Penn silver cup—Waban Rose Conservatories.

CARNATIONS—Vases of 50.

16. White, Philip Feinstein, cut glass—L. E. Small, with White Wonder.
17. Scarlet, Henry R. Comley, cut glass—C. S. Strout, with Beacon.
18. Light Pink, H. T. Capers, cut glass—C. S. Strout, with Pink Delight.
19. Dark Pink, Braman, Dow & Co., cut glass—Arthur Griffin, with Gloriosa.
20. Crimson, Market, cut glass—W. R. Nicholson, with Pochontas.
21. Variegated, Johnson Knight, cut glass—James Wheeler, with Benora.
22. Seedling not disseminated, John McFarland, cut glass—Patten & Co., with Princess Dagmar.
23. Seedling, White, not disseminated—Albert Roper, with No. 24.
24. Seedling, Red, not disseminated—Albert Roper, with No. 302.
25. Seedling, Dark Pink, not disseminated—Albert Roper, with No. 1000.
26. Seedling, Light Pink, not disseminated—J. H. Leach & Son.
27. Seedling, Scarlet, not disseminated—No entries.
28. Seedling, Variegated, not disseminated—John Barr, with Mrs. B. P. Cheney.
29. Vase of 100 Carnations, any color, Robert Montgomery cup—Patten & Co., with Princess Dagmar.
30. Vase of 100 mixed Carnations, limited to 6 varieties, B. A. McGinty, cut glass—Patten & Co.

VIOLETS—100 Blooms.

31. Lady Hume Campbell—1st, H. F. Calder; 2nd, Fred Sly.
32. Any other double—H. F. Calder.
33. Princess of Wales—J. F. Newman.

SNAPDRAGONS—Vases of 25.

34. White—W. S. Phelps.
35. Pink—Fred E. Palmer.
36. Red—No entries.
37. Variegated—James Wheeler.
38. Yellow—James Wheeler.
39. Vase 50 spikes, any color, Russell Norton Co., cut glass—James Wheeler.

MISCELLANEOUS.

40. Marguerites, vase 100 yellow—1st, J. W. Simpson; 2nd, James Wheeler.
41. Group of Commercial Foliage and Flowering Plants, A. H. Hews & Co. cup—Wm. J. Walke, 5 entries.
42. Floral Wreath, W. H. Elliott prize—F. H. Houghton, 7 entries.
43. Center Piece for Table, Winter Place Tavern, cut glass—Sidney Hoffman, 6 entries.
44. Shower Bouquet for Bride, Norris F. Comley, cut glass—J. A. Zinn.
45. Floral Basket, H. M. Robinson Co., cut glass—J. A. Zinn.
46. Basket of Bachelor Buttons and Yellow Marguerites, L. E. Small prize—Wax Bros.
47. 100 Pansies, Arthur Griffin prize—W. C. Ward.
48. *Asparagus Sprengeri*—Wm. H. Elliott.
49. *Asparagus plumosus*—Mrs. J. Flood.
50. 100 Flowers Yellow Primroses—Edward Bingham.
51. Display of bulbous flowers, S. B. Hodgins prize—Lively & Bond.
52. Wallflowers—Morris F. Comley.
53. Lily of the Valley, Geo. W. Ayer prizes—J. H. Leach & Son.
54. Mignonette—Robert McGorum.
55. For the best new or novel exhibit, Welch Bros. Co. prize—Ed. Wood, with Roman Anemones.

SWEET PEAS—Vases of 100.

56. Four varieties of Winter Flowering Sweet Peas, Wm. Rosenthal cup—William Sim.
57. White—William Sim.
58. Pink—William Sim.
59. Purple or Lavender—William Sim.
60. Any other color—J. K. Chandler.
61. Vase of 200 Blooms, Donald Carmichael prize—William Sim.
- Special for Callas—Mrs. J. F. Flood.

INTERNATIONAL FLOWER SHOW

The Banquet—Final Awards, Adjustments and Corrections— Sweet Pea Day—Awards to Trade Exhibitors— The Bowling

The best news about the show, now that it is a thing of the past, is that notwithstanding a very heavy extra expense account it was an assured financial success.

On Sunday evening, April 13, Harry A. Bunyard gave a lecture on The World's Great Flower Shows, illustrated with numerous stereopticon views. Leonard Barron, editor of the Garden Magazine, also gave a stereopticon lecture on Famous American Gardens, and Mrs. Francis King of Alma, Mich., gave a talk on School Gardens and Advanced Horticulture.

THE BANQUET.

The social event of the International Flower Show was the dinner tendered the visiting members of the S. A. F. and other societies by the New York Florists' Club in Hotel Astor on Thursday, and as is characteristic with this club nothing was wanting to make the occasion one long to be remembered. The magnificent ball room was filled to overflowing with over 800 guests, and was richly decorated under the supervision of Alex. McConnell.

Wm. H. Siebrecht, president of the club, was also the toastmaster as well as time keeper and much fun was occasioned by his endeavors to limit speeches. J. K. M. L. Farquhar, president of the S. A. F., spoke, complimenting the club on the very beautiful exhibition as well as the evening's entertainment. Patrick O'Mara was second speaker and in his usual jocular way made a few remarks and then said he did not expect to be called on for any talk but to sing a duet with Jos. A. Manda, ex-president of the club, whom he called to the head table and then presented with a silver service—knives, forks, spoons, etc., and wished Manda, who is a newlywed, would have "one" for each fork. Mr. Manda replied appreciatively.

The manager of the International Exhibition Co., being next called upon, complimented all and said that the florists were the finest men they had ever done business with. Robert Craig talked eloquently, as usual, and later a number demanded that he should tell the story, "Battle of Waterloo."

Wm. Wells, responding to the toast, "England," spoke in high tones of praise of the show and thought the roses exhibited the most wonderful thing he ever saw in his life. He was sorry that his countryman, Stuart Low, could not have stayed to see them. W.

F. Kasting, in the course of his remarks, mentioned there was \$27,000 in the S. A. F. treasury, which created much applause.

George A. Robinson of Montreal, responding for Canada, extended courtesy to all who would go to Montreal on the way to Minneapolis next August and said he hoped to get the convention in Montreal the following year. Philip Breitmeyer made a very interesting speech and Theodore Wirth followed him, telling what Minneapolis was preparing to do for those who come to the convention. E. G. Hill spoke for the ladies.

Charles H. Totty was introduced as "the man who did it all," but he turned that honor over to his committee. Mr. Wells, mentioning the visits of the King and Queen to the British Show, asked why we did not have "the great guns." Mr. Totty replied that they had tried first President Wilson, who was too busy revising the tariff downward; then Governor Sulzer, who was too busy with the grafters, and third, Mayor Gaynor, who was too busy closing the restaurants up at 1 o'clock, to come. Wm. H. Duckham spoke modestly, as usual, and sprung a surprise boom for Mr. Totty as next president of the S. A. F.

The dinner was a splendid one in every respect. After the close of the speaking there was dancing until 2.30 A. M.

FINAL AWARDS, ADJUSTMENTS AND CORRECTIONS.

(Other Than What Appeared in Our Notes in Issue of Last Week.)

200 Cut Roses, American Beauty and undissemminated varieties excepted, New York Cut Flower Company's Silver Vase to A. N. Pierson, Cromwell, Conn. This was a most sensational exhibit, declared by all to have been the finest vase of roses ever staged in this or any other country. The variety was Killarney Queen. The Philadelphia Rose Growers' prize for 75 roses, similar restrictions, was also won by Mr. Pierson.

Silver medal to J. T. Pratt, gard. J. W. Everitt, for 12 Gardenias in pots.

Silver medal to Chester K. Billings, gard. James Bell, for collection of Schizanthus Boddingtonii.

Gold medal to Robert Craig & Co. for named Crotons, 73 varieties, including many novelties.

S. A. F. gold medal to Thomas Roland for Acacia species and wonderful display of Acacias, Bougainvilleas, etc.

Silver medal to Mrs. D. Willis James, supt. Wm. Duckham, for collection of hyacinths.

Gold medal to Miss Mary Helen Carlisle, London, Eng., for pictures in oil and pastel of English gardens.

Gold medal to Metairie Ridge Nursery

WILSON'S PRETTY "DUTCH" FLOWER GIRLS.

Co. for group of lilies from American-grown bulbs, hybrids of *Lilium Harrisii* and *Multiflorum*.

Silver medal to John Wanamaker, supt. John H. Dodds, for new *Pandanus*.

Bronze medal to S. M. Goldsmith, gard. W. B. Seymour, for callas.

Gold medal to W. A. Manda for collection of orchids, including hybrid *odontoglossums*, etc., shipped from England.

Silver medal to Metairie Ridge Nurseries for cut liliuns, hybrids of *Lilium Harrisii* and *multiflorum*.

Gold medal to Charles H. Totty for roses and carnations and general display of cut flowers, etc.

Gold medal to Clement Moore for group of orchid hybrids.

Silver medal to Mrs. W. G. S. Griswold, supt. A. J. Loveless, Lenox, Mass., for new *antirrhinums*.

Silver medal to David S. Miller, Tuxedo Park, N. Y., for model estate.

The Henry F. Michell Company's gold medal to Thomas Roland for the most artistically arranged exhibit.

Specimen *Laelia*—W. A. Manda.

Tulips, 20 pans—Mrs. A. M. Mooth, gard. E. Farden, Great Neck, L. I.

Specimen *Kentia Forsteriana*—Mrs. H. McK. Twombly, gard. R. Tyson, Convent, N. J.; 2nd, W. A. Manda.

Specimen *Maranta*—W. A. Manda.

25 Conifers, 20 varieties—1st, F. R. Pierson Co.; 2nd, Julius Roehrs Co.

25 Conifers, dwarf—1st, Bobbink & Atkins; 2nd, W. A. Manda.

Holly—Bobbink & Atkins.

Miniature Landscape Garden, Horticultural Club of Boston prize—1st, Frank Josefko, Glen Cove, L. I.; 2nd, Julius Roehrs Co.

Miniature Model of Estate, Gardeners' and Florists' Club of Boston prize—Frank Josefko.

Cypripedium hybrid—W. A. Manda.

Flowering Plant Species, Massachusetts Horticultural Society's silver medal—R. & J. Farquhar & Co., Boston.

Neurolepis species—1st, Robert Craig & Co.; 2nd, F. R. Pierson Co.

Orchid species—1st, Clement Moore, gard. J. Mossman; 2nd, W. A. Manda.

Orchid variety—1st, Clement Moore; 2nd, W. A. Manda.

Most valuable Collection of New Plants or Flowers, Missouri Botanical Garden medals—1st, W. A. Manda; 2nd, A. C. Zvolanek.

Marguerites 1st, Madsen & Christensen, Wood Ridge, N. J.; 2nd, Mrs. F. A. Constable, gard J. Stuart.

Specimen *Rhynchospermum*—2nd, H. Darlington, gard. S. W. Popp, Mamaroneck, N. Y.

12 *Spiraea* or *Astilbe*, 3 varieties—Mt. Desert Nurseries.

Laelio Cattleya, judgment reversed—1st, Lager & Hurrell; 2nd, W. A. Manda.

Erica melanthra—1st, Thomas Roland; 2nd, Louis Dupuy, Whitestone, N. Y.

Erica specimen—Thomas Roland.

Moore, Hentz & Nash cup for six roses was won by Robert Simpson, Clifton, N. J.

Table decoration, open to members of National Gardeners' Association only—1st, Henry Siegel, Mamaroneck, N. Y., gard. Thos. Aitchison; 2nd, S. Untermyer, Yonkers, N. Y., gard. W. H. Waite; 3rd, Wm. Sim, Cliftondale, Mass.

Cut Flower Novelty, Niessen cup, F. W. Fletcher & Co., Auburndale, Mass.

Basket Foliage Plants—Max Schling, New York City.

Basket Flowering Plants, Max Schling.

Corsage of Orchids—1st, Max Schling; 2nd, Boston Cut Flower Co., Boston.

Bridal Bouquet, silver cup, Alfred Kattmiller, New York City; 2nd, Max Schling.

The sweet pea competition was practically a walk-over for Wm. Sim. In 45 classes for which he was eligible and in all of which he exhibited, he won first in all but five. He captured the Burpee Silver Cup for largest display.

Boddington Silver Medal, Lord & Burnham Gold Medal and Amer. Sweet Pea Society's Silver Medal. A. C. Zvolanek won the Am. Sweet Pea Society's Gold Medal for exhibit of exceptional merit, with his new winter flowering Spencers and Certificate of Merit for marked improvement over existing varieties.

John M. Barker, Morristown, N. J., won two 1sts and four 2nds in the classes of 50 sprays and 25 sprays, and one 2nd in the 100 classes. Winkler Bros., Hacken-

sack, N. J., one 1st and six 2nds in the 25s and 50s and two 2nds in the 100s, and F. Mamitsch, Paterson, N. J., one 1st and two 2nds in the classes for 100 sprays and four 2nds in the 25s and 50s. In the class for private gardeners Thos. Ryan, gardener for John I. Downey, Portchester, N. Y., was first. In the decorative section, 1st for table decoration was won by Adolph Lewishohn, Ardsley, N. Y., Max Schling 2nd. Max Schling won 1st for Basket of Sweet Peas and Bride's Bouquet, Boston Cut Flower Co. and H. R. Comley, Boston, taking 2nd respectively. For Corsage, S. A. Anderson, Buffalo 1st, and Henry R. Comley 2nd.

Sweet Pea Society's Special Awards.

A. C. Zvolanek, Bound Brook, N. J., certificates of merit for Mrs. A. Skach, Mrs. William Sim Spencer, Red Orchid, Blush Orchid, White Orchid, Pink and White Orchid, all winter-flowering varieties.

John J. Downey, Portchester, N. Y., gard. Thos. Ryan, for vase of summer-flowering Spencer Sweet Peas, Society's Bronze Medal.

W. Atlee Burpee, Philadelphia, Pa., for collection of winter-flowering Spencer Sweet Peas, Society's Silver Medal.

The judges were G. W. Kerr, Doylestown, Pa., chairman; Frank H. Treandly, New York; James Wheeler, Natick, Mass.; Edwin Jenkins, Lenox, Mass., and George T. Schuneman, Baldwins, L. I.

AWARDS TO TRADE EXHIBITORS.

Class A—Henry F. Michell Co., certificate of merit for Geranium Helen Michell. Honorable mention for new hybrid freesias.

Class E—Jos. G. Neidinger, honorable mention for a new device for keeping and showing violets, pansies, sweet peas, etc.

"INTERNATIONAL" TABLE DECORATIONS.

The accompanying illustration shows the first prize table decoration with carnations at the International Show. It was the work of R. Tyson, gardener to Mrs. H. McK. Twombly. The centre piece consisted of pink and white carnations and schizanthus, arranged in a tall silver vase.

On our cover page we show the second prize winner in the same class, a very unique design by George H. Cooke, in which Enchantress carnations only were used. The parasol and ribbon were of pale blue silk. Both of these exhibits attracted much admiration.

Class C—Hontsch & Co., Dresden, Niedersiedlitz, Germany, highly commended for exhibit of Hontsch boilers.

Kroeschell Bros. Co., Chicago, Ill., highly commended for exhibit of Kroeschell boilers.

Class D—King Construction Co., North Tonawanda, N. Y., honorable mention for improved flat rafter greenhouse. Highly commended for new iron eave plate for greenhouse. Highly commended for superior arrangement of drip pan and improved shape of eave, throwing the water away from the side wall of the house.

Class G—Schloss Bros., New York, honorable mention for exhibit of chiffons, "International" velvet corsage bows, lace and chiffon bouquet holders, chiffon and ribbon table decorations, gold and silver figured chiffons, satin black velvet and ombre shaded ribbons, silver and gold figured ribbons.

OUT OF THE GINGER JAR.

A good feature of the International Flower Show was the excellent labeling noticed in many displays, notably in those of Roland and Knight & Struck. Every plant was not only well-shown-off individually but it had a label, which, while small and unobtrusive, answered every question to the interested beholder.

We like the way our Philadelphia growers showed up. Ten firsts and one second was the record of one of them out of 12 entries. Robertson, Podd-

and Batchelor all surpassed themselves and were a credit to our burg and the show.

Of the many delightful foregatherings one of the best was with George A. Robinson of Hall & Robinson, Montreal. Mr. Robinson is from south of the Tweed, but good enough to have had better luck, which is high praise from "a citizen of the world" who had better luck. Mr. Robinson has made a good name for himself as a grower and shrewd business man, and is now one of Montreal's substantial citizens.

Another Canadian was C. Packman, who is of the same distinguished derivation as the two referred to above. We met him first in New York some years ago and now we find he has blossomed out into successor to an old business connection of ours—Graham Bros. of Ottawa. Mr. Packman is well pleased with the outlook and assures us that Ottawa is one of the best cities for a pushing wide-awake florist or seedsman.

David S. Miller, gardener for George Van Mason, Tuxedo, N. Y., proved a delightful companion and on the quiver to swap history, ethics, philosophy or gossip, past, present and future. He seemed delighted to find that although I had never been farther north than Inverness, yet that 30 years or so ago, as shipping clerk for Ben Reid's, I knew all about Wick and Lerwick.

The next time you go to Montreal do not forget to look up William O'Brien Cotter, managing director of the Montreal Floral Exchange, and a live wire. He was one of the most distinguished looking six-footers in the younger set.

Thomas Page, Brookside, Great Barrington, Mass., we only had a few minutes' chat with. But enough to make us eagerly desire a better acquaintance.

We talked with the redoubtable Ed. Jenkins for some time—quite unaware until he had walked away who the gentleman was. Then some kind friend said, "Don't you know who that was?" Enlightened, we ran after and caught him just at the swing door—with our abject apology.

G. C. WATSON.

Chester Jay Hunt invites his friends to see his collection of spring-flowering bulbs at his trials in Montclair, N. J. If the season is a normal one, the daffodils will be at their best during the last of April and early in May; the early tulips during the first week in May; the late tulips about mid-May. Notice of exact dates will be given upon request.

Among the hundred and fifty different daffodils may be seen such sorts as Apricot, Barcarolle, Bedouin, Blackwell, Circlet, Cœur de Lion, Cossack, Duke of Bedford, Evangeline, Home-spun, King Alfred, Lady Margaret Boscawen, Masterpiece, Monarch, Red Beacon, Seagull, Sunrise, Virgil, White Queen, and many other rare and equally handsome varieties. Over three hundred varieties of tulips will be in flower, two hundred of these being May-flowering kinds.

PERSONAL.

Horace J. Head, of Rochester, N. Y., has just got out of the hospital where he underwent an operation for appendicitis.

Jackson Dawson, of the Arnold Arboretum, who has been quite ill for two weeks, is now convalescing satisfactorily.

H. Bayersdorfer, Philadelphia, Pa., will make his annual trip to Europe in search of the latest novelties on April 29, when, with Mrs. Bayersdorfer, he will sail on the Kaiser Wilhelm II.

Mrs. Wm. W. Edgar of Waverley, Mass., entertained several S. A. F. ladies to tea at the Waldorf-Astoria Hotel, New York, on April 10th. She was assisted in receiving by Mrs. B. Hammond Tracy of Wenham, Mass.

Boston visitors—Stephen Green, representing H. Bayersdorfer & Co., Philadelphia; Robert Shoch and Sam. Edleman, representing Rice Co., Philadelphia; J. Niedinger and Geo. Hampton, Philadelphia; W. N. Rudd, wife and daughter, Morgan Park, Ill.; Will. Currie, Milwaukee, Wis.

MAKE A NOISE.

A hen is not supposed to have much
Common sense or tact,
Yet every time she lays an egg
She cackles for the fact.

A rooster hasn't got a lot
Of intellect to show,
But, none-the-less, most roosters have
Enough good sense to crow.

The mule, the most despised of beasts,
Has a persistent way
Of letting people know he's around
By his insistent bray.

The busy little bees they buzz,
Bulls bellow and cows moo,
And watchdogs bark and ganders quack,
While doves and pigeons coo.

The peacock spreads his tail and squawks,
Pigs squeal and robins sing,
And even serpents know enough
To hiss before they sting.

But man, the greatest masterpiece
That nature could devise,
Will often stop and hesitate
Before he'll advertise.
—T. P. A. Magazine.

American Beauty roses may be cheaper, but every day old-fashioned hog meat remains high.—*Southern Merchant.*

DURING RECESS.

The Bowling Tournament at New York.

The bowling tournament of the National Association of Gardeners, held at Thum's Alleys, New York, on Wednesday, April 9th, brought together a large gathering of gardeners and florists, members of the N. A. G. and S. A. F. While no record scores were made, the event was enjoyed by all and voted a success.

Messrs. Donaldson, Miesem and Iquey carried off honors for the Astoria team which won in the team tournament. Iquey made high score of the team, 235. Seybold won in the sweepstake contest. On the following morning the N. A. G. invited the ladies of the S. A. F. Auxiliary to a bowling contest.

Scores.

THREE-MEN TEAM CONTEST.

1. Astoria, L. I.	1520
2. Phila. Horticultural Society	1465
3. Baltimore, Md.	1433
4. Westchester and Fairfield	1422
5. New York City	1387
6. Glen Cove, L. I.	1339
7. Tuxedo, N. Y.	1297
8. Elberon, N. J.	1272
9. Oyster Bay, N. Y.	1191
10. Yonkers, N. Y.	1104

SWEEPSTAKE.

1. Seybold	522
2. Perk	520
3. Robertson	514
4. Shaffer	508
5. Brown	466
6. Niquit	440

Some eighty individual scores were recorded but lack of sufficient space prevents our giving them here.

On the evening preceding the bowling event, many of the bowlers attended the "Dutch" treat of the N. A. G., held at the Murray Hill Hotel. Good music and singing was enjoyed. The assembly was addressed by Messrs. J. K. M. L. Farquhar, H. E. Philpott, William H. Siebrecht, Edwin Jenkins and Charles B. Weathered.

"Get them at Dreer's"

ALL SEASONABLE PLANTS, SEEDS, BULBS AND SUNDRIES

HARDY PERENNIALS. The most complete collection of varieties and the largest stock in the country. Our Perennial plants have a national reputation, we spare no expense to have them in the best possible shape for the planter. Such varieties that move better when pot grown are prepared in this shape; this does not mean little seedlings, but in the majority of cases the plants were field grown, were dug and potted during the fall and winter months and are of just the right size to give immediate results; they are not to be compared with so called field clumps. Try them and be convinced. See Our Current Wholesale List for Varieties and Prices.

ROSES FOR OUTDOOR PLANTING TO GIVE IMMEDIATE RESULTS. We have three hundred thousand 5 and 6 inch pots, the usual Dreer stock and the style of palms your retail customers are looking for. These are all two year field grown plants which have been potted during the winter months and which were stored in cold houses and frames and which are now in prime condition for out-door planting. The collection is the most up-to-date, including many new varieties not offered by anyone in the trade.

New Hybrid-Tea Rose George Dickson.

Early-flowering Hardy Phlox.

HYBRID TEAS, HYBRID PERPETUALS, TEA AND EVERBLOOMING, RAMBLERS, BABY RAMBLERS, MOSS ROSES, HYBRID SWEET BRIARS, AUSTRIAN BRIARS, WICHURIANA, ETC., ETC. See Our Current Wholesale List for List of Varieties and Prices.

AQUATIC PLANTS—WATER LILIES, NELUMBIUMS, VICTORIAS. Tender and Hardy Aquatics have been a special feature with us for nearly a quarter of a century. Over eight acres of artificial ponds are devoted to their culture. If we can assist you in making plans, or selecting varieties, the services of our expert are at your disposal for the asking.

OUR CURRENT WHOLESALE LIST also describes the following, all of which are handled as Specialties:

DECORATIVE PLANTS, PALMS, FERNS, PANDANUS, BAY TREES, BOXWOODS, DRACAENAS, etc., etc.

HARDY SHRUBS, HARDY VINES, HARDY CLIMBERS, RHODODENDRONS, AZALEAS, etc.

BULBS, DAHLIAS, TUBEROUS ROOTED BEGONIAS, GLADIOLUS, GLOXINIAS, FANCY LEAVED CALADIUMS, CANNAS, etc., etc.

PHILADELPHIA, PA.

CLUBS AND SOCIETIES

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTI- CULTURISTS.

Meeting of the Board of Directors.

The board of directors of the Society of American Florists and Ornamental Horticulturists met on February 25th at the Hotel Radisson, Minneapolis, Minn. There were present President J. K. M. L. Farquhar, Vice-President Theo. Wirth, Treasurer W. F. Kasting, Directors E. Allan Pierce, Harry A. Bunyard, Chas. H. Totty, J. A. Evans, R. Vincent, Jr., Thomas Roland, August F. Poehlmann and, as secretary pro tem, George Asmus.

The president announced that owing to the serious illness of Secretary John Young, he had appointed secretary pro tem, Mr. George Asmus, which appointment was endorsed by the board. A telegram was sent to Mr. Young, who was an inmate of the Roosevelt Hospital, New York, expressing with him sympathy in his illness and the hope that he would speedily recover.

A sample of the proposed membership badge for 1913 was submitted to the meeting and the design being favorable to the board, it was adopted and the secretary was ordered to procure a supply of badges for the August convention. A design for a life membership badge was submitted by the secretary and was adopted. The secretary was ordered to procure a supply of these badges at a price not to exceed 75c each, and to place them at the disposal of life members at the cost price.

A resolution was passed to the effect that the leading florists, or others having trade interests, forward any suggestions or demands relating to tariff legislation which they might wish considered, as affecting their interests, to Wm. F. Gude, Washington, D. C., Chairman of the Tariff and Legislation Committee, which committee would meet during the National Flower Show to be held in New York City in April.

The following were appointed as a local advisory committee in connection with the preparations for the convention in Minneapolis next August: Theo. Wirth, Chairman; W. Desmond, Hugh Will and George Asmus.

Vice-President Wirth submitted a plan covering the utilization of a large piece of land adjoining the Armory in which it was proposed to house the convention for an outdoor exhibition, the laying out of the ground, securing exhibits from the growers and caring for them, turning the whole over to the society at the opening of the convention. The plan meeting with the approval of the Board, it was decided that such outdoor exhibition be provided for, merged with the general trade exhibit and made a part of the general expense, and that the secretary and advisory board be ordered to work out a feasible plan for carrying out the idea, and give public notice through the papers. Charles E. Critchell of Cincinnati was appointed chairman of the sports committee of the Convention.

In regard to the rates for space in the trade exhibition at Minneapolis, it

was decided that the rate be 40c. per sq. ft. with a minimum price of \$20. It was further arranged that the business convention occupy four days and that the trade exhibit should be opened for the same period and that all articles exhibited must be left in place until the close of the business session of the Convention, which would be at 10 o'clock P. M., on the fourth day. A resolution was passed that it was the sense of the Board of Directors that some action be taken by the society at the next Convention whereby exhibits of artificial flowers at the society's trade exhibits and flower shows, be prohibited.

On Wednesday morning, February 26th, the board visited the Armory to inspect the building and arrange plans for the Convention and trade exhibition. Afterwards, a convention program was arranged and duly adopted.

The following appropriations were made:

Entomologist	\$100
Pathologist	100
Botanist	100
Convention badges	100
Asst. to Sec'y at Convention	100
Sports Committee	75
President's messenger	25
School Garden Committee	75

The accommodations at the Hotel Radisson having been found satisfactory, that hotel was appointed headquarters for the Convention.

Vice-President Wirth was invested with authority to make arrangements for the lease of the Armory.

Charles H. Totty, chairman of the National Flower Show Committee, reported on the arrangements made for the show to be held in New York, and the report was accepted.

The salary of the secretary was fixed at \$1000 per year, with an additional allowance of \$300 per annum for office rent. It was also decided that in consideration of the additional work as superintendent of the trade exhibition he be paid an additional salary of \$500 per annum, with a further allowance of \$200 to cover the expense of a thirty-day stay in the convention city which would be required through his duties.

After a resolution covering thanks to the local societies and Vice-President Wirth for the hospitalities enjoyed during the visit of the board in Minneapolis, the board adjourned to meet at the National Flower Show in New York City.

GEORGE ASMUS,
Secretary, pro tem.

AMERICAN CARNATION SOCIETY.

At the annual meeting, held at New York on April 9, the election of officers for the ensuing year resulted as follows:

President, R. T. Brown, Queens, L. I., N. Y.

Vice-President, Herman Dorner.

Secretary, A. F. J. Baur, Indianapolis, Ind.

Treasurer, F. B. Dorner, Urbana, Ill.
Director, S. J. Goddard, South Framingham, Mass.

The location of the next meeting was referred to the Board of Directors to choose.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The April meeting of this club was especially interesting to the gardener fraternity, the special features being a paper on musk melons under glass by W. A. Carswell, of Bar Harbor, Me., and a talk by Fred E. Palmer on how a big crop of potatoes may be grown on unpromising land. Mr. Carswell's paper was an intelligent, practical presentation of the subject, covering all the operations from start to finish and the readiness with which he answered the questions propounded and parried the efforts to disconcert him placed him in an excellent light with his audience. It was brought out during the debate that the American varieties of musk melon are much superior to the English in flavor although not so attractive to the eye. Mr. Downs asserted that Sutton's widely advertised varieties are only turnips in taste when compared with James Garthley's Mrs. H. H. Rogers. W. N. Craig was equally positive that the flavor of the latter is immeasurably superior to that of any variety Sutton ever sent out. Another advantage in the favor of the American varieties was that they can be started and a crop ripened up in about nine weeks whereas the English varieties require fully four months. One peculiarity, however, of the American is that it cannot be fertilized by hand successfully, bees being indispensable to the production of a crop.

Robert Cameron, W. J. Stewart and Herman Bartsch were called upon to tell something about the International Flower Show which they had visited. Mr. Cameron was disposed to be critical as to the arrangement of the exhibits and the architecture of the hall; Mr. Stewart said his views were already in print and Mr. Bartsch said complimentary things regarding Massachusetts' participation in the honors of the exhibition, but declared the best thing was the dinner. "It certainly was some dinner," said he. President Kennedy took occasion to differ with those who had said the New York show was greatly superior to that held in Boston two years ago and deprecated the placing of greenhouse structure exhibits on the main display floor.

An invitation from W. H. Elliott to visit his rose houses at Madbury about middle of May was accepted and it is hoped that a sufficient number will go, to fill a special car.

Ladies night will take place in June and picnic in July, by unanimous vote.

There was a superb exhibition of sweet peas by Wm. Sim. It was divided in two sections, one containing only the grandiflora types and the other comprising the cream of Zvolanek's new winter-flowering Spencers. There were about fifty named varieties and seedlings under number, a vase of fifty sprays of each.

T. N. Cook, of Watertown, showed blooms of the rose Bessie Brown, lovely blush and full double. An interesting novelty was Gaillardia Lady Rolliston, a pure yellow hardy sort, shown by the Breck Robinson Co., of Lexington, Mass.

NEW YORK FLORISTS' CLUB.

The meeting of the New York Florists' Club on Monday evening, April 14, was fairly well attended but very little important business was transacted, the close of the big exhibition the night before having left everybody connected with it pretty well tired out and all matters appertaining to it were laid over until the May meeting. Oscar Boehler, A. L. Miller and John Birnie were appointed a committee to work with the committees of the New York and New Jersey Plant Growers' Association and the New York Plant and Flower Market Association in the matter of the proposed public plant and flower market in Union Square. At present there is no covering of any kind for wagons or stands but it is expected that proper provision will be made.

Resolutions were read and adopted on the death of A. Moltz and Philip Einsman. Philip Kessler for the outgoing committee stated that this annual affair would take place on Tuesday, July 1, at Wetzel's Point Grove. C. B. Weathered showed a design that had been submitted for a permanent button for club members and a committee was authorized to consider and report on this matter at a later meeting. Twelve new names were proposed for membership. Bergenfield Nurseries showed Lobelia Mrs. Clibran and two seedling carnations.

AMERICAN ASSOCIATION OF NURSERYMEN.

Portland Convention, June 18-20.—Mr. Marsden B. Fox, special excursion agent for the association, suggests that members in the Middle West and South and Southwest, arrange to join the Eastern men either at Chicago or St. Paul. It may consume a little longer time for some to do this, but it will not cost any more, and the larger the party the more enjoyment will the trip yield. Those who expect to attend the convention by any route, and those who wish to join the Eastern party, should communicate at once with the Secretary.

JOHN HALL, Sec'y,
Rochester, N. Y.

ST. LOUIS FLORIST CLUB.

The twenty-five members of the Florist Club who attended its meeting on last week Thursday, April 10th, spent a very pleasant afternoon. E. W. Guy presided in his usual pleasing way. The publicity committee reported through Chairman Windler. The committee is now hard at work for Mother's Day and Decoration Day. In response to an invitation from the director of the Missouri Botanical Garden it was decided to hold the June meeting of the club at the Garden. The next meeting will be held on Thursday, May 8th.

CLUB AND SOCIETY NOTES.

At the regular monthly meeting of the Lenox, Mass., Horticultural Society, held in the Town Hall, April 5th, there was a fine exhibit of *Odontoglossum crispum* from Mr. Cooley's place in Pittsfield (J. O'Keefe, gardener), which received an award of merit. H. O. Daniels of Millbrook, Conn., gave a talk on dairying.

EASTERN NURSERIES, Jamaica Plain, Mass.
HENRY S. DAWSON, Manager.

"The faults of the grower in growing and consigning," was the title of a paper read before the Lancaster Florists' Club on the 17th inst., by Samuel S. Pennock of Philadelphia. A quarter of a century's experience in the small space between the upper and the nether millstone makes this out-giving of exceptional interest to every grower. To what the appetites of our readers—we hope to be able to publish this in full next week. Do not miss the next number—and be sure your subscription is paid up. Obey that impulse.

The New Jersey Floricultural Society has about concluded the schedule for its annual dahlia show which will be held in English Hall, East Orange, the latter part of September. A large number of cups, medals and cash prizes have been donated. The committee has arranged a schedule that will, we believe, suit everyone, school children included. A feature of this show will be an exhibit of miniature gardens.

The April competition resulted as follows:

Wm. Reid, Killarney roses 80 points, carnations 50; John Dervan, roses 75; F. Bergerland, carnations 78; Max Schneider, carnations 88, sweet peas 65, stocks 85; E. Panuska, coleus 70, Vanda suavis 85. Lord & Burnham prizes—E. Panuska, Anthurium 70; Wm. Reid, carnations; John Dervan, roses 60.

At the regular monthly meeting of the Westchester and Fairfield Horticultural Society on April 11th a lecture was given by Prof. Jarvis of Storrs College on the "Diseases of

Fruit Trees." Quite a large number of pictures were shown illustrating the methods of pruning, planting, etc., recommended for the reclaiming of old orchards, so long neglected in this state. Prof. Jarvis answered many questions in a very able and practical manner. On account of the International Exhibition being held in New York, the exhibits at the meeting were not so much in evidence as usual. The following awards were made:

Thos. Ryan cultural certificate for sweet peas.
James Forster—cultural certificate for specimen marguerite.
A. Wynne—cultural certificate for Schizanthus Wisetonensis.
Thos. Ryan—honorable mention for Hydrangea Hortensis.
P. W. Popp honorable mention for chrysanthemum "Seven Oaks."

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Canners to Meet in Baltimore.

As forecast in these columns, Baltimore has been selected as the place for holding the next annual convention of the National Canners' Association and Allied Industries.

The committee on location held its final meeting in Baltimore on the 9th, and decided the matter officially. At this meeting contracts between the officers of the three associations connected with the canning industry, and the Canned Goods Exchange of Baltimore and the Baltimore hotel Proprietors, were signed, which practically closes the case excepting in the matter of details.

In this connection it may not be amiss to remark that the city of Richmond was a very close second to Baltimore, and had it not been the fact that Baltimore is the center of a great canning industry and more accessible to the men engaged in this business than Richmond, it would have been "nip-and-tuck" between the two. We are informed that already the rush to secure rooms at the leading hotels has commenced, and we advise all those expecting to attend the convention in February next to make early application for rooms or they may be unable to secure what they want.

Change in Bolgiano Firm.

Information has reached us of an important change in the firm of J. Bolgiano & Sons of Baltimore, Roland Bolgiano having sold out to his brother Charles or "Charlie," as he is familiarly known. It is said that this has been expected for some time by those close to the members of this firm and especially since the death of their father some months ago. As Roland Bolgiano is comparatively a young man it is to be assumed that he will go into some business, but we are advised that under the terms of sale to his brother he agrees not to engage in the seed business again, either directly or indirectly.

Flood Damage.

Private advices from the flood districts of Indiana and Ohio confirm recent newspaper reports that the damage to property was not nearly as heavy as the early stories indicated, and that the loss of life was much smaller than was generally believed. A circular letter issued by the Livingston Seed Co. of Columbus, Ohio, shows that this firm suffered little direct loss, although it was very seriously hampered for several days because of the demoralization of mail and wire service. Probably for a period of ten days it was impossible to make shipments, but we believe things are going now fairly well although still subject to some delays. It was gen-

erally believed that the canners of these two states had suffered heavy losses, but letters received direct from several of them show that while they did sustain some losses they were not in most cases of a crippling character, and generally such as could be readily replaced.

Pea Crop Injured.

It is reported that peas which were planted early in Delaware and Maryland have been severely damaged by winds and hail, while in some sections the young plants have been buried up by sand. It is quite generally believed that the pea crop of the two states will be short this season. In the northwest planting has not commenced, but those operating in Montana, Idaho and other northwestern states are anticipating an early spring. Let us hope this will be realized.

Growing of Beans in Ontario.

(Consul Fred C. Slater, Sarnia, Canada.)

In sections of Ontario bean farming is conducted extensively. The southern extremity of this consular district extends down into part of Kent County, bordering on Lake Erie, and this is one of the best bean sections of the Province. The crop suffered a partial failure in 1912, due partly to drought about planting time and partly to excessively wet weather later on. The quality was particularly poor.

The Ontario Bean Growers' Association held its annual meeting at Ridgetown, in Kent County, the 1st of March. The association deplored the fact that the yield of beans was on the wane, and it was brought out that, whereas Kent County had an acreage of 33,275 in 1903, with an average yield of 18.5 bushels per acre, and the Province an average of 18.4 bushels, the acreage in the county in 1912 was 34,325 and the average yield 16.7; the Province's acreage being 69,703 and average yield 17 bushels. The association emphasized the need of better seed and the problem of proper fertilization. Much was said with reference to getting the land back to its former state of productiveness, when it had produced as high as 40 bushels an acre.

Resolutions were passed favoring the removal of duty on ditching and tiling machinery, and instructing that the Agricultural College of Ontario be requested to aid in working for the best interests of the bean-raising industry in fighting pests and in protesting against the duty on acid phosphate.

Mr. Robert Sydenham, Birmingham, is contemplating a trip to the United States during the summer when the sweet peas are in bloom. He intends to visit the trials and the show of the American Sweet Pea Society. The versatile and genial "Uncle Robert" knows sweet peas from A to Z, and his next edition of "All About Sweet Peas" will no doubt be enriched by his American investigations and impressions. Sure we are of this, his notebook and pencil will have a busy time across the Atlantic. "Uncle Robert" is never in a hurry, but all the same, to use a Yankee term, he is a hustler.—*Horticultural Trade Journal*.

THE TARIFF.

Draft of Proposed Bill Now Before Congress as it Affects Horticultural Products.

Schedule G, Section 219, reads: "Orchids, palms, azaleas, and all other decorative or greenhouse plants and cut flowers, preserved or fresh, 25 per centum ad valorem; lily of the valley pips, tulips, narcissus, begonia and gloxinia bulbs, \$1 per thousand; hyacinth, astilbe, dielytra and lily of the valley clumps, \$2.50 per thousand; lily bulbs and calla bulbs, \$5 per thousand; paeony, Iris Kaempferi or Germanica, canna, dahlia and amaryllis bulbs, \$10 per thousand; all other bulbs, bulbous roots or corms which are cultivated for their flowers or foliage, 50 cents per thousand."

Schedule G, Section 220, reads: "Stocks, cuttings or seedlings of Myrobalan plum, Mahaleb or Mazzard cherry, Manetti Multiflora and briar rose, three years old or less, \$1 per thousand plants; stocks, cuttings or seedlings of pear, apple, quince and the Saint Julien plum, three years old or less, \$1 per thousand plants; rose plants, budded grafted or grown on their own roots, 4 cents each; stocks, cuttings and seedlings of all fruit and ornamental trees, deciduous and evergreen shrubs and vines, and all trees, shrubs, plants and vines commonly known as nursery or greenhouse stock, not especially provided for in this section, 15 per centum ad valorem."

Schedule G, Section 221, reads: "Seeds: Castor beans or seeds, 20 cents per bushel of 50 pounds; flaxseed or linseed and other oil seeds not specially provided for in this section, 20 cents per bushel of 56 pounds; poppy seed, 15 cents per bushel of 47 pounds; mushroom spawn and spinach seed, 1 cent per pound; canary seed, ½ cent per pound; caraway seed, 1 cent per pound; anise seed, 2 cents per pound; beet (except sugar beet), carrot, corn salad, parsley, parsnip, radish, turnip and rutabaga seed, 3 cents per pound; cabbage, collard, kale and kohlrabi seed, 6 cents per pound; egg plant and pepper seed, 10 cents per pound; seeds of all kinds not specially provided for in this section, 15 per centum ad valorem. Provided, That no allowance shall be made for dirt or other impurities in seeds provided for in this paragraph."

FREE LIST.

Section 561 reads: "Myrobalans."

Section 602 reads: "Seeds, cardamom, cauliflower, celery, coriander, cotton, cummin, fennel, fenugreek, hemp, hoarhound, mangelwurzel, mustard, rape, Saint John's bread or bean, sorghum, sugar beet and sugar cane for seeds, bulbs and bulbous roots, not edible and not otherwise provided for in this section, all flower and grass seeds; evergreen seedlings; all the foregoing not specially provided for in this section."

Concerning the above and its inaccuracies, James McHutchison has written the following letter to the Chairman, which we publish in full:

April 12, 1913.

Hon. Oscar W. Underwood, Chairman of Ways and Means Committee, Washington, D. C.

Dear Sir: Sections 219 and 220 of Schedule G in the new tariff bill covers horticultural products as bulbs, plants and trees. In such articles accuracy of classification and definition is of vastly more importance than the rate of duty, because the rate of duty depends altogether upon the definition of the items.

The last tariff contained many mistakes, which involved much expense to the importers in having the Board of Appraisers pass upon disputed points. Unless some changes are made in the wording of the two paragraphs mentioned above, we will have the same trouble over again as the new tariff makes exactly the same mistakes.

In the new tariff the same items carry different rates of duty, other items are classified incorrectly; we refer in particular to the following:

Section 219 rates "Orchids, palms, azaleas and all other decorative or greenhouse plants 25 per centum ad valorem. Section 220 rates "all fruit or ornamental trees, deciduous and evergreen shrubs and vines commonly known as nursery or greenhouse stock 15 per centum ad valorem." This makes the same items 15 and 25 per centum ad valorem, "greenhouse plants" and "greenhouse stock" being the same.

(Continued on page 606)

BODDINGTON'S QUALITY GLOXINIAS

GLOXINIA ERECTA GRANDIFLORA

This popular flowering plant is coming into greater vogue than ever, not only as a pot plant for house decoration, but also for cut flower purposes. Our strains of Gloxinias are the true erect-flowering type, grown by a specialist in Europe.

GLOXINIA ERECTA SUPERBISSIMA

Having during the past season been requested to secure some specially fine Gloxinias for exhibition purposes, we have made arrangements with a noted Gloxinia specialist in England to reserve for us some of the most distinct types. The bulbs are not so large as the Named Varieties, but this is a characteristic of most Erecta superbiissima varieties.

BODDINGTON'S IDEAL PRIZE GIANT MIXED. Great variety of superb colors.

CYCLOPS. Velvety carmine, shading to a broad white border, throat dotted with dark red.

DUCHESS OF YORK. Flowers of a rich dark blue, each petal being edged with a broad band of white. A most striking and lovely variety.

SPOTTED HYBRIDS. Whenever exhibited, they create intense interest. The delicate markings, in an infinite variety of forms, add a special charm to the flowers.

SUTTON'S WHITE. A giant white flowered variety.

DUKE OF YORK. Large scarlet Gloxinia with deep white edge to each petal. A magnificent flower.

HER MAJESTY. This exquisite Gloxinia is still unsurpassed by any other white variety. The flowers are as pure as newly fallen snow, and are borne on short stems, just clear of the elegantly recurved foliage.

READING SCARLET. In color this is the most brilliant Gloxinia in existence, being an intense glowing scarlet variety of the true Crassifolia habit. An admirable companion to Her Majesty.

GOLIATH. Violet and white, fine variety.

Per doz. \$1.50, per 100 \$10.00

Boddington's Quality Tuberous-Rooted BEGONIAS

Single-Flowering Tuberous-Rooted

For planting in beds and where color effect is desired. Our stock of these bulbs will be found true to color and free from mixture.

Crimson	Rose White, Pure	Salmon	Scarlet Yellow	Pink, Light Copper	Orange
---------	------------------	--------	----------------	--------------------	--------

Large bulbs measuring 1 1/4 inches and upward, separate colors or all colors mixed, 35 cts. per doz., \$2.25 per 100, \$20.00 per 1000; extra large bulbs, 1 1/2 inches and up, same colors as above, 40 cts. per doz., \$2.75 per 100, \$25.00 per 1000.

Double-Flowering Tuberous-Rooted

These can be depended upon producing 100 per cent. double flowers and contain very large and choice varieties.

Crimson	White, Pure	Yellow
Scarlet	Copper Bronze	Orange
Rose	Salmon	Light Pink

Large bulbs measuring 1 3/4 inches and upward, separate colors or all colors mixed, 50 cts. per doz., \$3.50 per 100, \$30.00 per 1000; extra large bulbs, 1 1/2 inches and up, same colors as above, 65 cts. per doz., \$4.00 per 100, \$35.00 per 1000.

Single Crested Begonias

This strain of Begonias ranges in all colors—salmon, pink, white, yellow, copper and scarlet; petals carry on the upper side a crested-formed cockscomb. Separate colors, 80 cts. per doz., \$6.00 per 100; mixed, 75 cts. per doz., \$5.50 per 100.

Single Frilled Begonias

These are of the finest types of the single Begonia, the petals being heavily frilled on the edges. To color, 10 cts each, 65 cts. per doz., \$5.00 per 100; all colors mixed, 60 cts per doz., \$4.50 per 100, \$42.50 per 1000.

Single Begonia Bertini

A beautiful bedding Begonia, brilliant vermilion flowers of rare beauty. As a hedger it stands unrivaled. 80 cts. per doz., \$6.00 per 100.

Double Begonias

	Doz.	100
Duke Zeppelin. Intense pure vermilion-scarlet.	\$1.00	\$7.50
Lafayette. Rich, brilliant crimson scarlet.....	1.25	10.00

Hotel Astor, Thursday Evening, April 10, 1913

THE TARIFF.

(Continued from page 602)

The word "Azaleas" is too vague, probably Azalea Indica is meant but it is grown in greenhouses in winter only. All other varieties of Azaleas are grown outside in nurseries, and are nursery stock not greenhouse plants.

The terms "greenhouse stock" or "greenhouse plants" are also too indefinite. Many shrubs and plants which grow in the open air in Southern states would be known as "nursery stock." Further North where the weather is colder, the same stock would be grown in greenhouses and would be known as "greenhouse stock." These classifications would pass if the duty were the same.

Section 220 rates "Seedlings of Myrobalan plum, 81 per 1000." Section 561 rates "Myrobalans" free of duty. It should be specifically stated whether Section 561 refers to Myrobalan seeds, fruit or seedlings.

Section 220 rates "Evergreen shrubs and vines 15 per cent." Section 602 rates "Evergreen seedlings" free, but places them under the classification of "Seeds." The same mistake was made in the last tariff and it took three years and much expense to get a decision from the Board of Appraisers. If it is your intention to continue evergreen seedlings on the free list, they should not be mentioned in Section 220, and should not be classified as "seeds," because evergreen seeds and evergreen seedlings are quite different articles.

Section 220 rates "Seedlings of briar rose, three years old or less, 81 per 1000," also "Rose plants, budded, grafted or own roots, 4 cents each." The principal "Briar rose" in commerce is Rosa rugosa, a shrub grown from seed and sold as two or three-year-old. The last tariff was also indefinite on this point and only after three years and much expense to importers was it decided it is not a rose (see T. D. No. 32266). Your tariff should be specific in including Rosa rugosa as a briar rose and dutiable at 81 per 1000, it is sold at 84 per 1000.

Section 219 rates "Hyacinths" as "clumps" instead of bulbs, the same mistake was made in last tariff and took years to rectify.

In these items the correct classification is vastly more important than the rate of duty. When the classification is not clear it opens a large avenue for fraud, the result being that the dishonest firm pays only half the duty the honest firm pays. Under the present tariff, honest firms are paying 25 per cent duty on evergreens grown by grafting or cuttings, while other firms are getting them in free of duty as "Evergreen seedlings." The tariff should be specific as to what an evergreen seedling is.

We respectfully request that Sections 219 and 220 be rewritten. We suggest no changes in the proposed rates of duty, but they should be specific and read as follows:

Section 219 should read "Orchids, Palms, Azalea Indica and all other decorative or greenhouse plants and cut flowers, preserved or fresh, 25 per centum ad valorem; Lily of the Valley, Pips, Tulips, Narcissus, Begonia and Gloxinia Bulbs, 81 per 1000; Hyacinth Bulbs, Astilbe, Dielytra and Lily of the Valley Clumps, \$2.50 per 1000; Lily and Calla Bulbs, 85 per 1000; Iris, Carna and Dahlia Roots and Amaryllis Bulbs, 81 per 1000; all other Bulbs, Bulbous Roots or Corms which are cultivated for their flowers or foliage, 50 cents per 1000."

Section 220 should read "Stocks, cuttings or seedlings of Myrobalans and St. John Plum, Mahaleb and Mazzard Cherry, Pear, Apple and Quince, Manetti, Multiflora, Rosa Rugosa and Briar Rose, three years old or less, 81 per 1000 plants. Rose plants, budded, grafted or grown on own roots, 4 cents each. Stocks, cuttings and seedlings of all fruit and ornamental tree shrubs and vines commonly known as nursery stock not specifically provided for in this section, 15 per centum ad valorem."

Section 602 should read "Evergreen seedlings, four years old or less" free, other wise there is nothing to prevent large evergreen trees, grown from seed, say six feet high, coming in as "Evergreen seedlings" free of duty.

Section 561 should read "Myrobalan Seeds," seedlings or fruits or whatever you intend to be free of duty.

The new tariff is fair, equitable and quite acceptable. If you do not see fit to make the above-noted corrections, then let us respectfully request that you make the ad valorem duties in Sections 219 and 220 the same either 15 per cent or 25 per cent as there is practically no difference in these items as you have them classified.

tion Day, etc. A very striking novelty
shown is the German "Atlas" wreath
of preserved foliage, cones, seed pods,
etc., in brown or dark green with
frosted or dark green with frosted
effect. Such things as these should
supplant the metal wreaths as the price
is quite reasonable.

We have noticed that many florists,
apparently with the idea of economy,
use a cheap quality of green thread
for stringing smilax and asparagus
and for various uses where green
thread is required in the flower store.
When compared with Meyer's Silka-
line threads this stuff is far from
economical, as many wise florists have
realized. Meyer's Lowell threads cost
a little more but they are worth it in
every quality of strength, finish, dura-
bility of color and standard length to
the spool.

THE FLORISTS' SUPPLY HOUSE OF AMERICA

Our Display at the National Flower Show Was A NOTABLE SUCCESS

Visitors crowded our booth continually, attracted by the extent and brilliancy of our display and especially the many *sterling novelties* never shown before. Among these were the **Sunshine Baskets** which leading retailers ordered in quantity and which alone make a store most attractive.

Our Silent Salesman Will Help You Out. Write For Him.

H. BAYERSDORFER & CO.

1129 ARCH STREET, PHILADELPHIA, PA.

OF INTEREST TO RETAIL FLORISTS

LEAKAGE.

There is more truth than poetry in the old adage, "Wilful waste makes woeful want," and this proverb should fit itself snugly into the heart of the retail store where the tremendous waste is going on daily without being noticed, except by the proprietors when the bills are to be paid.

To begin with, the wire used for funeral and bouquet work is a necessity, and when a number of pieces fall to the floor, they remain among the stems and foliage awaiting the brush to sweep it off to its resting place; and if you should pick up these few pieces of wire each time they fell and kept this up for one year, I have a grave doubt whether you would care to carry the wire very far, owing to its weight.

Our next waste appears in green goods, such as asparagus, ferns, etc. Your method of keeping these when received may be excellent; but what about the few leaves left after work has been completed? Have they been put back in the proper place? No, they have not. A few may be on the floor and more lying on the work table to dry up; still more waste.

It is a custom among most florists to cover maiden-hair fern with wet paper when not in use, and this is without doubt the best way of keeping it without wilting, but when a careless worker uses a few sprays and

fails to cover it again, the draught caused by opening and closing of the ice chest door soon finishes the delicate and unprotected adiantum; more waste.

Now come the insignificant fringes of sphagnum moss so frequently seen dangling from a design after being filled; had these fringes been trimmed and the fragments gathered it would startle you to know how many designs could be mossed with this so-called "waste" within the time of one month.

Again we see a fibre flower vase badly broken at the top; to throw it away spells "W-A-S-T-E." My advice is to saw away the broken edge, and when you are making up a basket of flowers to be arranged in water, set the fibre vase in, holding it firm with paper or moss packed between the basket and vase.

Sticks, toothpicks and tinfoil cost money when you want them; you are throwing away money when you waste them; frequently a piece of foil too small is torn from the sheet, then a larger piece is torn off, the smaller one being thrown aside and crumpled up unfit for further use. If you were to weigh these discarded pieces of foil at the period of one year you would be surprised at your loss.

Ribbon is the one big item where waste can be figured up at once. Through careless cutting a piece remains at the end of the bolt, too small

to be tied; it remains in the case untouched, many bolts following suit, and in this way a tremendous waste is carried on annually.

Last, but not least, the daily waste of cut flowers is overwhelming, such as heads of roses, carnations, etc., being snapped from their stems, trampled upon before being picked up and left in boxes to wilt. This is a bigger item than any of the above mentioned. Again the old adage, "One fool can spend more than 10 wise men can earn."

MR. STOREMAN.

CHICAGO NOTES.

Miss Corinne Pehrson has just returned from two weeks spent in Lindsburg, Kansas.

A. L. Vaughan is again at his place of business, though not quite recovered from his recent illness.

Wm. J. Smyth is able to again be regularly at the store having nearly recovered from his recent accident. This store is getting a large share of the wedding decorations this spring.

Samuel J. Pearce has purchased seven acres of land just inside the city limits, on the Higgins road, in Jefferson. Mr. Pearce says he has not decided just what he will do or when, and that the materials bought, etc., for a range of houses, exist only in the minds of the reporters.

The Hoerber Bros.' greenhouses recently blown down at Desplaines, Ill., are all cleared away and work is begun on the new ones. The stock, which consists of My Maryland roses, was all saved and will furnish the fine summer roses this firm is noted for. The broken glass through the rest of the range is all replaced.

The business of the Kedzie Florists has been taken over by one of their creditors who will continue the business until a buyer can be found. Leslie & Rowatz started out very auspiciously less than a year ago on West Madison street, but last week the creditors felt that something should be done and A. L. Zifferman, a brother-in-law of Leslie, who claims to have advanced money, took possession.

Another benefit of the early Easter is apparent now with the lengthened season for spring weddings. Quite a number of large affairs have already taken place and more are announced for the near future. The only novelty for the brides, so far noticed, is a basket said to come from St. Petersburg, of novel shape and exceedingly high slender handle. The basket proper is round, shallow and when the handle is thrown over the arm or shoulder of the bride the basket presents the open part to the front. This is beautiful when daintily filled and leaves the brides' hands free.

GEORGE B. HART, 24 Stone St., Rochester, N.Y.

The unusual spectacle of a downtown flower store with locked doors is seen on Michigan avenue this week. Canger & Bergman, who entered into a partnership several months ago, will no longer continue that relationship, but the final disposition of the business is not yet determined. Mr. Canger successfully operated the store on State street for many years known as Canger & Gormley's. After the death of Mr. Gormley he leased the store in the Fine Arts Building and later took in Victor Bergman as partner. It has been known for some time that matters were not running smoothly.

Mrs. A. I. Simmons, 242 W. 63rd street, had an experience which cost

her \$9 and will make her less sympathetic in the future. An old man of respectable appearance ordered flowers for his little granddaughter, who, he said, had been burned to death. His arm was badly burned in his efforts to save her and his tears flowed freely as he related the story. His pay check for \$20 was given in exchange for the flowers ordered and the balance paid back to him. Investigation before the flowers were made up proved the whole story false. He has been seen at other places, also.

Visitors: Martin Reukauf, of H. Bayersdorfer & Co., Philadelphia; Robert Grove, Hinsdale, Mass.; P. N. Obertin, Kenosha, Wis.; H. Philpott, Winnipeg, Manitoba.

Flower Market Reports

BOSTON This market is very quiet, considering the season. The activity expected to follow an early Easter seems to be lacking, for some unexplained reason. The rose market is not at all strong but carnations are doing fairly well, as are also sweet peas, of which there are many grades. Cattleyas are selling quite well but gardenias are down at the bottom of the ladder. There are still a few violets left but they are not in demand. Lilies and callas are too plentiful. Tulips are doing all right but daffodils move slowly. Spanish iris is very popular.

The railway strike which was on from Monday till Saturday, certainly put a damper on business the past week. There was practically nothing doing until Saturday and the wholesaler had a heavy load to carry, especially carnations and roses. Other stock was plentiful with little or no demand. The situation was bad, though at this writing the market has taken on new life. While the receipts are still heavy, the buying is quite brisk, and it is hoped for a continuance of the latter.

A decided change has come over the market. The early part of the second week in April was like the pre-

ceding one, inasmuch as there were more flowers than could be sold even at a low price, but on Friday stock suddenly became scarcer and buyers more plentiful. Saturday stock cleaned up for the first time in many days. The express companies, though not assuming any responsibility in the safe arrival of flowers bound for points east or south, are daily improving their facilities for caring for the shipments through the flooded district.

Prices have advanced along all lines since shipping began again and carnations were among the first to feel the change. Roses are shortening up and the warm weather of two weeks ago has reduced the cut considerably. Sweet peas are very much in demand. A few good violets are coming from the east and some home-grown ones also. Prices are low on violets. Beauties are not at all plentiful. Snap-

Flower Market Reports

(Continued from page 613)

dragons have fine long stems and perfect flowers. Daisies are short but sell readily. There has been nothing approaching a glut in greens all winter.

As the railroad service ice into town from the north and west has improved just so has the market been getting back to normal as far as the supply is concerned. Shippers who up to March 24th were shipping regularly are again able to get their stock into the city and business is picking up considerably. The improvement last week was very marked. Still the supply although it was short of the normal supply was easily able to take care of all requests. The carnation cut is so large that the wholesalers have been unable to maintain the price and many lots are cleaned up at sacrifice prices. The lily market last week, too, was fully adequate. Many excellent blooms came in from the local growers. Roses are again in abundant supply. Last week those that came in in good condition cleaned up easily but they brought at the best only a fair price. Sweet peas have sold very well. The good long stock had no trouble finding buyers while the short, though bringing only an ordinary price, still managed to clean up.

NEW YORK The situation in the wholesale trade has improved materially. Carnations have felt the impulse of a better demand and have responded with a more steady selling price. Roses are doing fairly well. Cattleyas have come once more to normal conditions with market value moving upward in a style very pleasing to those who have any to sell. Violets are about finished but the sweet pea more than fills their place and they can be spared. Snapdragons are assuming a place of prominence and worthily so, for some of the stock is simply grand. Bulbous material is on the wane as a forced specialty, the outdoor daffodils and early tulips being now in order. Lillacs from southern points are also crowding the greenhouse product. Lily of the valley is good property just now.

PHILADELPHIA Business continued on a satisfactory basis last week in this market. There was no let-up in demand and the wet, cool weather helped to keep stocks on the scarce side so that there was a healthy tone all through. Sweet peas were perhaps the scarcest item—this crop seeming to suffer more promptly from dull weather than most other staples.

	15.00	to 25.00	15.00	to 25.00

Carnations also showed a marked decrease in receipts and there was a noticeable hardening in prices towards the end of the week. While there was a good demand for American Beauty roses the supply was more than equal and prices receded a little in the higher grades. Other roses are without marked change from our last week's report. Quality continues fine and sales satisfactory. High-grade orchids meet with ready sale but the medium quality and less popular varieties are rather draggy. There are some fine Lady Campbell violets still arriving. Gardenias have improved somewhat and are now a much more lively item than they have been for some time. Snapdragon quite a strong feature and splendid quality. The cool weather has reduced supplies of southern outdoor lilac.

ROCHESTER, N. Y. Business for the past week has been fairly good. The improvement in the weather has done quite a lot to brighten up trade, although no particular slump has been noticed since the busy season of Easter. A personal canvass of the principal stores here finds each one more or less busy, and each satisfied for the time of year. Our stock is arriving in fine shape and handled so carefully that there is no great

waste. Roses of all kinds are in almost perfect condition, whilst sweet peas, pansies, lily of the valley, etc., were never finer. Easter lilies are still with us, also callas, but there is no very great sale for either. Some very fine azaleas and rhododendrons are seen in most stores, as well as a good stock of Rambler roses; in fact some of the stores look as though they would be glad to have Easter over again by the amount of stock they are carrying.

HORACE J. HEAD.

ST. LOUIS The market last week was in the same deplorable condition as the previous one; the glut was on for good in almost anything in season and at prices that could hardly be quoted correctly at any time. Roses of the best grades held up well, but in the other grades there were too many coming in to clean them up in any one day. Carnations were in the same fix as roses, even the supply was greater. Violets and peas, too, had to be sacrificed. All other stock ran about the same. The dark weather all week hurt the business and no doubt will shorten up the big supply for this week, as this Monday morning, April 7, prices have gone up a little on carnations, roses and peas.

HYDRANGEAS**THE NEW FRENCH FORCING HYDRANGEAS.**

Avalanche—A splendid large white. This will absolutely supercede Thomas Hogg. 3-inch pots, \$6.00 per 100.

La Lorraine—Pale rose changing to bright cerise pink; claimed by many to be the best of all. 3-inch pots, \$10.00 per 100.

Remember now is the time to buy these Hydrangeas and grow them along for another year. This fall we will offer all of Lemoine's and Mouillere's Novelties in Hydrangeas, including E. G. Hill, the gem of them all. The great blooming qualities of these Hydrangeas are their talking points. You may have in a four-inch pot three to five immense heads of bloom. You will never grow the old varieties again after you become acquainted with these new ones.

Write today for our catalogue of everything you need in the Rose and Plant line. **THE GOOD & REESE COMPANY,**

OUTDOOR PLANT EXHIBIT FOR MINNEAPOLIS CONVENTION.

At the executive meeting of the Board of Directors of the S. A. F. and O. H., held in Minneapolis, February 25th and 26th, I submitted a plan for an outdoor plant exhibit, which met with the approval of the board, and I was authorized to solicit information as to what growers would be willing to make use of the opportunities so offered.

I am of the opinion that the S. A. F. & O. H. conventions, in the past, have not given sufficient opportunity for such outdoor exhibits, and I am very anxious to make the Minneapolis convention the best in the history of the association from a horticultural point of view. My proposition is as follows:

Growers of all kinds of hardy and tender plants are invited to send exhibits of plants in spring planting time, each exhibit to fill properly an allotted space. The plants so sent will be properly planted in the exhibition garden and properly cultivated and protected, so that the exhibits are in good condition at the time of the convention. Each exhibitor will be allowed to display his sign and name of plants; signs and labels to conform to a uniform established scale of size and character. The plants so exhibited shall remain in the garden for the rest of the season and will be returned to the exhibitor or buyer in the fall.

The Board of Park Commissioners offer the use of the land free of charge and will put the grounds in serviceable condition. Some arrangement will be made whereby the S. A. F. and O. H. will sell the space to the exhibitors at a low figure, just enough to pay expenses of planting, maintenance and reshipment of plants, the exhibitor bearing all cost of shipment here and back.

The location of the proposed garden is a most excellent one and proper and efficient care for all exhibits is assured. It is especially desirable that novelties of all kinds of plants be shown in this garden, and that enough plants of each novelty be sent to fill a bed or make a favorable display possible. It is intended to give all growers an equal show within the limits of the available space, and in order to enable us to make a fair distribution of that space it is necessary that we should hear from you immediately, just what you want to exhibit, the number of plants and size of same.

Shrubs, evergreens and novelties in perennials it is intended to use for the border plantings, while the inside beds are intended for all kinds of bedding and ornamental plants.

Will you please inform me at your earliest possible convenience whether you are willing to make use of the opportunity so offered, and what and how much you wish to exhibit?

An early reply will be greatly appreciated.

Yours for "Advance in Horticulture,"

THEODOR WIRTH.

Minneapolis.

PHILADELPHIA NOTES.

H. Bayersdorfer & Co. say that they did a very nice business at their booth in the International Flower Show. They express great satisfaction with the venture as a direct business getter as well as a pronounced advertising success.

H. De Vilmorin of Vilmorin-Andrieux et Cie, of Paris, was the guest of W. Atlee Burpee on the 14th inst. at the Union League. The amenities were all properly attended to, after which our voyager wended his way with many genaflexions to Washington.

Faith without works is like a genius without advertising. Lots of them say "give them the goods—the goods will advertise themselves." Will they?

"Full many a gem of purest ray serene," etc.

—You know the rest.

William H. Westcott we are glad to report on the mend. He has been seriously on the sick list for the past ten days. Many inquiries for Commodore John Westcott at the New York show—including his old friend Will Currie of Milwaukee—are accordingly answered. Nothing could have kept the commodore away except imperative duty.

A. L. Don of New York is still hale in spirit although frail in body. He is able to come to the store every day. Fifteen years ago we allowed him six months for the wind-up. Same now. But we would not be a bit surprised if he has the laugh on us all fifteen years from now. His two boys, Lee and David, have now taken much of the active cares of the business on their shoulders and are a great comfort. We spent a delightful half hour with the old veteran last Saturday and we were glad to have found him in.

W. J. Muth of Lansdowne, Pa., has been appointed representative of King Construction Company in Philadelphia and adjacent territory. Mr. Muth has been connected with the wholesale florist business for over 20 years in Philadelphia and is therefore well acquainted with the requirements of the trade. Growers in the Philadelphia territory can reach Mr. Muth by mail at Lansdowne, Pa., or through the General Office of King Construction Company, North Tonawanda, N. Y.

Philadelphia visitors—Mrs. H. S. Bryan, Charlotte, N. C.; Miss G. N. King, rep. W. H. Turner, Wilkinsburg, Pa.; F. M. Ruppert, Cumberland, Md.; E. C. Ludwig, Pittsburgh, Pa.; L. F. Darnell, Gasser Co., Cleveland, O.; Mr. Osgood, Osgood Bros., Everett, Mass.; G. H. Benedict, Salisbury, Md.; B. G. Merritt, Grange, Baltimore, Md.; E. G. Hill, Richmond, Ind.; Max Kiser, Garrettsville, Pa.; J. D. Hopper, Richmond, Va.; Chas. Uttly, Harrisburg, Pa.; Frank Stuppy, St. Josephs, Mo.; William Lehr, Lehr Bros., Baltimore, Md.

WASHINGTON NOTES.

C. T. Eldredge, Danville, Va., and Mr. Petersen, Cincinnati, Ohio, were visitors here last week.

Regrets are being expressed at the loss suffered by Charles P. and Brainerd J. Dudley who conduct a store at Parkersburg, W. Va., by reason of the recent floods which swept over that city. The former is a member of the

GLASS

Oldsmobile, 200 gal. tank; two gas sprayers, 100 gal tank; one 55 ft. and one 36 ft. extension ladder; 950 ft. of one inch hose; 9 spray nozzles. Wm. F. Leary, 40 Pound Lane, Chestnut Hill, Mass. Tel., 2886-1 Brookline.

MISCELLANEOUS

FOR LEASE—Greenhouse in Boston, now in operation. Include 5000 ft. land and small cottage if desired. Low rent. Small amount money required for purchase stock on hand. "H," care HORTICULTURE.

WANTED—to correspond with someone having experience as grower of all kinds of greenhouse and nursery stock that would take share in a good business and be able to manage the growing of the stock for a company in Minnesota. Address, M, care HORTICULTURE PUB. CO.

local club and both are brothers of Mrs. Coffman, with F. H. Kramer.

The plans for the holding of a banquet by the Florists' Club of Washington are now being pushed to completion and this event will probably take place during the last week of the present month. From the number of people who have signified their intention of attending this should be one of the most successful affairs ever held by the club.

Obituary.

H. P. Campbell.

H. P. Campbell, a well-known and respected florist of Shamokin, Pa., died on April 1st. The funeral took place on April 5.

Loretta Bombenger.

Loretta, ten years old, daughter of J. Bombenger, 6429 Woodlawn avenue, Chicago, died very suddenly last week of diphtheria. She was her father's constant companion, out of school hours, in the store, and he has the sympathy of the trade in his loss.

W. B. Sands.

W. B. Sands, a well-known florist of Baltimore, Md., died suddenly on Tuesday morning, April 8, from a stroke of apoplexy. Mr. Sands was 71 years of age. He was active in civic affairs and an ardent agriculturist. He was for some time editor and publisher of the American Farmer and for 20 years was secretary of the Maryland Horticultural Society. He leaves five sons and one daughter.

EFFECT OF STRIKE IN BELGIUM.

Cable advices from Belgium inform us that the "General Strike" goes into effect there April 12. The Red Star Line which brings all Belgium plant shipments, will not accept perishable freight even though the Belgium Government-owned railroads could carry the stock from Ghent to Antwerp. This completely ties up plant shipments from Belgium and importers right at the beginning of the spring shipping season. Only one shipment has left Belgium—mostly bay trees. Further spring shipments will be delayed as long as the strike lasts—which is hoped to be not over two or three weeks.

FIRES.

Minneapolis, Minn.—A fire loss of \$300 was sustained by the Eldridge Floral Co. on March 29th.

Kearney, Neb.—The packing and furnace rooms of H. C. Green's greenhouse were totally destroyed by fire on the evening of April 9. The plants and flowers in the greenhouses were also damaged by smoke and are a total loss.

Fort Wayne, Ind.—The W. J. Vesey, Jr. greenhouses were damaged by fire to the extent of \$20,000 on March 27th. Cause is believed to have been an overheated oilstove used to protect orchids which had been rescued from the recent floods.

NEWS NOTES.

Salina, Kan.—A. B. Walter has purchased a tract of ground at 339 East Prescott street and will start in the florist business.

Mansfield, Ohio—Paul Kopanka, for the past two years a florist at the Lipman Northside Greenhouses, Columbia City, Ind., and his son-in-law, Mr. Lintott of Muncie, Ind., have bought the greenhouses of the Berno Floral Co.

Flower Market Reports

(Continued from page 615)

WASHINGTON

The supply of flowers of all varieties has been materially lessened by the continued rains in this vicinity and the dark cold days, and prices have accordingly risen. American Beauty roses are very scarce and are not as good as could be desired. This general shortage of stock has lessened the competition put forth by the street trade. The condition of unrest that pervades the city by reason of the agitation in Congress over various matters effecting the city has been felt by the local florists. Trade is very quiet.

If You Want To Plough Your House Our New Cantelever Construction Has Great Advantages

TO plough in a house filled with columns is almost impossible. At least, it is so difficult, that after one attempt with the whiffle tree continually catching in the columns, preventing ploughing close—you give it up in disgust.

For vegetables or sweet peas and violet growing, it is a great saving to plough. This new Cantelever construction reduces the number of columns 25% and in some widths 50%.

Another thing about it is, you can locate

the columns practically where you want them to meet your ideas about walk locations. It's the least arbitrary of all the constructions.

Fewer rafters and fewer

purlins are used. It has no tension trussing. In spite of all its many advantages, it costs no more than the regular flat rafter construction. It's worth looking into carefully.

The growers are taking hold of it better even than we anticipated.

Send for new descriptive circular.

Further U-Bar Facts Some You Know—Others You Only Think You Know

THESSE further facts are intended for the unbeliever. The man who shakes his head about the U-Bar and asks skeptically: "What's the all-metal house proven a failure over and over again? Won't that metal U-Bar cause glass breakage?" Won't you stop! Wrong! You are calibrating directly on metal is impractical. The glass continually breaks with expansion and contraction. With the U-Bar, the glass is bedded on putty.

The glazing nails are driven into the exposed edge but the expansion and contraction of the metal U-Bar is soft, is but slight, because it is not exposed to the varying outside temperature. All exposed metal is on the inside. All exposed wood is on the outside. The wood so placed protects the metal from glass breakage. Expansion.

The metal protects the wood from the moisture inside the house. The U-Bar protects frost and protects you. The U-Bar is so set that it protects you from frost. For nearly a decade U-Bar has been in use. When a building claims to be built on a good foundation, as the U-Bar, it is equivalent to claiming that there is no horse that is better as good as the U-Bar. It's for you to decide whether you want as good a house as the U-Bar.

INVESTIGATE

IF you were buying Bonds you would either buy from a house you knew was reliable or you would investigate the bonds before buying. There is no reason why you should not take the same precaution when you buy lily bulbs—in fact you should take more, because the risk is greater. In buying lily bulbs we will be only too pleased to have you investigate Horseshoe Brand bulbs. Look into our affairs, our record for deliveries, our source of supply, our manner of doing business, and anything else about us that interests you. Our business has been built up by hard work here and by good work in Japan. Large growers know very well we have the quality in lily bulbs and it has been proven time and time again that Horseshoe Brand Giganteum average better than any other brand known. Cold Storage Giganteum on hand now for delivery at any time you want them—good sound late dug bulbs, disbudded and properly packed just for Storage purposes. From the very best fields in Japan. Prices as follows:

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Alocasias

Alocasias in their tropical luxuriance of growth are almost indispensable where a large and varied collection of plants are under cultivation. Alocasias are propagated by suckers or cuttings of the rhizomes. These may be placed in small pots filled with peat and sand in equal proportions and the pots plunged in a close frame over bottom heat in a temperature of 70 degrees. It is very important to put drainage material in the pots to at least one-third of the pot room. The soil should consist of fibrous peat, with a little light fibry loam, in large lumps; to this add a good proportion of sphagnum and lumps of charcoal with plenty of silver sand. Keep the bulbs and soil raised well above the rim of the pot and finish off with a surfacing of either sphagnum or cocoanut fibre. Shade at all times when the sun is bright, but let the plants be kept well up to the light. Syringe overhead freely once a day, and keep a temperature from 70 to 75 degrees at night and from 80 to 85 in the day, giving water so as to keep the soil always moist.

Begonia Gloire de Lorraine

The early propagated portion of the ensuing season's stock should now be far enough advanced to require 4-inch pots. For compost use three parts turfy loam, two parts sand and one part very old manure. Place in a temperature of from 55 to 60 degrees at night and ventilate freely. They will need some shade from this out to keep the leaves from burning. Thrifty little plants derived from leaf sets and still in their first pots, should be transplanted before they become root-bound. Any sort of cultural encouragement now before the heat of summer interferes will tell plainly on the stock in the early autumn and whatever degree of size and vigor is now imparted by special good treatment is a permanent gain, while any neglect at this season is a certain loss which cannot be made good at any time later on. Give careful watering, avoiding any too much or too little. Pinch out the points so as to cause them to break back good.

Gardenias

To attain success with gardenias atmospheric conditions play a most important part. Keep the stock growing by giving them a house where they can have a temperature of 65 to 70 degrees at night with about 10 or 15 degrees higher with sunshine. Stock that was propagated in January should now have a shift into 4-inch pots, which will hold them until planting-out time in June. A good compost is fibrous loam three parts, very old cow manure and leaf mold one part each and sand enough to keep it open. Damping down will now be necessary, morning, noon and night; and the plants must be examined each day and watered only if they are

in a condition to need it for, even whilst growing, they should not be kept in a saturated condition. Keep up an abundance of moisture in the atmosphere as it is well-nigh impossible to use too much water about for evaporation at this season. It is not too late to root a good batch. Requirements are a warm, stuffy house and lots of moisture, and a frame to keep them close.

Gloxinias

Gloxinias that were started early and have been kept growing, should by this time have reached their flowering size with a fine spread of foliage and well-developed flower trusses. They will require a well-shaded house to keep the foliage right and to hold the color of the flowers. Keep them as near the glass as possible and do not let the temperature drop below 60 degrees at night. Keep the plants watered, but be careful not to wet the foliage any more than is absolutely necessary. Give ventilation when the temperature reaches 70 degrees and give enough to keep the house at 75 to 80 degrees. When well in bloom they can be placed where they can be kept cooler, which will harden them up and give more substance to their flowers. Seedlings that were started in January should by this time be large enough to go into 2½ or 3-inch pots using a moderately light and rich compost.

Phalaenopsis

Give these orchids every attention from this out. They enjoy a warm moist house, where the temperature never goes below 65 at night and 70 degrees would be better. Keep the paths, walls and benches damped down three or four times a day to produce plenty of atmospheric moisture. Give ventilation in greater or less degree so as to keep the day temperature with sunshine at from 80 to 85; on dull or rainy days about 75 degrees will do. Keep the shading just sufficiently heavy to moderate the direct solar influence, for when kept too dark they will make a soft growth which usually prevents flowering well. Give careful attention in watering looking them over every day and watering only those that may need it.

Shading

Shading will be necessary for a good many plants grown inside during the summer such as palms, ferns, orchids, etc. Do not wait until the foliage becomes discolored from the effects of the sun. Do not, however, place a dense shade on any of your houses as it will make the stock very soft in growth. All plants require as much light as can be given to them exclusive of scorching sun rays. There are lots of growers who use only temporary lath shading which can be removed at will, but where this cannot be done whitening and kerosene will be the best.

Mr. Farrell's next notes will be on the following: Care of Carnations; Dieffenbachias; Lily of the Valley for June; Growing Palms from Seed; Nephrolepis; Sowing Annuals

OUTDOOR VEGETABLES AND FRUIT

CONDUCTED BY

Edwin Jenkins

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Jenkins. Such communications should invariably be addressed to the office of HORTICULTURE.

Making an Asparagus Bed

As asparagus is usually left in the same ground for years it is well to bear this in mind when preparing the beds and not stint in preparation. Planting in rows is at once the most convenient method for cultivation and every other purpose, so we shall consider no other. As we believe the next year's crop is dependent upon the proper growth and development of the foliage and as this cannot take place without sufficient room for free circulation of air and sunlight the importance of laying out the rows a sufficient distance apart will at once be apparent. Four feet is the minimum distance between the rows for the best results, as good strong plants will root out two feet on either side. We are proposing to fill all the bed with roots therefore every bit of the soil should be enriched and improved. While believing in deep cultivation generally, still the asparagus is a comparatively shallow rooting plant and if the soil is thoroughly broken to a depth of eighteen inches and liberal amounts of barnyard manure, decaying leaves or any other decayed vegetable matter be added good results may be assured.

One-year-old seedlings raised in our own garden are the kind of stock we prefer to plant, and in planting the greatest care should be taken to keep the roots from any lengthy exposure to sun or wind, as they are extremely sensitive. Unfortunately men are apt to think that because there is no foliage to wilt or wither that no harm is likely to follow drying. This is a great mistake as the subsequent growth is weaker and the initial vigor of the plant is sapped away. It is analogous to starving or checking the growth of a young animal and all stockmen know that to do so is to throw away all chances of the animal's reaching its fullest development. It is because of these possibilities of check that we advocate the growing of seedlings for planting, but if time be precious and it is necessary to have material for cutting in the least possible time, then a portion of the bed may be planted from purchased two-year-old roots exercising all possible care to prevent drying and ensure a good start. These rows may be subsequently dug up for forcing and their place gradually taken by home-grown stock. As asparagus can be forced nearly any time and very easily it is well to have this in view and plant out a larger area than would be necessary for the ordinary

outdoor cutting, and for this reason we advise the sowing of some seed annually to be growing on to take the place of that dug for forcing.

For some reason there is an idea abroad that asparagus should be planted deep. Our own experience has been that if the crowns are covered by about three inches of soil it is better than more. As soon as the beds are planted apply a mulch of stable litter and leaves mixed about a foot on each side of the rows and keep the rest of the land cultivated and free from weeds. Should the grower have a chance to choose between different soils a sandy loam will be the most suitable as the wild asparagus is a native of the sandy seashore and hence its love of an occasional dressing of salt.

Parsnips for Exhibition

The parsnip is a plant requiring a long season of growth and while for ordinary table use there is yet plenty of time for sowing, those intended for exhibition at the fall shows should be sown as soon as possible. While a good deep friable loam will answer all requirements for ordinary crop, those intended for the exhibition table will call for something more. Our own method is to make holes about a foot apart in the rows and two feet between the rows. These holes are made with a crow bar or other suitable tool to a depth of four feet or more. They are then filled with a fine soil passed through a half-inch sieve, this soil being composed of a bushel of loam, half a bushel of leaf soil, a sprinkling of lime and a three-inch pot-full of fine bone meal. This mixture is carefully tamped into the holes till full and a few seed are sown on the top. As soon as they have germinated all but the strongest plant are removed and this plant on each hole is encouraged by watering and occasional feeding to do its very best.

Succession Crops

Sow lettuce, radish, cauliflower, spinach, cabbage, beets and carrots for succession. Small quantities sown frequently will give better results in young, tender, juicy product than large sowings made less frequently.

Our usual chapters on Fruit and Vegetables Under Glass are missing this week owing to the illness of Mr. Penson. We hope he will be able to resume his valuable notes next week.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Watering Young Plants

During these bright, clear, and sometimes very windy days, the young plants will dry out very rapidly, and if not watched carefully will dry out to such an extent as to be harmful to their growth. Plants that have become very badly stunted through improper watering will seldom recover altogether, and will always show the check in growth. It is well to go over the plants several times a day if need be and water the most outside rows. As for the plants on inside, i. e., those away from the edge of the benches, if these are watered with great care, they will dry out very evenly and will seldom require touching up. Never water late in the afternoon, so that all the foliage has had a chance to become perfectly dry before the sun sets. After syringing it is well to turn on a little heat and keep the ventilators more open to finish drying the plants. Also blow a little air slacked lime underneath to take up any excess of moisture there.

The Young Beauty Plants

No doubt many of these will be getting quite tall and will have to be spread apart to give them a little more room and a better chance to develop. It does not pay to crowd the young plants, as many have found out. We should always remember that our next season's cutting partly depends on these plants, and if they are not cared for properly now the results will likely fall below the level of our expectations.

Spot on Young Beauties

It pays to go over the plants quite often and pick off the least little leaf that shows any inclination toward spot. Get it when it is small; do not wait for it to spread to all the surrounding plants, or through the whole bench. A spray of copper carbonate is very good to apply and will do considerable to prevent this dreaded disease. Plants sprayed with Fungine seem to be more spot-proof, but as we have had very little trouble with spot as a whole, we could not give any definite answer as to the results. This applies to the copper carbonate as well. It will not cure spot by any means. There is

no spray that really will. But it will go a good ways toward preventing it.

Feeding the Young Plants

If the plants have been potted into good soil, such as has been frequently recommended through these columns, it will not be necessary to feed them with liquid in any form. At times, however, we wish to have an extra lot of nice plants for a certain house, and it is then that a little feed applied now and then will do them worlds of good. Never apply the liquid very strong, and make sure that the plants are perfectly wet before applying any at all. Plants in pots are even more particular than those in the benches, as the roots are confined and the plants have to take what is given to them, and have no chance to reach out into the surrounding soil to get what they need.

Yellow Leaves

No matter how well or how carefully roses may be grown there will always be some yellow leaves. These should be picked off as fast as they appear and we think it ought to be a part of the day's work to clean up a bit. Even the old houses should be swept after each syringing, and the leaves removed from the house and burned, not swept under the benches as is done on a good many places. Underneath the bench is no place for the old leaves as they only help to house the thousand and one different insects that we greenhouse men have to battle with, and most of us know what it would mean to lose this battle.

The Ice Box

Now that the weather is bound to be warm, a supply of ice should never be wanting on any rose-growing establishment. Another important and often very sadly neglected item is fresh water in the jars. All the water should be fresh and sweet all the time and the jars themselves kept clean, so that no one would ever hesitate to drink from them. Judging from the condition of these jars on many places, this is a bold statement, but nevertheless a true one. Cleanliness is next to godliness.

Views of a commission man
 of flowers to the wholesale marts of the great cities. The title of the lecture sounds somewhat censorious, but Mr.

Pennock's remarks present very little that can be construed as captious or reproachful. His talk is a frank and reasonable exposition of the problems that are at all times a part of this exacting department of commercial floriculture. Mr. Pennock's views come from experience gained in a widely varied school and are worthy of something more than passing attention.

Nothing but praise

The returning to the guarantors of all contributions to the guarantee fund for the International Flower Show at New York is a very gratifying sequel to the splendid work done and notable success achieved in getting together so superb a display of the products of American floral industry. Every successive time that this result is attained it makes the undertaking so much easier for those who are next to follow. Of course, there will always be doubters, skeptical as to the possibilities in this or that location, and probably it is as well that this is so, since over-confidence is liable to breed indiscreet action and the pessimist has his legitimate place as a brake on his more impetuous fellows. But in this instance he is not needed just at present, any more than is the man who tries to stir up a controversy as to whether the New York Show did or did not beat its predecessor—usually someone who did little or nothing personally for either affair.

The S. A. F. boom

Now that the International Flower Show is a thing of the past the next important event of interest to the horticultural world is the S. A. F. Convention at Minneapolis. That occasion will be a very important one in many respects and its transactions are likely to have a far-extending effect on the future of the Society and its relations with the various sections of the trade. The S. A. F. is now rapidly sizing up to the position its founders planned it should fill and a little realization of its own possibilities for usefulness. Its membership has been increasing rapidly of late and its friendly affiliation and practical interest in the work of the several special societies has added immeasurably to its prestige. The successful outcome, financially and otherwise, of the third national flower show—and that in the city where this was regarded as next to impossible—now raises the organization to an eminence never before attained in its history. That the effect of this will be a tremendous accession of members and activity within the lines of the grand old national organization this year seems assured.

A suggestion for the publicity workers

The development of a bigger market and more stable values for the florists' cut flower product is, we believe, generally recognized as the most pressing present need in the floral industry. We would respectfully suggest to those public-spirited gentlemen who are giving their time and thought to this problem that they consider, as one part of the system to be inaugurated, possible ways and means whereby approximate estimates may be made of the prospective supply in advance of holidays or other occasions where an augmented demand is expected. The effect of such a reporting service, giving some accurate information as to the available crops and where located, in the various large producing centres would be to lessen the liability to sudden and excessive fluctuations in value. It would conduce to a much wider distribution of the product and an assurance of fairness to all concerned—growers, dealers and the public—which would bring much added dignity and stability to the cut flower as a commercial commodity.

THE FAULTS OF THE GROWER

An Address by Samuel S. Pennock Before the Lancaster County Florists' Club, April 17, 1913.

When your president wrote and asked me to read a paper before your club, I felt considerable hesitancy in accepting the invitation as it is rather a delicate thing to do—to point out the faults of the other man's way of conducting his business. It is human nature to criticize; in fact it is a very easy habit to fall into and if one is not careful, it soon becomes chronic. But you have asked me to tell you of your faults as we see them, of the things that help to make or mar the sales of your stock, and I am going to pay you the compliment of believing that you want what you have asked for, so I will try to give you my honest criticisms and hope you will accept them as well-meant advice and not as though they were given in a spirit of finding fault with your own individual ideas and methods.

The Value of Encouragement.

To begin with, I do not think that we try to help one another enough with a word of encouragement here and there as we go along the path of life, which is of infinitely more benefit than a word of condemnation, not only to the one who may justly deserve it but to the one giving it as well. We are all glad to be praised when we do something which we think is good. How often do we hear from a grower when we are able to make him good returns? but when his returns are not satisfactory, we hear from him very quickly and there is not very much time wasted in telling us about it. It is an easy matter to kick, sometimes too easy; in fact we get far more kicks than we should and not enough praise when lots of times we really deserve it. By this I don't mean to say that the growers are the only ones who don't give praise when praise is due. The retailers and the wholesalers are just as negligent in this respect as any one; probably they don't really consider the other fellow as much even as the grower does.

On a dull market, often times the returns are so low that we are disgusted with them and hate to send them out but we have no alternative. We have no wish to send out low returns any more than our growers care to receive them and it is through no wish of ours that the stock brings low prices as it is certainly to our advantage to get all we possibly can out of it and get as high prices as possible for every flower that comes in to us. It is certainly as hard on us as on the

growers to have to sell at low prices, especially as we are selling on a commission basis. And we assure you that when the letters of commendation or praise do come to us, they are certainly appreciated and they stimulate us to even greater efforts on behalf of our growers, and we know that they

ADVERTISING TALKS

BY

Ralph M. Ward

No. 6

An educated business man will never dispute the fact that advertising pays. He may dispute the methods used, but the fundamental fact is the same. In a broad sense every man is an advertiser. His demeanor is a walking advertisement; his reputation, honesty, politeness, correspondence, methods, neatness or carelessness, etc., are all advertisements. The writer knows a Hollander who grunts like a pig, and everyone who ever met him knows him by his grunt. If he didn't grunt he wouldn't be remembered. It is advertising—whether it pays or not I don't know. But such advertising is confined to one's friends and acquaintances—so it is too limited for big results. There are many ways for the florist to advertise. The local telephone book represents a good list for circular solicitation—people who have 'phones can afford flowers. Street-car advertisements are sometimes used with good results. Billboards properly located are excellent, and pay handsome dividends. But above all, the best is the local newspaper with a good circulation. In newspaper advertising never use more than four words for a headline—the less the better. Illustrations with the advertisement are excellent as they catch the eye quickly. State facts in as few plain words as possible. Change the wording frequently—make things interesting. If you can't afford sufficient space daily, run the advertisement three or four times weekly; but don't stop it—keep pegging away and it will be sure to pay you, provided you are honest with the public.

make for a better feeling and understanding between us.

The mutual good feeling among the florists, particularly among the growers, is improving each year—hardly a grower but who is willing to live and learn, to profit by his neighbor's successes and mistakes, and meetings such as these where you get in closer touch with each other are of splendid value and benefit, for there is always something to learn.

Flower Shows Useful.

Then there are our shows. What schools of learning they are—particularly such shows as the National Flower Show which has just taken place in New York! I know that every florist who attended this show went home feeling that it was time and money well spent, and I was very much pleased to see Lancaster so well represented. It shows progressiveness. Not only was it of advantage to see the exhibits, how stock could be grown, the newer flowers and plants (many of them novelties never before seen), but the greatest advantage of all was the opportunity the little man had to get in touch with the big men of the trade on an equal footing, conversing with them, getting their ideas and helpful suggestions and going back home with the knowledge of how to do bigger and better things, knowledge that he could not acquire in years of hard grinding.

Not only are these shows valuable to the growers, retailers and wholesalers in the way of being a source of knowledge and information, but they are among the greatest advertising mediums we have for the flower business. The Publicity Committees that are working in the different cities are doing all they can, and mighty good work, too, to bring the flower business before the public. But the flower shows are infinitely more lasting and far reaching in their effects than ordinary advertising. By this I do not wish to convey the idea that I do not think advertising pays, as I am a very firm believer in advertising. But for that reason, if for no other, these shows should have your firm and hearty support and your individual attendance whenever it is at all possible.

Essentials to Success.

This may be digressing from the subject somewhat, but I hardly think so, as these are points every florist, whether he is a grower, retailer or middleman should consider. Don't be afraid to leave home now and then to see what the other fellow is doing. Many a grower finds at the end of his year that he has come out with little or no profit, owing sometimes to his staying at home entirely too much and not understanding how to properly market his stock or to get it into the best possible shape for marketing.

Then, too, often a grower does not know just where he is making or losing money, owing to the fact of his not keeping accurate records as to production per plant or per square foot. Then sometimes a greenhouse is run in connection with another enterprise and not kept separate, except in a superficial way, a way that is more harmful than helpful. Accurate accounting, even if it does take a little more time and expense, is bound to pay in the end.

Care in Handling, Grading and Shipping.

Every year the competition in the flower business becomes keener and

the supply larger, which makes it necessary to grow the stock and market it in the best possible manner. Having succeeded in growing fine, first-class flowers, it is equally, if not more, important to see that they are not spoiled by poor handling. This often happens and is due to the growers not looking after the details and appreciating that it is just as important to market flowers in the very best up-to-date manner as it is to produce the best flowers in the first place. How much quicker and better will a box of flowers sell that comes into the market carefully graded and packed and put up in attractive shape? That shipment commands a buyer, particularly on a dull market, far more quickly than the shipment that is carelessly graded and packed even if the stock in this shipment be well-grown and some of the flowers be of even better quality than the first shipment. If this condition be allowed to go on day after day from one year's end to the other, it means many a dollar out of the grower's pocket. Don't be afraid to watch the details; the larger things will then fall into line naturally and take care of themselves. Be particular about the grading; keep the quality up and do not allow poor stock to creep in. It is very important that rubbered or wired carnations should not be put in the same bunches with the better blooms as a few wired or rubbered blooms will spoil the sale of the bunch. Some growers feel that this is not important but every grower who does this loses out in the end as these bunches of carnations will not sell except on a scarce market and almost all the time it is a buyers' and not the sellers' market. Let the poorer blooms come in a lower grade. Details carefully watched spell success in any line of business.

Better Mutual Understanding Needed.

I believe most growers and wholesalers do not keep in close enough touch with each other. Advices from the wholesaler as to the market conditions, or advices from the grower as to his future crops, probable quantity and when these particular crops will come in, are points that are too often ignored and too little considered. Often a crop will come in which could have been marketed to much better advantage had the wholesaler known about it and understood what to expect, whether this was a new crop coming on or simply an extra big cut. The knowledge of this would help the commission man to plan for better sales of the stock, perhaps even give him an opportunity to advertise it, and the results would more than offset the trouble and expense of the grower's writing or phoning about it. If it were possible for the wholesaler and growers to visit each other oftener, it would be a great help to each of them and would prevent many a misunderstanding, bring them closer together, each one helping the other, pointing out when and where things could be improved and having many things considered and talked over that otherwise would never come up.

Wholesaler's Advice Often Ignored.

Then, again, there are times when a grower thinks he knows better than the wholesaler when he should send

his stock in. This is a very great mistake, as the commission man's business is to know when the goods should be sent in and when there should be the best market for them. Of course, sometimes his judgment is at fault and things do not work out just as he has expected, but on the whole, he is certainly in a better position to make the decision than the grower. And when the grower does not have confidence enough in his commission man to be willing to abide by his decisions in these matters and persists in sending in his stock as he thinks best, then he had better send his stock to some other market, or else try and get a little confidence from some of his neighbors who do back up their commission men, feeling that that is the only way to do in sending stock to any wholesaler. More than once have we instructed our growers to send in their stock on a certain day or days and then have had them disregard these instructions and send it in when they thought best and in such cases the flowers have

SAMUEL S. PENNOCK

probably arrived too late to get the benefit of the best market.

The wholesale markets are coming more and more each year to do their business early in the morning and this brings us to another important point. Get your stock in early in the day for the man who has his shipments in early is the man who is going to have his flowers sold first. There is no doubt about this. And if you wish the best results you will have to conform to these conditions, even if it does mean starting your day's work an hour or two earlier. The old saying that "the early bird catches the worm" is only too true in this case.

A Discredited Practice.

I would like also to speak of the tendency which some growers have to hold back stock hoping for big prices, particularly at holiday times, although this is something which has troubled us more in the past than it has for the last year or two. This is a very bad practice and can never be anything but detrimental to the sale of the stock. As an illustration of this,

I remember one Memorial Day when a large shipment of carnations came to us from one of our growers. Some of the stock was beautiful—fresh and well-grown flowers, but a large portion of it was material which showed that it had been pickled and this poor stock condemned the whole shipment. This particular grower must have lost \$200 or \$300 by holding his stock, where if he had sent it in when it was good and fresh, even on a lower market, he would have come out far ahead of the way he did. It was a lesson to him, one which he never forgot, and he told us afterwards that he would never repeat that mistake.

We would very much prefer to have to notify our customers that we had sold up clean and were not able to take care of their orders or were only able to send them a portion of their order, rather than to send them goods that we knew would not hold up for them, stock that would be bound to make trouble. Pickling is a thing of the past and any grower who indulges in it, does so at his own expense. We cannot force these goods on the buyer of today.

Advantage of Well-Grown Stock.

I have said practically nothing about the growing and it would be a hard matter for me to give you any advice on points on which you were at fault in this respect. When the stock comes in I can tell whether it has been well or poorly grown, or whether it has been grown in too high or too low a temperature or various points of that kind, but naturally it is the conditions governing the marketing of the stock with which I am most familiar. But I would say that here again in the growing is where details count, and where good results will not come without proper attention to details. Well-grown stock always shows that it has had the attention and care that are necessary to produce good flowers and without such attention and care it is very seldom that good material is grown. Sometimes it is possible to get good stock without attention to these details, but this is more good luck than good management, and it is very seldom that a grower is able to repeat such a chance success.

These are the points which our experience as wholesalers has brought most forcibly to my attention, and I hope you will consider them as they have been given—hints and suggestions made in a spirit of frankness and helpfulness and not in the spirit of fault finding. I believe that every man wants to improve his business whenever and wherever he can and is glad to get pointers even if they are in the line of criticism and not praise.

We, too, have our faults and are glad to be told of our mistakes so that we can seek a remedy for them. But our interests are identical and there can be no separation of our motives, our ambitions and our results. One hinges on the other and the more we try to help each other with friendly criticism and deserved praise as well as blame, the greater efforts we will both be able to put forth. Give us of your confidence and support, believe that we are working for your best interests as well as our own, and then there can be no question of our mutual success and profit.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

ADJOURNED MEETING OF DIRECTORS.

At the adjourned meeting of the board of directors, held in New York, Tuesday, April 8, 1913, the report of the judges of the trade exhibition held at the convention in Chicago, was approved.

Vice-President Theo. Wirth reported that he had leased, by order of the board of directors, the Armory and Colliseum in Minneapolis, from the 15th to the 23d day of August for use of the next annual convention. The vice-president also gave a detailed report of the outdoor plant exhibit, stating what progress had been made in this important project.

It was decided to rent this space at 10 cents per square foot for the inside bedding space and 5 cents for the borders, intended for perennials, shrubs, etc.

Mr. Wirth stated that there would be 13,000 square feet in this garden available for bedding plants and 17,000 square feet available for shrubbery, making a total available space of 30,000 square feet.

Mr. Wirth was empowered to hire such additional assistance as is necessary and render a bill to the S. A. F., who will reimburse him for any outlay he may make.

Secretary Young, who was unable to be at the meeting of the board of directors in February, was instructed to make a trip to Minneapolis at an early date so that he might become entirely familiar with all the possibilities of the convention.

On Thursday, April 10, the board had another meeting when Ex-President Vincent brought up the question of the

INTERNATIONAL FLOWER SHOW

First Prize Hamper of Carnations and Mignonette by A. T. Bunyard

flood sufferers from the recent flood in the Middle West and those sufferers who had so much stock destroyed should have as much help as possible from this society.

The plan outlined was that we co-operate with them as far as possible and ask them to make their wants known and publish the fact that certain sufferers were in need of different kinds of stock. Those having surplus stock might communicate with a committee appointed for the purpose and find out the names of those who are in need.

It was finally decided that a committee of three be appointed with power to act without expense to the society. This committee is to gather

information in regard to the sufferers and to recommend in their judgment those most in need of it.

John A. Evans, E. G. Hill and August Poehlmann were appointed as such committee.

A Plea to Growers.

One of the principal attractions of the coming S. A. F. and O. H. convention, to be held in Minneapolis, Minn., August 19 to 23, 1913, will be an outdoor plant exhibit, as shown by plans recently published in the trade papers. Applications for space should be made at once to John Young, Secretary, S. A. F. and O. H., 54 West 28th street, New York City. The plants should be shipped the last week in May, addressed to Theodore Wirth, Superintendent of Parks, Minneapolis, Minn. (Outdoor Exhibit.) Freight charges must be prepaid. The plants will be planted, and properly taken care of by expert employees of the Board of Park Commissioners, and every exhibitor can feel assured that his exhibit will be well taken care of at no other expense than the rental space paid to the S. A. F. and O. H., namely, 10 cents per square foot for the inside bedding space and 5 cents for the borders, intended for perennials, shrubs, etc.

Every grower is earnestly requested to participate in this exhibit. Novelties and superior varieties of any and all classes of plants are desired. Enough plants to fill one bed should be sent. The plants will be left in garden until fall and the exhibitor will be permitted to display a sign of his firm. These signs must be made of uniform size and will be furnished at

INTERNATIONAL FLOWER SHOW

Peter Henderson & Co's Display of Dutch Garden Marigold.

cost price by the superintendent of the S. A. F. exhibits.

Please get busy and help us to make the exhibition garden of the S. A. F. a great success.

Even at this date several growers have taken space to assist in making this outdoor exhibition the success it deserves to be.

National Trial Ground for Roses.

President Farquhar has appointed W. F. Gude, F. R. Pierson and Wallace R. Pierson a committee to represent the S. A. F. in the proposal to establish a national trial ground for roses at Washington, by the United States Department of Agriculture, and do what they think best to further the project either in the name of the S. A. F. or in conjunction with any other societies that may be interested.

Department of Plant Registration.

John Bauscher, Freeport, Ill., offers for registration the following plant:

Name—American Beauty Geranium. (Zonal Pelargonium.)

Description—American Beauty Geranium originated in a novelty collection. It is a vigorous grower. Stocky in growth; has a more bushy habit than others. Its foliage is of a green with a brown zone in leaf, leaf slightly corrugated; it grows about 12 to 15 inches high. The form of the flower is similar to that of S. A. Nutt, differing in color, which is that of an American Beauty rose.

JOHN YOUNG, Sec.

March 10, 1913.

LADIES' S. A. F.

The above society gained sixteen new members at National Flower Show, from states, as follows: New York, 7; Massachusetts, 3; Kansas, 2; Washington, D. C., 1; Connecticut, 1; Pennsylvania, 1; Maine, 1. Thanks are given all working S. A. F. ladies.

MRS. CHAS. H. MAYNARD, Sec.

Omitted from last week's report of awards in Trade Exhibit Sections; a certificate of merit to Coldwell Lawn Mower Co., Newburgh, N. Y., for Improved Lawn Mower.

A NEW FLORISTS' CLUB.

The Kirkwood, Mo., florists got together the past week, the occasion being a two days' visit of Ant. Zvolanek of Lompoc, Cal., the sweet pea specialist. H. Gross and Joe Hauser, a committee of the Kirkwood florists, took the gentleman in charge and made all the rounds of interest. On Saturday a meeting was called at the Eleven Mile House and hear a lecture on sweet peas by Mr. Zvolanek and 45 florists responded. Fred Ude, Jr., as presiding officer, introduced Mr. Zvolanek. The lecture took up an hour and the party was then invited to a fine lunch, after which Mr. Ude introduced Frank Vennemann to act as temporary chairman and John Connors as temporary secretary, and this was the first step to organize the St. Louis County Florist Club. A meeting is called for Thursday, April 24, at the same hall, to complete organization.

Saturday, April 26, is Arbor Day in Massachusetts this year.

Minneapolis, the seat of this year's convention of the Society of American Florists and Ornamental Horticulturists, is essentially a manufacturing city. It ranks fourteenth among all the industrial centers of the country. Its manufacturers have an annual production representing in value \$548 for every man, woman and child in the city. The development of manufacturing in Minneapolis, however, has not been accomplished at the expense of its natural beauties. On the other hand, the wealth of scenery with which nature so generously endowed the city has been preserved and has exerted a beneficial effect upon the upbuilding of the manufacturing business. There are no "sweat shops" or slums in the city. Its manufacturing establishments are models of modern construction, with plenty of light and air.

The first industry to engage Minneapolis was the reduction of the great pine forest of the State to lumber. The Fall of St. Anthony with their tremendous energy were harnessed and made to turn the saws. With the settlement of the fertile country surrounding the city and its planting to grain the falls were made to revolve the millstones, which turned the grain into flour and meal.

Long before the forests had diminished perceptibly and marked the waning of the lumber industry Minneapolis had provided itself with other manufacturing plants to take the place of the saw mills. A variety of industries began to surround the falls and to make use of the power generated by them. The manufacturers have multiplied and their products have increased until now nearly everything within the range of necessity and a large number of so-called luxuries are produced by Minneapolis manufacturers, and their products find their way into the remotest parts of the world. Flour blazed the path for the other manufactured articles and it remains the chief product of Minneapolis. The brands of its great milling companies are known in nearly every household in the civilized world. Linseed products, textiles, machinery and a long list of other manufactured wares are sharing the prominence gained by the city's flour in the markets of the globe.

Visitors to Minneapolis find St. Anthony Falls and the grain mills which line both banks of the river at that point one of the interesting "Things to See." The mills have a combined capacity of 84,000 barrels of flour per day. The largest flour mill in the world stands among this group of grain producers. Minneapolis has the largest grain elevators and they give a distinctiveness to the city's skyline no matter in what direction the visitor looks.

Only a few blocks from the milling district are the Chamber of Commerce and the Flour and Corn Exchange

buildings. It is in the Chamber of Commerce that the tremendous tonnage of grain used in producing the city's flour is bartered. More cash wheat is sold in the Chamber of Commerce than in any place in the world.

The Falls of St. Anthony have been affectionately nicknamed "The Cradle of Minneapolis." It was to them that this great manufacturing city owed its existence.

PHILADELPHIA—MINNEAPOLIS.

The second meeting of the transportation committee of the Florists' Club of Philadelphia was held in the office of the secretary on the 22nd inst., when it was decided to recommend the following program to the club at its next meeting, May 6:

Lake Route—Leave Philadelphia Monday, Aug. 11, 8.25 P. M., Penna. R. R. to Buffalo. Leave Buffalo 2 P. M. Tuesday, 12th, first call Erie, 7 P. M.; leave Erie 11 P. M. Arrive Cleveland 7 A. M., 13th; leave 12 noon. Arrive Detroit 8 P. M.; leave 10 A. M., 14th. Arrive Mackinac Island 8 A. M., 15th; leave 10 A. M. Arrive Sault Ste Marie 5 P. M.; leave 7 P. M. Arrive Marquette 8 A. M., 16th; leave 9 A. M. Arrive Portage Lake 4 P. M.; leave 6 P. M. Arrive Duluth 7 A. M., Sunday, 17th; leave 1.55 P. M., Northern Pac. R. R. Arrive Minneapolis 7.30 P. M. One-way fare, Philadelphia to Minneapolis, by the foregoing route, \$48, which includes stateroom and meals on steamer. Pullman to Buffalo extra; lower \$2, upper \$1.60.

All Rail Route—Philadelphia to Chicago, Penna. R. R. Leave Philadelphia Sunday, Aug. 17th, 10.35 A. M. Use mileage or buy straight to Pittsburgh, thereby saving \$2. Arrive Chicago Monday, 18th, 8 A. M. The Chicago contingent will leave at 6.15 P. M., Monday. Chicago & Great Western, and the general feeling at this writing is that we ought to go on the Chicago special—although some favor the Rock Island route which leaves at 4 P. M. Fare one way \$26.40. Pullman Philadelphia to Chicago; \$4.50 lower, \$3.60 upper. Chicago to Minneapolis, \$2 lower, \$1.60 upper.

Members going on either of the foregoing routes are requested to communicate at once with the chairman of the transportation committee, John Westcott, Horticultural Hall, Broad and Locust streets, Philadelphia.

JNO. WESTCOTT,
GEORGE C. WATSON.
EDWARD REID,
Committee.

FIRE.

Keokuk, Iowa—The fire at the store of the Gate City Seed Company, Main street, on April 11, damaged stock to the extent of \$10,000, fully insured. The loss to the building is estimated at \$2000.

"Get them at Dreer's"

ALL SEASONABLE PLANTS, SEEDS, BULBS AND SUNDRIES

HARDY PERENNIALS. The most complete collection of varieties and the largest stock in the country. Our Perennial plants have a national reputation, we spare no expense to have them in the best possible shape for the planter. Such varieties that move better when pot grown are prepared in this shape; this does not mean little seedlings, but in the majority of cases the plants were field grown, were dug and potted during the fall and winter months and are of just the right size to give immediate results; they are not to be compared with so called field clumps. Try them and be convinced. See Our Current Wholesale List for Varieties and Prices.

ROSES FOR OUTDOOR PLANTING TO GIVE IMMEDIATE RESULTS. We have three hundred thousand 5 and 6 inch pots, the usual Dreer stock and the style of plants your retail customers are looking for. These are all two year field grown plants which have been potted during the winter months and which were stored in cold houses and frames and which are now in prime condition for out-door planting. The collection is the most up-to-date, including many new varieties not offered by anyone in the trade.

Early-flowering Hardy Phlox.

New Hybrid-Tea Rose George Dickson.

HYBRID TEAS, HYBRID PERPETUALS, TEA AND EVERBLOOMING, RAMBLERS, BABY RAMBLERS, MOSS ROSES, HYBRID SWEET BRIARS, AUSTRIAN BRIARS, WICHURIANA, ETC., ETC. See Our Current Wholesale List for List of Varieties and Prices.

AQUATIC PLANTS—WATER LILIES, NELUMBIUMS, VICTORIAS. Tender and Hardy Aquatics have been a special feature with us for nearly a quarter of a century. Over eight acres of artificial ponds are devoted to their culture. If we can assist you in making plans, or selecting varieties, the services of our expert are at your disposal for the asking.

OUR CURRENT WHOLESALE LIST also describes the following, all of which are handled as Specialties:

DECORATIVE PLANTS, PALMS, FERNS, PANDANUS, BAY TREES, BOXWOODS, DRACAENAS, etc., etc. HARDY SHRUBS, HARDY VINES, HARDY CLIMBERS, RHODODENDRONS, AZALEAS, etc. BULBS, DAHLIAS, TUBEROUS ROOTED BEGONIAS, GLADIOLUS, GLOXINIAS, FANCY LEAVED CALADIUMS, CANNAS, etc., etc.

ROSE "MRS. GEO. SHAWYER"

Immediate delivery, own root stock, \$30.00 per hundred; \$250.00 per thousand. Did you note its beautiful color and keeping qualities at the National Show?

CHRYSANTHEMUMS

We have over four hundred varieties for you to choose from. If you are interested in pot plants, we would particularly recommend the Cap. Family, of which we have seven sports.

Lilac Cap., Purple Cap., White Cap., Yellow Cap., Butler's Caprice and many others for Decorative Work, such as Dean's Favorite, Hortus Tolosanus, and Lizzie Adcock. \$15.00 per hundred. These are the kinds that are grown by the million for the European market.

CHARLES H. TOTTY MADISON,
N. J.

CLUBS AND SOCIETIES

LANCASTER COUNTY FLORISTS' CLUB.

Thursday, April 17, about 25 of us made a visit to the greenhouses and seed establishment of Geo. W. Park at La Park, Pa. The greenhouses are in charge of E. W. Byer and they grow some 600 varieties of plants in addition to the immense stock of bulbous and hard-wooded stock found out on the grounds, quite an undertaking for one man.

The seed houses were a genuine hive of industry with a modern printing establishment turning out 600,000 of Park's Floral Magazine every month.

Coming back to Lancaster a meeting of the club at which nearly every member who belongs was present, was held with Mr. S. S. Pennock, of the Pennock-Meehan Co., Philadelphia, who was the essayist and the attraction. His subject was the faults of the grower in growing and consigning his stock, and was exceptionally well handled, bringing out quite a little discussion—a discussion that has practically put an end to the pickling of any stock from this section and has determined the grower who grows less than 5000 carnation plants for blooms to consign, to stick to from one to not over three varieties so that he may have them in reasonable quantity. Thos. Fries read a paper on Easter stock which was well received and discussed. After the meeting a large delegation escorted Mr. Pennock, Mr. Brown of Coatsville and Mr. Bernard from Northbrook safely through Lancaster's "White Way" to the station.

ALBION M. HERR.

AMERICAN GLADIOLUS SOCIETY.

Report of the Color Chart Committee.

The Color Chart Committee of the American Gladiolus Society, after examining all the available charts, recommend the adoption of the *Reper-toire de Coleurs* as the official color chart of the Society.

(Signed) A. C. BEAL,
ARTHUR COWEE.

Gladiolus Trial Grounds.

As the time for gladiolus planting is near, the Committee on Nomenclature again desire to call the attention of members of the society to the importance of their support, and especially in the contribution of bulbs of varieties, the names of which are duplicated, as well as varieties which have been renamed. Three hundred and eighty-five named varieties and seedlings have been tested on the trial grounds. It is known that there are at least four hundred and fifty named varieties in the American trade which we have never tried. In other words, we have tested less than half of the varieties grown. It is impossible for us to determine whether seedlings are distinct unless we have all the varieties. Have you sent bulbs of all your varieties to the trial grounds?

Your committee feel that this particular part of their task is even of more importance than the registration of new varieties, and unless the requests of your committee are heeded, the advancement of this work is delayed, and results naturally expected by the members from their committee are not secured.

(Signed) A. C. BEAL,
ARTHUR COWEE,
LEONARD JOHNS.

CLUB AND SOCIETY NOTES.

At the regular meeting of the Shelter Island (N. Y.) Horticultural and

Agricultural Society held in the Mechanics' Hall Wednesday, April 2nd, the judges awarded J. W. Gilbert 85 points on a fine seedling calla of his own originating, a cross of Little Gem and Flora. The next regular meeting will be held in Mechanics' Hall Tuesday, May 20th.

The monthly meeting of the New London Horticultural Society was held Thursday, 17th inst., which brought out a large attendance. Several members gave reports on the International Flower Show which were very interesting to those who could not attend. President John Malona read a paper on Annuals, Biennials, and Perennials.

A. LICKMAN, Cor. Sec.

The monthly meeting of the Nassau County Horticultural Society was held at Glen Cove, N. Y., on April 18. Communications were read from a number of firms offering special prizes for the fall show. The judges of the evening's exhibits awarded a certificate of culture to V. Cleres for *Hydrangea Hortensis*; first prize to G. Ferguson for roses; first to H. Gaut for Darwin tulips var. Clara Butt. The next meeting will be held May 14 at 7.30 P. M.

JAMES MACDONALD, Sec.

President Guy W. French announces that the Chicago Florists' Club would be very glad to receive any information regarding fellow florists who have lost all they had from the recent floods and storms and are worthy of help.

The club has a committee in the field investigating the needs of such cases, and will arrange to help with all in their power. The reporting of the cases will lead to prompt investigation and such help as necessary being extended.

Cash With Order Please

ANTON SCHULTHEIS, 316 19th St., College Point, L. I., N. Y.

or building material and this, with a little cash, will, no doubt, help many a man who has lost all he had to regain his feet.

Address all communications to E. C. Toepel, Sec'y, Chicago Florists' Club, Morton Grove, Ill.

The Chicago Florists' Club held its regular meeting at the Union Restaurant, Thursday evening, April 10.

The transportation committee made a report recommending that the Chicago Great Western R. R. be selected as the official route to S. A. F. convention at Minneapolis, Minn., next August. Their recommendation was adopted by a vote of the club, and the Great Western R. R. was selected. The transportation committee will make all the necessary arrangement for the pleasure and comfort of those going with the Chicago Florists' Club. They have arranged for an all-steel Pullman-equipped special train with all modern conveniences, and a large electric sign, reading "The Chicago Florists' Club Special." The Chicago Florists' Club invites all florists going to Minneapolis via Chicago to make arrangements to go with them from Chicago on their special train.

F. W. Muncie, physiological chemist in charge of floricultural fertility investigations at the experiment station of the University of Illinois, gave a very interesting talk about fertilizers, and answered numerous questions at the close of his remarks.

Edward C. Toepel, bookkeeper at Poehlmann Bros Co.'s Morton Grove office, was unanimously elected secretary to fill the vacancy caused by the resignation of Wilder S. Deamud, who has left Chicago and is now located at Bay City, Mich. Vaughan's Seed Store showed a bunch of Cannabis-cut flowers—two varieties, *Fire Bird*, a very bright red, the only one of its color having green foliage. *Carl Lutz*, a pure bright yellow without any spots.

WOMEN'S NATIONAL GARDEN CONFERENCE.

Garden-loving women in Philadelphia and vicinity have planned a national conference on Horticulture. It

will take place on the 17th of May at the Pennsylvania School of Horticulture for Women, at Ambler, Pa. Delegates from Connecticut, Rhode Island, New York, New Jersey, Ohio, Maryland, Michigan and other states will attend.

The subjects to be studied include beekeeping, methods of training abroad, commercial raising of vegetables, greenhouse growing, nursery work and rose culture.

The conference will bring together women from all over the United States who have achieved success with flower, vegetable or fruit raising.

Among those who will speak are R. L. Watts, dean, School of Agriculture, State College, on Education Value of Horticulture for Women; Mrs. H. B. Fullerton, Long Island Railroad Experimental Farms, on Horticulture in the Home; Miss Myra L. Dock, member State Forestry Commission, on Forestry; O. P. Bishop, Hummelstown, Pa., subject not decided upon; Miss Beatrice Jones, landscape gardener, New York City, on Landscape Gardening for Women; Miss Anne Dorrance, Dorranceton, Pa., on The Commercial Side of Rose Growing; Miss Martha Gibbons Lear, Morris Nursery Co., West Chester, Pa., on Twenty-Four Years' Experience on Nursery Work; E. B. Walrous, secretary, American Civic Association, Washington, D. C., subject not decided upon; Miss Elizabeth Leonard, landscape architect, Cambridge, Mass., on Landscape Work for Women; Miss Agnes Cunningham, Newtown, Pa., on Trucking for Women; Miss L. A. Alderson, Greenwich, Conn., on What English Women Are Doing in Horticulture; J. Horace McFarland, president American Civic Association, Harrisburg, subject not decided upon; Miss E. D. Varley, Home Garden Association, Baltimore, Md., on Horticulture in Settlement Work; Dr. Ida A. Keller, Philadelphia High School for Girls, on Horticulture for High School Girls; Miss M. V. Landman, manager, Sleighton Farm, Darlington, Pa., on Horticulture for Delinquent Girls; Miss Elizabeth M. Lee, landscape gardener, Philadelphia, on Horticulture in Civic Work.

It is hoped by those interested in the conference that it will take permanent form in an organization similar to the Woman's Horticultural International Union of England. The committee on arrangements for the conference includes Miss Jane B. Haines, president of the Horticultural School for Women; Mrs. Thomas Wistar, Mrs. H. B. Fullerton, Miss M. Catherine Straith and Miss Emma Blakiston.

BODDINGTON'S QUALITY GLOXINIAS

GLOXINIA ERECTA GRANDIFLORA

This popular flowering plant is coming into greater vogue than ever, not only as a pot plant for house decoration, but also for cut flower purposes. Our strains of Gloxinias are the true erect-flowering type, grown by a specialist in Europe.

GLOXINIA ERECTA SUPERBISSIMA

Having during the past season been requested to secure some specially fine Gloxinias for exhibition purposes, we have made arrangements with a noted Gloxinia specialist in England to reserve for us some of the most distinct types. The bulbs are not so large as the Named Varieties, but this is a characteristic of most Erecta superbissima varieties.

BODDINGTON'S IDEAL PRIZE GIANT MIXED. Great variety of superb colors.

CYCLOPS. Velvety carmine, shading to a broad white border, throat dotted with dark red.

DUCHESS OF YORK. Flowers of a rich dark blue, each petal being edged with a broad band of white. A most striking and lovely variety.

SPOTTED HYBRIDS. Whenever exhibited, they create intense interest. The delicate markings, in an infinite variety of forms, add a special charm to the flowers.

SUTTON'S WHITE. A giant white flowered variety.

DUKE OF YORK. Large scarlet Gloxinia with deep white edge to each petal. A magnificent flower.

HER MAJESTY. This exquisite Gloxinia is still unsurpassed by any other white variety. The flowers are as pure as newly fallen snow, and are borne on short stems, just clear of the elegantly recurved foliage.

READING SCARLET. In color this is the most brilliant Gloxinia in existence, being an intense glowing scarlet variety of the true Crassifolia habit. An admirable companion to Her Majesty.

GOLIATH. Violet and white, fine variety.
Per doz. \$1.50, per 100 \$10.00

Boddington's Quality Tuberous-Rooted BEGONIAS

Single-Flowering Tuberous-Rooted

For planting in beds and where color effect is desired. Our stock of these bulbs will be found true to color and free from mixture.

Crimson	Rose White, Pure	Salmon	Scarlet Yellow	Pink, Light Copper	Orange
---------	------------------	--------	----------------	--------------------	--------

Large bulbs measuring 1 1/4 inches and upward, separate colors or all colors mixed, 35 cts. per doz., \$2.25 per 100, \$20.00 per 1000; extra large bulbs, 1 1/2 inches and up, same colors as above, 40 cts. per doz., \$2.75 per 100, \$25.00 per 1000.

Double-Flowering Tuberous-Rooted

These can be depended upon producing 100 per cent. double flowers and contain very large and choice varieties.

Crimson	White, Pure	Yellow
Scarlet	Copper Bronze	Orange
Rose	Salmon	Light Pink

Large bulbs measuring 1 1/4 inches and upward, separate colors or all colors mixed, 50 cts. per doz., \$3.50 per 100, \$30.00 per 1000; extra large bulbs, 1 1/2 inches and up, same colors as above, 65 cts. per doz., \$4.00 per 100, \$35.00 per 1000.

Single Crested Begonias

This strain of Begonias ranges in all colors—salmon, pink, white, yellow, copper and scarlet; petals carry on the upper side a crested-formed cockscomb. Separate colors, 80 cts. per doz., \$6.00 per 100; mixed, 75 cts. per doz., \$5.50 per 100.

Single Frilled Begonias

These are of the finest types of the single Begonia, the petals being heavily frilled on the edges. To color, 10 cts. each, 65 cts. per doz., \$5.00 per 100; all colors mixed, 60 cts. per doz., \$4.50 per 100, \$42.50 per 1000.

Single Begonia Bertini

A beautiful bedding Begonia, brilliant vermilion flowers of rare beauty. As a bedder it stands unrivaled. 80 cts. per doz., \$6.00 per 100.

Double Begonias

	Doz.	100
Duke Zeppelin. Intense pure vermilion-scarlet.....	\$1.00	\$7.50
Lafayette. Rich, brilliant crimson scarlet.....	1.25	10.00

SEEDSMAN

342 West 14th St., NEW YORK CITY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

Rochester Seed Trade.

A. W. Gilman reports business as exceptionally good with a large demand for Golden self-blanching celery seed and cabbage seed is moving stronger than usual.

Crossman Brothers say that orders are rushing—business is good and that they are unusually busy at their nurseries.

James Vick's Sons are very busy—but the store trade has been so solely hit on account of bad weather. Their catalogue trade passes all expectations. They have increased their hot-bed stuff 400 per cent. Asters are coming and looking well. They are planting an increased acreage of asters, and also an increased acreage of Phlox Drummondii, Poppy, Sweet William, etc.—all of which they specialize. They have also engaged a Cornell specialist to work on their farm, and if any trouble occurs amongst the public in plant disease, etc., if they will refer personally to the firm they may get the benefit of this specialist free of charge. HORACE J. HEAD.

PLANT QUARANTINE DECISION NO. 2.

The Federal Horticultural Board recommends that regulation 5 of the rules and regulations for carrying out the plant quarantine act, published in Circular No. 41, Revised, Office of the Secretary, be amended by the addition of the following:

Permits for the entry of nursery stock or other plants and plant products of any grower or exporter may be refused, and existing permits may be canceled, on proof that such grower or exporter has knowingly shipped into the United States any nursery stock, or other plants and plant products, the importation of which is forbidden by the Secretary of Agriculture under the authority conferred by Section 7 of this Act.

Regulation 5, as amended, shall become and be effective on and after April 15, 1913, and the regulation in full shall read as follows:

Regulation 5. Permits for Entry of Nursery Stock.

On approval by the Secretary of Agriculture of an application for the importation of nursery stock from countries which maintain nursery stock inspection a permit will be issued in triplicate. One copy of the permit will be furnished to the applicant, one copy will be mailed to the collector at the port of entry, and the third filed with the application. Permits will expire on the 30th day of June of the year following the date of issue.

ding took place at St. Andrew's Church.

Herman Weiss of 127 W. 28th street and Miss Marguerite Alexander were married on April 15 at the home of the bride's parents, 1128 7th Boulevard. Mr. Weiss is well known among the wholesale trade.

PERSONAL.

F. C. Pellegrenhy has been appointed landscape gardener in the city parks of Jackson, Miss., a position just created by the new commissioners.

Sir Trevor Lawrence tendered his resignation as president of the Royal Horticultural Society, at the meeting of the Council of that body on April 1st, on account of advancing years and impaired health. Lord Grenfell was elected as his successor. Sir Harry Veitch was elected deputy-chairman of the Council.

SALESMANSHIP.

The sterling qualities of a good salesman are soon brought to the surface when he greets a customer who "merely stopped in to price your goods and not to buy." Courtesy is visible at all times, and even though they may not buy, they do not fail to remember the treatment received.

Patience is a virtue and here is where you make a sale. The customer is undecided as to just what he or she wants and in many cases relies on the salesman for suggestions, feeling that his ideas and experience are superior to their own and, by taking an interest in their order, no matter how trivial it may be, you have won them over and they will sooner or later agree with you.

In buying flowers no matter what the occasion may be, people do not always decide on the first suggestion and the salesman having the patience to hold his customer until satisfied will have no trouble handling these same people the next time they visit the store to purchase flowers. He has gained their confidence and that means the sale half made.

An artist may be a wonderful worker but not a good salesman, due to the fact that he cannot convince his customers enough to leave their orders with him; on the other hand, the less competent man who is a poorer worker may be much the better salesman.

Unnecessary talk is never appreciated by a customer and too much may be as bad as none at all. Customers feel when entering a store that the privilege of looking about and asking prices belongs to them. The wide-awake salesman will soon observe after a few moments consideration whether they mean business or are out sight-seeing. Courtesy may help to make a sale, gruffness may drive them out never to return. A shrewd salesman never forces anything on a customer; when in doubt as to a selection give them time to decide for themselves and if your opinion is asked give it honestly and you will not be called to account for it later.

When two or more customers are in the store at one time the quoting of prices should always be done quietly so as not to embarrass the customer with the meagre purse in the presence of the person with the fat pocketbook.

The habit of smoking or drinking during store hours is a serious detriment and the breath of one addicted to these habits is always offensive to a customer. In spite of gum and breath perfumes the salesman using either of these habitually is soon condemned.

The salesman having the proper qualities and ability to carry out the foregoing advice may be well taken care of when opportunity knocks at his door provided he is there to answer.

MR. SPREMAN.

CHICAGO NOTES.

Mrs. Frank Oechslein is visiting in New York.

The J. A. Budlong Co. is extending sympathy to many of them in a very practical way.

A department store reports two car loads of bay trees and shrubbery from Belgium as held up by the floods.

Peter Samuelson for several years with H. N. Bruns, has opened a store for himself at 5605 W. Chicago avenue.

Arthur Nees at 2419 North avenue has remodeled his store and put it in fine condition for an increased business.

Stephen and Charles Stebert have bought the Rhojahn greenhouses at 12th street and Desplaines avenue, Forest Park.

Another new flower store is that of C. Herleman at 709 Willow street. This spring seems to have moved many to venture into the business.

Attention is called to the announcement of the Chicago Florists' Club, under the heading of Club and Society Notes, concerning Relief for Flood Sufferers.

J. Bergstrom of Rockford, Ill., who was a Chicago visitor this week, has enlarged and remodeled his store at 507 7th street and is having an opening this week.

Again the Fairbank Building will house the old-time members of the Flower Growers' Market, though this time as individuals. The home coming occurs May 1st.

A. Lange found ready sale for pot plants of *Dielytrea spectabilis* (bleeding heart) last week. They were placed in baskets and made very attractive spring offerings.

N. J. Wietor, chairman of the committee that financed the S. A. F. convention here last August, expects to see everything cleaned up this week. The balance will be on the right side.

A special feature of nearly all the window displays in the flower stores now is the iris. This beautiful and graceful flower seems each year to be more popular and wholesalers report sales very satisfactory.

Flood conditions are not interfering so badly with the shipping business this week though goods are still received subject to delay. Most trouble reported now is from Southern Illinois and from Cairo to Memphis.

Phil Schupp continues to receive letters from florists who suffered and lost in the great flood. The stories of their experiences are almost beyond belief and how they escaped with their lives is little short of a miracle.

Ben F. Rubel, whose death we note on another page, was a Chicago man, who had just attained success and was preparing to take a trip to Europe in June. His death of pneumonia came just when he was planning for a time to rest and enjoy the results of the business he had built up.

Arbor Day was observed with no apparent lack of enthusiasm and many schools made the day quite an event. Trees were again sold for one cent each and 300,000 sycamore trees were offered by one store with a free cir-

McCray Refrigerator Co

553 Lake Street, Kendallville, Ind.

Mention Horticulture when you write.

cular of instructions for planting and care given with each sale. The sycamore has the approval of City Forester J. H. Prost for city use.

The Horticultural Society of Chicago is planning a peony and iris show. The cultivation of these flowers has increased wonderfully during the past five years. Large sums of money are invested in peony growing in the vicinity of Chicago and with the cold storage facilities now in use, beginning with the first shipments from the south and ending with the cold storage home-grown blooms, there is a long season, with immense possibilities which growers, wholesalers and retailers are alike more alert to each season. A good peony and iris show will be just the best thing to give the flower loving public. It will be held some time in June.

Visitors—J. J. Leborious, Duluth, Minn.; W. L. Rock, Kansas City, Mo.; J. Bergstrom, Rockford, Ill.; Wm. Wells, England.

RHINEBECK EASTER VIOLET SHIPMENTS.

Shipments of violets through the local American Express office reached a large total during the week preceding Easter. There were 3342 boxes shipped, which was 512 more than last year.

The shipment by days, in boxes compared with other years were as follows:

	1913	1912	1911	1910	1909
Monday,	172	161	170	161	151
Tuesday,	200	177	187	194	170
Wednesday,	311	297	287	311	272
Thursday,	664	534	502	512	493
Friday,	985	903	839	769	748
Saturday,	980	776	818	761	968
Total,	3,342	2,830	2,803	2,648	2,802

Ninety-three boxes were also sent by the Adams Express Company, and in addition several small boxes were sent by parcel post.

THE FLORISTS' SUPPLY HOUSE OF AMERICA

Our Display at the National Flower Show Was A NOTABLE SUCCESS

Visitors crowded our booth continually, attracted by the extent and brilliancy of our display and especially the many *sterling novelties* never shown before. Among these were the **Sunshine Baskets** which leading retailers ordered in quantity and which alone make a store most attractive.

Our Silent Salesman Will Help You Out. Write For Him.

PHILADELPHIA NOTES.

Mr. Smith of the Joy Floral Co., Nashville, Tenn., made us a flying visit on the 21st inst. on his way North. He expects to spend a week or two in New England.

The seceders sent a request for money to the wholesalers. Every one responded. Now, let us look for something the seceders are doing in return. Of course they will buy more—and be more pleasant in the buying.

Adolph Farenwald will be the star

TWO DARING AVIATORS.

The celebrated aviators, Blakely Graham of Chester, Pa., and George Cooper Watson of Philadelphia, making a daring flight in a gale at Atlantic City, April 20, 1913.

at the next meeting of the Florists' Club. His subject will be "Affiliation," and we expect some clean-cut new ideas from the growers' standpoint. The retailers have had it all their own way of late. So we expect to have a good audience to hear a live wire from the other side.

Fred Cramer, one of the good boys in the Niessen outfit, was married this week. You have to settle down, you know, and raise a family. We do not

know Mr. Cramer, but take Arthur Niessen's word for it. Started with them as a message boy—now one of their responsible salesmen. Merit counts. May they live long and prosper.

Visitors: A. E. Outerbridge, Bermuda; Harry Papworth, New Orleans; Jacob B. Wiese, Buffalo, N. Y.; J. A. Pennypacker, Phoenixville, Pa.; C. B. Knickman, New York City; William Swayne, Kennett Square, Pa.

FOUR NEW ROSES Every Grower Will Want This Year

IRISH FIRE FLAME The dainty new single Rose; a distinct novelty, beautiful and charming; a favorite wherever shown; nothing to compare with it. Very free, vigorous grower; color fiery crimson, shading to a rich orange-salmon at the base. Own Root: Doz., \$6.00; 25, \$10.00; 50, \$17.50; 100, \$30.00; 250, \$70.00; 1000, \$250.00.

MRS. CHAS. RUSSELL Grafted Stock Only: Doz., \$7.50; 25, \$12.50; 50, \$20.00; 100, \$35.00; 250, \$82.50; 1000, \$300.00.

MILADY Grafted or Own Root: Doz., \$5.00; 25, \$10.00; 50, \$17.50; 100, \$30.00; 250, \$70.00; 1000, \$250.00.

MRS. GEO. SHAWYER Grafted or Own Root: Doz., \$6.00; 25, \$10.00; 50, \$17.50; 100, \$30.00; 250, \$70.00; 1000, \$250.00.

1914 NEWS KILLARNEY BRILLIANT

The sensational new Killarney sport which will be introduced next year. About twice as double as Single Killarney, much larger flower and of a darker brilliant shade of pink. Unquestionably by far the best introduction of a new Rose of recent years.

	Doz.	100	500	1000
GRAFTED.....	\$7.50	\$35.00	\$150.00	\$300.00
OWN ROOT.....	6.00	30.00	125.00	250.00

Scions for grafting in 1000 to 5000 lots at \$200.00 per 1000. Special prices on larger quantities.

MATCHLESS The sensational White Carnation for 1914. Booking orders now. Deliveries can be made December, 1913, on the early orders. 100, \$12.00; 1000, \$100.00.

We guarantee not only the quality of our plants but their safe delivery by express.

RIBBONS AND SUPPLIES: Many new patterns in exclusive Ribbons. Write us for prices on these and on Supplies. Small shipments can be made by Parcel Post at purchaser's risk.

Flower Market Reports

BOSTON This market has been good for the past few days, a great and steady improvement in demand being supplemented by a noticeable decrease in quantity of stock coming in. Carnations are going at a lively pace and there are scarcely enough to supply the call, especially for white. In roses the white varieties are also the most active, although the crop is slackening on all sorts and the effect is healthy. The lower grades are really scarce as compared with the demand. American Beauty of all the best grades is experiencing a big demand. In all lines of staple flowers a big advance over last week is in evidence. Sweet peas are going well as are also daffodils, but tulips are poor and they have seen their best for this year. Violets about finished. Gardenias and orchids getting scarce and there is an insistent call for cattleyas which cannot always be gratified. Lilies and callas normal in supply and demand. Lily of the valley is one of the most desirable items on the whole list at present.

BUFFALO The market was in much better condition the past week and it looked as if new life had taken effect, the receipts being much lighter and the buying was more brisk. Carnations were in good supply, as were

roses and other stock. High prices were out of the question but the market was in good condition throughout the week. There is still a good lot of Victoria daffodils, jonquils, Vonsions, tulips, etc., coming in and they have had a fair sale. Callas and lilies have been plentiful. There is a good quantity of sweet peas. Violets are about to an end and lily of the valley has taken well.

CHICAGO Chicago market can be regarded as about normal at this writing. April 22, the demand being a little slow as compared to that of a week ago, when all kinds of stock moved along, bringing fair returns and little or none went to waste. Roses are coming in quite freely and first-class stock brings good prices. Carnations

Flower Market Reports

(Continued from page 640)

are maintaining a steady figure and generally everything sells that is at all in good condition. American Beauties are not at their best with some. On the whole stock is scarcely up to the average just at this time, especially in the long and extra lengths. Violets are practically of the past. All kinds of bulbous flowers are on the counters and shipments coming up from the South. Lilies are more plentiful than heretofore, many having very short stems. Lily of the valley is shortening up in supply and stock is sold as soon as it arrives. Iris is coming in fast and is not selling quite so rapidly as last spring.

The average weekly business is fair with no specially great doings and plenty of time for all to do more. So far we have been spared the distressing feature of gluts, principally because there was not such an abundance of bulbous stock and we hope very much that purchasers of bulbs have been conservative this year again. Local retailers are considerably agitated over the appearance of flower-loving burglars who, removing some panes of glass at a rear window, enter the stores usually between 12 and 1 A. M., take all the long-stemmed roses and carnations, sweet peas and violets, occasionally some ribbons and silkline. The first to be honored with this visit was Wm. B. Brown, next came Norman Sullivan; then J. F. Sullivan and B. Schroeter, and the last victim was Mr. Taepke.

A fairly good market, with encouraging figures for the growers who lead in their specialties has been the rule for the past week. There is no surplus of either carnations or roses of good quality. Medium grades are more in the running than the fancy products, but that is because the price is better adapted to the medium pocket book. There is a good call for orchids, especially those adapted for wedding occasions and this, in fact, applies to all choice white material, particularly lily of the valley. Gardenias are selling out clean every day, if of good finish, and at better prices than at any time of late.

Last week, it may truly be said, was one of the most remarkable in many years. Not only because of the scarcity of stock but from its unexpectedness. And the condition seemed to be more than local, as nearby centers, such as

New York, Baltimore, Pittsburgh, Washington—all seemed to want the same things, and had to be turned down. With it all there was no marked advances on quoted rates. Of course, the hardening in prices was very pronounced. The usual wagon loads for the street men on Friday and Saturday were conspicuous by their absence. And, in the balance sheets that's what finally counts. The old timers say they have never seen anything quite like it at this season of the year. Richmond roses were about as short as anything. There seemed to be a redundancy of white roses in

some quarters but as a rule all roses sold well. Orchids are fairly plentiful. Schroederæ on its last legs and Mossiæ and Skinneri now are favorites. A few Dendrobium nobile alba are a welcome novelty and meet with ready sale. Gardenias have shortened up in supply and the market for these is now in live healthy condition. Sweet peas are very scarce and only the newly planted are up to par as to quality. New items are "Baby" gladioli, such as Bride, Delicatissima, Blushing Bride, etc., and Spanish iris in blue and yellow. Both colors meet

HYDRANGEAS

THE NEW FRENCH FORCING HYDRANGEAS.

Avalanche—A splendid large white. This will absolutely supercede Thomas Hogg. 3-inch pots, \$6.00 per 100.

La Lorraine—Pale rose changing to bright cerise pink; claimed by many to be the best of all. 3-inch pots, \$10.00 per 100.

Remember now is the time to buy these Hydrangeas and grow them along for another year. This fall we will offer all of Lemolne's and Mouillere's Novelties in Hydrangeas, including E. G. Hill, the gem of them all. The great blooming qualities of these Hydrangeas are their talking points. You may have in a four-inch pot three to five immense heads of bloom. You will never grow the old varieties again after you become acquainted with these new ones.

Write today for our catalogue of everything you need in the Rose and Plant line. THE GOOD & REESE COMPANY, The Largest Rose Growers in the World, Springfield, Ohio

FLOOD RELIEF IN OHIO.

The Cleveland Florists' Club Committee, appointed by President Graham to investigate the conditions in this state, and to give relief to those in need, have made very good progress but there is still much to be done.

John Evans, who with E. G. Hill and August Poehlmann were appointed by President Farquhar of the S. A. F. as an investigating committee, passed through Cleveland this week and held a meeting with the local committee consisting of A. Graham, H. A. Hart, Geo. W. Smith and Frank Friedley. The field was gone over thoroughly and methods discussed.

The list of donations to date is as follows:

Arthur Doeble, Norwalk, Ohio, 1000 geraniums, 1000 salvias, etc.; MacNair, Florist, Providence, R. I., cash \$10.00; Louis Epple, Jr., Pelham, N. Y., cash \$2.00; Geo. L. Ely, Clyde, Ohio, 1000 geraniums; Stubbs Nursery, Augusta, Ga., five boxes plants, asparagus, Salvia, coleus, etc.; L. G. Barbier, Dunkirk, Ind., Boston ferns, 500 geraniums, 400 chrysanthemums; Woodbury & Woodbury, St. Johns, Mich., 1000 carnation cuttings, callas, asparagus, daisies, etc.; R. Vincent, Jr. & Sons Co., White Marsh, Md., 10,000 geraniums; Wauseon Floral Co., Wauseon, Ohio, 500 salvia; J. F. Sked, Westerville, Ohio, 500 salvias, geraniums, pelargoniums, etc.; A. Graham & Sons, Cleveland, Ohio, geraniums, etc.; J. M. Gasser Co., Godfrey callas, chrysanthemums, carnations, etc.; Adam Graham, cash \$10.00.

The names of those helped are not to be mentioned in these columns. Never was there a more opportune time to help a man who has lost all of his stock, for with Decoration Day only a few weeks away he can quickly turn plants into cash.

If you know of any florist in this state who is in need of help—a man to whom a few hundred or a few thousand plants would be of benefit, to put him on his feet—let us know.

If you have surplus stock of plants and want to know where to send them to do the most good—let us know.

If you are a retailer or a supply man or if you have no plants to offer, a small amount of cash will help pay expressage on a box of plants to some brother florist who has met with misfortune in the flood.

What is to be done must be done at once. Reports have been very hard to get from down state or this should have been cleaned up sooner.

Address all communication to Cleveland Florist Club, Frank A. Friedly, Secretary, Rocky River, Ohio.

PUBLICATIONS RECEIVED.

The New Gardening, by Walter P. Wright. Published by Doubleday, Page & Co., New York. A guide to the most recent developments in the culture of flowers, fruits and vegetables, with six illustrations in natural colors and 48 half-tone reproductions from photographs of plants, views and garden operations. The 400 pages are a gold mine of practical information in all the fundamentals and modern details of garden science and art. Part 1, devoted to the New Flower Gardening, contains 22 distinct chapters covering borders, rock-gardening, bedding, roses, tulips, sweet peas, Japan-2 comprises The New Fruit-Growing, city gardens, water gardens, trees, shrubs, etc., etc. Part six chapters. Part 3, The New Vegetable-Growing, four chapters. This useful manual should be in the possession

of everyone, professional gardeners as well as amateurs. The author speaks out boldly on the subject of garden fads, fallacies and fashions, and convincingly, too. After an hour's perusal one is comfortably flushed with the impression that he has learned something of use to him and that his vision is wisely broadened and his judgment matured. The selections of varieties of rhododendrons, conifers and some other things, being made from the standpoint of English climate would require revision to make them reliable north of Philadelphia.

The Making of a Country Estate. With this elegant volume of landscape pictures and pertinent comment, the author, Henry Wild, makes his formal bow to the American estate owner, present or prospective, as a landscape architect. As is generally known, Mr. Wild has been engaged for the past 18 years in laying out and developing the 2000-acre estate of Mr. E. C. Converse, Conyers Manor in Greenwich, Conn. The publication before us is practically an album of views on that now-famous estate, showing gardens, lakes, woods and vistas, as produced under the skillful direction of the trained gardener. It is handsomely bound and an appropriate souvenir of an undertaking well done as well as a credential of Mr. Wild's abilities for future triumphs.

Polly Anna; the Glad Book—By Eleanor H. Porter. The What Shall I Do Girl—By Isabel Woodman Waitt. Alma's Sophomore Year—By Louise M. Breifenbach. The Career of Doctor Weaver—By Mrs. Henry Backus. The Harbor Master—By Theodore Goodridge Roberts. This is a galaxy of five books recently published by L. C. Page & Co., Boston. As the titles indicate the three first-named are designed to interest girls from 14 to 18 years of age, but readers of more mature age will find them all very pleasant reading. The characters are true to life, the anecdotes sprightly and the tone clean and healthy throughout. For the young woman forced to depend on her own resources the "What Shall I Do Girl" is full of helpful suggestions and encouragement; the "Glad Book" fully justifies its name and Alma's Sophomore Year will delight all with its realistic stories of seminary life. Like all of the fiction issuing from this publishing house, every line of romance is clean, salubrious and untainted by the puerile sentimentalism, which permeates so much of modern novel literature. The Career of Doctor Weaver is unique and captivating. It portrays the responsibilities and problems assailing the young man in the medical profession of today, in the course of a vigorous and engrossing story which is skillfully written and quite out of the usual order. The Harbor Master is a strong portrayal of life on the bleak, treacherous coast of Newfoundland. It is full of tragic mystery, strength and vigorous action, a romance of warm-hearted devotion to friends and duty and one that leaves a lasting impression on the reader. It is one of the best of this young author's efforts. The price of Alma's Sophomore Year

is \$1.50. All the others above mentioned \$1.25 net, \$1.40 postpaid.

OBITUARY.

B. F. Rubel.

The sudden death of Ben. F. Rubel on April 18 was learned with regret by his many friends in the trade. Ben F. Rubel was born in Chicago 46 years ago and has spent practically all his life there and is well known as the president of the Fleischman Floral Co., whose store in the Railway Exchange Building is one of the finest in the city. He also had a large confectionery store on State street. Mr. Rubel leaves a mother, Mrs. Frances Rubel, three brothers and two sisters. The funeral was at Sinai Temple, Sunday, Baron Hirsch officiating, and interment was at Rose Hill.

Flower Market Reports

(Continued from page 651)

with ready sale. Outdoor things like tulips and daffodils not so many. The queer April weather has affected these also, and the usual supplies are not forthcoming as yet.

The last week's **ROCHESTER** business has shown a very marked improvement in both wholesale and retail markets. It is an old saying, "A poor start means a bad end; a good beginning—a grand finish." It was pretty much so in our case. Most florists were very busy on Sunday with funeral work and each day following bringing its own work and more of it. The rather unsettled weather has brought much illness along with it, and consequently many cut as well as potted flowers are needed. The spring days with the warm sunshine, have brought many inquiries for veranda boxes and lawn work, this, of course, reminding the greenhouse men that their busy time is on and will be until the end of June. The market has been brisk, and there has been plenty of all kinds of stock. Sweet peas are especially good, particularly in the bright cerise, which just now is the fashionable shade among the milliners. American Beauties are with us and are of good color. There are plenty of Harrisii lilies, of fair quality, but no callas worth speaking of. Pansies are being used much for table decorations also marguerites. Carnations are very good and there are large quantities. Snapdragons do not sell quite so readily as one might expect, but there is a large demand for jonquils.

The market during **ST. LOUIS** the past week had its ups and downs as to supply and price. In the early part of the week prices on carnations and sweet peas were considerably higher than later on when stock became over plentiful and flowers of all kinds sold very low. At present their is plenty of everything and prices reasonable. A lot of out-door truck is coming in. Wild smilax is hard to obtain but there is plenty of other greens.

carias, Palms, Azaleas, Rhododendrons, etc.

F. E. Conine Nursery Co., Stratford, Conn.—Catalogue of Nursery and Landscape Gardening Material. An illustrated list of good things in shade ornamental and fruit trees. An excellent reference book.

Peter Henderson & Co., New York.—Everything for the Lawn and Lawn Formation and Care. Lawn views paneled in gold make a very attractive cover for this useful publication.

J. Woodward Manning, North Wilmington, Mass.—59th Annual Price List. Hardy shrubs, trees, fruits and flowers are comprehensively listed in this condensed and handy little publication.

The Recognized Standard Insecticide. Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.

\$1.00 per Quart. \$2.50 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water, it does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

SUMMER SCHOOL OF AGRICULTURE.

A bulletin has been issued by the Extension Service of the Massachusetts Agricultural College descriptive of the sixth annual Summer School of Agriculture and Country Life, July 1-29. Extended courses will be offered for the benefit of the many people who wish a general knowledge of theoretical and practical agriculture and who can come to the college conveniently during the summer season. Special attention will also be given to the needs of teachers.

The courses to be offered this summer will include practical agriculture and horticulture, elementary sciences, agricultural education, agricultural economics, domestic economy and household science, organized play and recreation, and a group of courses arranged especially for rural social workers.

Another forward step taken by the Extension Service is shown in the announcement of a summer camp for boys, the purposes of which are to interest boys in agriculture and rural life, to impress on the boy his responsibility as a member of society and to teach him clean, wholesome sports and recreation. The camp will be under military discipline. During the morning instruction will be given in agriculture, hygiene and citizenship. Afternoons will be given over to organized play, recreation, games, tramps through the hills and evening camp fires, all managed by experts.

Amherst is acknowledged to be one of the most delightful towns in New England, noted both for its natural scenic beauties and because it is an educational center. Expenses are very low.

Write for bulletin to Professor W. D. Hurd, Amherst, Mass.

4. What firms carry seeds of finest selected strain, bulbs and roots—gladioli, cannas, dahlias, etc., etc.?
5. The best sources of supply for hardy shrubbery, herbaceous perennials, choice conifers and new introductions in ornamental nursery stock?
6. The merits of the various greenhouse constructions, as to stability, utility and economy in running?

All necessary enlightenment on the foregoing may be quickly found in the advertising pages of HORTICULTURE by consulting the Buyers' Directory and Ready Reference Guide, which in this issue appears on Pages 652, 653, 654, 655.

Get the Habit. HORTICULTURE is the only trade paper which thus fully indexes for the benefit of its readers the offers of its advertisers each week. In case there should be any information sought along these lines which is not found here we shall be glad to supply same on request.

"Get the Habit."

OUR PRICES WILL PROVE THIS.

CHICAGO, ILL.

Looking Price Straight in the Face

When you get a specification estimate on our Pipe Frame House, the first thing you do is to take a look at the price. If that price seems at first glance to be about right—all is satisfactory

If it is some higher than you have been paying for all cypress houses, with heavy wooden plate and other shade-casting, short-lived wooden members, then without any further investigation, you at once jump to the conclusion that L. & B. are "high."

Now, isn't that so?

Let's look at this price question straight in the face. Look at it from all points of view: Suppose you are going to stock a house with carnations—you are pretty careful to compare different varieties, looking into their free blooming qualities, strength and length of stems, and so on; then you select the very best ones your money can buy, because you know that in the end you will get more blooms and more money by making such a selection.

Then why allow yourself to apply any less careful investigating business methods when buying a greenhouse?

Why not be equally as fair with yourself and make just as careful comparisons, point by point, between our construction and others?

If you read carefully over the list of materials we furnish for our Pipe Frame House, and check it up, item for item, in comparison with the specifications for the other build of houses, you will find that in reality you are getting from us not simply the usual Pipe Frame house, but one that is more than half iron. Other estimates you may have are for one thing, while ours is an en-

tirely different proposition. The other prices are a little cheaper at the beginning, but if you will give us half a chance we can show you how our construction most certainly will cost you less in the end.

Things are different now than ten or twenty years ago when men could make good money in heavy, shade-casting houses. These same men find themselves up against the stiffest kind of game, to make satisfactory profits today, in competing against growers without up-to-date, productive, repair-free houses.

Still, on the other hand, if you want an all-cypress house rather than our Pipe Frame or all-

Iron Frame, we can sell you top notch materials as reasonable as anyone—quality of cypress and smoothness of milling taken into comparison. Fact is, there is no greenhouse concern in the country that has as many million feet of air-dried cypress being turned into greenhouse materials each year.

It is exceedingly bad financing to build in a way that you know means constant repairs, and in a few years, makes necessary the complete tearing down and replacing of your houses. Such houses positively cannot produce the highest paying quality and quantity—and such a property if put on the market practically brings nothing.

Building cheaply is a losing game any way you figure it.

Write us.

View looking down one of the alleys in the cypress yards. Millions of feet of cypress, air-drying for greenhouse materials. Not a stick used in our greenhouses that has not been air-drying for two years. When milled, all sappy parts are cut out and burned. Sappy parts are not used in our greenhouses in any way, shape or manner.

COMPETITION

There are two ways to compete in lily bulbs—price and quality. In competing in price we have come to the conclusion there is no profit in it, either for the grower or ourselves. So we are competing in quality. You know that lily bulbs is a difficult article to handle successfully and barring accidents you cannot buy good lily bulbs cheap. At the same time you can get them from us very reasonable—we don't make much per thousand—in fact, a florist wouldn't work on such a small margin that we operate on. Under such circumstances don't you think you should trade with us? We need your orders because we must have the volume to make the small margin pay. We haven't any implements, seeds, greenhouse stock, or chicken feed to sell you—we have chiefly Horseshoe Brand Lily bulbs. They are good bulbs and well worth your consideration. We also carry them in Cold Storage at considerable expense to accommodate you—why not give us your order for lily bulbs? Try it. Send for Catalog.

COLD STORAGE STOCK ON HAND.

LILIUM GIGANTEUM	7-8	\$8.00	per 100
"	7-9	8.50	"

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Carnations

Houses of carnations which were planted late last year will give fair returns up to the end of June if given attention. Give them a top dressing of half loam and half cow manure; or a coat of all manure may be applied. Any other fertilizer you are in the habit of using may be also used. Give all the ventilation now that the weather will permit so as to keep the air pure and dry. Every morning syringe thoroughly, or red spider will be very troublesome; if this pest gets foothold at this time of the year it will be hard to get rid of it. Keep fly and thrips down by timely fumigation; never relax your watchfulness but keep up the fight at all times. See that the young stock has good care until planted out. Give plenty of ventilation, so that the plants will be sufficiently hardened off. Keep them well watered as they should not be allowed to become dry for any length of time.

Dieffenbachias

These plants require plenty of heat and moisture. Now that the warm weather is with us increase the temperature up to 70 degrees during the night with from 10 to 15 degrees more during the day. They cannot be kept too near the glass, if not absolutely touching it, but must be protected from the sun with a thin shade, or the leaves will lose their healthy color. They like a daily syringing overhead through their growing season. Young plants that were propagated early in the year and are in small pots should be shifted, as they will make roots rapidly. A good mixture is fibrous loam three parts, leaf mold and peat one part each, and well rotted cow manure one part. Syringe regularly once or twice a day and give them abundance of water at the roots. A high degree of moisture should be maintained from this out. When the desired size pot is reached they can be kept in good condition by the use of manure-water once a week during the summer.

Forcing Lily of the Valley for June

Cold storage pips are now used exclusively for this purpose. Place them where they can have a brisk bottom heat and keep close and dark until they are half-drawn up when light should be gradually increased. Where you want good foliage give them full light from start to finish; the stems may be shorter but the foliage will fully counterbalance this. After the middle of May lily of the valley can be grown in frames that are built good and close. For the next couple of weeks bottom heat will be necessary, but from that out they will do without it. Place about six inches of sand on the manure and in this plant the pips the same as one would in the frame in the greenhouse. It is a good plan to have the frame partitioned off then one can plant two or more

batches which will be coming on from time to time. It will be comparatively easy to maintain enough of heat in the frame. Keep close until they are well up and then give air so they will not become too leggy. When the bells are well out give shade with plenty of air which will help to keep them longer.

Growing Palms from Seed

To grow palms from seed successfully always make it a point to get fresh seed. It is better to procure the various kinds as they are imported from their different sources and plant from time to time as received. The seed can be sown in pans or flats, but pans are to be preferred as the flats are liable to rot before they are large enough to pot off. Fill the pans with a mixture of equal parts of loam, leaf mold and sand, and provide ample drainage for each pan. The seed should be covered twice their depth and pressed down firm. To help retain the moisture the pans should be covered with moss. All palm seed will germinate better when kept over bottom heat and under closed sashes. The temperature can run anywhere from 70 to 80 degrees. Give just enough of water to keep the compost moist, but never wet or soggy. From now on an ideal place for palm seed is a mild hot-bed where they will germinate good. Do not become discouraged if they do not appear in four or six weeks, as the germinating period varies anywhere from four weeks to six months. Pot off at the first signs of growth.

Nephrolepis

It is now time again to turn our thoughts to nephrolepis, bearing in mind their importance during the winter and spring sales. A side bench will make an ideal place for these ferns to grow in. When planting allow them at least 15 inches of space. Give the soil a good soaking after the ferns are planted out and when they need water again just water around the plants until they make roots through the soil after which water all over the bench. On all bright days they should have gentle sprays twice a day and a frequent damping down of the walks. They will require some shading, but not too heavy and keep plenty of ventilation.

Sowing Annuals

Now is the time to make outdoor sowings of annuals such as sweet alyssum, calendula, calliopsis, candytuft, cosmos, eschscholtzia, marigold, mignonette, nasturtiums, poppy, salpiglossis, scabiosa, zinnias, etc. They can be sown in neat shallow drills, with some fine soil to cover them and beat down a little with the hoe. Where it is possible keep them moist until they are above the ground. When large enough they can be thinned out to the proper distance apart.

Mr. Farrell's next notes will be on the following: Care of Old Azaleas; Gladioli; Growing Ferns During Summer; Lyceum; Planting Out Carnations; Wintering Flowering Marguerites.

OUTDOOR VEGETABLES AND FRUIT

CONDUCTED BY

Edwin Jenkins

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Jenkins. Such communications should invariably be addressed to the office of HORTICULTURE.

Onions

Onions should be sown now as soon as the ground can be got in nice friable condition for seed sowing. A prime requisite for a good bed of onions is a well prepared, finely raked bed, and fortunately this crop makes no objection to being planted on the same ground from year to year; in fact it seems to thrive the better for it. Onions are gross feeders and there will be a vast difference in the weight of crops lifted from a comparatively poor soil and those from a soil which has been well enriched. However, like all good things, manuring may be overdone, especially if the manure be very rank. When you see a crop fail to make bulbs and running all to neck you can be sure that the feeding has been overdone. Soot, salt and lime are three things that onions seem to revel in when the ground is lightly dusted over with these at frequent intervals. In sowing onions do not cover the seed heavily, nor tamp the soil if it is the least bit sticky, but if the soil is in just the right condition for seed-sowing, neither too wet nor too dry, then a light tamping with the back of a rake is advisable. Sow the seed moderately thick and space the rows about a foot apart.

Onion Grub or Maggot

This pest is a great scourge if it once obtains a foothold in the garden. The parent fly is like a small house fly and it lays its eggs on the young seedlings. These eggs after hatching out in the grub form eat their way to the center of the plant and the plant turns yellow and dies. There appears to be no very successful means known of preventing the ravages of this pest except sowing the seed in flats or frames and transplanting the young plants. For some reason or another they never seem to bother a transplanted onion. Treating infected soil during the fall after the crop has been removed may be useful and such things as formalin, gasoline, or kerosene would undoubtedly kill off any of the pupae which came within its reach. However, as long as transplanting is such a sure and simple remedy it is hardly worth bothering with other things except where onions are grown on a large scale for market.

Exhibition Onions

These should now be in cold frames or a very cool airy greenhouse, and should be gradually hardened off preparatory to planting outside. They should be but rarely syringed, as that tends to make them too soft, but the

greatest care must be exercised in the watering, guarding especially against the plants getting dry. Treat the leeks just the same as the onions.

Sowing Peas for Succession

It is time now to get in some more peas and sowings of several kinds at once may be made if such varieties are chosen as will naturally succeed each other. If you dig out trenches of one to two feet deep for the peas and put manure in the bottom you will be able to harvest a much better crop of better peas than by sowing in the ordinary manner. But be sure to use only well-rotted manure for if it is light and full of undecayed straw more harm than good is likely to come from its use as it will lie in the trench in a semi-dry state cutting off the rise of water from below.

Nitro-Bacteria Cultures for Peas

The use of nitro-bacterine for legumes generally is coming more and more into favor with the most progressive growers and good results may be confidently expected from its use on many soils, especially the lighter sandy soils. The Cornell Agricultural College at Ithaca, N. Y., will send you some for the cost of postage with full directions for its use.

Cauliflower, Cabbage and Brussels Sprouts

These should be planted out now and the richest ground you have will be none too rich. Give a good watering to each plant as soon as planted, and mulch them with a mixture of half-rotted manure and leaves. In planting out any of these crops, either choose a cloudy day or else do the planting as late as possible in the afternoon.

Hardening

Globe artichokes ought to be exposed to full air now, day and night, unless it looks like freezing as in the gradual hardening of crops which are to be moved from the greenhouse or frames to outdoor planting lies a great deal of the after success of the plants and this matter will pay for careful thought and study.

Greenfly and Spider

Make sure that the crops above referred to are thoroughly clean as they will be much easier cleaned now of any insect pests than after being planted out.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Sulphur and Its Uses

At times during this season of the year a little mildew on the plants cannot be avoided, and the first thing we turn to is the old fungicide, sulphur. Now sulphur is a very good fungicide, and is the main ingredient in many fungicide preparations. However it must be used with care, or its application will do much more harm than good. Where steam is used for heating the simplest way is to apply a little here and there to the steam pipes. The older houses with the three-quarter-span and twenty feet wide will take only one pipe, with the sulphur spread on it or rather painted on every ten or twelve feet. It is best to apply the sulphur direct to the hot pipe although too hot a pipe is not wanted. About eight pounds of steam is plenty when the sulphur is applied. Many growers will mix a little lime into the sulphur, claiming it is much safer to use. This may be well when the sulphur is blown on the plants with a pair of bellows, as it lessens the danger of burning the leaves, especially when it is or has to be applied by inexperienced help. The lime in the sulphur helps to distribute it so that only a few particles can settle to a leaf, and more is not wanted.

Mulching

Houses that are to remain for quite some time to come can still be mulched and this will help wonderfully in giving extra vigor to the plants also help to keep up the quality of the cut blooms. Do not use any fresh manure for this purpose as it will be likely to burn the foliage. When no other is to be had we would rather use soil and bonemeal for mulch and then give the plants plenty of liquid to help keep them in good shape. If it has to be applied, then apply it only to one bench at a time taking a good many days to finish the house. Give plenty of air all the time and do not let the houses run too warm during the day.

Manure for the Fall Mulching

Right now is the time to get the manure pile ready and have it in prime shape when it is wanted in the fall. It is best to use manure that is a year old and has been turned over several times, to bring it to a very fine condition and make it available to the plants. A least bit of soil can be added, preferably sod, as sod absorbs a large amount of the liquids that would otherwise go to waste. Many growers will treat the manure pile with a "it-is-a-nuisance," but when it comes to the facts the manure well prepared is one of the secrets of growing good roses, and we think a good manure pile is a great asset when it comes to rose growing.

Tying

During these busy days of spring, we are very likely to let things slip a little, but unless this cannot be avoided it is best to try to keep things in shape. Among the first that shows neglect are American Beauties. These feel it more than any other roses, and the loss is considerable more than it would be with any other variety. It is hard to keep untied plants free from insects; besides the poor stems and foliage of the twisted shoots of the plants are a great detriment.

Disbudding

This, too, is bound to be neglected a bit, and, if so, this will greatly prey upon the vitality of the plants and bring nothing in return but loss and that is all. There are too many other good flowers in the market for people to bother with poor roses. Try to keep up the good quality for each box and your roses will be sought, and never have to go begging for a buyer.

We wish to correct a mistake in our notes of last week in which we referred to S. S. Pennock's paper on "The Faults of the Grower" as having been presented at Pittsburgh. We should have said Lancaster, Pa.

A valuable contribution In the rhododendron tabulations which appear in this issue of HORTICULTURE Mr. Curtis has rendered a signal service to the gardening profession and made a useful contribution to the advancement of garden art.

Many years of observation and recording are required to make such a compilation really valuable and this being taken into account together with the fact that these records have been gleaned from three of the most extensive and notable hardy rhododendron collections in America gives a value to this report which will be at once recognized and cannot be overestimated. We think it presents more definite and reliable information concerning the dependable varieties of this noblest of all garden shrubs than has hitherto been published anywhere. The theme is, however, an almost inexhaustible one and we shall be glad to give space to any of our readers who may have something instructive to impart on this most interesting subject.

The winning combination As we jubilate over the gratifying financial outcome of the recent big flower show in New York it should be ever kept in mind that had it not been for the spirit of enterprise shown by the exhibitors in the trade section, the projectors and guarantors of the affair might have had a very different proposition on their hands and we fear we should have had a much less cheering story to tell at the close. The trade exhibitors at the show filled about the same place that the advertisers do in HORTICULTURE—they supply a good share of the wherewithal without which its existence would be mighty precarious, to say the least. We are glad, therefore, to know that the trade exhibitors succeeded in doing such a thriving trade in New York as most of them report they did. While there may be minor problems yet to be straightened out, still as a general proposition the fusion of competitive flower show and trade exhibit as carried into effect at the Boston and New York National Shows appear to have been a winning combination.

Horticulture commended No one will deny that a little sincere commendation is welcomed by the average mortal. Being constituted like all others in this respect we must confess to a touch of pleasant satisfaction over the generous compliments on HORTICULTURE's editorial policy which have been coming to this paper from time to time. One correspondent in the middle west, in the goodness of his heart is kind enough to say—"By your vigorous handling of the live topics of the day you have really established a new standard of horticultural trade journalism. I get all the trade papers but HORTICULTURE I invariably read first." Another gentleman, one of New York's most alert business men, writes, "It has often occurred to us that your editorials make your paper a particularly valuable trade journal. To us it seems almost a reflection on the trade that those trade papers which receive the most from the florists in advertisements give so little to them in the way of editorial advice in exchange." Naturally, we are proud to receive such compliments, but the greater gratification comes in the assurance they give that HORTICULTURE has been able to work out a distinctive place for itself in the esteem of the trade it aims to serve. Indeed, if it could do nothing better than merely to imitate existing trade periodicals this paper was no more needed than a "fifth wheel to a coach." We are deeply grateful to our friends for their encouraging words.

HISTORY OF GREENHOUSE ESTABLISHMENTS IN MINNEAPOLIS.

Floriculture in Minneapolis is nearly as old as the city itself. In 1857, Dr. Alfred E. Ames, uncle of the famous Dr. A. A. Ames, instructed his brother, then a consul in Hamburg, Germany, to send him a gardener. Wm. Buckendorf was engaged and came to Minneapolis. He, therefore, was the first florist. A year later they built two neat greenhouses on Eighth avenue (South), between Fourth and Fifth streets. For several years these greenhouses were kept for private use only, when Mr. Buckendorf decided to operate them for commercial purposes. In 1886, Mr. Buckendorf built a greenhouse on his own property, Fourth street and Seventh avenue (South). This ground was sold for building purposes and in 1890 Mr. Buckendorf built another house on Fourth avenue (South) and Seventeenth street, which was discontinued in 1900. In 1862 Wyman Elliot having a large nursery on Park avenue, built two greenhouses where Elliot Park is today.

In 1865 R. J. Mendenhall decided to have a few small greenhouses for his private use. He engaged Henry Buckendorf, a brother of William Buckendorf. They began in a small way and kept enlarging until the plant was one of the foremost in the country. This was located on Nicollet avenue and Eighteenth street (South). First avenue was not opened up at that time. After this plant covered a city block and some space across the street, another one was started at Twenty-eighth avenue (South) and Thirty-eighth street. In 1903 Mr. Mendenhall sold out to L. S. Donaldson, and one year later the greenhouses were torn down.

About the same year Mr. Mendenhall started, George Brackett built a greenhouse where the City Hospital is now located. This was operated a few years by Mr. Brackett, with Mr. Boose as florist, and later Mr. Kilvington. In 1883, Mr. Kilvington built a greenhouse near Lakewood Cemetery on Hennepin and Thirty-sixth street (South), which has been dismantled for many years. In 1880, Mr. White started the establishment on Twenty-second avenue and Garfield street (N. E.), which now belongs to O. H. Carlson. Mr. White had a nursery, a dairy, and one small greenhouse. This was purchased in 1905 by O. H. Carlson and rebuilt into a modern plant.

In 1880, C. A. Smith erected a plant at 3501 Portland avenue, which he operated until 1899, when it was bought by L. S. Donaldson. Mr. Donaldson has been running this in connection with his department store. W. D. Desmond is manager at present.

In 1886, Wesling & Hartman, then two young men, started what is now Lakewood Cemetery Greenhouse on Hennepin and Thirty-sixth street. Two years later they separated, Mr. Hartman remaining on the old place, and Mr. Wesling building in his present location, 3538 Hennepin avenue. The same year Fred Bush began the erection of his present handsome plant on Lyndale and Fiftieth street (South), then far out in the country. In 1888, John Vasatka started on Chi-

cago avenue and Thirty-fourth street (South), and he is still doing business at the same stand.

In 1887, Henry Bartsch opened up on Twenty-fourth street and Twenty-ninth avenue (South). Five years later he moved to Sixth avenue (North) and Irving, where he stayed until he discontinued business a few years ago. In 1888, Mr. E. Nagel commenced the greenhouse now owned by his son, T. Nagel, on 1118 West Lake street.

About the same time Henry Bucken-

was sold in 1893 to R. J. Mendenhall. Mr. Gust Malmquist directed the building of Senator Washburn's greenhouse located on Stevens avenue and Twenty-fourth street, and the last few years he has been running it on his own account. The Sunnyside greenhouse at 817 Fifth avenue (Southeast) was built by Miss Hilliker and it is now owned and operated by her husband, Walter Pier.

In 1892, R. Will laid the foundation of the extensive plant of Will Bros. Company. In 1898 the Drake greenhouse on Fourth avenue (South) and Lake street was built. In 1900, John Munson commenced the plant of the Minneapolis Floral Company, on Thirty-sixth street and Calhoun Boulevard. This has become the leader in size. In 1901, Sauer & Rosacker built the plant of the East Side Floral Company on 1621 Adam street (Northeast). The next year Hans Rosacker started his own plant on Nineteenth avenue (Northeast) and Stinson Boulevard. In 1904, Robert Stern built a greenhouse on Thirty-eighth avenue (North) and Girard street. The same year Mr. Drake erected a building across the street. Both plants are now operated by Mr. Stern. Two years later the following greenhouses were erected: Thos. Hall on Lyndale avenue and Thirty-sixth street (South); Julius Rieck on 1318 Washington avenue (North), and Hiawatha Gardens Company on 3406 University avenue (Southeast). In 1911 the latter company built another plant on Lyndale avenue and Fifty-seventh street (South). The same year Hopper & Magnusen built the plant of the Central Floral Company on Central avenue and Twenty-sixth avenue (Northeast). In the year of 1907 the Park Board started to build a greenhouse ranch at the Lyndale Farmstead, Thirty-eighth street and Bryant avenue (South). Additions have been made since then. The plant now consists of five growing houses and the total amount of glass is 12,000 square feet. This completes the list, but material is already on the place of John Vasatka, Chicago avenue and Forty-third street, for a new plant.

Up until 1900 every grower was his own retailer and we had only two retailers, namely, Miss H. B. Whitted, who began in 1894 and Swanson in 1898. We now have a large number of stores. Thos. Lynes opened up in 1901, and R. Latham in 1903. In 1906, Miss H. B. Whitted moved to Fifth street and opened another store at Tenth and Nicollet streets in 1910. In 1912 she opened a store in the Radisson Hotel Building. O. E. Amundson began business in 1904 and Carl Lindscoog in 1907. In 1912, W. F. Holmes and W. H. Bofferding went into business. In addition we have candy and grocery stores which handle flowers as a side-line, too numerous to mention.

In 1900, Brant & Noe of Chicago opened up a commission house in Minneapolis, with Cal. Rice in charge. After a year's experience this was discontinued as not being profitable. After this, Cal. Rice and Arthur Rice continued the business under the name of Rice Bros. From a very small beginning, they now have an establishment which is equal to the best.

ADVERTISING TALKS

BY

Ralph M. Ward

No. 8

For a long-time advertising investment of permanent value, the writer believes that the American school children should be immediately looked after. Those in the schools now will be your prospective customers before you realize it. What are you doing to educate them regarding flowers? You can bring more influence on them right now than you will ever be able to after they leave school, and for a comparatively small amount of money. Their minds are in a most receptive state—they will never forget what is now being taught them, especially what is made interesting to them. If the florists of a town or city would co-operate in supplying the schools with flowers periodically, what a benefit it would be to them in the long run! Suppose a school contained 500 pupils and owing to a glut of flowers Mr. Gravel-grubber loosened up and gave each child a good flower. What would 500 flowers be as compared with 500 tongues wagging all over town as a result? It would be the least expensive kind of advertising, if not overdone. Children are the best carriers of good news among humans. Their influence upon their parents is greatly underestimated. If the National Society would establish and support a Publicity Association to educate the school children florally, it would be doing something really worth while for the benefit of everyone in the florist business as well as mankind in general. Let us hope there will be some spark soon that will kindle the fire that will burn results into the minds of young Americans. It will take some money, but in proportion to the benefits which are bound to follow, the amount is infinitesimal.

dorf started in business on Aldrich avenue (North) and Western avenue. Mr. Buckendorf stayed there until a large factory building was erected which obscured practically all the light, so he sold out to the factory and retired.

In 1889, what is now called Merriam Park Greenhouse was started. Later it was leased to Kaiser & Weland. In 1890 the Washburn, Desmond and Sunnyside greenhouses were built. Mr. Desmond's house on Portland and Twenty-fourth streets

RHODODENDRON PLANTING TABLES

Soon the rhododendrons will be in bloom. Although the records here given are not complete they are published at this time in order to make a beginning and to call attention to the subject. We need more definite information on the time of bloom, size of plant and range of successful growth of hardy, hybrid rhododendrons.

For example, Charles Dickens and Everestianum are both old reliable varieties and both early bloomers but their colors do not harmonize and they should not be planted together. If they must be planted near each other they should be separated by white varieties which bloom at the same time.

Through the courtesy of Mr. Hatfield of Wellesley and Mr. Dunbar of Rochester their observations have been combined in the foregoing tables with our measurements and records of thirty-four Arboretum varieties, all of which are established plants twenty years old or over. It is from just such collections as these that this kind of information can best be gathered. In these tables the letter A preceding the name of a variety means that this variety is recorded from the Arnold Arboretum at Boston, Mass. In the same manner H refers to Hunnewell Gardens at Wellesley, Mass., and R to Highland Park, Rochester, N. Y.

It will be noticed that the three records do not always agree but this makes them all the more worth while. Another season will give a further check and will lay the emphasis where it rightly belongs, namely, on the conditions under which the plants are grown. For example the majority of the Arboretum plants recorded in these

tables all appear to run smaller in size than plants of similar varieties in Hunnewell Gardens or at Rochester. If this is so, what is the reason?

Again, such varieties as F. L. Ames, Lady Grey Edgerton, Mrs. H. S. Hunnewell, Mrs. Harry Ingersoll and Sef-ton, while perfectly hardy at Rochester and growing both in the Hunnewell Gardens and at the Arboretum can not be recommended for general planting in New England because local conditions enter so largely into the success or failure of rhododendron plantations.

Among these necessary conditions should be mentioned an abundance of water with also good drainage. On this point it is interesting to note that while Mr. Gomer Waterer lays special emphasis on good drainage Mr. Hatfield writes that some rhododendrons are doing well in a swamp near Wellesley. The soil must be in fine condition with plenty of leaf mould or well-rotted manure but no traces of lime. There must also be no indications of lime in the water used for watering the plantations in summer.

The general location should face the north or northwest with a wind-break if possible and always some shelter from the early morning sun. Many plants prove to be tender because they have to take the early morning sun. With the beds properly mulched the roots seldom become frozen in the winter but the leaves and buds do. In the early spring with hard frosts at night and warm sunshine during the day the alternate rapid thawing and freezing of the foliage of unsheltered plants is what does the harm. The best exposure is towards the northwest with shade furnished by evergreens or a bordering woodland early in the morning.

In addition to the above the matter of stock in grafted plants and of parentage in seedlings is of the utmost importance. Formerly we accepted the tender ponticum stock if the graft were made low and the plants set deep so as to completely bury the stock. But now this should no longer be tolerated. Ponticum stock is short-lived at the most and should not be used for New England plantations. Plants worked on the hardy native Catawbiense stocks are much more satisfactory, and so are those which have been layered and started on their own roots. Maximum stock does not take the graft well and is little used for this purpose. In seedlings those which are crosses between the best of our hardy hybrids and either Catawbiense or Maximum as one parent or which are crosses between Catawbiense and Maximum themselves are the most hopeful sources for successful American types. This does not always follow, however, as is shown by Rh. Wellesianum, a cross between Catawbiense and Maximum, which is still not reliably hardy. But we already have some standard sorts from this kind of parentage, such as album elegans, album grandiflorum and delicatissimum and it is gratifying to know that American hybridizers are unanimous in believing that ultimate success will come from just such hardy, native crosses.

In conclusion let me urge other readers of HORTICULTURE to add any scrap of information available which will help to fill out and complete these rhododendron tables. In publishing such incomplete notes it is the writer's desire simply to suggest more observation on these things which are so essential to good landscape planting.

R. W. CURTIS.

WANTED—A TARIFF FREE FROM AMBIGUITY.

McHutchison & Co. are sending out to the nursery trade a very important letter of which the following is a copy:

Dear Sir:—The Underwood Tariff Bill, now before Congress, embodies exactly the same errors in classification as the Payne-Aldrich Law which took years to rectify and is still open to much dispute.

There cannot be any good reason why the new Tariff Bill should go through filled with errors and ambiguities which serve to enrich lawyers, puzzle importers and allow openings for fraudulent entries. The wording should be clear and specific and not an incentive to fraud and litigation as it at present reads.

Sections 219 and 220, Schedule G, covers horticultural products, such as bulbs, plants and trees. On such items accuracy of classification and definition is of vastly more importance than the rate of duty, because the duty depends altogether upon the definition. Unless some changes are made, we will have the same litigation, uncertainty and fraud over again. Here are some of the ambiguities:

Section 219 rates "Orchids, Palms, Azaleas and all other decorative or greenhouse plants 25 per cent ad valorem." Section 220 rates "All fruit and ornamental trees, deciduous and evergreen shrubs and vines commonly known as nursery or greenhouse stock, 15 per cent ad valorem." This makes the same items 15 per cent and 25 per cent ad valorem, "Greenhouse plants" and "Greenhouse stock" being the same.

The word "Azaleas" is too vague; proba-

bly Azalea Indica is meant. All other varieties of Azaleas, such as Amoena, Hino-degeri, etc., are grown outside in nurseries, and are nursery stock—not greenhouse plants. It should be clearly stated which azaleas are 15 per cent and which 25 per cent.

Section 220 rates "Myrobolan plum seedlings \$1.00 per 1000." Section 561 rates "Myrobolans" free of duty. It should be specifically stated whether Section 561 refers to Myrobolan seedlings, seeds or fruits.

Section 220 rates "Evergreen shrubs and vines and all trees, shrubs and vines commonly known as nursery or greenhouse stock, 15 per cent ad valorem." Section 602 rates "Evergreen Seedlings" free, but places them under the classification of "Seeds"—same as last tariff. This should be made more definite, an evergreen seedling being defined as an evergreen four years old or less, grown from seed.

Section 220 rates "Seedlings of Briar Rose, three years old or less, \$1.00 per 1000"; also rose plants, budded, grafted or on own roots, 4c. each." The principal "Briar Rose" in commerce is Rosa rugosa, a shrub, grown from seed and sold as low as \$4.00 per 1000. The tariff should specifically include Rosa rugosa as a briar rose to avoid the duty being assessed as roses at 4c. each. While there are many Treasury decisions on file to prove that Rosa rugosa is a briar rose—not a rose—these decisions do not hold on new tariffs, which means that unless the wording is corrected, we will have the same delay, expense and litigation over again.

This might seem a small matter to you, so we give the following illustration. When a shipment of, say, 20,000 Rosa rugosa seedlings arrive, the value being \$4.00 per 1000 or a total of \$80.00, duty is paid as

briar roses at \$1.00 per 1000 or a total of \$20.00. About three to six months after, the Government makes a peremptory demand for \$780.00 more duty because some employe thinks Rosa rugosa is a rose. The amount must be paid at once, so the importer can appeal, then in from six to ten months the case comes to trial. If he has witnesses and evidence enough he might win, and if lucky he will get part of this amount back in from two to four years, the lawyer getting half; so you can see why the wording should be clear and specific.

Section 219 rates "Hyacinths" as "clumps" instead of bulbs. The same mistake was made in last tariff and took years of time and much unnecessary expense to rectify.

Section 219 rates "Seeds of all kinds, not specially provided for in this Section, 15 per cent ad valorem." This should read 10c. per lb., as on seeds subject to fluctuation in value, a specific duty is always to be preferred to an ad valorem rate with all its attendant injustice and disputes.

Mr. Underwood writes us that the matter is now beyond the jurisdiction of the Ways and Means Committee and is now before Congress, so we request that you at once write your Congressman and Senator, asking them to insist upon these Sections being corrected before they give their assent to the Bill.

You will probably not agree with the proposed duty on all items: neither do we; but on the whole the Bill is fair and equitable. Don't suggest changes of duty or you will cloud the main issue—that of having the tariff made understandable. Write your Congressman and Senator today.

Respectfully yours,

McHUTCHISON & CO.

CLUBS AND SOCIETIES

NURSERYMEN'S CONVENTION DATE.

Allow us to correct a seeming error which has crept into the eastern journals regarding the date of the opening of the joint convention of the American and Pacific Coast Associations of Nurserymen.

This Convention will open at ten o'clock on the morning of June 17th in the Multnomah Hotel, Portland.

In several eastern dispatches which have recently come before us, it has been noticed that the dates have been given as the 18, 19 and 20th, when in fact the correct dates are 17, 18, 19 and 20th.

All nurserymen planning to attend this convention should reach Portland not later than the morning of the 18th and if possible, should be here earlier. The great Rose Carnival takes place in Portland during the week just previous. Nurserymen should make their plans to see the greatest display of roses that can be seen anywhere in America.

The Portland Floral Society have agreed to furnish decorations and make a nice exhibit. This is something new in connection with the annual meetings of the nurserymen's convention. In the past the exhibits have consisted principally of a few lithographs, wooden labels and catalogues. This year they are trying to make a feature of the exhibits, and know that the decorations at least will be done up right, as the Portland Floral Society has such a reputation. In addition to this, the nurserymen of California have agreed to bring up exhibits of semi-tropical plants, fruits, nuts, dried fruits, etc., and the nurserymen in the north will make exhibits of fruits.

Frank W. Power is chairman of Exhibits Committee, and M. McDonald is chairman of Executive Committee.

AMERICAN GLADIOLUS SOCIETY.

Preliminary subscriptions to the prize schedule of the American Gladiolus Society's Exhibition at Minneapolis, August, 1913:

C. Betscher, Canal Dover, O. —\$10 for best display of 50 spikes Gladiolus Primulines Hybrids, stems 18 inches from first bloom, blooms over 4, open form; \$5 for best new seedling, 3 spikes, variety must be ready for market within 3 years, plant must be 4 1/4 ft. high, blooms 5 in. wide, open form, clear color.

B. Hammond Tracy, Wenham, Mass. —\$5 in gold for best vase each of 25 spikes Dawn, Maize and Mrs. Jas. Lancashire.

Arthur Cowee, Berlin, N. Y. —\$25 for best vase of 25 spikes of War, by an amateur; \$10 for best vase of 25 spikes of Peace, by an amateur.

H. W. Koerner, Milwaukee, Wis. —\$10 for best vase of 25 spikes Early Bird, open class; \$5 for best vase of 12 spikes Early Bird, amateur class.

Vaughan's Seed Store, Chicago and New York —Silver medals for best vase each of Chicago White, Mrs. Francis King and Princess; \$10 for best vase of Rainbow Mixture.

E. E. Stewart, Brooklyn, Mich. —\$5 for best vase each of 25 Golden Queen, Michigan, Lucille and Purty.

Henry F. Mitchell Co., Philadelphia, Pa. —Mitchell's Silver Medal for best vase of six spikes of white; Mitchell's Bronze Medal for best vase of six spikes of yellow.

Peter Henderson & Co., New York, N. Y.

—\$10 for best 12 varieties not now on the market, 3 spikes each.

W. Atlee Burpee & Co., Philadelphia, Pa. —\$10 for best collection 10 varieties, 6 spikes each.

M. Crawford, Cuyahoga Falls, Ohio —\$5 for best 12 spikes any white variety.

Chamberlain & Gage, So. Natick, Mass. —\$5, second prize, best yellow, 6 spikes; \$5, second prize, best white, 6 spikes.

L. MERTON GAGE, Cor. Sec'y.

CLUB AND SOCIETY NOTES.

The St. Louis Florist Club will hold its regular monthly meeting on Thursday, May 8th, in Odd Fellows' Hall.

The American Institute of New York has removed from 19-21 West 44th street to 322-324 West 23rd street, New York City.

John Young, secretary of the S. A. F., is in Minneapolis this week on official duties connected with convention preparations.

At the next meeting of the New Haven County Horticultural Society, May 14, John Gerard, of New Britain, Ct., will lecture on pansy culture.

The Engelmann Botanical Club meets Saturday, May 10th, at Shaw's Garden, St. Louis, at 3 P. M., where Mr. Thompson and Mr. Schiller will read interesting papers.

The St. Louis Retail Florists' Association met at Washington Hotel on Monday night, April 21st. The meeting was poorly attended and it was decided not to hold any meeting during the summer months.

The Kirkwood (Mo.) florists held another meeting last Thursday night at the Eleven-Mile House. Officers elected were: Henry F. Vennemann, president; F. W. Ude, Jr., vice-president; Albert Schedegger, secretary; W. J. Pilcher, treasurer. Messrs. Gross, Pilcher, Ude, Jr., and Winter were constituted a committee to draw up by-laws and present same at the next meeting. Quite a discussion came up as to the name of the club and on vote it was decided to call it St. Louis County Plant and Flower Growers. They will meet once a month at the same hall.

Secretary John Young of the New York Florists' Club is sending out copies of the following letter to all who exhibited in the trade section of the International Flower Show:

Gentlemen—One of the principal reasons for holding the Third National Flower Show in New York, was to find out if the public would support a flower show if such were given on a large scale, and if same could be made a financial success.

The recent show was a success in every way; was liberally supported by the public and received wide publicity in the daily press. Very favorable reports have been received from the exhibitors in the trade section.

It is the wish of the local committee to present at the next meeting of the New York Florists' Club, a report embracing the opinions and suggestions of the exhibitors as to the advisability of holding a Spring Show in 1914. The exhibitors in the trade section were largely responsible for the financial success of the recent exhibition, and the committee is especially anxious to have their views on the subject.

I would therefore ask you: Were you

satisfied with the results obtained at the recent show? Are you in favor of holding a show in 1914 under the auspices of the New York Florists' Club or all local horticultural societies which may desire to co-operate? Would you take space in the trade section if it were decided to hold a Spring Show in 1914?

A prompt reply with any suggestions will be greatly appreciated by,

Yours very truly,

JOHN YOUNG, Secretary.

DURING RECESS.

Gardeners' and Florists' Club of Baltimore.

Members of the Gardeners' and Florists' Club were entertained at last regular meeting by G. O. Brown of Baltimore with a stereopticon exhibit of pictures made from negatives made by him. The pictures showed many leading villas and lawns of Maryland, and scenes in Charleston, S. C., and Savannah, Ga., New Orleans, California, Salt Lake, etc. It was Ladies' Night and the attendance was large. Refreshments followed the pictures, and the hall was cleared for dancing, which continued till past midnight.

More than 300 were present at Junior Pioneer Hall at the annual dance of the Minnesota Florists' Association, April 17. It is customary for the association to alternate its annual dances between Minneapolis and St. Paul. This year there have been balls in both cities.

The Rochester Florists' Association held its fourth annual banquet at the Hotel Rochester, and about one hundred members and their wives attended. The decorations consisted of pink carnations. W. T. Logan was toastmaster, and called upon the following for addresses: President Dunbar, who spoke on "The Horticultural Horizon;" A. E. Crockett, "The Rochester Flower Show;" W. H. Dildine, "The Successful Florist of the Future;" F. B. Messing; R. G. Salter, "Reminiscences," and H. P. Neun.

The Entertainment Committee was composed of F. W. Vick, G. B. Hart, C. B. Ogston, J. M. Keller and T. R. Schlegel. The association was organized in January, 1908, and now has a membership of 161 members. The officers are: President, John Dunbar; vice-president, George Arnold; secretary, H. B. Stringer; treasurer, William L. Keller.

Baltimore, Md.—The freeze on Sunday night, the 20th, almost completely destroyed all prospects for a strawberry crop in the berry-growing section of the State. Peas, in Anne Arundel County in many fields were also ruined. The peach prospects in the western part of the State, it is estimated, also were cut 50 per cent. The school contests for window box and gardens promises to be a great feature this season. Many entries are already made. Prizes up to \$10 are offered. Window boxes were very prominent in residences last season, and the delegates to the Democratic Convention were pleasantly impressed.

"Get them at Dreer's"

ALL SEASONABLE PLANTS, SEEDS, BULBS AND SUNDRIES

HARDY PERENNIALS. The most complete collection of varieties and the largest stock in the country. Our Perennial plants have a national reputation, we spare no expense to have them in the best possible shape for the planter. Such varieties that move better when pot grown are prepared in this shape; this does not mean little seedlings, but in the majority of cases the plants were field grown, were dug and potted during the fall and winter months and are of just the right size to give immediate results; they are not to be compared with so called field clumps. Try them and be convinced. See Our Current Wholesale List for Varieties and Prices.

ROSES FOR OUTDOOR PLANTING TO GIVE IMMEDIATE RESULTS. We have three hundred thousand 5 and 6 inch pots, the usual Dreer stock and the style of plants your retail customers are looking for. These are all two year field grown plants which have been potted during the winter months and which were stored in cold houses and frames and which are now in prime condition for out-door planting. The collection is the most up-to-date, including many new varieties not offered by anyone in the trade.

Early-flowering Hardy Phlox.

New Hybrid-Tea Rose George Dickson.

HYBRID TEAS, HYBRID PERPETUALS, TEA AND EVERBLOOMING, RAMBLERS, BABY RAMBLERS, MOSS ROSES, HYBRID SWEET BRIARS, AUSTRIAN BRIARS, WICHURIANA, ETC., ETC. See Our Current Wholesale List for List of Varieties and Prices.

AQUATIC PLANTS—WATER LILIES, NELUMBIUMS, VICTORIAS. Tender and Hardy Aquatics have been a special feature with us for nearly a quarter of a century. Over eight acres of artificial ponds are devoted to their culture. If we can assist you in making plans, or selecting varieties, the services of our expert are at your disposal for the asking.

OUR CURRENT WHOLESALE LIST also describes the following, all of which are handled as Specialties:

DECORATIVE PLANTS, PALMS, FERNS, PANDANUS, BAY TREES, BOXWOODS, DRACAENAS, etc., etc.

HARDY SHRUBS, HARDY VINES, HARDY CLIMBERS, RHODODENDRONS, AZALEAS, etc.

BULBS, DAHLIAS, TUBEROUS ROOTED BEGONIAS, GLADIOLUS, GLOXINIAS, FANCY LEAVED CALADIUMS, CANNAS, etc., etc.

HENRY A. DREER, INC.,

714 Chestnut Street

PHILADELPHIA, PA.

Personal.

Mrs. Mulford of Lebanon, Ohio, was in Cincinnati last Sunday.

Frank McMahon of Seabright was married on Wednesday, April 30.

Henry Weston, of Hempstead, N. Y., is still quite ill, following an operation for appendicitis.

J. P. Cleary, formerly with the Fruit Auction Co., has taken a position with MacNiff Horticultural Co., New York.

Wm. Allen, a former salesman for P. J. Smith, 49 West 28th street, New York City, and Helen Weeks, were married at Little Neck, L. I., on Wednesday, April 16th.

Fred Lautenschlager, Kroeschell Brothers' hustling salesman, has returned to Chicago after a very successful eastern trip, having taken orders for boilers to heat 199,600 square feet of glass.

J. A. Weber, for the last 12 years in the employ of James J. Goodwin and Senator Walter L. Goodwin, Hartford, Conn., and for the last few years having entire charge of Senator Goodwin's greenhouses and spacious grounds, has accepted a lucrative position in Excelsior, Minn., a few miles outside of Minneapolis, where he will have charge of an estate of over 200 acres belonging to E. C. Goodrich, a prominent railroad official. Mr. Weber came to this country from Switzerland 23 years ago, and worked on the estate of George S. Morgan of Lenox, Mass., before coming to Hartford. While in Lenox Mr. Weber married, and has two daughters and one son, aged 13, 11 and eight years.

Mr. Weber has been much interested in the Connecticut Horticultural Society, serving as its vice-president, member of the schedule committee and executive board, and has had charge of many of the society's exhibits. For the past two years he has had charge of the horticultural department of the Connecticut State Fair Association, and received high praise for the able manner in which the exhibits have been arranged.

His right thigh fractured in a fall at his home at 311 State street, Flushing, N. Y., Jean R. Trumpy, 83 years old, formerly a horticulturist of national reputation, was removed to the Flushing Hospital on April 27 in a serious condition. Owing to his advanced age Mr. Trumpy is extremely feeble. Thursday, April 23, he was stepping into the bathtub when he slipped and fell on the floor his right leg doubling under him. He called for help and members of his family went to his assistance. They did not realize that his condition was serious and did not send for a physician until Saturday.

When Dr. MacLeod was called he saw at once that Mr. Trumpy's thigh was fractured and he recommended that he be removed to the hospital. The family objected at first but finally realized that such action was im-

DECORATIVE FOLIAGE PLANTS IN BASKET ARRANGEMENTS.

In Exhibit of Max Schling at International Flower Show, New York City.

The use of small plants, flowering or decorative foliaged, for holiday or other gifts has been very general in New York City for many years—much more so than in any other city in this country. The custom has been well supported by the plant growers who make New York their centre of activity, who have shown remarkable enterprise in striving for quality on the old favorites and in experimenting with promising new or novel subjects.

Our cover illustration this week shows how admirably such things as

Begonia Rex, dieffenbachias, anthuriums, cissus and selaginella lend themselves to arrangement in the rough brown willow baskets now offered in so many different and artistic shapes. The picture on this page shows a basket of different model, larger and with a greater variety of plants included, such as small palm, yellow callas, Japan maple and trailing tradescantia.

As indicated, both of these baskets were shown in Max Schling's group of designs at the International Flower Show.

NEWS NOTES.

Samuel Parsons & Company, landscape architects, New York City, announce their removal from the St. James Building, Broadway and 26th street, to the Architects' Building, 101 Park avenue, corner of 40th street.

A vase of Henry Weston's new carnation Majestic in the window of the Growers' Cut Flower Co., in New York, has attracted much attention this week. The flower is glistening white with very fine pencillings of carmine pink; large and well built.

Visitors in Boston: D. Lumsden and John Muth, New Hampshire State College, Durham, N. H. R. F. Smith representing Joy Floral Co., Nashville, Tenn.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

A Good Man Gone.

W. Atlee Burpee, commenting on the severe loss the seed trade has suffered in the death of Frank T. Emerson, of Waterloo, Neb., said: "He was a most remarkable man in many ways. Keen, farseeing, original, and absolutely unselfish. If Emerson discovered important facts in seed growing he did not exploit them for his own advantage, but was always willing to give frankly and freely for the public advantage. If any man ever carried out the Christ ideal in all walks of life, Frank Emerson did." So said Mr. Burpee. From our own personal knowledge of the man, we fully endorse these heartfelt words. Frank Emerson was one of the most delightful men it has been our privilege to meet in the American seed trade. Humorous, witty, keen, well posted, and with the inimitable Yankee flavor to everything he said and did. The seed trade has many splendid men, but we never had but one Frank Emerson, and we will never have another. I am proud to have known him.

GEORGE C. WATSON.

California Seed Crop Alarm.

More or less disquieting reports are coming from California. The entire seed-growing district of the state is suffering for rain and it is believed that unless there is an ample rainfall in the immediate future seed crops on the Coast this year will be very light in yield and poor in quality. This condition, we understand, extends as far south as the Lima bean districts and undoubtedly under any conditions the dwarf or bush varieties will be a short crop and at a considerable premium next fall over present contracting prices.

There have been many false reports about conditions in California, often simply the old cry of "wolf" when there is no wolf, but sometime the wolf will come and the majority of seedsmen will be caught napping, as they generally regard all ill reports respecting crops as the annual California story. Many compare it with the annual failure of the peach crop in Delaware and Maryland and whenever the crop is the most complete failure in the spring it is usually the heaviest in the fall. The present reports about California seem to have a more substantial foundation than many that have gone before, and it is a fact that several of the largest wholesale seed houses have cautioned their representatives on the road not to accept orders for any large lots of California-grown seeds without submitting same to headquarters for approval. During the past two or three

years when crops in other parts of the country, as well as Europe, were so short as to be near the total failure line, California has given us fairly abundant crops which have very materially helped out the shortages in other parts of the world.

Biennials Here and Abroad.

The latest advices we have had from Europe are very favorable and with the large acreage of nearly all biennials and root crops in general, if there is a fair yield, there should be an abundance of all of the leading items required by the trade. Strenuous efforts have been made by growers in this country to produce crops of beets, carrots, turnips, and other biennials, considerably in excess of any recent years, and coupled with the excellent European prospects it seems as if prices would return almost to the level of four or five years ago. Of course, there is "many a slip 'twixt the cup and the lip" and the present rosy outlook may be less encouraging a few months hence. However, we must be grateful that we have a good start and trust in Providence to bring the crops through successfully.

Pea Prospects.

While there has been a superabundance of rain in some sections of the country, it has been quite insufficient in others. The weather has also been rather cold up until the present week, but now that summer is with us agricultural work will progress rapidly. Peas have been planted for seed purposes in many sections of Michigan, Wisconsin, and in the far Northwest and conditions are generally most favorable. Should there be a full average crop from the acreage planted, there will certainly be peas enough to meet all requirements of both the seedsmen and canners, a considerable number of whom are firm believers in lower prices after harvest than growers are willing to quote at the present time. For this reason many are ordering very lightly for their future requirements, while not a few are not ordering at all. It is very much of a gamble and an even bet either way. Both seedsmen and canners have taken this view of conditions before and been badly left, and it is not at all impossible for them to have the same experience the coming season. They argue that prices are now so very high that even with a short crop they are not likely to run very much higher, while if there is a large crop, values will certainly be below present contracting figures. What has been said about peas will apply with equal force to many other lines of seeds, and the wise man is he who gives his opinion next autumn.

Retailers Busy.

It is needless to say that retailers in all parts of the country are pushed to the limit of capacity in keeping up with their business. Counter trade is so brisk that the entire force of most establishments is required to wait on customers, and orders have to be put up nights and Sundays. It is becoming increasingly difficult to secure experienced and competent help in the

retail seed business, as the greater part of the year's business is transacted during a period of about four months. The balance of the time trade is more or less slow and dealers can very well get along with half the number of hands required during the spring rush. This is an old story, and old complaint, however, and it is doubtful if any solution can be found.

Duty on Seeds.

It is hoped that the efforts that have been made to continue seeds under a specific, instead of an ad valorem, duty in the new tariff bill now before Congress will be successful. There is not a single logical argument in favor of returning to the ad valorem duties. They were a source of continual controversy between the appraisers and the seedsmen, and if our democratic friends think that the seedsmen are paying too high a duty they can reduce the specific duties to the point they consider proper.

A Boston Seedsman Honored.

Governor Foss has appointed Luther Adams Breck as a delegate from Massachusetts to the Southern Commercial Congress during its forthcoming session at the International Institute of Agriculture in Rome, Italy.

Mr. Breck is a Harvard man and of the fourth generation of the name in the old seed house of Joseph Breck & Sons, Boston. At present he, with his family, are in the South of France having reached there in the course of a somewhat extended tour of information through Europe and the British Isles in the interest of horticulture and agriculture. Mr. Breck will join the commission, which sailed Saturday on the Saxonia from New York, at Rome. His associates from Massachusetts are J. Lewis Ellsworth of Worcester, formerly secretary of the Massachusetts Board of Agriculture, and Mrs. Charlotte B. Ware of Norwell, who represents the Federal Government.

The session of the International Institute of Agriculture continuing several days includes a reception tendered to the American Commission by the King and Queen of Italy and which will be attended by their Majesties.

At the close of the session the commission will resume its itinerary which includes Italy, Hungary, Austria, Germany, Denmark, Sweden, Holland, Belgium, France, England and Ireland, extending over about 70 days.

Notes.

Herbert Reichardt, of the firm of Reichardt & Schulte, seedsmen of Houston, Texas, was recently married to Miss Margarite Dennis.

Harry B. McCullough, of Cincinnati, has gone to the Pacific Coast for his health. He expects to rough it in the open until he is well and strong again.

Mr. and Mrs. W. Atlee Burpee left Philadelphia on the 25th inst. for Indiana to visit their boys who are at college in that State. We look for big things from David by and by, if we may judge from the course of international studies he is pursuing.

Boddington's Quality Cannas

Are true to name, have two to three good eyes, are well cured, sound and dormant, and give absolute satisfaction. Our sales last year were nearly 700,000, and not an overgrown kick. The Canna crop this year, however, is very short, and we advise placing orders early to secure stock. Delivery can be made at purchaser's option. Remember, you may deduct 5% if cash accompanies the order.

ARTHUR T. BODDINGTON

SEEDSMAN

342 West 14th St., NEW YORK CITY

TULIPS AND NARCISSI IN GRASS.

That tulips and narcissus planted in the sod can be made a success has been proved on this place. Five years ago 27,000 Early Bedding tulips, all colors, were planted in holes made with a pointed spade handle, three inches under the sod, from six to ten inches apart. Today these tulips are flowering almost as good as they did the first year. With the exception of a few spots (probably destroyed by grubs or moles) the tulips come up in bunches of five to eight flowers each, long stems and pretty foliage. The beauty of such a mass in all colors in the green grass is far ahead of stiff beds which, besides, have to be replanted every year.

Narcissus, 6000 planted the same way, is today finer than ever, almost crowding out the grass. The work done after the bulbs have been planted is only a light mulching with rotted manure each fall. The grass was never cut before the leaves begun to dry off, about three weeks after flowering.

T. NORMAN.

Kansas City, Mo.

NEWS NOTES.

Cleveland, Ohio—Carl W. Gerdum has purchased the greenhouses of the Ohio Floral Co., Schaff road, and is moving his stock of cattleyas from his old place in Lakewood.

Brookline, Mass.—Albert H. Woods, who killed Thomas Goldrop when he detected the latter stealing violets from his place a few months ago, has been discharged from custody after paying a fine of \$500.

day. It contained about one hundred big long-stemmed American Beauty roses, with masses of purple lilac and branches of pink-tinged crab apple blossoms, making an effective combination.

Max Schling, New York, writes that on April 24 he had the record for centre pieces since he has been in business. The list of these affairs which he gives, includes centre pieces for tables with 1192 covers, the largest being at the new Woolworth Building and requiring 102 centre pieces, the smallest consisting of 150 roses. All retail florists in New York have been and still are very busy and it now looks as if the prediction of a lively season to succeed an early Easter would be fully verified.

Of Interest to Retail Florists

TAKING AN INTEREST.

The hours of the help in the retail flower stores located in large cities are invariably long and strenuous, and while a few may not mind these long hours, there are vast numbers that do; and among those that do, are usually the element that are always finding fault and at every opportunity; always feeling they are doing too much and at not being paid enough for it.

Do just a little more than you are being paid to do. That is the way to attract the attention of your employer; then when the proper time arrives for you to ask for an advancement, you have established a foundation for an argument, should one take place. Don't think these little extras you have accomplished have gone by unobserved, for they have not. Were your employer to pat you on the back every time you made a little special effort, you would soon have to put your hat on with a shoe horn.

The proper way to begin attracting the attention of your superiors would be, likewise, to assume some sort of responsibility. There is nothing an employer enjoys better than to see one of his help placing himself, taking on a voluntary responsibility and showing his capability of taking care of it; thus unloading some of the burden from his shoulders. Every man taking a small portion of responsibility upon himself will soon regulate and systematize the crudest store.

The class spoken of above, that are always "kicking" are as a rule the type of help that do not want to be held responsible for anything, not even the orders they have filled; they are ever ready to place the fault at another's door, just to clear them-

selves. Though the employer may be the loser by such a transaction, they have freed themselves from any responsibility.

Again this class appears in the shirking of work, making every effort to throw as much work as possible upon the willing ones, abstaining from everything but bluffing it and taking their salaries; always feeling that the envelope is not heavy enough and wondering why that advancement promised does not appear. We might also add, the most notable trait of the shirker is, to be the last one in when opening and the first out when closing. Can you advance this man? No, you cannot; he does not deserve it; he may be a good artist and knowing it, he depends on this one feature to carry him through life, expecting that some day somebody will do great things for him.

The qualities admired by most employers are displayed by the wide-awake men who are ever on the lookout for worthy advancement. Some of these we might mention as courtesy, promptness, an ability to overcome wastes and leakages, and not grumbling at an extra hour or so when business requires it.

To show your employer that you are taking an interest in his business and working as an individual, regardless of what the others about you are doing, means success for you. It may not appear in a month or a year, but it is coming your way, so you just keep plugging.

Perseverance and stick-to-itiveness have never been known to fail. Take an interest in your employer's welfare and he will take an interest in yours.

MR. STOREMAN.

PHILADELPHIA NOTES.

It is rumored that Wm. Henry Maule will start for Europe on his annual seed inspection journey in the near future.

Abram L. Pennock, Jupiter, Fla., had a painful accident recently. Spilt some gasoline on his clothing which took fire causing rather severe burns.

We have not heard that W. C. Langbridge has been in town recently. But there are other worries. Some of them we have escaped. For instance, measuring floor spaces.

Do not forget the Adolph Farenwald "Affiliation" at the Florists' Club, May 6th. We are assured by those who know that same will be "hot stuff" and that he will hand them a few.

Alexander Cumming of the Red Rose Nurseries, Center Square, Pa., who has been in rather indifferent health for a year past has gone west on an extended vacation. Mr. Cumming is well known in horticultural circles from his early nursery experience in Great Britain and later in Canada, New England and Pennsylvania. He is a man of unusual attainments and charm and his hosts of friends in this section wish him renewed health and strength and a speedy return. The business meantime will continue as during the past year or two under the active management of his son, Duncan.

Visitors: Stephen Mortensen, Southampton, Pa.; Mr. Evans, of Dards', New York; M. J. Brinton, Christiana, Pa.

CHICAGO NOTES.

Jas. G. Hancock is moving his family into their new home at 5003 Berseau avenue in West Irving Park, this week.

Invitations are being received in Chicago for the annual opening on May 1st of the Meredith Flower and Vegetable Co., at Libertyville, Ill.

Tearing down of the buildings on the northeast corner of the Marshall Field block begins this week and a good location for a flower store is no more. For many years Lubliner & Trinz have occupied a store in this building.

A. Vanderpoehl, known as the Douglas Boulevard Florist, is now temporarily at 4013 Colorado avenue, while his houses are being demolished. He has purchased a new site and will build during the summer so as to be ready for the fall trade.

The new tariff bill, known as the Underwood Bill, which has passed the Ways and Means Committee and is now before Congress is attracting considerable attention among the Chicago florists and nurserymen, especially among those who do importing. Letters are being sent to Congressmen in hopes of rectifying the errors before the bill is passed.

To be regretted is the action of the Mothers' Emergency League, which is preparing artificial white carnations to sell upon the streets and elsewhere on "Mothers' Day." Not a card calling attention to Mothers' Day, now only a few days off, has been seen in any of the florists' windows so far. The orders that come for the day will probably be in spite of, rather than because of, the attitude of the trade.

The committee that handled the financial part of the S. A. F. convention in Chicago, last August, met on the 24th inst. and had a final closing up of all matters pertaining to their work. Their report showed a balance of 40 per cent of the guarantee fund to be returned to the subscribers and checks have already been sent out for that amount. The committee, of which N. J. Wietor is treasurer, has received many well-deserved compliments for the way in which the financial affairs totaling an expense of about \$8,000

were handled. A banquet is arranged for at the Union Hotel, May 1st, when the committee will celebrate the closing up of their work and then consider themselves as discharged.

There was a very good attendance at the regular meeting of the Cook County Florists' Association, April 17th, and the live topic of publicity to the florists' business was the main item. The advisability of regular advertising in the Chicago street cars was discussed and prices furnished by a representative of the company. H. N. Bruns was on the program for a talk on his recent trip abroad, but was absent on account of illness. H. E. Philpott, who has just returned from England and the New York Flower Show gave the club his impressions and drew comparisons between methods in flower markets in London and cities of this country. The transportation committee reported on the special train accommodations to Minneapolis over the St. Paul Railroad.

A \$4,000 collection of orchids, native to many foreign countries have been offered to the city of Omaha, Neb., free by Mrs. George A. Joslyn, in addition to \$1,000 in money with which to care for them. The Joslyn residence was badly damaged in the tornado and probably half of the plants in their private greenhouse were destroyed. Park Commissioner Hummel has asked the city commission for \$3,000 with which to build a greenhouse in Hanscom Park, where the plants could be kept

DETROIT NOTES.

John Breitmeyers' Sons are making quite a hit with English market baskets filled with pansy plants.

Three little Jewish boys were found to be the real culprits of recent burglaries of flower stores. They disposed of flowers so stolen at cheap dance halls.

A very interesting visitor was William Wells of Merstham, England. Mr. Wells was so impressed with carnation Philadelphia that he pronounced it the best yet seen in his travels. A large number of them he ordered shipped at once in two-inch pots to be propagated for European dissemination.

THE TARIFF BILL.

All florists and horticulturists who have any suggestions to make as to changes, if any, in the present tariff bill which is now before Congress, should send in suggestions at once, if they have not already done so, to the Chairman of the Tariff Committee of the S. A. F. and O. H., Mr. William F. Gude, 1214 F street, N. W., Washington, D. C. Mr. Gude will be pleased to do all that he can to further the interest of the florists and horticulturists, and members of the kindred organizations, but is at a loss to know what action to take until the parties interested make complaints or suggestions.

A cable despatch received from the Grand International Exhibition at Ghent, Belgium, states that W. A. Menda has won five medals there.

Flower Market Reports

BOSTON

This market has been very quiet for the past few days and, with a heavy influx on all lines, prices have been battered down severely. Carnations are particularly in the doldrums and sweet peas are a surfeit everywhere. On nothing is there any stringency—even the cattleyas, lily of the valley and gardenias which are apt to strike a bit of scarcity in this period of weddings and other joyous affairs being on tap in quantities beyond any call. Of violets there are very few; this week will probably finish them. Among the more recent acquisitions to the regular stock are the Spanish irises, baby gladioli and anemones. These bring a fair price as do also the antirrhinums in the popular shades. Smilax is scarce as usual in the month of April.

BUFFALO

Warm weather has brought on the stock a little too fast and business has not been as good as might be expected at this season of the year.

Since the violet season is over sweet peas have been in good demand and at times a shortage has existed. On no other line has there been any scarcity. There are plenty of roses, carnations, snapdragon, lily of the valley, mignonette, lilies and considerable bulbous stock, indoor grown. There is no outdoor material except a few daffodils. Weddings are slightly noticeable and white roses have taken a little better. Beauties are plentiful but the quality is not of the best. It is a puzzling

problem to the wholesaler how to unload the surplus at the end of the week.

To use the vernacular of the day, the business last week and the first part of this week was the “worst ever.” A large supply combined with a rather less than ordinary demand was not enough. The sun had to come out with almost such a mid-summer fury that shirt waists on the street was the rule for the fairer sex, while many of the men wished rather for soft collars and

flannels rather than their business dress. The next result was a very large supply with just an ordinary demand. The florists are also having considerable competition from the bulbous stock in private gardens and lilacs and the like. Prices are at absolutely the lowest point this season. The leaders among the roses are Killarney and Taft. As the weather has grown brighter and warmer the latter has come forward splendidly. The carnation supply is larger than a fortnight ago, white predominating in

Flower Market Reports

(Continued from page 685)

numbers. The sweet pea cut is much larger than the conditions require. Lilies are not selling very well. Bulbous stock finds only a limited market. The two things, however, that are enjoying a good call are Spanish iris and snapdragon.

DETROIT Business has been rather quiet and the only ones who cannot come up to the demand are the landscapers. A couple of warm days last week seemed to make everybody anxious to have their flower beds planted. The present setback in temperature gives us a chance to catch up in this line. Prices in general rule firmly but low.

NEW YORK After the very acceptable flurry of last week it is too bad to have to record a sudden collapse in the demand and, consequently, in prices on all lines of cut flowers. This week came in with a very dubious air and by Wednesday the bottom seemed to drop out of everything. As carnations had been the first item on the list to respond to the upward movement last week, so they were also the first to feel the depressing influence of the present situation and values have been cut in half or worse. Sweet peas are among the things most perplexingly overstocked, yet in the extreme fancy blooms a good fair price is maintained. Roses have settled back to some extent and are liable to still further decline should a warm wave come along. Beauties are more abundant than they have been for a month, with quality greatly improved. On lilies a wide range of prices prevails, according to size and character of bloom. Lily of the valley from frame culture is superlatively good. Cattleyas of extra grade are in fair supply, but demand for them is light. Outdoor lilacs, apple blossoms and similar material all have an effect on market values and there seems no likelihood of a recovery in prices generally for some time to come.

PHILADELPHIA Prices generally kept pretty even all through last week. A few items were on the scarce side—such as lily of the valley and lilies—but even in these the quoted rates held—and there was a good clean-up. For carnations the demand was so good and the quality so excellent that nothing went a-begging. There was a slight falling off in the supply of roses early in the week but the bright weather changed condi-

MISCELLANEOUS	Last Half of Week ending Apr. 26 1913		First Half of Week beginning Apr. 28 1913	
Cattleyas	35.00	to 50.00	35.00	to 50.00
Lilies, Longiflorum	3.00	to 8.00	3.00	to 8.00
Callas	8.00	to 10.00	6.00	to 10.00
Lily of the Valley	1.00	to 3.00	2.00	to 3.00
Daffodils	1.00	to 2.00	1.00	to 2.00
Tulips	1.00	to 2.00	1.00	to 2.00
Violets	.40	to .50	.40	to .50
Daisies	.50	to 1.00	.50	to 1.00
Mignonette	2.00	to 5.00	2.00	to 5.00
Snapdragon	3.00	to 6.00	3.00	to 6.00
Wallflower	1.00	to 2.00	1.00	to 2.00
Sweet Peas (per 100 bunches)	3.00	to 6.00	3.00	to 6.00
Gardenias	12.00	to 20.00	12.00	to 20.00
Adiantum	.50	to 1.00	.50	to 1.00
Smilax	12.00	to 15.00	12.00	to 15.00
Asparagus Plumosus, strings (per 100)	35.00	to 40.00	35.00	to 40.00
& Spreu (100 bunches)	15.00	to 25.00	15.00	to 25.00

tions materially later. Gardenias continue of good quality and the demand very fair. Not quite so many orchids but enough to go around. Baby gladioli and Spanish iris are more plentiful; excellent quality; good demand. Outdoor lilac is now at its best and a general favorite for decorative work. Sweet peas are in active demand especially the higher grades which come from the late-planted crops. The tail-enders of the old crop are generally under grade and sell for very little. Greens plentiful except string smilax which is scarce and high. Wild smilax is over for the season. Cold storage dagger ferns need a lot of picking over now to make them pass muster. The new crop will be in soon.

ROCHESTER The past week started off very briskly and maintained it throughout. Everybody seems busy in some way or other, especially the greenhouse men, where so much is being done for the coming season. The weather has been glorious and if it keeps up this way for another week, the bedding season will be in full blast. Most of the growers who specialize in this kind of work are well stocked. Lilies and a few other shrubs are already in leaf and bud in the parks and a few more warm days will see them in blossom. Cut flower stock is fine. Roses are arriving plentifully. Sweet peas are especially good and long-stemmed. As bunched by the local growers they are made much more salable by a couple of sprays of maiden-hair fern. This

was adopted last season, and has proved efficient. Some extra large pansies of many shades are on the market and are used frequently for table centres. Carnations are in their prime, being good blossoms and strong lengthy stems. Lily of the valley is good, but a little scarce. Mignonette and snapdragon are in great shape, also white daisies. White stocks are a little slow in moving. Plenty of outdoor jonquils are in now. Most of the bulbs are in blossom in the gardens and parks and this naturally makes them a little slow in selling. Greens of all kinds are plentiful.

ST. LOUIS The market was in full blast last week. Everything was plentiful and not enough demand, any one day to clean up any one of the markets. Prices took an awful drop. Roses and carnations are fine in color and stem and consignments large. Sweet peas and lilac bunches are coming in in large quantities daily, and the wholesale markets are loaded down with them at cheap prices. Bulb stock is about over for the season; still, there are plenty of lilies, lily of the valley and callas to be had at any time. The demand for greens was fine last week.

HYDRANGEAS

Anton Schultheis, College Point, N. Y.

Choice Young Stock for Growing on.

For page see List of Advertisers.

THE NEW FRENCH FORCING HYDRANGEAS.

Avalanche—A splendid large white. This will absolutely supercede Thomas Hogg. 3-inch pots, \$6.00 per 100.

La Lorraine—Pale rose changing to bright cerise pink; claimed by many to be the best of all. 3-inch pots, \$10.00 per 100.

Remember now is the time to buy these Hydrangeas and grow them along for another year. This fall we will offer all of Lemoine's and Mouillere's Novelties in Hydrangeas, including E. G. Hill, the gem of them all. The great blooming qualities of these Hydrangeas are their talking points. You may have in a four-inch pot three to five immense heads of bloom. You will never grow the old varieties again after you become acquainted with these new ones.

Write today for our catalogue of everything you need in the Rose and Plant line.

Canal Dover, O.

"PEONIES FOR PLEASURE."

- This book of "Peonies for Pleasure" gives information on peony history, soil and plants to use, how and when to plant, fertilizers and how to apply, and describes the most extensive planting of really valuable peonies ever gathered together under the sun; describes the old and new, as well as the plebeian and aristocrat of the peony family. If you want information on the plant that stands next to the rose in beauty, that is practically known to the amateur as simply a red, white and pink peony, then send for "Peonies for Pleasure."
We also issue a special wholesale price list of peonies for fall sales, 1913. Send for both of the booklets.

ROSE AFTER-SATISFACTION.

When you buy G. & R. Roses you get along with them the after-satisfaction—that sense of realizing all the success that should come from planting quality roses, the knowing that no better results are possible to be obtained outside of G. & R. Roses. It is the after-satisfaction that has compelled us to plan to grow for the coming season one million additional roses. Think of it, the after-satisfaction selling five million roses, and demanding a million increase in one year. Going some! you say. Yes; but are you getting your share of this Rose after-satisfaction? If not, why not? Plant G. & R. quality roses. None better, none so good.

Our new catalog, giving prices on all roses and other plants, now ready. Write for it today.

Greenhouse property for the purpose of raising flowers for wholesale. Must be in first class condition and within easy shipping distance of Boston. Give full particulars and rent per year in first letter. Address B, care HORTICULTURE.

WANTED—To Lease, with privilege of buying, a greenhouse establishment, doing a good retail business. Give full particulars. Address G. T., care HORTICULTURE.

YOUR Kind of Advertising Will be Boosted at Baltimore

You may not think that you are much of an advertiser—but you are—nothing is sold without advertising of some kind. Do you want to learn what is being done in your line of advertising—trade paper, technical paper, direct-by-mail advertising—whatever method of publicity you use? Do you want to hear addresses from the men who have made the big American successes in advertising and merchandising of all kinds? Do you want to meet 10,000 live, progressive, thinking men—buyers of advertising—the men who are responsible for the industrial progress and supremacy of the United States? If so, go to the ninth

Annual Convention of the Associated Advertising Clubs

of America. This great Convention will be held in Baltimore, June 8th to 13th. Open meetings, held every day, will be full of inspiration, education, and information on every branch of merchandising. Delegates from 135 American and Canadian clubs will be present, as well as delegations from Great Britain, Germany and other foreign countries. Baltimore will

more than sustain her enviable reputation for bountiful hospitality in a series of splendid evening entertainments of wide variety and delightful possibilities.

You will be welcome whether you are a member of an advertising club or not. Make up your mind now to go; write to the address below for information as to the program, hotel accommodations, etc.

Associated Advertising Clubs of America Convention Bureau

1 North Calvert Street

Baltimore, Md.

CATALOGUES RECEIVED.

Francesco Bulleri, Italy; V. Shaketano, Representative, 50 W. 30th street, New York City. Wholesale Price Current of Flower Seeds.

Chester Jay Hunt, Montclair, N. J.—“The Blue Book of Bulbs, 1913.” This catalogue is a very refined production and in it are listed the most select species and varieties of spring-flowering bulbs, for the use of discriminating buyers. The cultural notes are a valuable part of the contents.

Yokohama Nursery Co., Yokohama, Japan, and 31 Barclay street, New York.—1913-1914 Descriptive Catalogue

of Bulbs, Plants, Seeds, etc. A handsomely illustrated catalogue attractively bound in Japanese style. Covers show a number of rare hardy garden perennials in natural colors, beautifully tinted. Prices quoted wholesale, in U. S. gold.

Felix & Dykhuis, Boskoop, Holland.—Wholesale Trade List, 1913-'14. A splendid catalogue, giving much useful information. Printed in two colors and richly bound. Accompanying it is “The Pæonia,” a descriptive list of 300 varieties of pæonia sinensis; also folders with instructions for the forcing of lilacs and rhododendrons and a complete nursery cable code.

Obituary.

Frank T. Emerson.

Announcement has been received of the death, at Mercedes, Texas, of Frank T. Emerson of the Western Seed & Irrigation Co., of Fremont, Neb., which took place on Wednesday, April 23. The news of Mr. Emerson's death was wholly unexpected for, although it was evident that his illness would eventually prove fatal, recent letters seemed to indicate some improvement, which it now appears was only temporary.

The body was brought by Mrs. Emerson and their son, Sam, to Boston for burial. Mr. Emerson was a native of Boston where he was engaged in the seed business for a number of years. His father, Joseph Homer Emerson, was for some time with the Ames Plow Company, later going into the seed business. Leaving Boston the son went to New York, and later to Omaha, Neb., eventually getting to Mercedes, where he continued the seed business first as a retailer, then as a wholesaler. He is survived by his wife, Mrs. Fannie W. (Hildreth) Emerson, and three children. His mother resides in Roxbury, and there are several brothers.

We refer our readers to the note on Mr. Emerson by George C. Watson on Seed Trade page. We can most sincerely endorse every word by Mr. Watson and Mr. Burpee, after many years' acquaintance and friendship with the noble-hearted man.

William Kalesh.

William Kalesh, founder of the business of Kalesh Bros. Floral Co., St. Louis, Mo., died April 24th at his home, 4508 Delmar Boulevard. Mr. Kalesh was not actively engaged in the business for some time. John E. Edwards, his sons and Mrs. Kalesh, the mother, compose the firm. The funeral took place on April 27th and many beautiful floral designs were sent by friends in the trade who extended their sympathy.

B. Schworm.

B. Schworm, who has been in the florist business in Brooklyn, N. Y., for the past thirty years, died on Tuesday, April 22, at his home adjoining his store on Court street, aged 56 years. He leaves a widow and several children.

LEMON OIL CO'S STANDARD INSECTICIDE

Guaranteed under the Insecticide Act, 1910. Serial No. 321
Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, etc. without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

1/2 Pint - - 25c; Pint - - 40c; Quart - - 75c
1/2 Gallon, \$1.25; Gallon, \$2.00; 5 Gallon Can, \$9
10 Gallon Can - - \$17.50

Dilute with water 30 to 50 parts

SLUG-SHOT

USED FROM OCEAN TO OCEAN FOR 29 YEARS.

Sold by Seed Dealers of America.

Saves Currants, Potatoes, Cabbage, Melons, Flowers, Trees and Shrubs from Insects. Put up in popular packages at popular prices. Write for free pamphlet on Bugs and Blights, etc., to B. HAMMOND, Fishkill-on-Hudson, New York.

tains lots of material and covers the ground fully, including chrysanthemums, geraniums, dahlias, etc.

R. M. Ward & Co., The Lily House, New York.—"Horseshoe Bulbology." A catalogue of Lilies and French Bulbs, Azaleas, Palms, etc., which is more than a catalogue—an interesting book of information, philosophy and sound business advice which every florist will thoroughly enjoy reading and reap a benefit besides.

Kelway & Son, Langport, England.—Kelway's Manual. Each year as this superb trade publication comes to our desk we think that the perfection of catalogue making has been reached and that further improvement in any direction is well-nigh impossible. Yet, somehow, they always manage to beat

their own record and this year they have done it again. The book contains over 350 pages. The illustrations are beautiful and include 16 full-page inserts of illustrations in natural colors of peonies, delphiniums, pyrethrums, gaillardias, gladioli and other Kelway flower specialties. The descriptions are excellent, of course, and contain much of valuable cultural suggestion.

Also received Kelway & Sons' Wholesale Catalogue of Vegetable, Flower and Root Seeds. This is of the same high class as the general catalogue and contains four full-page colored plates as well as many superb half-tone illustrations. The prices in this list, it is stated, are open to the legitimate seed and nursery trade, but not to market gardeners, etc.

The Recognized Standard Insecticide.
Not a cure-all but a specific remedy for all sap sucking insects infesting plant life such as green, black, white fly, thrips, red spider, mealy bug and soft scales.
\$1.00 per Quart. \$2.00 per Gallon.

FUNGINE

An infallible remedy for mildew, rust and bench fungi. Unlike Bordeaux and lime and sulphur it does not stain the foliage but cleanses it.

VERMINE

A soil sterilizer and vermicide. Destroys eel, cut, wire and grub worms, maggots, root lice and ants. Used one part to 400 parts water, it does not injure plants, but protects your crops against ravages under the soil.

\$1.00 per Quart. \$3.00 per Gallon.

All are spraying materials and are effective in the greenhouse and in the garden.

FOR SALE BY SEEDSMEN.

PUBLICATIONS RECEIVED.

American Gladiolus Society; Bulletin Number 7, just issued, contains some very interesting original communications and other matter of value to the gladiolus growers. A commendable innovation is the designation by a letter before each name in the list of members of the society, whether it represents a professional grower or an amateur.

Iowa Horticultural Society; Transactions for 1912. Wesley Greene of Davenport, who has been a long time secretary of the Iowa State Society, knows how to get out a good report and this is one. It is very comprehensive, profusely illustrated with handsome full-page plates, and all departments of horticulture are well covered in its 482 pages.

Proceedings of the Fourteenth Annual Convention of the American Association of Park Superintendents.—This is a record of the meeting of this Association at Boston, Mass., August 12-14, 1912. Besides some excellent papers and instructive discussions it includes obituary notes on the late J. A. Pettigrew, Chas. E. Keith, James Wilson, W. R. Smith and E. H. Perry, also portraits of past and present officials of the Association.

The German Kali Works have just issued a neat little illustrated pamphlet entitled "Fertilizing Peaches." This is a useful and instructive production for the culturist. The peach industry is one of great importance and exact knowledge as to its plant food requirements such as this little book imparts is of great value. Soils, potash in its relation to peach growing, nitrogen, phosphoric acid, the application of fertilizers and results of their proper use are topics all fully covered.

The Carnation Year Book, 1913.—Published by the Perpetual Flowering Carnation Society of England. This is the fourth annual volume of the official organ of the society which under the enthusiastic guidance of J. S. Brunton, W. E. Wallace, T. A. Weston, the late Hayward Mathias and others, has done so much for the popularity of the carnation in Great Britain. The book contains much matter of interest even to American carnationists between whose society and the British Society there exists a strong bond of fraternal feeling.

Annual Reports of the Park Board, Portland, Oregon, from 1908 to 1912, inclusive. The reports of these five years are comprised in one volume, the information given in the 1912 report showing that an enterprising and progressive policy has been awakened during the two years incumbency by

Would You Like to Know

1. Where you can buy spring bedding plants; good, clean, reliable stock?
2. Who can supply young roses, carnations and chrysanthemums well rooted and cool grown, to fill your houses?
3. Where you can get young ferns, palms and other greenhouse decorative stock for growing on for next season?
4. What firms carry seeds of finest selected strain, bulbs and roots—gladioli, cannas, dahlias, etc., etc.?
5. The best sources of supply for hardy shrubbery, herbaceous perennials, choice conifers and new introductions in ornamental nursery stock?
6. The merits of the various greenhouse constructions, as to stability, utility and economy in running?

All necessary enlightenment on the foregoing may be quickly found in the advertising pages of HORTICULTURE by consulting the Buyers' Directory and Ready Reference Guide, which in this issue appears on Pages 652, 653, 654, 655.

Get the Habit. HORTICULTURE is the only trade paper which thus fully indexes for the benefit of its readers the offers of its advertisers each week. In case there should be any information sought along these lines which is not found here we shall be glad to supply same on request.

Erected for Eben Richards, Tuxedo Park

Tuxedo's Side of the U-Bar Question

If you know Tuxedo Park, you know that it is not only exceedingly hilly, but that few of the newer places are so large that the greenhouse can be advantageously placed out of sight of the residence, as some few persons still prefer it. This means that the houses must be attractive.

Must be up-to-date in every way. It also means that available space being limited, the construction of the houses must insure the highest growing conditions so that quantity and quality will both be of the highest. The U-Bar, because of its U-Bar construction,

meets these exacting conditions as no other construction does. This is an established fact that many discuss, but none can fairly contradict.

If U-Bar houses are best for the Tuxedo Park folks, they are best for other folks, especially those folks who want the best.

WHERE DO YOU BUY?

You can buy lily bulbs from many firms the same as you can buy flour from many grocers. But when you buy flour you always ask for a certain brand—one you know is good, and you don't want any other brand. Now in the lily business the principle is the same, except that you can't get Horseshoe Brand bulbs from various Jobbers. Jobbers won't buy from us because we sell the florists and as we have always found the florists' money as good as the jobbers, we naturally cater to the florists—the consumer. Under these circumstances we can afford to give a better value for the same money owing to our most direct source of supply. Quality has a direct bearing on price and a very great effect on results—in fact the odds are so much in favor of quality for results that the matter of price is practically buried. The prices of Horseshoe Brand Lily Bulbs however, are very reasonable—so much so that price is no excuse for not buying them. Absolutely the best you can get anywhere. You don't have to pay more and you can't afford to pay less. Send for Catalog.

COLD STORAGE BULBS ON HAND.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Azaleas

It pays to carry over any unsold plants of azaleas, as they usually flower earlier and more heavily the following season if given rational treatment. If leaf mold can be had in sufficient quantity to prepare a bed about 6 inches deep plant the stock out. The finer the soil the better, and a liberal amount of sand should be mixed with it, as also well-rotted cow manure. If soil is scarce pot culture for the plants is best, in which case the pots should be plunged up to the rim in soil, ashes or other material, for it is almost impossible to keep the soil in pots moist if they are exposed. Proper attention to watering is needed for the stock planted out. The least neglect in this respect will be ruinous to the plants in the pots, so care should be taken to select a place where water is handy. Shade is not necessary; in fact the plants grow better and set more flower buds when given the full sun. A dose of liquid cow manure every other week is of great benefit to the pot plant. They can be kept well syringed all summer and to prevent drying out a mulch of old hotbed manure or any other well decayed manure can be given.

Gladioli

The earliest outdoor planting of gladioli is now well above ground and has had one cultivation. Plantings are made once a fortnight in order to insure a constant succession of flowers, this planting being continued until the end of June. The bulbs are set at an average depth of six inches. This keeps the stems more rigid when rain and windstorms prevail; those planted nearer the surface will in many cases be laid flat. In order to get the most out of gladioli, plan so that you are able to cut good flowers over the longest period possible. Make use of a deeply cultivated soil and avoid shallow planting. You can plant in double rows about 6 inches apart, and place the supports to tie the plants to between them. In this manner you will get flowers from the earliest date until the season closes and will avoid having an over supply at one time with a shortage right afterwards. When the weather becomes dry you can give weekly waterings and it is always better to plant a batch where the water is handy as you can force these in ahead of the others.

Planting Out Carnations

We are now at the time for planting out the carnation stock into the field. What is of as much importance as anything is to do this work with as little check to the plants as possible, especially if you have to haul them a long distance. You can plant twelve inches between plants and fifteen inches between rows and leave out every sixth row. Be sure to plant in straight rows

both ways; that allows you to turn the cultivator both ways. When planted out at least one good watering is of much value, for it will settle the soil firmly around the roots and the plants will get established quickly. Usually there are sufficient rains to keep the soil moist enough but should a dry spell set in following the planting the grower will make no mistake in using the hose freely, giving water sufficient to go down in the soil, and this should always be followed up by cultivating as soon as the soil is dried off enough and every week until they are housed.

Growing Ferns During the Summer

Ferns will now require to be kept shaded, but never too heavily as it tends in a good many cases by producing fronds that will be soft and weakly in growth. Keep a nice circulation of fresh air in the house as ferns never do so well when kept too close. Now is the season that all kinds of ferns will want an abundance of water at the roots. Plants that are fairly well pot bound will make better fronds if given some stimulant in the way of weak liquid manure once or twice a week. Young ferns that are in small pots should be shifted before they become too pot-bound. A good compost to use is equal parts of new loam, leaf mold, peat and some sand.

Lycastes

Lycaste Skinneri, one of the best, has fine lasting qualities either on the plant or when cut. The flowering season is now over and just as soon as they start making new growth to any extent they should be repotted. Where the compost is in good condition, however, they can go over for the second year and do well. They thrive in equal parts of fern fibre and fibrous loam from which all the fine soil has been screened out and about one-quarter of very dry cow manure can be added. Fill the pots or pans half full of clean crocks. The compost should be rather firmly pressed in and about the roots leaving the base of the pseudo bulbs on a level with the rim of the pot. Keep rather close and under quite heavy shading until they begin to make new roots. After this they want plenty of indirect sunlight, moisture and sufficient water at the roots to ensure active growth.

Winter Flowering Marguerites

Where you want nice large flowering plants by next winter now is the proper time to propagate. When they are rooted pot off and keep shaded for a short time when they should be exposed to full sun and when these pots are filled with roots either plant out in the field or grow under pot culture; the latter I think is best. Keep shifting until you have reached an 8 or 10-inch pot, using a good rich compost as these daisies are rank feeders.

Mr. Farrell's next notes will be on the following: Antirrhinums; Chrysanthemums; Cinerarias, Cycas Stems, Increasing Begonias; Tuberoses.

Hardy Phloxes for Midsummer and Early Fall

Phloxes in Southwest Harbor, Maine.

Within the precincts of the herbaceous garden planted after a certain color scheme the subject of perennial phloxes remains an ever-alive one. Past seasons, as delightful and interesting as they may have been, taught us lessons. New possibilities present themselves; new problems arise, new plans are to be carried out. True, the best time for planting phloxes is September and October, nevertheless with a little extra care plants can be easily moved in spring without being seriously stunted and even entirely new plantations very often make a good showing the first year. As a matter of fact recent attempts to use phloxes for the strictly formal flower parterre by rooting cuttings during April have resulted in low plants available for bedding purposes producing at the regular flowering time uniform panicles of remarkable size and perfection. For the skilled grower and enterprising garden-architect the phlox question is today as important in spring as it is in fall. Their principal client, the flower-loving lady, as garden owner, desires to enjoy beauty in harmoniously blended combinations acceptable to an artistic eye. Well arranged the subsequent success as far as phloxes come in question depends largely on well enriched ground, an open sunny exposure, weeding, hoeing and ample irrigation during the growing and flowering season. The strong and clear shades of the present standard varieties, the size of their panicles and singular flowers and the long period of the total florescence of the paniculata class from mid-July until late in September—have brought about an ever-increasing demand for plants. Comparatively easy to handle, their showiness appears literally unsurpassed. I will never forget the picture of a display of a bed several hundred feet in length, running parallel with a winding walk in a New England garden, planted with two double rows of the varieties *Le Mahdi* and *Fraulein von Lassberg*. The wave of color of the former, on cloudy days and toward evenings a clear deep blue again in bright sunlight violet-purple—contrasting with the snowy white of the latter, was indeed a wonderful combination for near effect. A few years ago I was called on to plant a border running along the whole front piazza of an extensive cottage and selected *Geo. A. Stroblein* for the rear and the dwarfy growing *Frau Anton Buchner* for the outer row. The

bright scarlet of the masses of the large compact panicles of *Geo. A. Stroblein*, boldly standing out against a dark green railing as background, blending agreeably with the glistening white of *Frau Anton Buchner* in front not only proved satisfactory to the owner but the combination found ready imitators during the following seasons. Beholding a large well-assorted plantation of mixed varieties in full bloom we have a veritable color carnival; a picture in its brilliancy extremely beautiful. It deepens our conviction that for transient floral arrays phloxes are indisputable leaders.

A glance through the trade lists of leading growers shows a firm resolution to offer a limited number of varieties of unquestionable merit. The wisdom of elevating the standard by timely discarding back numbers and barring doubtful debutantes is a boon to the purchaser and in turn is bound to stimulate business. Under such conditions your correspondent refrains from enumerating and describing phlox varieties. The reader will find this information in the catalogue of the phlox advertisers.

Riverton, N. J. *Richard Rothe*

Tariff Amendments Adopted

Editor HORTICULTURE:

We are immensely pleased to be able to advise you that all of the following amendments to Tariff Bill H. R. No. 3321 have been adopted by United States Congress in response to our demand for a tariff free from the errors and ambiguities in former tariffs.

No. 1. Page 53, line 11, Section 215, the words "and all other decorative or greenhouse plants" are omitted. This will make orchids, palms, azaleas and cut flowers dutiable at 25 per cent. advalorem, and all other greenhouse or nursery stock not otherwise stated, at 15 per cent. advalorem under Section 216. It will avoid disputes as to what is greenhouse stock or nursery stock.

No. 2. Page 53, line 14, Section 215, the word "bulbs" is added after hyacinths. This changes "hyacinth clumps" to hyacinth bulbs, dutiable at \$2.50 per 1000 bulbs.

No. 3. Page 53, line 16, Section 215, the word "herbaceous" is prefixed to paeony. Some paeonies as *Paeony Moutan* are grafted shrubs and not bulbs and are dutiable at 15 per cent. advalorem under Section 216 instead of \$10.00 per 1000 under Section 215.

No. 4. Page 53, line 18, Section 215, changed so as to read "all other roots, rootstocks, corms and tubers." This will aid in exact classification and avoid expensive disputes.

No. 5. Page 53, line 22, Section 216, the words "*Rosa Rugosa*" are added after *Multiflora*. This is a most important change; it makes *Rosa Rugosa* seedlings three years old or less dutiable at \$1.00 per 1000 unquestionably. The Government cannot now collect duty of \$40.00 per 1000 as roses, on *Rosa Rugosa* seedlings which are sold at \$3.00 per 1000, as under former tariffs. This will save honest importers much expensive litigation and will largely prevent fraudulent entries of budded roses as briar roses.

No. 6. Page 122, line 6, Section 600, the word "coniferous" is prefixed to evergreen seedlings and the words "4 years old or less" are added. This correction is of inestimable value to the Government and honest importers; it should prevent boxwood, bay trees,

OUTDOOR VEGETABLES AND FRUIT

CONDUCTED BY

Edwin Jenkins

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Jenkins. Such communications should invariably be addressed to the office of HORTICULTURE.

Lettuce

A pan or flat of lettuce seed should be sown about every two weeks so as to keep up a constant supply and we believe that by sowing this way and frequent transplanting the future crop is better assured than by sowing in drills outside or in frames.

Growing in Cold Frames

As the cold frames will be of very little service after the end of May until autumn weather sets in, I would suggest to all who are troubled by their lettuce bolting in the months of July and August that they grow crops in the frames all summer. Since we adopted this method we have never been troubled by the lettuce running to seed in hot dry weather. First, the soil in the frames is generally light and rich; further, it is mostly where the hose is nearby and it seems as if the protection afforded by the sides of the frames prevents too rapid drying. Then there is the ease with which a newly transplanted crop may be shaded for a day or two until the roots have taken hold of the soil. Finally while the ordinary methods of culture in the garden are hazardous in the critical months, frame culture seems to be certain. Big Boston has been our great standby as far as varieties go. We have found May King very good for early and late work. The Cos varieties thrive equally well under the treatment here advocated.

String and Lima Beans

Though there is still some danger of cold snaps the season is sufficiently advanced to risk sowings of string and Lima beans, especially on soils that are sandy and light. If the Limas are sown in pots in the greenhouse or a warm frame and kept going till about May 20 and then planted out, a little time will be gained especially if the usual cold spell which comes about the middle of the month should materialize.

Carrots for Exhibitions

Prepare the holes for these just the same as recommended for parsnips in a previous number of HORTICULTURE and sow a few seed of New Red Intermediate or Long Red Surrey on each hole, thinning down to the

rhododendrons, Koster blue spruce, kalmias, etc., being brought in *free* by reason of fraudulent entries as evergreen seedlings; it will also make large evergreens 5 years old or more dutiable at 15 per cent. advalorem under Section 216.

These amendments correct and simplify the tariff immensely as applied to horticultural imports. It will make it much easier for the customs officials to detect and correct fraudulent entries, it should avoid expense to honest importers now that "Evergreen Seedlings," "Briar Roses," etc., are defined, and it will largely prevent the confusion and abuses which have arisen under former tariffs owing to incorrect varying Treasury decisions handed down at different ports of entry on the one item. These amendments do not change the rates

strongest looking plant as soon as they are large enough to handle. Holes should be spaced about one foot apart and rows about eighteen inches.

Ailsa Craig Onions; Leeks; Globe Artichokes

These early-sown vegetables should be planted out on the first favorable opportunity, choosing if possible a cloudy day. The land for these having previously been prepared, should be in fine mellow condition. The onions will be planted in rows eighteen inches apart and one foot between each plant. The leeks are better planted in trenches in single rows and also one foot between each plant. For the globe artichokes four feet apart each way is not too much. Each and every one of these will be the better for a light mulch of half-decayed manure as soon as possible after planting.

Mulching Strawberries

Get the mulch on the strawberries early; it will help to conserve the moisture. As the main purpose of this mulch is to keep the berries clean we use clean straw or else the long grass raked from the lawn.

Treatment of Potatoes to Prevent Scab

The use of formaldehyde for the prevention of scab on potatoes is growing in favor yearly. Mix one pint of formaldehyde with fifteen gallons of water and put the seed potatoes into soak for about an hour just before planting.

The Currant Worm

This worm is due just about now and if not carefully watched for some of the bushes will be stripped of their foliage before you are aware of their presence. Hellebore put on with a powder bellows in the morning while the dew is on the leaves is the best and safest remedy.

Melons; Egg Plants; Peppers; Tomatoes

These should all be where they can be exposed to full air day and night so as to harden them ready for planting out. Under this treatment the plants will lose a little of that luxurious appearance which the greenhouse treatment generally gives them, but will feel the shock of planting out the less and will ultimately thrive the better for it.

of duty on proposed tariff in any way. To have recommended them would have meant the defeat of our important demands—a tariff free from errors and ambiguities.

Let us take this opportunity of thanking *you*, the Government officials, Congressmen and the numerous friends in the trade who have helped and supported us in this campaign, the benefits of which are obvious to every florist, nurseryman and seedsman in the United States who either directly or indirectly handles imported stock.

J. G. Shutch.

able stock. Should the season maintain the pace it is now keeping up, a great proportion of the outdoor material ordinarily utilized for the Memorial Day demand will be all gone. If it brings to hand other things to fill the gap, well and good, but if it does not we can already see prices soaring and the dealer in artificial or preserved goods will have the time of his life.

A tariff free from ambiguities

Not only those of our readers who are interested in horticultural importation but those engaged in any home nursery industry as well will hail with much satisfaction the announcement concerning accepted tariff amendments which appears in another column of this paper. All are now fairly assured of an uniform interpretation of the law by importers and customs authorities alike. Ambiguities that have almost worried the life out of honest importers, left home growers in the dark as to what they had to compete with, and opened the way for all kinds of crooked scheming are now done away with, let us hope. The entire nursery and florist trade are under no small obligation to the gentlemen who have so persistently worked for this reform, in the face of many obstacles and discouraging conditions. HORTICULTURE is pleased to know that it has contributed even in an infinitesimal degree to the success of the movement.

Retailers "getting a move on"

At last—here, there and everywhere—the retail flower dealers are getting together locally, organizing and laying plans for mutually helpful co-operation. The wonder, to the outsider, is not only why they waited so long but why they insist in flocking away by themselves rather than under the wing of the long-existing Florists' Clubs. If the latter had been tried and proved inefficient to conserve the interests of the retail dealers the reason for this new movement would have been readily apparent, but although the constitutions and by-laws of the Florists' Clubs are everything that could be asked for in this respect, yet it has been a matter of common knowledge that, in nearly every case, the retail store men have held aloof. Well, flocking alone is far and away better than not flocking at all and since that is their preference, we must wish them all success and we hope they will individually and as a class find in it progress and profit of the most substantial sort.

The Arnold Arboretum

We have at no time seen the Arnold Arboretum looking so attractive and interesting for the horticultural eye as it is just now. The season is remarkably precocious and the winter has done less injury than usual, all of which counts for much, but in addition to these favorable conditions extensive plantings have been going on for the past two or three years of things new or rare and some of this material is now beginning to show or at least suggest its character as a landscape or

Memorial
Day possibilities

As the great floral holiday of the year in many communities approaches it becomes necessary to look ahead and try to discern the outlook and make some approximate estimate of avail-

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Watering

Now that the summer weather has arrived, the watering of the houses should receive careful attention. Many growers will let the old houses go, paying more attention to the young plants, with the excuse that roses are bringing low prices. Yes, low prices indeed, but growers should remember that the expense now is the very lowest, as all that is necessary is water and tying, with an occasional dose of liquid manure. Do not let red spider get the best of the plants at any costs. Good roses will bring a fair price in spite of the over-crowded markets. Above all do not allow the plants to become so dry that they will shrivel up and lose all their foliage. Keep the water to them and watch out for dry spots in the benches. If the plants have any growth at all there is but little danger of over-watering, and the results will well repay the cost of the care.

Tying

This too is often sadly neglected and is one of the worst causes to have a dozen diseases which the rose is subject to. Red spider will always be found in houses where tying has been neglected. When tying to stakes be careful not to tie the plants too tight as this would be as bad, yes even worse than no tying at all. American Beauties are very apt to go bad if allowed to go untied, and are among the very first that would receive a dose of spider or spot as well. At the same time the stems will not be very good, and we all know what an American Beauty without any stem means. The buds will also be of a very poor quality if the shoots lay all over, and then of course it is not a wonder that the roses are not bringing any kind of a price.

Shading the Houses

Many of the deep colored roses will do much better if shaded the least little bit. It must not be overdone, however, or it will be worse than letting the houses go altogether. We find good stiff clay mixed with water makes the very best possible shade, that washes off very easily and will not injure the paint in the least. Lime, unless applied to the glass just a certain way, will stick

so hard as to be a regular nuisance when it comes to removing it from the glass, and it is not only that, but the paint is bound to suffer a little no matter how carefully the lime may be removed. There is a way of applying lime to the glass, and it comes off very easily, but this is hard to put into words, and can best be shown in practice.

Early Planting

At times we wish to have a house or two come in real early, and there is no better way than an early planting. To write a long article on this would be quite useless as all "know" the best way. However, we will say that it pays to have all the benches thoroughly cleaned, white-washed, and all the soil, leaves, etc., that may be under the bench, cleaned out. Do not forget to add a little copper sulphate to the lime as it will be a great help in conquering many of the fungous diseases that at times appear in the least expected ways, and ruin many plants before they can be stopped. Of course the plants seldom die outright, but usually they get such a set-back that it takes a long, long time for them to recover from it, and even when they do they are never the same as when the plants are kept perfectly healthy by good care in the beginning. As to the depth of soil in benches our experience teaches us to use the least soil possible, as more can always be added any time it may be required, whereas if too much soil is used in the beginning none can be removed, without raising havoc with all the plants.

Coarse Bone

This is a very good material to mix into the soil when planting, and will remain in the soil for practically the whole season. It is well to mix quite a quantity of it as it cannot do any harm. By coarse bone we mean bone about the size of a lima bean, such as is used largely by fruit growers growing fruit under glass. This should by no means take the place of the regular bonemeal, as this is too important an item to be left out of the soil composition. We simply add this coarse bone to help out in supplying the necessary nourishment to the plants.

garden subject. The Wilson introductions from western China, some three hundred in number, are for the horticulturist, easily the most interesting objects to be seen here. They run all the way from tiny cotoneasters to walnuts and ashes that in years to come will attain to giant size. For the general public who are looking for spring floral splendor, the pyruses are at present a picture never to be forgotten and the lilacs will soon be in their full glory. The strange part is that so few comparatively of the Boston people seem to know or to

realize this great unique possession of theirs. Visitors from afar would not think of returning home from Boston without a sight of the Arnold Arboretum yet there are tens of thousands within a half-hour's riding distance who have never passed through its gates. But it is being planned and planted with broad forethought for the future and the time will surely come when grateful recognition will be accorded the men whose lives have been given to the upbuilding of this noble educational institution.

AFFILIATION

Address by Adolph Farenwald before the Florists' Club of Philadelphia.

Affiliation is the proper word for the subject on which I am going to talk to you tonight. I start right off by giving you the kernel of the nut. Our National Society, the S. A. F. and O. H. should adopt all florists' club members as her legitimate children, with \$1.50 as dues, thereby getting a membership from ten to fifteen thousand on short order. Why should we do this? Because the S. A. F. has not enough members and funds to do its great mission justice. It is a National Society without power, and it is up to us to give it that, so it can help all of us. Now, what can it do for us?

First, it should have a press bureau; this, to look after our interests which are jeopardized by false statements in newspapers; to send out education articles, such as we have had lately in Philadelphia papers; and advertise nation-wide. Second, it should have means to pay men to look after our interests regarding tariff, or other legislation. It should be able to get into line, either by itself or with other merchant societies, to fight excessive freight or express rates. Such matters as these should be taken care of by the S. A. F. for the benefit of its members. The S. A. F. through lack of funds, is not able at the present time to give us the necessary assistance in these matters.

For a single business man to attack a corporation is simply useless—a waste of time and money. For instance, there are the coal-carrying roads through the East. They are charging for the hauling of the coal as much as the coal itself costs. Other business corporations have taken this matter up to fight it, but our National Society is not able to stand in the firing line. We growers, as an aggregate, are large coal consumers, and to have our expenses for freight reduced is only proper economy. The same way with the express companies. We are continuously overcharged on those lines. The redress carried through by the S. A. F. for us some years ago against the express companies was a short-lived victory, as the express companies, inside of a year were, in most places, back to their old rates or nearly so, the S. A. F. not having the necessary means to follow up our success against them.

The daily press goes on unchallenged when it comes out and tells the flower-buying public that prices for

afford them. Such nonsense! There is where a press bureau should take hold. Or, the agitation against flow-Easter or other holidays, on roses and other flowers, are going to be very

ADVERTISING TALKS

BY

Ralph M. Ward

No. 9

The beginner in advertising always has the bulge on the trailers and always gets the best of the business if his methods and goods are right. Therefore the florist who has no advertising competitor had better get busy immediately. It takes years sometimes to build up a good trade through advertising, but when it is once built up that way, it is an asset no one can take away from you. You have heard of "good will" and the enormous price it often brings—well, good will is nothing but the result of advertising. There can be no good will without advertising and to make the will good the advertising must be good. The florist who spends \$1,000 judiciously advertising his business, immediately adds that amount to the value of his business. The returns may not have come in, but the benefit is there and will eventually bear fruit with compound interest. The public is very much like the soil—if you neglect it you get poor crops; but if you give it the necessary attention, if you fertilize it with courtesy and fair play, it will yield very valuable returns. As you must treat the soil scientifically, so must you treat advertising. A mere jumble of words is not enough—you must inject human interest into your adv.—talk to the public as if it were your friend. Never neglect, however, to impress upon your readers one thing—always that one thing—a brand; your name, provided it is agreeable, easily spelled and remembered; your store, or something pertaining to your business that will stand out distinct. Don't assume that the public knows anything about you, for ten to one it don't—you must educate it in your business, take it into your confidence, talk plain, and it will then understand you and respond. If you can't write advs. yourself, your local newspaper staff can do it and will be willing. Just try it a year.

high and that only millionaires can afford at funerals. You all know that our business is hurt by such wrong statements, and our central press bureau would be the best and the only

place to fight against it. The education when and how to use flowers is a problem for this bureau. Skillfully written articles, such as have been appearing in some of the Philadelphia papers, will educate the public and make them ashamed to wear artificially-made flowers.

There is the tariff which should be taken care of by our National Society. Just a few days ago, I received a communication telling in what shape the tariff on plants is at the present time. In many respects it was simply ridiculous the way it was worded. This should have been taken care of by our Society. Sometimes it has taken care of it through some of its most interested members, who spent their time and money to work for the interests of our profession. But, we cannot always ask these men to do so without the proper recompense. This time, it seems it has passed over—nobody has paid any attention to it, and this ridiculous tariff will go on for another period. (No, it has been corrected.—Ed.)

Gentlemen, there are so many important jobs for the S. A. F. that I cannot go into them all. I just will give some of the most important lines along which it should use its power. But, fellow members, such a great task cannot be performed by a few. Wallace Pierson, a few weeks ago, told us here one evening that we are all in the same boat, and he is right. Or, in other words, we have all the same interest—floriculture is our boat. It doesn't matter if a cut flower or a plant grower, retailer or commission man, our aim is to advance this boat with as little friction or damage as possible, as by this time it has grown to very large proportions; in fact, so large are its proportions that it is often rubbing its sides or running into the mud. We are today in the same fix with our boat, floriculture, as the first great steamboat—the Great Eastern was, years ago. I think it was about eight hundred feet long, but it lacked powerful engines and steering gear to make it a success.

Twenty-seven years ago, when this boat of floriculture was a youngster, some of our best captains then put a new and most up-to-date set of engines and steering gear into it, called the S. A. F. It then, and for several years after, did its work well. But as this boat of floriculture has grown so large, and steering gear and engines have not increased in the same proportion, its rudder of twenty-seven years ago is not able to keep us straight, and we get bruised and run into the mud. We need larger machinery and steering gear, which means membership and money. Without larger membership and increased funds, our National Society cannot do us much good along those lines I have mentioned, and others. In fact, what little the S. A.

F. has done has been done mostly through the generosity and earnest desire of some of its most loyal members, at their own expense and time and money.

Fellow members, we have a National Society, which, if properly backed up by the majority of the men in our profession, could give us splendid results. But, we must not stand pat; we must all be willing to do our little share in this crusade. The florists' clubs all over the country are the offspring of the National Society. They are all strong and in a healthy financial condition. There should be no objection whatever to giving back to our National Society what is actually her due. It will strengthen not alone the S. A. F., but the florists' clubs as well. Nobody who has the least idea of the importance of our business, should have any objection to paying \$1.50 a year to be a member of the S. A. F. We should have no trouble whatever in making it the strongest commercial horticultural society in the world, able to take care of its members, and by so doing solving many conditions which, at the present time, are very perplexing.

I know it is uphill work. President Wilson, in his last week's speech at Trenton, said: "It takes courage for a handful of men to start a battle." I hope that all of you members of the Florists' Club of Philadelphia will be with me—will be that handful of loyal men to do our best to bring about a larger and more useful National Society, worthy of the great cause it stands for.

ARBORETUM NOTES.

The procession of spring flowers at the Arnold Arboretum is passing along rapidly under the impulse of summer temperature. Prunuses are already past and pyruses are in their prime. While lilacs, dogwoods and honey-suckles are bursting into bloom about two weeks ahead of the average date. The trusses on the lilacs appear to be smaller than usual, but there are plenty of them. The dogwoods have never before been so profusely set with bloom and will make a rare display. Japan quinces, although reported as being winter killed in some places, have flowered as well as ever and about every variety is represented.

A long winding border on the top of the hill contains much of engrossing interest for the progressive horticulturist, for here are all the Wilson collections, some three hundred species from China, three specimens of each, undergoing their test as to character and hardiness. Some of the larger growers such as walnuts and ashes have now been planted in their permanent locations and are making a vigorous growth. Early rhododendrons of several species are now blooming, among them being one low-growing pink-flowered beauty which Mr. Jack got in Korea, and which will be sold by the million, if it ever gets disseminated among the nursery trade.

Sir Herbert Maxwell, a distinguished English horticultural authority, is expected to visit the Arboretum next Sunday.

CARNATION CALIFORNIA GIANT.

The accompanying picture of this huge carnation is from a photograph sent to us by P. W. Popp, gardener for H. Darlington, Mamaroneck, N. Y., who has been testing the variety for the past season. Mr. Popp says that the claims of the introducers as to size, stem and fragrance are fully borne out, every bloom that he has cut measuring at least 5½ inches and some as much as 6¼ inches. He finds it necessary to split the calyx, otherwise the bloom is liable to come one-sided, there being such a mass of petalage to develop. It throws good, strong cuttings, is a gross feeder, has clean, healthy foliage and every shoot produces a flower. He gives further details as follows:

I received my dozen single-stem plants the first week in July last year, pinched once, and planted directly in the bench, August 1st. The plants were very hard when received. The house they were planted in has two benches in the center. The outside bench room is devoted to miscellaneous pot plants, the temperature averaging about 53 degrees at night, 67 to 70 degrees in the day-time. I plant-

ed in well enriched soil with a mixture of broken concrete added, fed occasionally with liquid animal manure, and applied a light dressing of lime occasionally. The support showing in the photograph is 36 inches high, and the blooms show 12 to 20 inches above it. The other varieties growing in the bench are White Enchantress and Princess Charming. Even with the poor start the plants made from six to twelve leads and growing stronger all the time. I had a vase of it at the International Show, showing six blooms, measuring from 5¾ inches to 6¼ inches, with 30-inch stems, but they were damaged from handling before the judges got to them.

My conclusions about this carnation are as follows: Planted in the field in rich ground and kept pinched to induce it to break freely, lifted in September and planted in solid beds in very rich soil with plenty of old concrete or lime rubble, and given a higher temperature than the ordinary varieties of carnations, 56 to 58 degrees, I think that the productive qualities will compare very favorably with the average varieties of carnations as grown today.

TO FLOWER VANDAS.

Editor HORTICULTURE:

Dear Sir: I would very much like to be posted in the culture of vandas. Have two plants, but in six years they have never produced a flower. Roots seem healthy and leaves, too. I keep them in a house with hothouse plants at a temperature of 60 to 65 degrees at night and plenty of moisture. Does this plant need any drying up?—T. N.

Your correspondent does not say what varieties or rather species of vandas he has which do not flower under the treatment given them. Most likely his plants get too much shade, as under such conditions most any vanda ought to flower, providing they

get enough light. Vandas should never be dried up, but during the dull winter months they should be allowed to dry out between each watering. During summer when the plants are growing and rooting freely they enjoy plenty of water at the roots and a hot, moist atmosphere. Shade only enough to prevent the leaves from scorching. Vanda teres can be grown in full sun all the year around, also V. Kimballiana and other terete-leaved varieties. Vanda coerulea likes cooler treatment, such as is given the general run of cattleyas.

M. J. POPE.

A meeting of the Advisory Board was held at which were present all of the Committee, also C. E. Critchell, Cincinnati, and John Young, Secretary of the S. A. F. The general situation regarding the trade exhibit was reviewed and plans laid out whereby the exhibitors in the trade section would be given sufficient space by widening the aisles more than has been done in past exhibitions of this kind. Both the Auditorium and the Coliseum are magnificent large light halls and all the exhibition space will be on the ground floors.

All materials for structural work will be placed in the Coliseum. At no previous convention has there been such favorable opportunities to make displays. In view of the fact that the "outing" day will be the fifth of the convention, it will give the trade people another day for business without having any event to detract the attention.

But the most impressive thing was the wonderful work that had been accomplished by Vice-President Theodore Wirth and others in Minneapolis in conjunction with the outdoor plant exhibition. Adjacent to the Armory,

where the convention will be held, the surroundings of the outdoor exhibit are naturally beautiful, and it behooves the growing interests to give every support to this laudable undertaking, this being the first time when by arrangement the Society is in a position to guarantee the plantsmen that their exhibits will be cared for and grown on under every favorable condition, having the constant attention of competent help who will be under the supervision of Mr. Wirth.

Everything is ready for immediate planting, but as the space is limited, application for same should be made at once to Secretary John Young, who is Superintendent of the Trade Exhibition. He will forward applications immediately to Mr. Wirth. This outdoor plant exhibit will be a success and will be one of the features of future conventions. The price of space is nominal—only sufficient to cover the expense of planting and maintenance of the plants during the season.

Outdoor plant exhibits must be shipped, charges prepaid, to Theodore Wirth, Superintendent of Parks, Minneapolis, Minn.

JOHN YOUNG, Secretary.

Bird's eye View, Garden for Outdoor Plant Exhibits, Minneapolis Convention, Ready for Planting May 3.

Personal

We are sorry to hear that John Barr of South Natick, Mass., is in the hospital for an operation.

Michael McIlveen, a gardener of Brookline, Mass., was overcome by the heat on May 3, while working on a lawn at Mrs. M. S. Blodgett's estate.

Alex. F. Moore, manager for E. G. Asmus & Son, 55 West 26th street, New York, and Miss Mabel C. La Pe, were married April 26th in West Hoboken, N. J.

William C. Rickards is now employed by S. D. Woodruff & Sons, the well-known seedsmen of Dey street, New York, and will immediately start traveling in their interests.

George H. Penson, who has been painfully ill with an abscess in his throat for some weeks, has now nearly recovered and hopes to be able to resume his notes on Fruit and Vegetables Under Glass in our next issue.

Boston visitors: J. Rider, representing J. Blaauw Co., Boskoop, Holland; Robert Greenlaw, representing S. S. Pennock-Meehan Co., Philadelphia; Chas. H. Totty, Madison, N. J.; E. J. Harmon, Portland, Me.; F. R. Pierson, Tarrytown, N. Y.; C. B. Weathered, New York; L. J. Endtz, Boskoop, Holland.

Cincinnati visitors: Mrs. W. H. Gnadinger, Cynthia, Ky.; John A. Evans, Richmond, Ind., and Frank Farney of M. Rice Co., Philadelphia.

CLUB AND SOCIETY NOTES.

The Florists' Club of Philadelphia held their regular monthly meeting on the evening of May 6. It was a rather disappointing meeting with little in it worth reporting at length.

On May 10th and 11th, the Horticultural Society of New York will give an exhibition of spring flowers and plants at the Museum Building in the New York Botanical Garden, Bronx Park.

The inauguration of Dr. Edward T. Fairchild as President of the State College of Agriculture at Durham, N. H., will take place on Wednesday, May 21, at the college. The exercises begin at 11 A. M.

The Horticultural Club of Boston held its last session for the season at the Parker House on Wednesday evening, May 7. During the afternoon the members enjoyed an auto ride through the Boston park system and Arnold Arboretum as guests of Deputy Park Commissioner J. B. Shea. A lunch was served at Mr. Shea's residence in Franklin Park and nothing that hospitality or courtesy could suggest was overlooked by that prince of good fellows. Among the party were: F. R. Pierson, of Tarrytown, N. Y.; and Chas. H. Totty, of Madison, N. J. Jackson Dawson, who has just got out after a serious illness, was taken aboard at his residence and participated in the ride. He was the recipient of many hearty congratulations on his recovery.

MASSACHUSETTS AGRICULTURAL COLLEGE GROUNDS.

The practical advantages and the natural beauty of the site occupied by the Massachusetts Agricultural College have been recognized by everyone from the first foundation of the institution in Amherst. While the soil is fertile and unusually well adapted to farming, it is also rolling and diversified, giving good opportunities for growing a wide range of crops. Moreover, the beauty of the situation has always made it seem most appropriate as a site for college buildings and as an environment for the college life. Many generations of graduates now testify to the inspiring influences of these surroundings. Amherst, in fact, enjoys more than a local reputation for the beauty of its scenery, being widely accepted as a type of what is best in the rolling fertile homely landscape of New England.

The value of this environment, and the importance of its wise development was recognized at the outset, and the late Frederick Law Olmsted, the most eminent landscape gardener of his day, was brought to Amherst in 1866 to advise upon the location of buildings and the planning of the campus. Afterward much was done to beautify the campus, especially by the planting of trees and shrubs and the opening of large lawns. From the start the grounds took on an air of breadth and openness which is still their chief character and charm.

When the Agricultural College, a few years ago, entered on its period of great expansion, it was seen that a re-study of the situation was imperatively needed to provide for the proper location and harmonious arrangement of new buildings, to provide also for the rapidly growing college population and for their enormously multiplying activities, and to provide most of all for the conservatism of the beauty of the grounds in all their charm and influence. A commission was authorized by the trustees which took the matter in charge, and which has now for several years directed the formation of new plans to meet the new conditions. Various studies, some partial and some comprehensive, were made by Professor F. A. Waugh of the Department of Landscape Gardening in the college. Several architects and engineers were consulted. Finally Warren H. Manning of Boston was retained by the trustees, and has now been engaged for a period of more than four years in the preparation of plans and in the practical development of detailed improvements upon the grounds. In this work he has enjoyed the constant co-operation of the Commission of Grounds and of the College Department of Landscape Gardening.

Mr. Manning is everywhere acknowledged to be artistically one of the best representatives now living of the Olmstedian style of landscape gardening—a style which may easily be accepted as the one best adapted to the character of the Massachusetts Agricultural College Estate. Furthermore, Mr. Manning has already been engaged as principal designer or advisory counsel in the planning of a large number of college grounds in all parts of the country. He has also shown a special interest in the public problems of

Massachusetts, the development of her public parks, reservations, road systems, and state institutions generally. Recently, Mr. Manning has submitted to the trustees a general plan for the college estate which has been adopted as the working plan of the college. Mr. Manning has also been retained as landscape designer and advisor, working in connection with the College Department of Landscape Gardening, to carry the new plans forward.

The first feature of the new plan is its provision for an orderly grouping of the college buildings—a matter of the most fundamental importance, and yet one sadly neglected in many public institutions. The buildings used by the various agricultural departments will be placed in a group on the west side of the campus, those used by the horticultural departments will supply the proper antiphony on the east side of the campus, buildings like dormitories and dining hall, devoted to the domestic and social life of the students will be grouped at the southwest side of the campus, and the other buildings are similarly classified and grouped.

The plans provide for keeping the central portions of the campus forever open. The pond is to be preserved and eventually extended. Most of the present trees are to be kept, with only so much pruning and cutting as may be necessary to the health of the trees and the opening of attractive vistas. Other plantings will be made in support of the present groupings. Some new service roads are projected, and a belt of pleasure boulevard is suggested against the possible seeds of a remote future. It has been the policy in making this plan to foresee and provide for all the possible growth of the college in the next fifty years.

The new plan is already in operation; that is, all current improvements are being carried out in accordance with it. The most important of these thus far have been the location of the new entomology, live stock and dairy buildings and the construction of new walks. Other equally important improvements are fully planned in detail and await only the necessary appropriations by the legislature.

Fortunately, Mr. Manning's services have not been confined to one plan, with the expectation that his activities shall end there. It is understood that he is to become a permanent member of the college staff, acting as professional advisor to the trustees in the further development of the college estate, and co-operating also with the other members of the Landscape Gardening Department both in working out the necessary detailed plans of the grounds and in developing the highest possible standard of professional instruction for the students in that department.

With such a splendid campus on which to work, with such well-matured plans, with such competent professional oversight, and with a well-organized Department of Landscape Gardening, constantly engaged in the development of the plans, the Massachusetts Agricultural College may fairly expect to have a physical plant which is not only highly adapted to its multifarious business but which is also "a thing of beauty and a joy forever."

PRIMULA MALACOIDES.

By early sowing this charming subject can be flowered for Christmas but by far the best results are obtained by late sowing and having the plants at their best around Easter.

With a little care and forethought *P. malacoides* is very easy to grow. In order to have plants for next Easter seeds may be sown during the latter part of May. A light sandy soil is the best medium in which to sow. Give the pan or flats, whatever are used, ample drainage in the form of crocks and coarse soil, so as to prevent the seed bed becoming sour. Place in a temperature of 60 degrees, cover with glass and a sheet of newspaper until germination takes place. The covering should then be removed, but care should be taken to protect the young seedlings from bright sunlight for a few days. When large enough to handle they should be pricked out into flats, using a compost of two parts loam, one part leaf soil and sand. Place in a cool house and shade for a day or two until the roots get active when they should be given all the light possible.

A cool house is indispensable for this plant, a night temperature of 40 to 45 degrees suiting it better than 48 degrees. The writer well remembers being pushed for room, and after potting some of these plants into 2½-inch, placed them on a shelf in a Killarney house. Their resentment of this treatment was, however, soon apparent by the yellow cast and wilted condition of the leaves.

As soon as the plants are large enough for 2½-inch, pot them off, and continue to pot them on as they fill the pots with roots. For these later shifts a compost similar to that used for pricking them off into may be used with the addition of some well-rotted or pulverized sheep or cattle manure. The writer has used the latter with excellent results.

About the end of November the flower spikes will begin to show. If first quality plants are required, feeding should be commenced now and continued right along, for being a robust grower this primula will stand twice as much as other members of its family in the way of stimulants. Liquid manure is the best all-around fertilizer. This with an occasional dose of clear soot water, and an application of evergreen manure, will produce plants carrying spikes with five and six whorls of flowers.

Some disappointment has been expressed that this primula damps off so easily. The remedy for this lies to a great extent with the grower. For one thing the plants may have been sown too early. Careless watering, too, is the cause of many a failure. Never spray overhead and water so as to avoid wetting the crown of the plants for damping off is invariably the result of this. Going over the plants every week or so and picking off any decaying foliage and moving the pots around so as to provide a free circulation of air will do much to mitigate the damping off problem.

By following the foregoing suggestions plants which are things of beauty can be produced.

HENRY GIBSON.

Staatsburg, N. Y.

"Get them at Dreer's"

ALL SEASONABLE PLANTS, SEEDS, BULBS AND SUNDRIES

HARDY PERENNIALS. The most complete collection of varieties and the largest stock in the country. Our Perennial plants have a national reputation, we spare no expense to have them in the best possible shape for the planter. Such varieties that move better when pot grown are prepared in this shape; this does not mean little seedlings, but in the majority of cases the plants were field grown, were dug and potted during the fall and winter months and are of just the right size to give immediate results; they are not to be compared with so called field clumps. Try them and be convinced. See Our Current Wholesale List for Varieties and Prices.

ROSES FOR OUTDOOR PLANTING TO GIVE IMMEDIATE RESULTS. We have three hundred thousand 5 and 6 inch pots, the usual Dreer stock and the style of plants your retail customers are looking for. These are all two year field grown plants which have been potted during the winter months and which were stored in cold houses and frames and which are now in prime condition for out-door planting. The collection is the most up-to-date, including many new varieties not offered by anyone in the trade.

New Hybrid-Tea Rose George Dickson.

Early-flowering Hardy Phlox.

HYBRID TEAS, HYBRID PERPETUALS, TEA AND EVERBLOOMING, RAMBLERS, BABY RAMBLERS, MOSS ROSES, HYBRID SWEET BRIARS, AUSTRIAN BRIARS, WICHURIANA, ETC., ETC. See Our Current Wholesale List for List of Varieties and Prices.

AQUATIC PLANTS—WATER LILIES, NELUMBIUMS, VICTORIAS. Tender and Hardy Aquatics have been a special feature with us for nearly a quarter of a century. Over eight acres of artificial ponds are devoted to their culture. If we can assist you in making plans, or selecting varieties, the services of our expert are at your disposal for the asking.

OUR CURRENT WHOLESALE LIST also describes the following, all of which are handled as Specialties:

DECORATIVE PLANTS, PALMS, FERNS, PANDANUS, BAY TREES, BOXWOODS, DRACAENAS, etc., etc.

HARDY SHRUBS, HARDY VINES, HARDY CLIMBERS, RHODODENDRONS, AZALEAS, etc.

BULBS, DAHLIAS, TUBEROUS ROOTED BEGONIAS, GLADIOLUS, GLOXINIAS, FANCY LEAVED CALADIUMS, CANNAS, etc., etc.

Boddington's Quality Cannas

Are true to name, have two to three good eyes, are well cured, sound and dormant, and give absolute satisfaction. Our sales last year were nearly 700,000, and not an overgrown kick. The Canna crop this year, however, is very short, and we advise placing orders early to secure stock. Delivery can be made at purchaser's option. Remember, you may deduct 5% if cash accompanies the order.

ARTHUR T. BODDINGTON

SEEDSMAN

342 West 14th St., NEW YORK CITY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. N. Page, Des Moines, Ia.; 1st vice-president, Harry L. Holmes, Harrisburg, Pa.; 2nd vice-president, Arthur B. Clark, Milford, Conn.; secretary and treasurer, C. E. Kendel, Cleveland, O.; assistant secretary, J. M. Ford, Ravenna, O. Next convention at Cleveland, Ohio, June 24-25, 1913.

A Tribute to Frank T. Emerson.

In the death of Frank T. Emerson there has passed to the great beyond one who was for many years a conspicuous figure in the seed trade of this country. Mr. Emerson was an enthusiast in the work of his chosen business, and in the broad expansive meaning of the term. He resembled in many respects a philanthropic, resourceful physician, a lover of his fellow men, who gives them freely of his experiments and experiences.

The seed trade telegraphic code was mainly Mr. Emerson's work, and represents weeks of time and much painstaking research, and his compensation was thanks. In many other movements for the betterment of the seed trade Mr. Emerson joined most heartily, and was always a most industrious worker. He was not a money grubber; acquisition of the dollar was not his controlling motive. He gave with a generous hand whenever there was need—often beyond his means. He was always optimistic, confident and hopeful of the future. Keen, witty and original, he was a delightful companion and friend.

He had far from lived out the allotted three score years and ten, but just where the shadows begin to lengthen the curtain was rung down. "Will it rise at last upon some fairer, brighter scene? Reason says 'perhaps,' and hope still whispers 'yes.'"

CATALOGUES RECEIVED.

I. N. Kramer & Son, Cedar Rapids, Iowa—General List of Novelties and Leading Standard Seeds. Freely illustrated.

PUBLICATIONS RECEIVED.

Farmers' Bulletin 533, issued by the Department of Agriculture, treats on "Good Seed Potatoes and How to Produce Them." Wm. Stuart, Horticulturist in the Bureau of Plant Industry, is the author. The bulletin contains some very valuable information and statistics and shows convincingly how essential to full success good seed tubers are.

Of Interest to Retail Florists

Providence, R. I.—Wm. B. Hazard
and Neils G. Pierson are the new man-
agers of the flower department of L.
Dimond & Sons, Westminster and
Union streets.

The window of the store of Gude
Bros., Washington, is making a fine
appearance in honor of Horse Show
week, being decorated with numerous
horses show bouquets and a paddock
scene with a saddle hung up on a rus-
tic fence. In the other window is dis-
played the cups to be given the teams
collecting the largest sums of money
in the campaign to collect \$300,000 in
twelve days to be used in the building
of a new Emergency Hospital here.
Mr. Gude is chairman of the commit-
tee of one hundred business men ap-
pointed to gather in that sum of
money.

Henry M. Robinson & Co. announce
the opening this week of their new
headquarters at 2 Winthrop square
and 34 Otis street, Boston. This in-
cludes the entire basement floor under
the new Flower Exchange, the centre
of the Boston flower trade.

HORTICULTURE extends cordial con-
gratulations to these enterprising
young men who, beginning at very foot
of the ladder fifteen years ago, have in
this brief period worked themselves up
to the prominence and influential po-
sition they now occupy in the cut
flower and supply trade of New Eng-
land. Their success is a bright ex-
ample of what brains and persevering
industry well directed can accomplish.

MEMORIAL DAY.

"In time of peace prepare for war," and prepare you must, though you are busy; Memorial Day will not wait for you. Get ready your magnolia and galax wreaths and whatever other tributes you are preparing for this day which is set aside as the appropriate time to decorate the graves of those departed.

It is needless to say that the making up of bouquets and sprays must be put over until the last, but a study of the past few years has revealed the increase of set designs to such an extent that it requires more than a few days to get ready for the rush.

What to make up for this occasion should never worry the retailer, as the grave decorators will buy anything that appeals to them at first sight, so long as it is within their means; the customers with plenty of this world's goods do not study expense so much when it goes for decorating the grave of one beloved.

The experienced florist, having had occasion to cope with Memorial Day business, knows that expensive pieces do not sell as readily as the moderate priced ones, and therefore works accordingly, the average sales amounting to a couple of dollars.

The best show for the least money attracts the public at all times, and there is no larger attraction than a flat design made of magnolia or galax leaves, both of these being profitable, and always giving satisfaction to the purchaser. An attractive wreath can be made with either and decorated with natural flowers and be sold for \$2.50 or \$3.00, leaving a good profit for the florist.

Then the bouquet and cut flower problem confronts the dealer. This is generally overcome by the usual good supply of outdoor stuff that shows up this time of the year. Roses and car-

nations have a tendency to advance, leaving one alternative for the poor person with the lean purse, and that is: usually a bunch of some sort of outdoor stuff to place upon the grave. The trade who limit themselves to the fifty and seventy-five-cent bouquets must be taken care of as well as the big buyers, and with stock on hand to supply their wants, the day can be made a banner one, especially for the florist doing business near cemeteries just outside of large cities.

Shipping flowers out of town is one of the things to be studied carefully, as they must arrive in time for the occasion they were purchased for. The timing of trains, boats, etc., mean a great deal to your customer and The timing of trains, boats, etc., means sale or fail to give it the minutest attention; it may be the means of bringing larger ones later.

MR. STOREMAN.

RETAIL FLORISTS' CLUB.

The Retail Florists' Club of Boston met on Monday night, May 5, at the City Club, where after the usual banquet the business of organization was advanced and discussion was had on topics of immediate interest. The president and two directors of each of the two flower markets were present as invited guests. The principal subject under consideration was the question of how to eliminate the glut that occur in the market from time to time. It is proposed to ask the growers to contribute to the cost of special advertising at such times and to persuade all retailers to help by putting the selling price of the flowers where the public would be induced to buy freely. Meetings will be held on the first Tuesday of each month.

The decoration of the big Pogue store, Cincinnati, was very prettily decorated by the A. Sunderbruch's Sons on the occasion of the former's golden jubilee. In cut flowers yellow roses and yellow snap-dragons were used while the principal plank used were many Boston ferns and vincas.

ROCHESTER NOTES.

The Rochester florists have been somewhat inconvenienced owing to the ice men going on strike. Up to the time of writing, men were busy getting their own supplies and drawing it away in their own wagons.

Mr. and Mrs. Hiram E. Wilson, who have spent the winter in Florida and have recently taken a trip to Panama, have just reached home, having spent a delightful and instructive vacation.

Harry Merritt, of Irondequoit is growing some specially good White Wonder and Delight carnations, with large blossoms and stems measuring nearly four feet long.

George T. Boucher is planning to build two new greenhouses this season. The library which occupied the East avenue part of the store, is to get out in a day or two. He will then occupy the whole floor space, with entrances on East Main street and East avenue. He has placed large orders for palms and ferns with the hope of making his store "one of the finest."

Manistee, Mich.—J. Clarkson succeeds J. Schneider in the florist business here.

PHILADELPHIA NOTES.

Carnations and white roses went up twenty per cent., overnight, May 3rd.

Wm. Henry Maule left for his annual vacation to Europe on the 2nd inst.

Wm. H. Westcott, son of our commodore, is recuperating at Atlantic City after a month in bed. At latest accounts he is progressing favorably.

Abram L. Pennock of Jupiter, Fla., has so far recovered from his accident that he is expected to start North for Pennsylvania on the 10th inst., under special care.

Maurice Fuld addressed the Ridley Park Civic Club on the 6th inst. on how to reduce the high cost of living. His argument, of course, was raise your own truck. That helps Michell but is bad for the automobile industry. The auto people are seriously thinking of putting some kind of tariff on Fuld.

Emil Lieker, Lansdowne, met with a serious accident on the 28th inst., by falling from a loft and striking the motor car as he fell—breaking his shoulder blade. No one was near him at the time but he managed to get to the house before fainting. The arm was four inches out of plumb. Progressing favorably. It's no use talking. The devil is certainly abroad this spring.

Peonies from Indiana and other southern points are already with us in the Philadelphia market (May 1) but nothing extra as to quality and the time for them is not yet. Too early. We fear our local crops will be too early, also, for best financial returns to the growers. It looks as if our Berks Co. friend would come in about right as they are usually two weeks later back there in the mountains.

Mr. Brunswick, of M. Rice Co., thought he had a strike on his hands on Monday. The rattle of footsteps of fifty or more workers down the back stairs at 10.30 A. M. sounded that way. But it turned out on investigation that they were only taking an hour off to see the circus parade. Just think of it! There are some of us so engrossed in business we'd rather go two blocks out of our way than meet a circus parade.

Much commendation is heard on the Rialto over Samuel S. Pennock's address to the Lancaster County Florists' Club. The more the rank and file think of those kind, wise, helpful words, the more they become impressed. And the thought with it—that a better and less antagonistic title might have been used. Co-operative loyalty was really the keynote, and not fault finding—as the title "Faults of the Grower" seemed to indicate.

A Berks County florist writes: "Most

excellent advice to the growers—no dry bones about it; but full of good meat! Although I do not live in Lancaster County, I can hear the noise across the mountains, and profit equally well as if I had been there—thanks to HORTICULTURE which publishes all the really good things. And many thanks to Mr. Pennock for having given us of his ripe and almost unique experience."

Commenting further the same writer says, under date of April 29th: "The recent moist weather followed by a warm week has hastened the peonies and they have come forward rapidly. The officialis section will be past by Memorial Day. With us, Festiva Maxima will be at its height—at least we hope so, for if it is, that will mean some prosperity for us. They are ready now to be disbudded. A sudden drop to freezing would be harmful. Let us hope for the best."

Visitors: George H. Berke and G. A. Klings, Atlantic City, N. J.; Edwin A. Seidewitz, Baltimore, Md.; C. B. Knickman, representing McHutchison & Co., New York City; Wallace R. Pierson, Cromwell, Conn.; Stephen Mortensen, Southampton, Pa.

CHICAGO NOTES.

The growing of gladioli for early spring is not a new custom, but the Mrs. Francis King, grown to very near perfection, is about the only offering in this flower this year. Past experience proved it worse than useless to grow poor varieties.

The affairs of Canger & Bergman are getting into shape and the creditors seem likely to get their bills taken care of soon. Mr. Canger hopes to dispose of his lease and says he will remain with J. Mangel. Victor Bergman is at Bohannon's and Frank Pasternick is with A. L. Randall.

The Cook County Florists' Association extends an invitation to all clubs who wish to do so to join with them in going to the S. A. F. convention in their special train, the Pioneer Limited, over the Chicago, Milwaukee & St. Paul Railroad. Train leaves the Union Station, August 12, at 6.30 P. M. Round trip, \$16.00.

The active work of the publicity campaign in the interests of the florists of Chicago, has begun with a canvass of the city to ascertain how many in the trade are in favor of

street car advertising. Aside from deciding this question it will start the ball a-rolling and other ideas will, no doubt, be brought to light also.

Cupid has made A. Lang's store headquarters recently and there will be a rush of applicants for various positions there. Miss Lillian Ytterberg, cashier, will be married in June to Harry Berg and Miss Gertrude Arnold will become Mrs. Robert L. Renth some time later. Other announcements are expected soon.

A local grower with a genius for utilizing apparently worthless things, grew a crop of buttercups in some old unheated greenhouses. The old-fashioned flowers were consigned to Erne & Klinge, who found ready sale for them. In J. Mangel's window they were seen later made up in nosegays, which form of corsage is again popular, and were so appreciated by the buyers that many more could have been sold.

Personal.

Mr. and Mrs. Frank Oechslin have returned from the East.

Albert Cole, American Beauty man at Amling's, has purchased a retail store at 31st street and Cottage Grove avenue, which Mrs. Cole will manage.

Mrs. C. M. Dickinson is spending a few weeks in St. Louis, Mo., where her son is in school. She is the guest of Mr. Starbuck, who was formerly in the E. H. Hunt office.

A. L. Vaughan is being congratulated by his friends on his return from the Milwaukee Sanitarium, where he has been receiving treatment for rheumatism. Though far from being a well man he is much improved.

Visitors: Gus Rusch, Milwaukee, Wis.; Mr. Loudon, representing Phoenix Nursery Co., Springfield, Ill.

Mrs. C. C. Brawner has purchased the flower business of the Rex Floral Co., at Eugene, Ore.

Flower Market Reports

BOSTON A fair market, all things considered, is the general verdict here this week. White carnations are apparently a short commodity, but how many of them are in storage for the approaching "Mothers' Day" nobody knows. Everything else on the list is either in full supply or overstock. Roses are very good in quality, but are a bit slow to move and Beauties are inclined to accumulate. Lilies are very draggy and so is lily of the valley since the outdoor crop began to arrive. Fortunately, the demand is good, otherwise it would not take long to overload the craft and swamp things on all sides.

With a week of summer-like weather the market has taken a change for the better. The supply has been lighter, mostly on carnations, which really were on the short side for a few days and prices have advanced a notch. There are plenty of roses, among which the Killarney shows the summer effect. Marylands are good, also Kaiserin, Carnot and Richmond, the latter having a good call. Weddings are slightly noticeable and choice white flowers have sold well. Sweet peas continue good and have taken well. There is plenty of greens, except possibly smilax.

CHICAGO A few very warm days has increased the supply of flowers and lowered its general quality causing the counters to fill up rapidly and prices to

lower. Sweet peas accumulated rapidly, the demand not being equal to the supply and only the timely arrival of some very large orders saved the market from a glut. Carnations also are coming in fast, and it is fortunate that a special demand, in the form of Mother's Day, is at hand to move the stock to advantage. Some wholesalers say they have had all the orders for white carnations booked for a week, that they can take care of, and that the trade for that day seems on the increase. All kinds of roses are in good supply and the quality generally is con-

sidered fair. American Beauties are more in excess of the demand than at any previous time since last summer, but the stock contains many that are of poor grade. Lilacs from the South and the home-grown ones are coming together this year with the result that sales are slow. An unusual amount of snapdragons of a superior quality are much in evidence and price has to be cut to move them. Lily of the valley is offered in three grades, the best selling first. Peonies are expected by the 10th.

Flower Market Reports

(Continued from page 721)

CINCINNATI

Last week's market affairs proved as different from those of the week before as day is different from night. In place of the sluggish market of the week before there was a real active one. The call reached practically every line in the market. The supply of roses is large. A good bit of the stock sells at fair prices. Some, however, must be moved at sacrifice prices while a small part hardly realizes these. The reds are selling pretty well. Pink moves slightly better than white while in Beauties the cut of each size is easily adequate. Carnations are now realizing a very good figure, where a week or ten days ago they sold at almost anything the buyer chose to offer. The higher prices are due to a very pronounced shortening of the supply combined with the general good demand. To the lily line, which up to this time has been including callas and Easter lilies, there is now added rubrum lilies. Many outdoor lily of the valley are coming in. Outdoor tulips completes the bulbous line. Both Spanish iris and German iris are arriving in fair quantities. The former finds a very ready sale. Miniature gladioli also sell quickly. Sweet peas are much more plentiful than they were a week ago.

NEW YORK

The heavy receipts of material of every kind, from outdoor and indoor sources, continues unabated and the accumulations are moved with difficulty and on a "wagon load" basis of prices as a rule. Selling prices on small lots of most staples remain about stationary, but carnations have shown considerable fluctuation, values going down to a very low figure last week and recovering nicely this week, with a very bullish tendency as Mothers' Day draws near. This, of course, is largely confined to the white varieties, however. There is no cause to find fault with the quality of stock as a rule, for it is uniformly good. There are some pretty poor lilies coming in from careless growers, and American Beauty roses don't average up as well as they should.

PHILADELPHIA

April 28 to May 3 proved a good week in the wholesale trade here. Prices kept firm all along the line and there was very little surplus. On some lines quotations advanced considerably. This

was especially the case in white carnations—and the colored varieties also responded in sympathy, although to a lesser degree. The leaders in carnations at present are Perfection, White Wonder, and White Enchantress in whites. In other colors Beacon and Enchantress are showing the effects of the warm weather, but Gloriosa and Winsor are fine. Victory is very fine, also, and good judges say this old variety can still be grown at a profit. Roses were on the scarce side until the latter part of the week, when the bright and abnormally warm days brought them in with a rush. Nearly all the growers sent in double cuts on Saturday after the temperature went up to 80 and 85 for two or three days. There seems to be a fair amount of gardenias and orchids on hand—enough for all demands. Sweet peas are of excellent quality and are moving well. The gladiolus market is quite lively, the "baby" varieties being now supplemented by some of the earlier of the large-flowering sorts, particularly Crawford's May. Southern peonies are to be seen in limited quantity. Other good outdoor items are the blue German iris, bridal wreath (S. Thunbergi), and Deutzia gracilis.

ROCHESTER

The past week's business, both wholesale and retail, has not been up to normal. We are now having intensely hot weather for the early part of May, which is bringing on the stock quicker than we really wish, with the result that the market is fairly

glutted with tulips and hyacinths—their quality being poor and blossoms soft. Counter trade has been slack until Saturday, when most of the stores advertised specials and did a good business. We cannot give anything but praise for the stock, as it arrives in first-class condition. American Beauties bring fair prices and other roses are all favorites, and are used constantly for corsage work. Sweet peas are good and a larger demand is noticed. Baby gladioli are here again, as well as a fair supply of snapdragons. Carnations were never finer. Daisies, pansies, mignonette, lily of the valley, callas, cattleyas and a few gardenias make up our usual stock of flowers. Asparagus is a little scarce, but other greens are very plentiful.

ST. LOUIS

The market was very much overcrowded during the past week and the demand was not strong enough to consume the supply that came in daily. All stock is of extra fine quality. Outdoor peonies and Cape jessamines are expected this week.

WASHINGTON

Stock is not quite so plentiful as it has been and what is coming in is being cleaned up well. The Horse Show last week called for the supply of many table decorations, corsage bouquets, etc., adding quite a little to the usual business. Among the new varieties seen during the past week are Spencer sweet peas, dahlias.
